PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 3, 1909.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1909

From the 3rd April next till further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 27th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that all papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

No. 335 of 1902.—John Edward Cooper. *An improved construction in connection with the anti-friction mechanism of the axle shafts of railway carriages and other vehicles.* (From 31 March 1909 to 31 March 1910.)

No. 363 of 1902.—Robert Stewart Carmichael, James Henri Carmichael and Frederic Robert Carmichael. *Improvements in processes for oiling and finishing textile materials.* (From 31 March 1909 to 31 March 1910.)

No. 19 of 1903.—Fredrick George Creed and William Arthur Coulson. *Improvements in or relating to telegraphic apparatus.* (From 21 May 1909 to 21 May 1910.)

No. 80 of 1903.—Walter Lamont and David Kinloch Michie. *Improvements in and relating to tea drying machines.* (From 6 May 1909 to 6 May 1910.)

No. 381 of 1903.—George Westinghouse. *Improvements in steam turbines.* (From 28 April 1909 to 28 April 1910.)

No. 418 of 1903.—John Glennie Holbourns and Henry Alexander Longhurst. *Improvements in machines for the assembly of type matrices and the casting of linotypes therefrom.* (From 19 May 1909 to 19 May 1910.)

No. 358 of 1904.—John Alston Hart. *Improvements in apparatus for use in ventilating with conditioned, or filtered, cooled, or warmed, and moistened air.* (From 12 April 1909 to 12 April 1910.)

No. 385 of 1904.—Illius Augustus Timmis. *Improvements in the construction of bogies for vehicles which run on rails.* (From 11 April 1909 to 11 April 1910.)

No. 114 of 1905.—Walter Lamont and David Kinloch Michie. *Improvements in and relating to tea drying machines.* (From 1 May 1909 to 1 May 1910.)

No. 200 of 1905.—George Henry Oatway and Charles Edward May. *Improvements in fire alarms.* (From 16 January 1910 to 16 January 1911.)

No. 1301 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 446 of 1903.—Ernest Conway Gayar. *Improvements in automatic couplings for railway vehicles and the like.* (Specification filed 23 December 1904.)

No. 506 of 1903.—John Mackay. *Improvements in pianos.* (Specification filed 21 December 1904.)

No. 216 of 1904.—Gerhard Ditmar. *Improvements in fastenings for lantern glasses.* (Specification filed 20 December 1904.)

No. 221 of 1904.—William Kingsland. *Improvements in or connected with ratchet-operated electric switches.* (Specification filed 23 December 1904.)

No. 228 of 1904.—Karl Fredrik Elers. *Improvements in current collecting devices for electric generators and motors.* (Specification filed 23 December 1904.)

No. 476 of 1904.—Arthur Elliott Johnstone. *Improvements in and relating to liquid fuel burners.* (Specification filed 23 December 1904.)

No. 499 of 1904.—The Lamp Manufacturing Company, Limited. *Improvements in overhead regenerative gas lamps.* (Specification filed 23 December 1904.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 200 of 1903.—John Henry Elspass. *Improvements in pulverizing mills.* (Specification filed 21 December 1903.)

No. 204 of 1903.—Robert Chamberlin Hislop and Wyatt Webber. *Economising solder used for soldering the joints on tins.* (Specification filed 23 December 1903.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of R50 for each of the above inventions.

No. 216 of 1897.—Eugen Hornung and Stefan Hansel. *Improvements in the treatment of india-rubber, guttapercha and their compositions.* (Specification filed 20 December 1897.)

Fee in respect of the continuance of an exclusive privilege—

4 (*h*) After the expiration of the tenth year and before the expiration of the eleventh year from the date of the filing of the specification—

The sum of R100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905, 1906, 1907 and 1908, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified: or if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. A new and revised edition is now on sale. Royal 8vo volumes, paper cover, price one rupee or 1*s*. 6*d*. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

A copy of the Bill, which it is proposed to introduce to amend the law relating to the protection of Inventions and Designs, together with a statement of objects and reasons and notes on clauses, has been placed in the visitors' room of the Patents Office for inspection. Copies, price one rupee, may be obtained on application to the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

F. E. DEMPSTER,
for Director General of Telegraphs.

YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 7th and 8th June 1909, at 10-30 A.M., both days :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)	100	50
Dictation (spelling, punctuation, etc.)	100	50
Arithmetic (the whole)	240	160
Mensuration (*a*) (the whole)	60	30
Book-keeping (*b*) mercantile	100	50
TOTAL	600	...

Minimum required in all papers collectively, 400.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Hall and Hamilton.
"Book-keeping," by double and single entry, by W. Inglis (Chambers' Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted, either at the College, or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed ; but the officer who will conduct the examination may make his own arrangements, in regard to the *place* and *hour* of examination, with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is not already in pensionable service he will be eligible only for appointment to the non-pensionable establishment on State Railways.

*This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch; but none will be returned:—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth) not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's handwriting.

NOTE.—A candidate already in Government service should, in like manner submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of application of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts, in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants, and over 25 years of age, are allowed to appear at the examination at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College not later than 30 days previous to the examination: the application to be accompanied by the fee of Rupees ten.

B. HEATON,
Principal, Civil Engineering College.

LIST OF NEW BOOKS FOR SALE AT THOMASON COLLEGE, ROORKEE WHICH WERE NOT ADVERTISED BEFORE.

Roorkee Treatise "on Railways," 4th Edition. Revised by F. Wolly Dod, F.C.H. Price R3 per copy.

Roorkee Treatise on "Irrigation Work." By Lieutenant-Colonel J. Clibborn, C.S.I. B.A., L.C.E., C.I.E. Price R9 per copy.

Roorkee Treatise on "Sanitary Engineering." Compiled by Lieutenant-Colonel J. Clibborn, I.S.C., B.A., L.C.E., C.I.E. Price R4-8 per copy.

Roorkee Manual of "Applied Mechanics," Volume II. The stability of structures mostly by graphic methods. By Lieutenant-Colonel J. H. C. Harrison, R.E. Price R8-2 per copy.

Roorkee Manual of Hydraulics. Price per copy R4 (No. XIX) Elementary Treatise. By E. F. Tipple, Esq., B.A.

Designs for Wooden Bridges, together with rules for calculating the area of waterway, etc., and Plates. By late Rai Bahadur Kunhya Lall. Price per set R4-2.

Pamphlet on Examination for Acid Radicals: Tables giving Analysis of Acids. Price per copy 8*a*.

Pamphlet on Examination for Acid Bases: Tables giving Analysis of Metallic Bases. Price 8*a*. per copy.

Military Works Handbook, 4th Edition. Price R4.

A LIST OF NEW BOOKS AND PERIODICALS FOR SALE AT THE LIBRARY OF THE ASIATIC SOCIETY OF BENGAL, 57, PARK STREET, CALCUTTA.

SOCIETY'S PUBLICATIONS.

Journal and Proceedings, Vol. 4, Nos. 4 to 7 at R2 each.

Memoirs, Vol. 2, No. 7, "The Fastness of the Indigneous Dyes of Bengal." By E. R. Watson, at As. 12 each.

BIBLIOTHECA INDICA.

Godadhar Poddhati Acharasar, Vol. 2, Fasc. 3. By Pundit Sadasiva Misra, at As. 10 each.

Godadhar Poddhati Acharasar, Vol. 2, Fasc. 4. By Pundit Sadasiva Misra, at R1-4 each.

Nityacara Pradiph, Vol. 2, Fasc. 1. By Pundit Binoda Behary Bhattacharjee, at As. 10 each.

Qawaninu's-Sayyad. By Lieut.-Col. D. C. Phillott, at R5 each.

Catapatha Brahmana, Vol. 6, Fasc. 2. By Acharya Satyabrata Sawasrami, at R1-4 each.

Catapatha Brahmana, Vol. 6, Fasc. 3. By Acharya Satyabrata Sawasrami at As. 10 each.

Vidhana Parijata, Vol. 2, Fasc. 3. By Pundit Taraprasanna Vidyaratna at R1-4.

Gobhilya Grihya Sutra, Vol. 2, Fasc. 2. By Mohamohapadhyaya Chandra Kanta Tarkalanker, at R1-4 each.

Chaturvarga Cintamoni, Vol. 4, Fasc. 7. By Pundit Pramath Nath Tarkabhusana, at R1-4 each.

Mohabhusyapradopoddyata, Vol. 3, Fasc. 8. By Pundit Balmvallab Sastri, at As. 10 each.

Clokavartika, Eng., Fasc. 7. By Pundit Ganganath Jha, at R1-4 each.

Bandhyastotrasangraha, Vol. 1. By Dr. Satis Chandra Vidyabhusana, at R2 each.

LIST OF PUBLICATIONS ISSUED BY THE METEOROLOGICAL DEPARTMENT FROM 1ST OCTOBER 1908. TO 31ST MARCH 1909.

Monthly Weather Review, April to September 1908. (Illustrated by 7 plates.) Quarto. Paper cover. R1 per month.

Annual Summary of the Monthly Weather Review, 1907. (Illustated by 6 plates.) Quarto. Paper cover. R3.

Memoirs of the Indian Meteorological Department, Vol. XX, Part V. By R. L. I. Jones, Esq., M.A. (Illustrated by 6 plates.) Quarto. Paper cover. R1.

Memoirs of the Indian Meteorological Department, Vol. XX, Part VI. By Dr. G. T. Walker, M.A., Sc.D., F.R.S. Quarto. Paper cover. R1.

Memoirs of the Indian Meteorological Department, Vol. XX, Part VII. By J. H. Field, Esq., M.A. (Illustrated by 6 plates.) Quarto. Paper cover. R1.

Memoirs of the Indian Meteorological Department, Vol. XVIII, Part II. By Sir John Eliot, M.A., F.R.S., K.C.I.E., (Illustrated by 30 plates.) Quarto. Paper cover. R2.

INSOLVENCY CASE NO. 4 OF 1909.

In the matter of the application of Charles William Lafrenais residing in St. John's Church Road to be adjudged an insolvent.

It is hereby notified under section 12, sub-section 2, of the Provincial Insolvency Act III of 1907 that an application filed by the above petitioner for being adjudicated an insolvent has been admitted in this Court and that it will be heard on 7th April 1909.

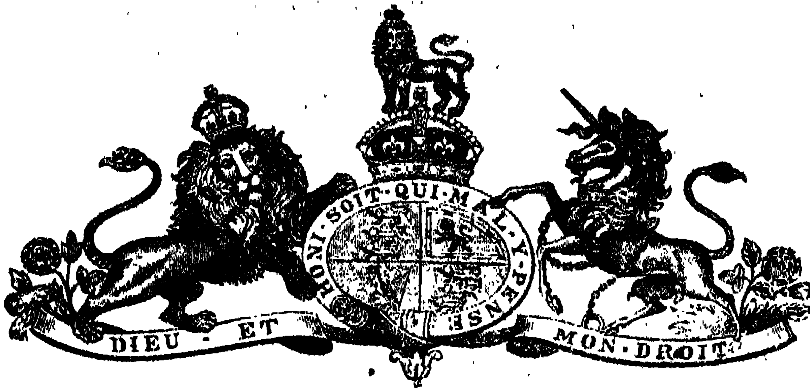
A. RAMAYA PUNJA,
District Judge.

BANGALORE,
The 12th March 1909.

UNCOVENANTED SERVICE FAMILY PENSION FUND.

NOTICE.

Notice is hereby given that in pursuance of a requisition of twelve qualified subscribers to the Uncovenanted Service Family Pension Fund (resident in England) a special meeting of the subscribers to the Fund will be held in the Town Hall on Saturday, the 12th June 1909, at 3 P.M., to consider the advisability of referring again to the general body of subscribers the revision and amendment of the proviso added to Rule 54 by circular No. 1 of the 10th April 1907



Under the above proviso every subscriber's share of surplus at the commencement on each year was restricted to an amount not exceeding his registered annual subscription, any surplus in excess of this limit being held over for addition to the surplus to be distributed in the following year, instead of being available for refund to the subscriber concerned in cash or for enhancement of the pension assured.

The requisitionists propose that the above proviso be repealed in view to a reversion to the practice of treating excess surplus as available for refund in cash or for enhancement of the pension assured

Subscribers who cannot attend the above meeting have the right to vote by proxy, the votes to be valid should be stamped with a one-anna stamp and registered in this office not later than the 9th June 1909.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., C. 67, AND 55 & 56 VICT., C. 14).

The Council met at Government House, Calcutta, on Monday, the 29th March 1909.

PRESENT:

His Excellency the Earl of Minto, P.C., G.C.M.G., G.M.S.I., G.M.I.E., Viceroy and Governor General of India, *presiding*.
His Honour Sir Edward Norman Baker, K.C.S.I., Lieutenant-Governor of Bengal.
His Excellency General Viscount Kitchener of Khartoum, G.C.B., O.M., G.C.M.G., G.C.I.E., Commander-in-Chief in India.
The Hon'ble Sir H. Erle Richards, K.C.S.I., K.C.
The Hon'ble Major-General C. H Scott, C.B., R.A.
The Hon'ble Sir Harvey Adamson, Kt., C.S.I.
The Hon'ble Mr. J. O. Miller, C.S.I.
The Hon'ble Mr. W. L. Harvey, C.I.E.
The Hon'ble Sir G. F. Wilson, K.C.B., K.C.M.G.
The Hon'ble Mr. Gopal Krishna Gokhale, C.I.E.
The Hon'ble Mr. A. A. Apcar, C.S.I.
The Hon'ble Maung Bah Too, C.I.E., K.S.M.
The Hon'ble Mr. W. W. Drew.
The Hon'ble Nawab Saiyid Muhammad Sahib Bahadur.
The Hon'ble Raja Sir Muhammad Ali Muhammad Khan, K.C.I.E., Khan Bahadur, of Mahmudabad.
The Hon'ble Mr. N. C. Macleod.

[*Mr. Holms.*]

The Hon'ble Mr. J. Andrew.
The Hon'ble Mr. Maneckjee Byramjee Dadabhoy.
The Hon'ble Mr. F. A. Slacke, C.S.I.
The Hon'ble Mr. J. M. Holms, C.S.I.

MISCELLANEOUS.

The Hon'ble SIR HARVEY ADAMSON laid on the table the list * of Muhammadan religious and charitable endowments and trusts under Government management in the different provinces, as asked for by the Hon'ble Nawab Saiyid Muhammad at the meeting of the Legislative Council on 26th February 1909, and the statement † showing the cost of special Commissions of Enquiry as asked for by the Hon'ble Sir Khwaja Salimulla at the meeting of the Legislative Council on 5th February 1909.

DISCUSSION OF THE FINANCIAL STATEMENT FOR 1909-1910.

The Hon'ble MR. HOLMS said :—"My Lord, the few remarks which I have to make concern the terms of the revised financial settlement with the United Provinces which have recently been announced.

"My predecessors have not been backward in urging on the Government of India the claims of the United Provinces to the enjoyment of a larger share of the revenues raised therein, and the Council will, I think, admit that the result of the present revision is sufficient justification for their importunity. The last settlement was entered into in 1904, but it was soon found that the provision made for the needs of the Province was entirely inadequate. The Province had been starved in the past, and no allowance was made in the settlement for the large expansion of expenditure which was needed to satisfy its legitimate claims.

"The settlement has now come under revision. In the revision it has been recognised that the principle of basing the settlement on recent actuals may fairly be departed from, when otherwise the result would be the perpetuation of an inadequate standard of expenditure. This principle is no doubt one of the main bulwarks of the keeper of the public purse, but like most principles it has its exceptions. Among the satisfactory features of the new settlement these may be noticed; the larger share under certain heads of growing revenues now placed at the disposal of the Province, the smaller proportion which the non-elastic item of fixed assignment now bears to the whole income, and the guarantees given by the Government of India to ensure the stability of land-revenue and of irrigation receipts.

"I am to express the gratitude of the Government of the United Provinces for the liberality and fairness with which the question has been treated by the Government of India and for the arrangements which they were willing to make. These arrangements, however, have been subjected to modification in certain respects. It is true that, since the settlement has been under discussion, the Imperial Government have found themselves in more disturbed financial waters, and no exception need be taken to the postponement of the allotments for certain reforms until these reforms are on the eve of being carried out.

"The provision in the scale of expenditure of three lakhs for the upkeep of the new Medical College at Lucknow and the hospital to be attached thereto has been reduced to two lakhs for the hospital only. It was originally intended to provide the remaining lakh for the Medical College from Provincial funds, but the famine has entirely altered the financial position, and the full provision made might well have been allowed to stand.

"But the most important matter to which I would refer is the question of an initial grant. Under the operation of the rules regarding the debit of famine

* Appendix I.
† Appendix II.

[*Mr. Holms.*]

charges the considerable balance of nearly 56 lakhs, which we had in hand two years ago, has been completely wiped out, and we are left at the beginning of the coming year with the ordinary minimum balance of 20 lakhs which has been restored, plus an amount which is earmarked for a particular purpose. It is true that this amount has been entered in the budget as a lump assignment in connection with the revision of the Provincial settlement, but this classification does not alter the fact that it is set apart for the building of the new hospital to be attached to the Medical College at Lucknow, and that it will not be available for the general needs of the administration. The grant of an initial assignment for general purposes is the ordinary accompaniment of a financial settlement, and is designed, I understand, to enable a province to meet the unavoidable demands on its resources not provided for in the settlement, until the Provincial items of income have had time to expand. The United Provinces, which have worked for several years on a settlement less favourable than that of most other provinces, and which have been crippled by a severe and widespread famine, appear to have special claims to liberality in this respect. Financial straits may not allow of such a grant at present, but when the sky clears it is hoped that the Imperial Government will see its way to allow to the Local Government the equivalent of what might have been given as a grant with which to start the new arrangements fairly on their way.

"In the budget before the Council it has not been found possible to provide for any large grants to Provincial Governments in aid of administrative developments. But there are two matters of importance to the United Provinces which I desire to mention.

"In view of the admitted backwardness of the Province in the matter of education, provision has been made in the settlement for an increase of six lakhs in the Provincial expenditure under this head. This amount is not earmarked for any particular reforms, but is to be used for the general improvement of education. It is urged that this addition is wholly insufficient to carry out the scheme which has been worked out for the furtherance of secondary education involving the provincialisation of high schools, in addition to other urgent reforms of pressing importance. The improvements which the Local Government desires to introduce in secondary education are estimated to cost over 10 lakhs a year net, and in addition at least one lakh a year is needed for female education. Defects both in respect of buildings and equipment and in the quality of the teaching in secondary schools are prominent in the United Provinces, where the scale of expenditure on education is below the standard of other Provinces. Even when the effects of the famine are over and the Provincial finances are restored to equilibrium, it is clear that whatever the additional expenditure may be, which the Province can afford to devote to education, it will be fully utilized in meeting the normal expansion of educational charges, and cannot be reckoned on to meet the cost of the larger schemes which have been worked out in the endeavour to bring the Province into line with the rest of India. It is to be regretted that the present financial position renders it unlikely that any further subvention from Imperial revenues will be made in the near future in aid of educational expenditure in the United Provinces.

"So in the important matter of technical education the Province is for the most part dependent on the Imperial Government for funds. A scheme to foster industrial development, mainly by providing facilities for technical education, has been matured and is before that Government. The scheme can be introduced on a capital expenditure of 15 lakhs and a recurring grant of 4½ lakhs a year. No provision for this has been made in the revised settlement, but an assurance has been given that the question of assistance from Imperial funds will be considered without awaiting the schemes in other provinces which may not yet be ripe for submission. It is hoped that, when the financial clouds clear away, the Government of India may be able to give a substantial subsidy towards the vigorous prosecution of the policy of industrial development, in which the public have displayed the keenest interest.

[*Mr. Holms; Mr. Slacke; Mr. Dadabhoy.*]

"In conclusion, I have to congratulate the Hon'ble the Finance Member on the decision to frame his budget for the ensuing year without resort to increased taxation."

The Hon'ble MR. SLACKE said:—"My Lord, while respectfully conveying to Your Excellency the gratitude of the Province to which I belong for the timely assistance that Your Excellency has given to its finances, I venture to bring to the notice of Your Excellency that in the course of the present and the preceding two years the Government of Bengal has had from their own resources apart from any Imperial allotments to meet an expenditure of 48 lakhs of rupees on charges that were quite unforeseen, while in the current year the loss under Land Revenue, Excise and Stamps as compared with the estimates, a loss due to a bad season, exceeded 5 lakhs. In the case of the Police, additional accommodation and increases in subordinate and menial establishments, supplies and services and contingencies account for 6½ lakhs, grain compensation amounted to 23¾ lakhs, famine relief 9¾ lakhs, and the proceedings undertaken in connection with the outbreak of anarchism and sedition required 8 lakhs.

"My reason for enumerating these facts is the hope that should the coming rains break favourably and be well distributed and should the political aspect improve, the Government of Bengal may be at liberty to approach Your Excellency's Government for further financial assistance, and that such application will be sympathetically received and generously treated."

The Hon'ble MR. DADABHOY said:—"My Lord, an adversity Budget with a prospective deficit for capital requirements of £6,406,100 (not taking into account the heavy balance of the sterling loan of 7½ million pounds floated in January last), proposed to be made up by borrowings both here and in England to the extent of over six crores of rupees and the reduction of the cash balances by £2,339,400, naturally would disconcert a Finance Minister who has only recently come to office. It discloses an alarming state of agricultural and commercial depression with an element of uncertainty that might in the end upset the financial calculations for the coming year. Estimates are, as the Hon'ble Sir Guy Fleetwood Wilson pithily puts it, 'largely a gamble in rain.' It will be unwise therefore to count too much on the budgeted surplus; all we can hope for is that the forecast may prove true. But alongside of this darkness of the doleful account there is an agreeable feature; the Hon'ble Finance Minister is to be congratulated upon his wise policy of economy and retrenchment. The public will feel grateful to him for it. He can justly claim credit for 'strict economy' which 'is the main feature of the Budget.' He regretted in Council it had fallen to his lot in the first year of office to prepare a budget involving a sharp curtailment in expenditure. For the causes leading up to that result he has our genuine sympathy; in the policy itself there is ground more for felicitation than commiseration. My Lord, the people need a Finance Minister who so thoroughly realises the great need of Indian finance, 'close economy. The avoidance of an increase in the burdens of the people—which was just an imminent possibility—is likewise a point in Sir Guy Fleetwood Wilson's favour. Far better we should progress slowly without additional taxation than that a heavy programme of work should be taken in hand at the sacrifice of the poor Indian taxpayer. The Hon'ble Member will have the satisfaction to know his policy is appreciated by the people, and he has the support of the Indian public in his financial scheme. If he is disposed to respond more fully to the wishes of the Indian community, more liberal and expansive grants for Sanitation, Irrigation, and Education—Primary and Secondary, Commercial, Technical, and Industrial—and a substantial reduction in the Railway and Military expenditure will become necessary.

"It was expected the subject of high prices would receive proper treatment at the hands of an economist of Sir Guy Fleetwood Wilson's experience and reputation. My Lord, abnormal prices still rule in the market, causing acute distress to thousands of families. The position cannot surely be viewed

[*Mr. Dadabhoy.*]

with indifference by Government. A patriarchal Government especially has serious responsibilities in the matter. People have been taught to look up to it for almost every mundane advantage, and it will not do now to wait for the operation of economic laws for a restoration of the *status quo.* I believe, and I am supported by the opinions of a large number of people who ought to know, that the evil is, to a large extent at least, amenable to administrative treatment. But before the remedy can be applied the causes must be thoroughly sifted, and that is just an inquiry which can with advantage be undertaken only by Government. My Lord, much time has already been lost, and further delay will not only leave the people helpless in the face of a growing evil of incalculable potentialities for mischief, but will most effectively cause widespread discontent and, consequentially, unrest. The complex nature of the subject apparently accounts for the indecision of Government, whereas in my humble opinion, it should have impelled it to energetic action. It is because the subject is complex that an inquiry by Government has become necessary. A simple fact does not require elaborate examination. The thing lies on the surface; the cause is obvious; the solution is plain; the way is clear. But not so in a matter dependent upon a complex variety of conditions, including international commercial operations. That must be the subject of Government inquiry, and the sooner it is undertaken the better for both Government and the people. An authoritative pronouncement on the causes and the solution of the difficulty will remove much of the popular misapprehensions, fix the limits of the responsibility of Government, and prepare the ground for the application of the proper remedy. It is therefore in the best interests as much of the Government as of the people that an inquiry by a Commission is demanded with such persistence. I fervently hope Government will now make up its mind and appoint, to ensure full and independent investigation and to secure popular confidence, a Joint Committee of Inquiry of officials and non-officials.

"My Lord, the rise in prices which causes so much distress throughout India would not have been so disconcerting an element in national calculation were this, as it should have been before now, a great manufacturing country like England, Germany, or Austria. The quantum of prices has nothing intrinsically wrong about it, and, as must be obvious, the mischief arises only from the poverty of the people. The aim, therefore, of wise administration must be to increase by all legitimate means the financial ability of the citizen, not only by the removal of artificial and preventible causes of the appreciation in values, but by the induction of at least a proportionate increase in wages. My Lord, a good deal is heard in India about recurrent famines. It is an endless tale of woe and suffering. There is hardly a year in which some part or other of the vast Peninsula is not affected. I imagine an extensive area like that of our country can never be wholly free from drought and failure of crops. But recognising as I do this fact, I fail to see why the effects of a seasonal calamity should not be considerably minimised, if not completely prevented. My Lord, drought is not an essentially Indian evil, but famine has unfortunately come to be; and yet it is a long step from drought to famine. The position thus offers a problem with which British statesmanship must seriously grapple and solve. But beyond the preparation of a creditable Famine Code that statesmanship has not been productive of much good so far. The energy of Government seems to have spent itself in the narrow channels of the details of Famine relief. Government has not gone to the root of the matter yet; little has been done to increase either the staying power of the people or the food-supply of the country. Millions of acres of land now lying waste can be converted into smiling fields by the inauguration of well-devised systems of drainage and irrigation. The larger the area under cultivation the lesser the risk of suffering from drought. The contingency is unlikely that there should be drought all over the continent at the same time. There are weird tracts, my Lord, with great potentialities of fertility, which can be turned into thriving villages of contented cultivators and industrious artisans under a judicious system of inland emigration. Parts of the country, again, which appear too inhospitable for the agriculturist ought to be, and can be made into,

[*Mr. Dadabhoy.*]

hives of small industries, ensuring plenty to the artisan and peace to the land. My Lord, I believe that the time has come when Government should encourage by every legitimate means in its power inland emigration and discourage exodus to distant and unsympathetic colonies, the more so since it feels itself powerless to protect Indian emigrants from maltreatment at the hands of selfish and exclusive colonists. Here within India there is ample room for all Indians. And not only that: the country requires the assistance of all her sons in the work of development.

"My Lord, Government must not be slow to take full advantage of the great industrial awakening of India. The inquiry is fruitless as to how the existing industrial prostration of a country once enjoying a world-wide reputation for the excellence of her manufactures came about. The fact is there somehow, and we must settle our programme of action in full recognition of it. Fortunately the darkness of the night is past, and the streaks of dawn illuminate the horizon. The people have awakened. A wholesome change has come over their ideas, thoughts and spirit. Government should foster this new spirit, and guide the industrial activity of the nation into profitable channels. My Lord, it would be unkind to say Government does not recognise its responsibility in the matter. I am aware it has already given evidence of its deep concern for the industrial progress of India by the creation of a special department for the regulation of Commerce and Industry. That department has now been in existence for some years, but the results have not been quite commensurate with the high expectations of the public. Possibly the time is too brief; possibly the department has had its attention too much engrossed by large schemes to care much for small industries which must be introduced far and wide to effect a real improvement in the condition of the people. But the department is now in charge of an officer fitted alike by his experience, versatility and resourcefulness to give a healthy direction to its operations. It is needless to remind the Hon'ble Mr. Harvey that big concerns, owned and managed by Joint Stock Companies, with lakhs of rupees at their back mostly imported from foreign countries, the bulk of the profits which must go out of the country, will in the end only swell the ranks of operatives, aye prosperous, but operatives all the same. They will not improve the lot of the nation. Exploitation with foreign capital is, I know, an attractive idea, but, on analysis, will be found to be productive of only a modicum of good. For a real amelioration in the condition of Indians the industries must be in their hands, owned and worked by them. In any other contingency the national asset will be precious little. It may be argued it is open to Indians to come into the field and by their merit win the race. But that is hardly fair or practical. The competition is unequal and highly disadvantageous to Indians. For them industrial enterprise on European lines is a novel venture, the strangeness of which is calculated to repress enthusiasm and induce timidity. We lack expert knowledge, experience, guidance, facilities, and unlocked capital. Suitable markets for the sale of manufactures even are not known to us, and from the necessities of the position, we are hopelessly behind the European manufacturer in respect of facilities for international commercial operations. To cap all, the fiscal policy of this Government being dependent upon that of the United Kingdom, at times it entails hardships and disadvantages which, without helping much the English manufacturer, seriously handicaps the Indian manufacturer in his competition with manufacturers of other countries.

"My Lord, with Government help much might be done to improve the present unsatisfactory condition. Some of the measures necessary for industrial progress must emanate from Government. The first step necessary is to ensure the dissemination of expert knowledge by the establishment at suitable centres of properly equipped Technological Colleges with branches in the interior. Institutes for the impartation of commercial education are equally urgent. The cost, large though it may be, must be incurred in the interests of the nation, and the sooner it is done the better. No expenditure could be more reproductive in the long run than

[*Mr. Dadabhoy.*]

money spent on the industrial and commercial training of the people. The institutions lately started by Government must be admitted to be wholly insufficient for national training in either of those departments of knowledge. A comprehensive and thorough-going scheme is urgently required. The results of the small efforts hitherto made will provide data at once inadequate and unreliable for any future pronouncement about the utility or otherwise of an expansive system of special training. Industrial scholarships, tenable at large centres of industrial activity, will prove a valuable aid to industrial education. While I gratefully acknowledge the action taken by Government in this behalf, I cannot but regret that they are not more numerous and more comprehensive as regards subjects of study.

"In the industrial development of the country Government help in other directions is not only desirable, but imperatively necessary. Facilities for the sale of indigenous manufactures should be provided, and they should be preferentially purchased by Government, if only to encourage production. Circulars, reports and resolutions have not been wanting giving evidence of the Government's desire to buy articles made in India, but it may be doubted if all that could be done in this respect has been done.

"In the present infant stage of Indian manufactures a judicious protective tariff is the *sine qua non* of progress. They must be protected against unrestricted foreign competition by some sort of prohibitive tariff. My Lord, the use of the handicap is not unknown in races, and why should it be impossible in a race upon the result of which depends the economic fate of a whole nation? The West has not attained to its present industrial development without State help of this kind. Monopoly and protection played an important part in that progress. India is in a more helpless condition today than the West ever was, and the need here for protection in the initial stages is *à fortiori* all the greater. We must have *fair* competition first and *free* competition afterwards.

"There are industries again which by reason of the exceptional difficulties and the uncertainties of profits at the inception may require a greater sponsorial attention, and should be supported with bounties. Here, as in the case of technical, industrial and commercial education, the cost, however large, will only be an investment, yielding an ample return in national prosperity and contentment and the eradication from the land of famine, sedition, and anarchy.

"Reduction in railway freight, my Lord, is another prime necessity for healthy economic progress. The existing scales of freights are a fruitful source of annoyance and trouble. They hamper trade and place artificial difficulties in the way of inland traders in their competition with consignors from foreign countries whose merchandise is brought here over seas at a considerably lesser cost.

"Bulletins issued by the Department of Commerce and Industry, containing elaborate information about industries, machinery, and markets should be very helpful to progress. The disinclination of the Indian capitalist to invest in sound and profitable concerns is to a large extent due to want of precise and reliable information about their financial prospects, the amount of capital necessary, the machinery to be used, and the firms which supply it. This information the Department of Commerce and Industry ought to supply from time to time and circulate freely among the people.

"Government will also be pleased to note the educative influence of Exhibitions, and much can be done in that line by proper encouragement to organisers. The phenomenal success of the Exhibition recently held at Nagpur—principally due to the indefatigable energy and the whole-hearted support of the Hon'ble Mr. Craddock—should be a fillip to local leaders and heads of Provincial Governments.

"Every effort should further be made, every inducement offered, for the remunerative employment of Indian capital. I do not believe in 'the hoarded wealth' of India. That is a myth. But there is some capital in the hands of big men which might with profit be employed to support industrial concerns,

[*Mr. Dadabhoy.*]

and the objective of official action should be to set free this locked up capital. A hint from Government will go a great way to give a healthy direction to investment. I do not know what official encouragement will not do in India. The people are hardly responsive to any other stimulus.

"My Lord, notwithstanding its admitted utility, necessity, and commercial success, Irrigation, it pains me to point out, has not received up to now a liberal treatment at the hands of Government. Even the modest recommendations of the Irrigation Commission have not been worked up to; the annual allotments have fallen short of the average, with the net result of a total shortage of 228 lakhs of rupees on four years' working. And when Government is moved for an additional grant sufficient to cover the accumulated arrears, the prayer is refused on the score of impracticability. 'The money could not be spent!' That may be a satisfactory reason from the official point of view, but is singularly unconvincing in view of the extra lavish expenditure sanctioned for the Army and Public Works of at least doubtful utility and urgency. The issues are simple enough: Is the outlay recommended by the Irrigation Commission going to be undertaken, and if so, when is the shortage of past years going to be made up? The decision on the first issue is, happily, no longer a matter of conjecture or debate. The affirmative resolution of Government settles it once for all. The second issue only awaits decision. And in this connection it will be well to bear in mind that arrears are as troublesome an element in Government finance as in private finance, and have a tendency to elude settlement. It is always an unwise policy to allow them to creep into the accounts, and the danger is aggravated where, as in the case of this Government, expenses have a normal tendency to swallow up the income, be this ever so large. Government is almost always more or less troubled for ways and means; its financial difficulties are perennial; hundred things crop up to checkmate its operations. Is it prudent to allow arrears to accumulate in such circumstances? If Government experiences such difficulty in settling a small arrear of 228 lakhs of rupees, what ground for hope is there that it will be in a position to pay off the arrears once they grow and accumulate to larger proportions? The present carries the future in its womb; and if there are elements of prospective trouble in the former, how can they be eliminated from the latter? Even for the next year the allotment is less than the annual average, and that in spite of the enactment by Parliament of special legislation for a maximum loan of £20,000,000 for railway and irrigation purposes. Where is then the guarantee that the arrears will be reduced in the near future, and that the total amount of expenditure recommended by the Irrigation Commission will be incurred within the twenty-year limit?

"And yet, my Lord, there are few countries where irrigation is so very necessary, so pregnant with possibilities for the prosperity of the people as India. Millions upon millions of acres of arid soil, vast expanses of scrub and wilderness, miles of waste and jungle meet one's eyes on all sides, the bulk of which with judicious irrigation can be made to yield food for the millions of the country. The comparative neglect in this matter of irrigation has impressed even foreigners. The following passage from an article on Indian Irrigation by the American statesman, Mr. Bryan, headed 'Money for an Army, none for Irrigation', published in the *New York Sun* in 1907, contains a strong criticism of the Government policy:—

'There are now large tracts of useless land that might be brought under cultivation if the irrigation system were extended. 'Proof of this is to be found in the fact that the Government of India has already approved of extensions which, when made, will protect 7,000,000 acres and irrigate 3,000,000 acres.................... ..*Ten per cent. of the Army Expenditure* applied to irrigation would complete the system within five years, but instead of military expenses being reduced, the army appropriation was increased more than $10,000,000 (Rs. 3,00,00,000) between 1904 and 1905.'

"My Lord, they are doing great things in the United States of America. Besides other projects, in the Western States alone works now in progress will cost 15 crores of rupees. Even in a country of infinitely lesser resources, Egypt, the Assouan Dam stands pre-eminently high among the great Irrigation

[*Mr. Dadabhoy.*]

Works of the world. But in India, with an annual revenue of over 100 crores of rupees, money cannot be found for working up to the modest limit of 220 lakhs of rupees a year, even though Irrigation works pay a handsome profit of over 8 per cent., because, forsooth, what with an ever-increasing Military Expenditure, the Home Charges, the ordinary needs of a complex system of administration, and the expenditure entailed by the adoption of a vigorous Railway programme, the financial capacity of the Government is wofully crippled!

"My Lord, I have heard it said that the Engineering Staff of the Government is inadequate for the execution of an elaborate scheme of irrigation. Supposing it is, the solution of the difficulty is simple. Large works can be done through contractors of established reputation for business capacity. The great Assouan Dam was constructed by a body of contractors, Messrs. Aird and Co. The suggested change in the system of work will afford appreciable relief to the Government, besides ensuring despatch. Is the hope extravagant, my Lord, that Government will yet see its way to carry through the Irrigation programme approved by the Irrigation Commission with energy and spirit?

"My Lord, Government has no money for the vigorous prosecution of a proper irrigation policy, but is extraordinarily liberal in its outlay on Railways. In spite of universal protest from the people, in spite of the financial straits of Government, money on a lavish scale must be spent on railways; credit premised, there could be no difficulty for funds And hence it is that even in an adversity Budget the allotment for railway expenditure is kept up at the high figure of the current year. And the bulk of this amount is going to be raised by sterling loans under the new East India Loans Act, a contingency by itself of sufficiently grave import to Indian finance. In judging of these figures, it should be remembered that down to December last our total Railway Debt, according to the statement made by Mr. Buchanan in Parliament, stood at £176,600,000 out of a total of £2[illegible]6,000,000. But the figures need not appal any one. That is all, in the official language, *productive debt*! Government makes profit out of the business! That was the observation made by His Honour Sir Edward Baker in the course of the Budget Debate of 1907, on Mr. Chitnavis's sound suggestion for working the railways by private companies:—

'Our railways do not now impose any burden whatever on Indian revenues, but, on the contrary, afford considerable relief to the taxpayer. Why it should be suggested on financial grounds that we should hand them over to private enterprise I am unable to understand.'

"It would almost seem as if fifty years of Crown rule had failed to divest the Government of the commercial character impressed upon it by the East India Company. My Lord, there are many enterprises which are calculated to prove commercially successful. An extension of the principle underlying the present solicitude for railways would justify Government in undertaking some of these as likely to afford relief to the taxpayer. But would it be contended Government ought to? Besides, what is after all the net gain to Government? It is in prosperous years, as pointed out on that occasion by Mr. Chitnavis, about one per cent. upon the Capital charge! It was much more according to the Finance Minister. The contention was that the net surplus was 'the excess after deducting all charges for interest and annuities' and did not therefore provide a basis for calculation of profit. But in commercial calculations of net profit the interest charge upon capital has to be deducted, and more. The allowance for depreciation and renewal of block is pretty heavy; this is absent from the Government accounts. The net surplus can alone supply a correct basis of calculation of net profit Applying this test, the railways must be taken to have worked during the year at a loss. Indeed, the Hon'ble Finance Minister admits that in the Budget. The receipts have fallen off by 3½ crores of rupees, while the working expenses have increased by two crores, *i.e.* a total loss of 5½ crores of rupees in one year, a sufficiently alarming aspect of Railway finance that might well call for a halt in further extension.

[*Mr. Dadabhoy.*]

" But be the railways ever so successful from a commercial point of view, what is the urgent necessity, what the hurry for a vigorous railway programme? At the end of October last the total mileage of open railways was 30,384. Is that length really so very small for ordinary purposes? One would rather think it was enough. But 'financiers, traders, and Chambers of Commerce' are claimant and their voice prevails. There is the Report of the Railway Commission, recommending 'very strongly a much more energetic railway programme, the reorganisation of the Railway Department in India, and more liberal expenditure of capital on railways'; and, unlike the Report of the Irrigation Commission, it commands the ready assent of Government. Surely a vigorous railway programme is not wanted by the people. But supposing the need for expansion and better equipment of the Indian railways is urgent, it can be best met by private companies and syndicates rather than by Government. Government need not act the sponsor longer. If the railways are a financial success, there cannot be a dearth of capitalists to finance them. The time has admittedly come when the development of the system must be left to private companies. That is the view taken by Sir Henry Kimber, M.P., Chairman of the Board of Directors of the South Indian Railway, in his thoughtful article on 'The Future of Indian Railway Finance' in the *Financial Review of Reviews* of December last. The Mackay Committee, too, recommended the transference of some of the State railways to private companies on judicious terms. I fail to understand, my Lord, why Government, in spite of such weighty opinion, should cling to the old policy of godfathering railway enterprise in India, especially when it impedes development simultaneously with being a fruitful source of trouble to Indian finance. The suggested transference of execution and management will be decidedly conducive alike to economy and progress; the investment of capital will only be circumscribed by the limitations of the money market; and Government, as appellate authority, will have splendid opportunities of enforcing up-to-dateness and excellence in management.

" Two other points demand serious consideration: the better equipment of existing lines for which 'three-fourths or four-fifths' of the capital to be borrowed in England is required ought to be done out of the revenue; and if in the past provision had been made annually and a portion of the revenue had been set apart for this purpose, as is done by all respectable companies, instead of utilising the whole revenue to swell the profits, much of the present embarrassment of Government could have been avoided. I hope, my Lord, this point will receive proper consideration in future accounts. The larger employment of Indian labour on the railways cannot but have a wholesome influence on railway finance. Labour can hardly be said to be employed now with an eye to economy.

"My Lord, the complaint is not new that the Military Expenditure of this country is ruinous to a degree. With the advancement of years, settlement of frontier difficulties, the prostration of Russia after the Russo-Japanese War and the promotion of international alliances, one should have expected the expenditure to go down rather than increase, but the fact is otherwise. The expenditure in the current year is £20,754,400 against £15,029,800 spent in 1899-1900. The increase has been over 33 per cent. in ten years! This large increase has been justified on grounds of efficiency and economy. The outlay, in this theory, is a fee wisely paid for the insurance of the Empire against danger, and will be found really economical in the long run. My Lord, without seeking to subject to profane criticism a policy the details and the merits of which must be especially within the knowledge of the inner circle, several points may be laid before Government for earnest consideration. The insurance is clearly abnormally expensive, the fee paid being fully 28¼ per cent. of the annual revenue! Such a lavish expenditure is hardly consistent with sound finance. And yet the cost shown in the annual Budget does not represent the whole expenditure incurred. Much of the transport work is done by the Imperial Service Troops. This cost as also the cost of the Military Police and the strategic railways are not shown in the accounts.

[*Mr. Dadabhoy.*]

"My Lord, efficiency is a thing singularly incapable of definition. Military authorities are by no means agreed about the utility and the urgency of the Army Reorganisation Scheme. It is difficult to prophesy what the future verdict will be. We have the high authority of Your Excellency for the conclusion that much of the expenditure of preceding periods was so much waste of money. Be that as it may, I have abundant faith in Lord Kitchener's wisdom and far-sightedness. It would be sheer ingratitude to either deny or minimise the brilliant services he has rendered to the Empire. But the Indian Army is much too large compared with the armies of other countries. Is such a large army maintained anywhere else on a peace footing? Sir Charles Dilke, the reverse of an idealist, recently condemned the strength of the army with convincing force:—

'Why was the Indian Army kept up on an extravagant scale as compared with that which England could afford in this richer part of the world, and which was altogether out of proportion to that which she dared to ask the Crown Colonies to contribute? Why should there be a two to one different scale between Ceylon and India?'

"If it be the case that the Indian Army is intended to serve the purposes of an Imperial Reserve, common fairness would demand the payment of a substantial Imperial contribution towards its upkeep. But far from affording relief to the Indian taxpayer, the Imperial Government has proceeded, in the vigorous words of Sir Charles Dilke,

'in the teeth of all the evidence that had previously been produced, against the protests of the Government of India, to increase a charge already indefensible, a charge which we dare not put upon any other portion of the Empire, and appeared to be the deliberate creation, behind the back of Parliament, and without the knowledge of the people of India until it was done, of a new and fresh grievance which might easily have been avoided.'

"My Lord, the whole of this Romer Committee business is indefensible. It is true where the receipts and disbursements are calculated in crores of rupees the additional charge of 45 lakhs might not strike one as particularly ruinous; but the unfairness, the injustice, and the breach of compact involved are too great and too palpable to reconcile public feeling to it. The Welby Commission, after protracted inquiry, laid down once for all definite principles for the adjustment of accounts between the Imperial Government and this Government. Was it open to the Secretary of State, or for the matter of that the Cabinet, to undo the work of that Commission, to resile from the position assigned to the Imperial Government by it, and to create fresh financial obligations for this country? The report of that Commission may have been before the Committee for aught we know. The questions are, was it duly considered? If any of its decisions was modified, on what grounds, with what justification and under what authority was it done? If the matter is so plain, so reasonable, so just, why such reluctance to publish the papers? It will be difficult to resist the inference that the papers, if published, would unfold a tale of melancholy injustice. If anything is in the public interest, the publication of the report manifestly is, and the suggestion it would not be is clearly unsound. The worst feature of the business is that once the Welby Commission Report is disregarded, India is relegated to its former position of utter helplessness against the exactions of the Imperial Government, and one might shudder to think what might yet be in store for us.

"My Lord, the Hon'ble Sir Guy Fleetwood Wilson has explained the differentiation in the treatment of Crown Colonies. Without for the moment disputing the soundness of the position, it may be open to the people to urge that an arrangement which proves so eminently satisfactory to those Colonies from a financial point of view ought to be extended to India in supersession of the present arrangement which leaves her so hopelessly dependent upon the will and power of the Imperial Government.

"My Lord, all praise is due to Government for the generous Scheme of Reform, the *magnum opus* of British statesmanship. The Despatch of the Secretary of State of 27th November last was like a gospel of peace to disturbed

[*Mr. Dadabhoy.*]

India, and had at once the effect of soothing the public mind, of inspiring hope for the future, of restoring trust in British statesmanship, British justice, and British sympathy with popular aspirations, of removing discontent, and of rallying round Government the great Indian Constitutional Party, who have ever been its strongest supporters and powerful interpreters to the masses of its benevolent intentions. My Lord, much has been heard of late of this discontent; it has been requisitioned in controversy in justification of their respective views by diametrically opposite schools of political thinkers, from the most uncompromising repressionist to the most liberal and sympathetic statesman. It would be affectation to deny there is, or to be more precise there was, discontent in the land. But discontent among Indians—the mildest, the simplest, the most loyal and law-abiding, the most easily satisfied people in the world—affords food for reflection to the far-sighted statesman. It proves the existence of legitimate grievances, at any rate of unsatisfied desires and aspirations. But British statesmanship has proved equal to the occasion. Government has now dealt a death-blow to anarchism, not by repression, but by liberal political concessions; it must in course of time die of inanition. The publication of the Reform Scheme for the first time during the last three years gave incontrovertible proof of the continuance of that solicitude for the goodwill and the advancement of the people which has ever been associated with British rule in India. Naturally despair was dispelled, confidence was restored, the national heart leaped with joy at the sight of the glorious dawn of a new and brilliant future. Hence the unprecedented jubilation. The voice of discontent is stilled, rancour is drowned in joy. It would be a pity, my Lord, if anything supervenes to check this outburst of national joy. But nothing is better calculated to produce this unhappy result than the action since taken by British statesmen. The introduction of the principle of class representation on the basis of the fancied importance of Mahomedans has at once taken away the chief merit of the Scheme, and given umbrage to the great non-Moslem communities of India. My Lord, I am not a Hindu; I am under no personal obligations to the Hindu; I do not hold his brief; I bear no animosity to the Mahomedan. My remarks are grounded only upon my conceptions of the political necessities of the situation. And I shall be wanting in duty if I do not say that I fail to see the justice and the wisdom of Lord Morley's concessions to Mahomedan demands. Religion is widely apart from politics, and once the religious element is eliminated from the discussion, I do not understand how Hindu interests are opposed to Mahomedan interests in politics. I shall be glad to know what these so-called Mahomedan interests are. I cannot conceive them. It is a mistake to suppose that the bulk of the Indian Mahomedans are separated from their Hindu congeners by any sharp cleavage of race and tradition. In their present backward state they cannot have better representatives than Hindus. Where there are deserving Mahomedans they have as good a chance as Hindus. In Municipalities, Local Boards, District Boards and the Legislative Councils, Hindus and Mahomedans have so far worked hand in hand and shoulder to shoulder in cordial co-operation; there has never been any complaint on the score of ineffective representation, and never any demand for separate election. Even now Mahomedan opinion is by no means unanimous on the point. Why then should this wholly novel and invidious principle of election be introduced into the Reform Scheme, in supersession of a method which has so far produced excellent results, and in disregard of the fact that ample provision was made in the Scheme for the adequate representation of minorities? And what would be the result? Separate representation in all stages must be productive of considerable heartburning among the different communities who constitute the Indian people, will interfere with administrative efficiency, and what is perhaps the greatest of evils, will accentuate and perpetuate racial differences and prevent for all time to come the formation of one united Indian Nation; in other words, will produce results the opposite of what has been the objective of British Indian statesmanship so long.

"My Lord, the question of comparative importance raises important issues and can only be the source of perennial quarrel among the different communities

[*Mr. Dadabhoy.*]

of India. There are communities—the Sikhs, the Rajputs, the Mahrattas—who have each as great a record of past services and past greatness as any in India. The Parsis, about whom such flattering things were said in the House of Lords, and the progressive domiciled Anglo-Indian community are likewise important. Once this contentious and invidious method of representation is accepted, how are the conflicting claims of these various communities going to be settled? If Mahomedans are granted separate representation, with what justice, with what fairness, can the privilege be denied to the other great communities? And where is all this to end in a country like India peopled as it is by a congeries of innumerable sects and races? And is this method practicable? Really this is a step well calculated to damp the popular enthusiasm for the Reform Scheme. Add to this elimination of statutory provision for the creation of Provincial Executive Councils with the resultant prevention of the popularisation of Provincial Administration, and I should not be surprised if the popular feeling oscillated back to the point from which it turned to greet with such genuine enthusiasm the Reform Scheme. That would be a disaster. My Lord, the action of the House of Lords is viewed by the people with keen and bitter disappointment, and some of the reasons advanced by noble lords opposing the measure have caused them great distress. My Lord, the people have just cause to resent their wholesale condemnation on the grounds of unfitness and incapability of impartial and dispassionate criticism in spite of their proved capacity and impartiality in difficult and delicate spheres of action. But they have one consolation: They feel they have in Your Excellency a champion of their cause, who will do all in his power to ensure them a bright future. I hope, too, the Provincial Governments will rise equal to the occasion, and by the weight of their favourable opinion facilitate the reinsertion of the deleted clause in the India Councils Bill. The people attach great importance to it, and nothing will satisfy them except its reinsertion. Mahomedan opinion coincides with Hindu opinion in the demand; the voice of the nation is unanimous. What is the danger, my Lord, in having a clause of that kind? It seeks only to vest a certain discretion in this Government which is absolutely necessary in view of the engrossing work of Parliament and its want of leisure to deal with Indian matters with that promptitude which their importance demands. Government may be trusted to use the discretion with care and proper consideration of local conditions and in consultation with the Local Government concerned. Why then the meaningless opposition to a wholesome provision? The Decentralisation Commission also recommends the reform.

"My Lord, from the generous spirit in which the Reform Scheme has been conceived and the expression of official conviction that we 'shall never again have the combination of a Viceroy and a Secretary of State who are more thoroughly in earnest in their desire to improve Indian Government, and do full justice to all bodies of the Indian population,' one would expect that, with a view to ensure the pursuit in future of the same liberal policy, all the comprehensive reforms should be placed on a firm statutory basis. The policy, my Lord, of leaving important details of administrative reform to be settled by regulations is of doubtful wisdom. Regulations, however high the source, have not the authority, the force, and the permanence of a Parliamentary enactment, and are liable to be rescinded at Executive will. So long as the happy combination continues there need be no fear; but when we have an unsympathetic Executive—by no means an unlikely contingency—the rights and the privileges secured by regulations may be considerably whittled down for no fault of the people. My Lord, not long ago even Her Gracious Majesty Queen Victoria's Proclamation of 1858, stamped as it is with Royal imprimatur and invested with the authority of age, was sought to be explained away in this very Council. What is the guarantee then that mere regulations will command greater respect in future? It will be a wise policy to have all the important concessions so generously proposed to be granted to Indians by the Reform Scheme well and truly laid upon a solid bedrock of legal provision.

"My Lord, in any general scheme of reform provision ought to be made for, what is technically known as, the separation of Judicial and Executive

[*Mr. Dadabhoy; Mr. Andrew.*]

Functions and the appointment of trained lawyers as District and Divisional Judges. My Lord, after the Hon'ble Sir Harvey Adamson's clear pronouncement on the subject in this Council on 27th March 1908, the public expectation ran high, and it looked as if Government had finally made up its mind to introduce the much-needed reform of the separation of the functions. The Hon'ble Member's reply to my question on 5th February last, however, has disappointed hopes. Will it not be wise to push this reform if only with a view to conciliate public opinion? May we hope to have the chance of associating this reform with Your Excellency's honoured name? The wisdom of the other reform will doubtless suggest itself to Your Excellency. It is everyway desirable that the administration of justice in the interior should be in the hands and under the control of trained lawyers. The popularity of Government largely depends upon the administration of justice, and too much care cannot be taken to place it above suspicion and to secure for it popular confidence.

"My Lord, the Government reply to my question about the creation of a Legislative Council for the Provinces I have the honour to represent in this Council is disappointing to a degree. The abandonment of the scheme of Advisory Councils leaves the only alternative of a local Legislative Council for the 'assistance and support of public expression of views on public affairs' which the Hon'ble the Chief Commissioner desires to have. The Hon'ble the Chief Commissioner, in his admirable Note on the Government of India's Reform Proposals, further admitted that a local Legislative Council was demanded by 'advanced public opinion.' Why then should the proposal not find favour with Government? The measure cannot surely be productive of harm. Your Excellency will pardon the freedom of their representative if he takes the liberty to point out that the people of the Central Provinces and Berar have been left in the cold shade of neglect in the Reform Scheme. In the bountiful shower of gifts they only have been overlooked. Even the right of election enjoyed by the other Provinces has been denied to them. When all Indians elect their own representatives to the Legislative Councils they alone must remain satisfied with nomination. Surely the Central Provinces and Berar have sufficient enlightenment and public spirit to deserve this right? May not they then expect the concession? The bigger Municipalities and District Councils, at any rate, can be expected to soundly exercise the right.

"My Lord, the first step in the Reform programme has already been taken by the appointment of an Indian to the Executive Council of the Government of India. We hail with pride and joy this announcement, and I take this opportunity of expressing the country's gratitude to Your Excellency on this appointment. I congratulate the Government of India on the excellence of its choice, and I also offer the nation's greetings to the recipient of the honour for the noble sacrifice he has made to serve his country.

"All told, my Lord, the year has been one of steady progress. Trouble and tribulation, anarchy and repression, punitive police and drastic legislation, secret plottings and deportations have darkened the sky; the ship has tossed and lurched in the storm; but the captain has been vigilant all through; the port is at last within sight. And when the history of the past three years comes to be written, Your Excellency will occupy the foremost place in it as a statesman who, with a heritage of trouble and difficulty that might well daunt lesser spirits, with vision unclouded by passion or prejudice, with rare courage, through good report and evil report, has worked unweariedly for the good of the millions placed in his charge, and by wise and timely concessions has consolidated the foundations of the Empire and fixed it firm on the affections of a grateful nation."

The Hon'ble Mr. ANDREW said:—"My Lord, while I regret the necessity which compels the Hon'ble the Finance Member to adopt a policy of retrenchment I must refer with gratification to the fact that the Government of India in fixing the Madras estimates for 1909-1910 have not made any material alterations in the Budget submitted. I learn with satisfaction that Madras will

[*Mr. Andrew.*]

realize a surplus in this year of general financial depression, but I note with some concern the remark in the Financial Statement (paragraph 142) that the Provincial balance is considered ample. It is true, my Lord, that the current year is expected to close with a balance of 114 lakhs, and this is due in large measure to that tradition of economy and careful management which the Hon'ble the late Finance Member in the last Budget debate said had long characterized Madras administration, and which has led to caution in embarking on promising schemes, involving considerable initial and recurring expenditure until such arrangements could be made as would ensure in the long run the fullest regard to efficiency and economy. My Lord, though the balance is comparatively large, the Government of Madras foresee no lack of works and schemes of permanent utility upon which to expend it, not forgetting that in utilizing balances they have to be careful to select objects which will not entail recurring expenditure beyond their normal resources. The development of agricultural, industrial and technical education, and of reforms in the Forest and other departments will impose contingent charges for which it will be necessary to draw largely upon the balances. The high prices of food-grains have necessitated the grant of compensation to Government servants which in the current financial year will amount to about 12 lakhs under Provincial heads alone, and this drain upon the balances may have to be continued in the coming year longer than was anticipated.

"My Lord, last year the Hon'ble the then Finance Member held out hopes of relief to the Bengal Government, on the return of favourable times, in respect of grain compensation, in consideration of the facts that no provision was made for it in the Provincial settlement and that it amounted to 9 lakhs, and I trust that the Hon'ble the present Member may see his way to holding out like hopes to Madras which also has, I think, claims in each of these respects.

"I would urge, my Lord, that expenditure of this sort, in so far as it may be considered the result of famine, should be met out of the annual assignments made to Local Governments under the arrangements detailed in paragraphs 48 to 57 of the Financial Statement for 1907-1908.

"May I express the earnest hope, my Lord, that early orders may be passed soon on the scheme for the revision and redistribution of District and Divisional charges, a reform which is urgently called for in the interest of efficient administration? The report of the Decentralisation Commission and the reform proposals now under discussion will shortly result in an enormous addition to the labours of district and other officers who were already in need of relief when Mr. Meyer formulated his proposals some years ago.

"I should like to draw Your Lordship's attention to the unsatisfactory position in which District Boards in the Madras Presidency stand in regard to Railway enterprise. Up to the present over 150 miles of railway have been constructed by these Boards at a cost of over 70 lakhs; and the Railway Cess levied in ten districts under Madras Act VI of 1900 has accumulated to an amount sufficient to construct 60 or 70 miles, while the annual revenue arising from the incidence of the tax would suffice to raise in the open market a capital sufficient to construct about 200 miles of railway. Besides this, the Tanjore District Board—described by the late Viceroy as the pioneer of local railway enterprise in India—sets aside annually a large proportion of the net earnings of its railway for the purpose of further construction, and if this practice is pursued, as it doubtless will be, by other Boards when the lines projected by them are earning surplus profits, they will be in a position to raise further capital for other branch lines. The money thus accumulating cannot be diverted to other purposes, and District Boards are anxious to proceed with the work of railway construction but are discouraged by the decision of the Secretary of State that lines constructed from loans obtained by a Local Board from Government fall under the Imperial programme of railway construction.

"My Lord, it is hopeless to expect any steady progress in lines of the class contemplated if Local Boards are subject to the restrictions imposed by the

[*Mr. Andrew; Mr. Macleod.*]

Secretary of State as they are by their nature of secondary importance from the Imperial point of view, though of the greatest importance locally. As an instance I may mention the Bezwada-Masulipatam line which was constructed by means of a loan from the Provincial Loan Account just before the Secretary of State's ruling was issued. This line, which was opened for traffic only a year ago, is already earning 7½ per cent. and is of the greatest benefit to the district, and brings in, I imagine, a considerable amount of traffic to the Madras and Southern Mahratta Railway, while the Provincial Loan Account is making 4 per cent. on the loan. Had this line not been built before the Secretary of State's ruling was issued it would have had to be included in Imperial programme, and its construction would have been deferred in all probability for years to the loss of the district and probably also of the parent line. I would therefore urge, my Lord, that the Secretary of State be moved to modify his ruling in such a way as to permit some small definite loan, say up to 15 lakhs, being made annually from the Provincial Loan Account for the construction of railways by Local Boards without including them in the Imperial programme.

"Another discouragement under which District Boards in Madras labour arises from the difficulty and delay they experience in obtaining satisfactory terms for the construction and working of the projected lines from the South Indian Railway Company. It may be that the interests of a Railway Company would in some instances be better served by postponing indefinitely the construction of a line—however desirable in itself—with a view to its eventually becoming an integral part of its own system, but such a line of action, however reasonable from the point of view of the Company, would not be justifiable in view of the encouragement given to District Boards to tax themselves in order to obtain facilities for railway construction. I would specially mention the case of the Tinnevelly-Tiruchundur Railway, about which negotiations have been proceeding for over 2½ years, and I would press, my Lord, for early and satisfactory settlement of terms between District Boards and the Railway Company."

The Hon'ble MR. MACLEOD said:—"My Lord, while the greater part of the civilized world has been passing through a most serious depression in trade, it was hardly to be expected that in India the revised estimates for the current year should show anything but a deficit. This deficit has unfortunately been increased owing to the fact that the unfavourable conditions which existed in the previous year have had more far-reaching consequences than could have been foreseen when those estimates were framed. On the other hand, duty has been paid this year in Bombay on nearly 20,000 chests of opium in excess of the permissible export so that well over a year's revenue from this source has been received in advance. The Hon'ble Finance Member must therefore be congratulated on having the courage to base his estimates for the coming year on existing sources of revenue without increasing taxation.

"Further, the Financial Statement is calculated to inspire confidence. The Chambers of Commerce will note with satisfaction that Government are intent on building up our stock of gold. A few months ago when the balance of trade set against India and merchants were clamouring for gold it was said that if they had only known they could get what they wanted, they would not have needed to ask for it. It was the fear that they could not get it that dominated the situation. The conversion of the unfortunate 3 per cent. rupee loan must tend to strengthen the credit of Government and again the Chambers of Commerce are to be congratulated on Government having acceded to their request, while it cannot be said that the terms offered to the holders of this loan are unreasonable. The fact that the amount available for Railway development has had to be reduced by 2½ millions below the amount recommended by the Committee on Indian Railway Finance emphasises the necessity for enlisting private enterprise. I cannot quote a higher authority on this question than the Hon'ble Mr. Proctor, who recently in his address as retiring Chairman at the Annual Meeting of the Bombay Chamber of Commerce pointed out [illegible] Government must reap considerable benefit

[*Mr. Macleod; Raja Sir Ali Muhammad Khan.*]

by encouraging local private enterprise; that it would enable feeder lines to be built long before they otherwise would be if they were to take their place in the Government programme; that the construction of these lines would bring more land into cultivation and that by attracting rupee capital Government would so far prevent an increase of the gold indebtedness and would afford the people of this country an opportunity of having a stake in its welfare and development. These arguments seem unanswerable. And while I am dealing with railways I should like to draw the attention of Government to the complaint of the Chairman of the Bombay Chamber of Commerce that they do not know to whom to go for expert information and advice, now that the post of Consulting Engineer to Government has been abolished and apparently the post of Secretary to Government in the Railway Branch as well. Bombay has frequently complained in the past that in spite of the whole-hearted support of the Local Government her claims to be heard on the question of railway development have not been given that consideration to which by reason of her position and trade she is entitled, and so it is to be hoped that the situation will be watched and that if the delay, inconvenience and constant misunderstandings now apprehended by the Chairman of the Chamber are actually caused by this change, a remedy will be found.

"It is satisfactory to note that it is possible to allot in the coming year the full moiety of the Famine Relief and Insurance Grant for expenditure on Protective Works, but the Financial Statement appears to be silent as to how the allotment will be distributed. There must no doubt be degrees of urgency, but the works which are destined to relieve certain districts in the Deccan plateau in which famine is almost chronic deserve very great consideration. I understand that a new system has been devised for these districts which, it is hoped, will induce a more constant demand for water for irrigation from the cultivators and thereby reduce the loss which usually results from protective works when the monsoon rains are plentiful. If this can be done, the greater necessity for allotting sufficient funds for the completion of the Deccan schemes within a reasonable time. Lastly, those persons who have been recently exhibiting a somewhat pardonable curiosity as to the results of the labours of the Stores Committee appointed in 1906 will be gratified to find that directions have been received from the Secretary of State which should prove beneficial to local industries."

The Hon'ble RAJA SIR ALI MUHAMMAD KHAN said:—"My Lord, the anxiety which prevailed as to the character of the budget before it was laid on the table has not been much relieved by its perusal. But I find that deficits are the order of the day all over the world. The revised estimates show a deficit of 5½ crores as against the surplus of 86 lakhs budgetted by the Hon'ble Sir Edward Baker. The causes which have contributed to the financial depression appear to be such as could not have been foreseen and over which Government had no control. I am however glad that the Hon'ble Member for Finance has been able to budget for a modest surplus of 35 lakhs next year and congratulate him on the courageous manner in which he has met the situation as well as on the wisdom of the course which he has followed in not resorting to increased taxation. The shadow of the famine has not disappeared from my province yet and it is always more or less associated with other forms of suffering. In August last we were visited by an epidemic of malarial fever unprecedented in its severity. The epidemic lasted till the end of December and claimed a far heavier toll of human life than any epidemic of plague in previous years, the total number of deaths amounting to over thirteen lakhs. Sir John Hewett, with his characteristic foresight and energy, caused an inquiry to be instituted into the causes of the outbreak; but no satisfactory results have been arrived at yet. So widespread was the epidemic, that agricultural operations came for the time being to a standstill, and when they were resumed the sowing of the spring crops was much delayed. The area sown was comparatively small and owing to the partial failure of the winter rains the outturn of the rabi cannot be estimated at more than 85 per cent. of the normal in the larger part of the provinces, while in the north of

[*Raja Sir Ali Muhammad Khan.*]

Oudh things are much worse. Conditions such as these cannot be deemed favourable to a decrease in the price of food-grains, and the extraordinary disturbance of economic conditions which we have witnessed of late is not likely to disappear at an early date. In reply to a question put by my Hon'ble Colleague Mr. Dadabhoy at the meeting of the 15th January last, with regard to the abnormal rise in prices, the Government were pleased to say that the subject was engaging their careful attention. I am afraid the Hon'ble Member for Finance is too sanguine when he anticipates an appreciable fall in prices as a consequence of 'a favourable agricultural position' as experience has belied such expectations in the past. The question is becoming one of extreme gravity for the middle classes, and though I recognise its complexity, I trust that this consideration alone will not deter the Government from instituting a thorough enquiry. I may mention that His Honour the Lieutenant-Governor of the United Provinces has announced his intention to summon a conference during the monsoon of this year to consider what action can be taken by the Government in connection with the rise in the price of milk and ghee. It is time that the question was made an Imperial one.

"My Lord, I have read with satisfaction paragraphs 43 and 44 of the Financial Statement which announce the decision to abolish the special grant to the army and to restrict the limits of military expenditure. But the present year appears to me to have been most unsuitable for the increase in the pay of the Indian Army. It is true that a slight reduction has been effected in the budgetted expenditure of the current year, but the figures for the next year show an increase of 23 lakhs. So far the expenditure has gone on increasing year after year, as a comparison of the figures which I give below will clearly show:—

	£
1899-1900	16,168,763
1900-1901	16,365,886
1901-1902	17,222,4[illegible]
1902-1903	18,852,283
1903-1904	19,540,667
1904-1905	21,906,377
1905-1906	21,056,411
1906-1907	21,587,103
1907-1908	20,415,787
1908-1909	20,557,700
1909-1910	20,708,200

"It has risen by 13 crores or 28 per cent. during the past 10 years. The need for a retrenchment in this direction has been urged in this Council before by much abler men than myself, but I may be excused for making a reference to a matter which is cognate to the question at issue. I mean the Ecclesiastical charges of the Army. They do not only show a considerable rise during the same period, namely, from 1899 to 1910, but I submit that they need not form a charge on public revenues at all. It seems to me to be opposed to the well-defined principles laid down by Government themselves that they should take no part in matters of religion, be it of the ruling class themselves. If they recognise the obligation to provide facilities of religious worship for the British soldier, the other classes of people represented in the Army have a right to make a similar demand. It is hardly justifiable that any portion of the revenues contributed by people of diverse creeds should be devoted to the spiritual well-being of the British soldier. I think his religious welfare can well be left to Missionary societies instead of being made an item of charge on the general revenues which are already heavily burdened with an excessive and ever-growing military expenditure.

"But I am chiefly concerned with the effect which the present situation has on the finances of my province. They were reduced to a condition verging on bankruptcy, and if the Imperial Government had not come to the rescue of the Local Government by making a special assignment of 41 lakhs to restore the minimum closing balance, the latter would have closed the year with a deficit

[*Raja Sir Ali Muhammad Khan.*]

balance of 21 lakhs. My Lord, I am thankful for the assistance given to the Local Government by the grant of 4 lakhs for Police Reforms. It is also gratifying to learn that the new Provincial settlement has been concluded, but I would respectfully submit that it does not much improve the financial position of the Local Government. The province was parsimoniously treated in the past; the standard of expenditure kept in sight was low and its needs were not fully recognised. The result was that it remained comparatively backward in all respects and there is vast ground to make up in consequence of the policy pursued in the past. The grant of 10 lakhs which has been made to the province is earmarked for the new hospital to be attached to the medical college at Lucknow. There is no initial assignment to enable the Local Government to carry out the much-needed educational and medical reforms. It will be impossible for it to meet the many pressing needs unaided in order to bring up the province to the standard of other advanced provinces unless the Government of India extend their generosity in future as they did this year in order to relieve the stress caused by famine.

"My Lord, it will not be going too far to say that of all the problems which affect the welfare of India, there is none of greater moment (next to its peace) than education, but there are no improvements which are so often relegated to an indefinite future as those connected with it. The Progress Report of Education in India, 1902-1907, which has just been issued is a record of substantial improvement if compared with the period which preceded the quinquennium. It shows a considerable increase in primary schools both in number and strength, but it is admitted that the increase is not proportionate to the demand. A similar tale is told by the report on Public Instruction in the United Provinces for the last year. It records an increase of 172 in the number of primary schools and of 41,847 in that of scholars. 'But speaking generally,' says the report, 'the supply of educational facilities has been unable to keep pace with the demand.' While acknowledging gratefully the efforts which have been made by Government in the expansion of primary education and in raising the level of education in general, I submit that they have proved inadequate. The absence of provision in the next year's budget of the cost of free primary education is apparently to be accounted for by the present state of finances. In my opinion the importance of the task exceeds its magnitude and difficulty, and I earnestly hope that the realisation of the prospect which was held out in 1907 will no longer be delayed when easier financial conditions prevail. As regards secondary education in the United Provinces, it calls for urgent reforms which mean increased expenditure. The schools are generally badly equipped. The furniture, such as there is, is a disgrace to modern carpentry; the apparatus for teaching is insufficient and accommodation inadequate. There is everywhere a cry for new buildings and additional classes. The inefficiency of the teachers is in keeping with the low rate of pay offered to them. The resources of the district boards are severely taxed and yet they cannot find sufficient room for the scholars seeking admission to vernacular schools. The keen interest taken in all forms of education by Sir John Hewett has led to the introduction of certain improvements. Of these the conversion of the High Schools at the head-quarters of the districts into Government Model Schools is a necessity which cannot be long postponed, but the proposal has not been given effect to for want of funds. My Lord, the resources of a provincial Government are limited and even under normal conditions it cannot cope with the demand which is being made upon it now for the spread of education. It will be a sad thing to crush the demand for English education which is growing everywhere through lack of encouragement. There is room for economy in other directions but to effect economy at the cost of education means a check in the moral and material growth of the country. My Lord, when the opportunity comes the grant of additional expenditure for carrying out the improvements in secondary education will be a great boon to the people of the United Provinces, and I strongly hope that their requirements will not be forgotten. I may add here that a great impetus has been given to industrial and technical education in my province by Sir John Hewett. The reluctance which characterised the educated middle classes formerly in availing themselves of the advantages of such education is fast disappearing and

[*Raja Sir Ali Muhammad Khan.*]

commerce and industry are taking a higher place in their estimation. I venture to hope that the proposals for the establishment of a technological institute in the United Provinces when sanctioned by the Secretary of State will receive the financial support of the Government of India. The problem which is staring the Government in the face is that of devising means for the provision of industrial and technical education in the country on a large scale. I sincerely trust that the situation will be faced in a liberal spirit as times permit.

"My Lord, I may be allowed to say one word in regard to railway construction. I believe that Government is not unaware of the fact that a series of collisions occurred during the last year on different railway lines. The most appalling of these accidents took place at Dasna in Meerut District in the beginning of the hot weather. It resulted in an unusually heavy loss of life and property and was the subject of a protracted Government inquiry. The Railway Board came to the finding that it was an 'act of God'. My Lord, if human foresight can avert such dangers without shifting its responsibility to higher powers, I think the fact should not be blinked. The chances of a collision are extremely minimised where there is a double line. In the interest of public safety I would urge the necessity for the doubling of the line on the Oudh and Rohilkhand Railway and would suggest that the work may be included in the programme for raising the standard of the existing railways.

"My Lord, I now come to a subject on which a great deal has been said before and to which I can add nothing new, but my excuse for referring to it is the fact that it threatens to become a standing grievance. I mean the Asiatic difficulty in the Transvaal. Matters have not advanced much since the decision of the Transvaal Government was announced in the House of Commons by the Secretary of State for India on 31st January 1908, in regard to the registration of Indians. The position of the British-Indians in the Transvaal reminds one of the position of Jews in ancient Europe when every attempt was made to extirpate them from the face of that country. The problem with which the Indian Government is confronted is not merely how to reconcile the claims of the Indians as citizens of the Empire to settle in a self-governing colony; but in it is involved the larger and more important issue of the relations of the white to the coloured races in general. The treatment which the Indians are undergoing there is a reflection on the white race and is a source of great irritation to the people of this country. Their recent deportation from South Africa has afforded a fresh cause for excitement. In my humble judgment a thorough overhauling of the whole question of Indian migration into British Colonies is extremely desirable. I would respectfully suggest that as trustees of Indian interests, Your Lordship's Government will keep pressing on His Majesty's Government the necessity for the removal of those restrictions which are debasing to the Indians in the Transvaal and excite feelings of bitter resentment in this country.

"My Lord, speaking at this time last year the Hon'ble Sir Harvey Adamson announced the intention of the Government of India to give a trial to the separation of the judicial and executive functions in the two Bengals. The results of this experiment will be watched with close interest in other parts of the country. I can realise fully the financial difficulties which are in the way; but I hope that the importance of the question will not be lost sight of as soon as the pressure has diminished.

"My Lord, I cannot conclude without a retrospect of the violent unrest which we have lately experienced. There were moments when we seemed to be standing on the brink of a disaster owing to the frequent display of brute force and to the 'arrows that flew in the dark,' probably the work of a misguided few. To uphold the authority of law, to soothe the public mind which was in a state of tension, and, at the same time, to formulate a scheme for constitutional reform, were the trying tasks which befell Your Lordship's Government. Never before has a Government placed under similar circumstances faced so difficult a situation with such a remarkable success. At the commencement of the present session, Your Lordship's Government was forced to resort to coercive legislation. When I supported the Summary Jurisdiction Bill I did

[*Raja Sir Ali Muhammad Khan; Nawab Saiyid Muhammad.*]

not do so merely because it was a measure emanating from Government, but because I was convinced that it did not in any sense indicate a departure from the fixed policy of peace and progress which has characterised Your Lordship's Government. That repression was necessary at the time, later events have fully demonstrated; and that I was not wrong in judging the scope of Government action, is proved by the fact that the new law has not been applied wholesale. The close of the year saw the promulgation of the long-waited reforms which were received with a feeling of intense relief and to quote the words of Lord Morley with 'various degrees of approval'. Harmony is often evolved out of chaos. So the reforms may be said to have brought peace and good will with them. As an Indian member of this Council, I desire to express my deep gratitude for the generous recognition of an extended right of representation and for Your Lordship's benevolent solicitude for the welfare of the country. Opinions may differ as to details; but no one can fail to appreciate the liberal spirit underlying the reform scheme and the new era of possibilities which it bids fair to provide. Destructive criticism in any quarter, at this stage of affairs, cannot but be productive of more harm than good. I hope at least that we have no 'Adullamites' at the present moment in this Council. My Lord, we are entering upon a new and important phase of administration. The best qualities of the head and heart will be called forth on the part of those who have to give practical effect to the proposed reforms as well as on their part who have to prove themselves worthy of higher responsibilities. If the efforts on both sides are sincere, they will be crowned with success. With regard to the deletion of clause 3 of the India Councils Bill by the House of Lords, Your Lordship's Government has justly recognised the necessity for creating Executive Councils in provinces where their existence may be justified by circumstances and the action of Your Lordship's Government in expressing its adherence to the provisions contained in the clause in question has given satisfaction. I take this opportunity of congratulating my countrymen on the appointment of the new Law Member and of thanking the Government for having made a concession to merit. The people of other provinces might well lay this example to heart and strive to come up to the level of educated Bengal. My Lord, I cannot here help asking myself whether political concessions will bridge over 'the tremendous chasm' that separates the rulers from the ruled? If I understand rightly, the superiority of the white to the coloured races consists in the moral uplifting of the latter by the former. It is a noble task, but it cannot be achieved through political machinery alone. It is a healthy sign of the age that the evils of aloofness between Europeans and Indians are being recognized on both sides. But the advances must be mutual. I would ask my countrymen to rise equal to the occasion and would appeal to the ruling class to meet us half-way. If the day ever comes, when racial prejudice has ceased to affect our mental vision; when colour is no longer recognized as the stamp of moral and social inferiority; when the Indian learns to realise that a bond stronger than that of territorial subjection exists between him and his rulers; when official restraint has given way to a free interchange of ideas; when want of confidence is displaced by a better understanding; when the call to duty meets with a true response on one side and real grievances evoke genuine sympathy on the other, it will be the Reform of Reforms."

The Hon'ble NAWAB SAIYID MUHAMMAD said:—"My Lord, the Hon'ble the Finance Member deserves our genuine sympathy in the very difficult task he has been called upon to undertake. He has had to frame what has been called an adversity budget—the first of its kind since 1897-1898. During the decade that has produced what is called prosperity budgets, one sees much unnecessary expenditure and in spite of solid achievement in remission of taxation—with which the name of the Hon'ble Sir Edward Baker will be honourably associated—the feeling has been encouraged to grow up that every budget is bound to bestow largesses, grants and so forth. That, my Lord, is in the highest degree demoralising. 'The ideal of State economy,' as Bastable in his famous work on 'Public Finance' says, 'is, on the contrary, to establish a balance between

[*Nawab Saiyid Muhammad.*]

receipts and expenditure. A State that has very large surpluses is as ill-managed as one with large deficits. The practical rule is to aim at a slight excess of receipts over outlay in order to prevent the chance of a deficit. The position of the State as drawing its resources from the contributions of the several private economies under its charge is the reason for this course of conduct.' That leads me, my Lord, to quote the wise observation of Sir James Wilson that finance is not mere arithmetic, but a great policy. 'Without sound finance, no sound government is possible; without sound government, no sound finance is possible.'

"My Lord, as we are at the beginning of a great era which would undoubtedly tend to strengthen sound government in India let us earnestly trust that we are also going to have sound finance, and I am indeed glad to see indications of sound finance in the rigorous pronouncement of the Hon'ble the Finance Member in favour of retrenchment of expenditure. I sincerely hope this pronouncement is not wrung from the Hon'ble Member simply because he is confronted by a large deficit and that under different conditions he will not lapse into the habit of seeing in increased expenditure an incontrovertible proof of growing prosperity. Addressing this Hon'ble Council in March 1907, I ventured to state: 'The relief to the tax-payer can be but temporary unless the Government enters upon a bold policy of retrenchment. So that the reduction of revenue which we anticipate may be met without embarrassment.' . . . . 'The claims of the services are insistent and oftentimes overpowering. But the new situation forced on the Government—I refer more especially to the possible extinction of our opium revenue—indicates the path along which progress must be made, so as to bring revenue into reasonable correspondence with expenditure. The curtailment of expenditure, especially on the services, is both a political and a financial necessity.' My Lord, this time there is no relief to the tax-payer; rather the Hon'ble the Finance Member is disposed to take some credit for not asking for a rupee of extra taxation and for meeting his difficulties by retrenchments. If I may venture to say so, these retrenchments are but temporary expedients. To do the Hon'ble Member justice, in the concluding paragraph of his Budget Statement I find him saying that he can 'see no reason why, with a due regard for economy, favourable harvests and a period of peace, we should not look forward to a return of that prosperity which has characterised former years.' Let me lay stress for a moment, my Lord, on due regard for economy. That, at any rate, is not beyond the control of Government. As the Hon'ble the Finance Member tersely puts it, estimating in this country is largely a gamble in rain. All estimates have necessarily to be based upon a normal rainfall, but no two years have passed in succession in which the rainfall has been really normal. Even at the present moment there is distress in parts of the country and relief works have been opened. This is as regards estimating revenue. But estimating expenditure is largely a matter of prudence and foresight. 'Let us spend while we may, and let us retrench because we must,' does not seem to be the acme of financial wisdom. Assuming, however, that the monsoon will not fail in the forthcoming year and there will be a normal rainfall, that alone will not restore the equilibrium of Indian finance unless there is a general improvement in trade so that the railway receipts may not again fall short of the estimates. As regards the collections of arrears and suspensions of land-revenue, these again are dependent upon a seasonal and normal rainfall. On the whole the Hon'ble Member takes the right view of the situation when he says that it would be clearly imprudent to speculate on too rapid a recovery in revenue.

"My Lord, I venture to call attention to the enormous increase in administrative charges in recent years. Not all these increases can be justified. Mr. Parnell in his well-known work on 'Financial Reform' says: 'Each public department stands prepared to give the most confident reasons why it is absolutely necessary to keep up the scale of its expenditure to the exact point at which it now is.' Speaking on the Budget two years ago, the Hon'ble Sir Edward Baker—whom it gives me sincere pleasure to see as the Lieutenant-Governor of Bengal—said: 'I have now been connected with the Finance

[*Nawab Saiyid Muhammad.*]

Department of the Government of India for five years continuously, and during the whole of that period I do not believe that a single day has passed on which I have not been called upon officially to assent to an increase of pay of some appointment or group of appointments, to the reorganisation of some department or to an augmentation of their numbers. All experience proves that wherever revision is needed, either of strength or emoluments, the Local Governments and the Heads of Departments are only too ready in bringing it forward. Nor are the members of the various services at all backward in urging their claims.' And His Honour concluded: 'I cannot in the least recognise the necessity for imparting an additional stimulus to this process. On the contrary, I believe that all that is necessary is continuously being done. In this view I welcome the remarks of the Hon'ble Saiyid Mahammad, though I am not very sanguine that the urgent needs of India will permit of any actual reduction.' I submit, my Lord, this subject deserves to be carefully inquired into, for we are on the eve of great changes, probably necessitating increased expenditure. It is a matter for the consideration of Your Excellency's Government whether it is not time that small departmental committees were appointed to go into the whole question. It is a pleasure to me, in this connection, to note that the Decentralisation Commission points out in paragraph 432 of their Report how the Secretariat establishments (both Imperial and Provincial) have grown in bulk unnecessarily. The Commission, while admitting that the increase in establishments represents increase of work which is inevitable in consequence of the material, intellectual and political advance of the country bringing up new questions or necessitating the reconsideration of old ones, emphasise the fact that there has been an unmistakeable tendency on the part of all Secretariats to interefere in unnecessary detail with the action of the authorities subordinate to them. In this direction and in many other which I need not dwell upon, considerable reduction of administrative charges can and ought to be made. The necessity for retrenchment is emphasised not only by the growing contraction of the revenue from opium and any mere temporary embarrassments of Government but by the fact repeatedly dwelt upon by the Decentralisation Commission that 'the growing material, intellectual and political advance of the country' has brought up new questions or necessitated the reconsideration of old ones. New developments in education have recently been suggested; in fact, we want a fresh stimulus imparted to every branch of educational work. Free primary education is in a state of suspension for want of funds. Local Governments who had shown commendable zeal in submitting proposals for the development of secondary and collegiate education have precipitately withdrawn their proposals, when they found what their educational reforms would cost. Throughout the country there has been a cry for industrial education and 'industrial surveys' have been officially undertaken and industrial conferences held for the consideration of questions bearing upon the industrial future of the land. It is evident that things cannot remain where they are,—all these surveys and conferences must yield some practical results. Funds are urgently wanted for these objects, and funds should be found for them, for the Government cannot afford to ignore the growing demands of the country in this respect.

"The Hon'ble the Finance Member has refrained from making any specific reference to the question of sanitation. The small grant made last year for this object has not been renewed this year, although there is an increase in the medical charges, to provide for 'a more active programme of sanitation'. There is perhaps no problem comprised in the vast range of problems connected with rural prosperity so important as the problem of improved sanitation. In paragraph 3 of the Financial Statement the Hon'ble the Finance Member refers to the recent deplorable outbreak of malaria in Northern India, 'which caused considerable mortality in some tracts and greatly debilitated the agricultural population, hampering the harvesting of the autumn and the sowing of the spring crops.' That is adequate testimony to the importance of the careful consideration of the subject. Hence, the

[*Nawab Saiyid Muhammad.*]

supreme necessity, even from a purely financial point of view, of taking measures to organise sanitary works on a large scale. This problem of rural prosperity must be solved, and its solution depends almost entirely upon the Hon'ble the Finance Member's ability to provide funds.

"That leads me to consider the Hon'ble the Finance Member's budget proposals. In framing his budget the Hon'ble Member says:—'The result has been a sharp arrest of expenditure, both Imperial and Provincial, at no small discomfort to ourselves as well as to Local Governments, and in some cases at a temporary sacrifice of administrative efficiency.' The Hon'ble Member then says:—'But the only alternative was increased taxation, and this, in our opinion, would have been a greater evil.' After more than ten years of unbroken financial prosperity and large surpluses it would be scarcely wise to meet the first appearance of financial adversity by an enhancement of taxation. Recognising the discomfort both to the Supreme and the Local Governments, there can be no question that the wiser and more statesmanlike course has been adopted. But a condition of finance in which the only alternative courses open to a Finance Minister are either to effect a sharp arrest of expenditure, even at the sacrifice of administrative efficiency, or to resort to increased taxation, cannot be considered to be a healthy condition. What is true of Imperial is equally true of Provincial finance. Some of the Hon'ble the Finance Member's remarks upon the excess expenditure—the tendency to outrun their grants—on the part of Local Governments would seem to suggest that the control exercised by the Central over the Local Governments is not constant, or, at any rate, not effective enough, to secure the necessary condition of unity between local and general expenditure. The Decentralisation Commission rightly insist that in no case can the financial powers of the Provincial Governments be so developed as entirely to eliminate the control of the Government of India, since the latter must remain responsible for the general efficiency of Provincial administration and could not allow a province to become hopelessly crippled or involved.

"Whether the small surplus which the Hon'ble Member has budgetted for will be realised or not is more than any one can say, but the position is undoubtedly grave. If there is no call for dark pessimism there is no occasion either for robust optimism. Knowing that the chief causes of fluctuations in revenue are beyond our control, the supreme need of persistent and general economy must be realised, and there will be good reason for congratulating the Hon'ble Member if the depressing experience of the year about to close is not repeated.

"My Lord, I beg to express the earnest hope that Your Excellency's Government will lose no time in investigating the whole subject of the high prices of food-stuffs prevailing. It was understood to be the object of Government to undertake the enquiry and to entrust it to officers of Government acting with outside experts. I do not know what the present intention of Government may be, but I trust an early opportunity will be taken to take the public into the confidence of Government. In view of the great suffering entailed upon certain classes of the population by the high prices ruling and their embarrassing effects upon both the Imperial and the Provincial budgets, it is desirable that an enquiry should be held. In this connection, my Lord, I observe that the Hon'ble the Finance Member anticipates a fall in prices. That anticipation seems to be scarcely justified. Indeed, so far as I am aware, the Provincial Governments do not seem to entertain any hope in that direction.

"I crave Your Excellency's permission to refer to a subject in which the Muhammadan community is much interested; I mean the management and administration of the Muhammadan charitable and religious endowments. We are grateful to the Government for managing these institutions which shows their great solicitude for the welfare of all sections of the Muhammadan population. Sometimes, and in some cases unfortunately, the management is not what it should be, and I would therefore respectfully suggest for Your Excellency's consideration the necessity of asking Local Governments and Administrations for a report on the management of such trusts existing

[*Nawab Saiyid Muhammad; Maung Bah Too.*]

in various Provinces, and publishing it for general information. Such an enquiry will result in their better management and will also tend to satisfy the religious communities for whose benefit these institutions exist.

"Before concluding, my Lord, I cannot refrain from expressing, on behalf of the Presidency which I have the honour to represent, our most grateful thanks to His Majesty's Government and to Your Excellency for the great measures of reform so happily initiated. I would add the expression of our earnest hope that the scheme of reform announced by the Right Hon'ble the Secretary of State for India, with the warm-hearted support of Your Excellency's Government, may be carried through. It is not too much to say, my Lord, that the whole country is looking forward with eagerness to both the Houses of Parliament acting in unison in supporting the Indian reforms.

"My Lord, it will not be considered out of place if I venture respectfully to congratulate Your Lordship and His Majesty's Secretary of State for India on the appointment of the Hon'ble Mr. S. P. Sinha to Your Excellency's Executive Council for which the whole country is grateful. I feel in common with my countrymen that a great step forward has been taken and a momentous change effected which I hope will be followed by the happiest results."

The Hon'ble MAUNG BAH TOO said :—"My Lord, I am sorry that, owing to causes beyond his control, we are unable this year to congratulate the Hon'ble the Finance Member on the flourishing state of the Imperial finances. It may be hoped that brighter days are in store and that in future years he will present many prosperity Budgets.

"I ask leave to take the opportunity, the only opportunity afforded in the year, of calling attention to the needs and financial situation of the Province which I have the honour to represent. Financially, Burma has fallen on evil times, and I regret that I must ascribe its misfortunes in great part to the terms of the *quasi*-permanent Settlement imposed on the Province in the year 1907. Both my predecessor and myself pleaded, and pleaded in vain, for more generous treatment. The Settlement—it cannot be called a Contract—was concluded on its present basis.

"Now the theory of a Provincial Settlement, I understand, is that certain heads of revenue are shared between Imperial and Provincial, with the intention that expansion of revenue should provide for expansion of expenditure on the public needs. It is not expected that what are called the standard figures of expenditure should remain fixed and unalterable. It is recognized that if proper progress is to be made, with the growth of population and advance on modern lines, expenditure on vital objects such as, for instance, education, sanitation, public works, medical aid, will necessarily increase. In Burma, it has, I think, been recognized that something more than this is required; that for many years the development of the Province has been impeded by want of funds for Provincial expenditure. Even from the most rigidly economic point of view, increased expenditure is required, for it would be productive. In the interests of Imperial, no less than of Provincial, Funds, improvement of communications and the provision of proper establishments would be more than justified. But how has the theory of Settlement resulted in practice in Burma? The standard figures of revenue have been over-estimated and there has been no increase but rather a decrease in receipts under the most important heads. As for expenditure, so far from expansion being possible, notwithstanding that the Provincial balance has been reduced almost to the vanishing point, it has been necessary to place the estimate for public works at more than twelve lakhs less than the standard figures and to effect ruthless curtailment in all departments. The provision for ordinary public works, which experienced officers consider should not be less than 100 lakhs a year, has fallen to 69 lakhs against a standard figure of 80 lakhs. In consequence, establishments have had to be reduced, to the great distress of many persons who will be unexpectedly thrown out of employment; even works in progress have been stopped and no new works can be undertaken; the province must still be a bye-word, as well to residents, official and non-official, as to visitors,

[*Maung Bah Too; Mr. Apcar.*]

in respect of its communications, sanitation, medical relief, education, contributions to local and municipal funds, all share in the common reduction and depression.

"My Lord, I hope I may be pardoned if I speak plainly but with due respect. I speak on behalf of all communities of my loyal Province, Europeans, Burmans, and the strangers within our gates, when I say that there is a strong and growing feeling that Burma does not receive a sufficient share of her revenues for expenditure on her needs. Cut off as we are by geographical position as well as by racial differences from the rest of the Empire, we feel that we are too often overlooked, that our needs are not recognized, that we do not receive that sympathetic care which is bestowed on other and more favoured provinces. It is my duty as a responsible member of this Council to say that this feeling is likely to spread through all classes of people in Burma who take an interest in public affairs.

"As regards the financial relations between the Imperial and Provincial Governments, it is, of course, not true, as many ill-informed people suppose, that Burma supports the Empire. Its actual annual contribution is less than that of any other Province except the Punjab, Eastern Bengal and Assam, and the Central Provinces. But it is true that its contribution to the Imperial Exchequer per head of population is greater than that of any other province except Bombay. It is estimated in the coming year to amount to the substantial sum of two millions and three-quarters sterling. Moreover, Burma is the only province, except again Bombay, of which in recent years the Provincial contribution has increased and is still increasing. According to the Budget figures the two Bengals and Assam are to contribute in 1908-1909 2¼ crores less than in 1904-1905; Madras falls by over a crore; the United Provinces by a crore and a half; the Punjab by 25 lakhs; the Central Provinces by 65 lakhs. Bombay increases by 12 and Burma by 7 lakhs. Though Provincial expenditure in Burma has had to be reduced, the estimated contribution to Imperial in the year 1909-1910 is greater than the estimate for the current year.

"These bare figures are sufficiently striking. But did time permit me to enlarge on the needs of the Province, to show that merely from the economic point of view expenditure on a liberal scale would be justified, the picture could be made still more convincing. I am aware that Imperial finances are not in a position to enable aid to be given to Burma in the coming years. But I earnestly ask that our plight and our needs may be remembered and that when prosperity is restored our settlement may be revised, I will not say on a liberal, but on a sound economic and business-like footing."

The Hon'ble MR. APCAR said:—"It is extremely unfortunate that financial conditions have been so unsatisfactory as to oblige the Secretary of State to reduce the expenditure on railways from 18¾ crores to 15 crores.

"The Finance Committee's report gave hope that a more liberal supply of money would be available for railway work in the future, and I most sincerely trust that this hope may still be realized in future years and that the adoption of a figure of 15 crores is merely temporary.

"The very large reduction in railway earnings and the growth of working expenses, while producing for the last year disappointing results, seem to have been due to causes for which the Government cannot be held to blame.

"Throughout the world railways have had a bad year, the depression of trade affecting every country and naturally producing less receipts. As to working expenses, from the point of view of trade, the increase is explained and not so serious as it looks.

"The commercial community for some years past have urged on the Government of India the necessity of bringing the railways of India more up to date and put them in a better position to deal satisfactorily with a steady growth of trade. To do this large expenditure was necessary in renewals and

[*Mr. Apcar.*]

betterments, the cost of which fell to a considerable extent on Revenue. The improvement of the railway systems of India is a matter in which trade is vitally interested and it is satisfactory to know that this improvement has been maintained even in a bad year for receipts, as a more efficient means of transport will be available for commerce when the trade depression shows signs of improving.

"It is also satisfactory to note that no action has been taken to raise railway rates because the results of working would show disappointing results. India, unlike other countries, has hitherto had the great advantage of steady railway rates, and to know they will keep steady even when receipts are diminishing, is a great asset in assisting development as it gives a feeling of security in the cost of transport by rail—a most important item in commercial transactions. I think the Government would be unwise to place any check on the steady rate of improvement of its railways that has been in progress of late years, even in the face of a possible reduction in the surplus earned by railways in the past, as though it may temporarily cause reduced net receipts the result must be of benefit to the country in the improvement of its railway property and the expansion of its power to deal with transport.

"The year has been an important one in the history of methods under which the Government carries out its railway duties.

"The Railway Board has been entirely re-organized and placed in the position it should have occupied from the beginning, and I feel justified in saying that under its new constitution the Railway Board has begun to earn the confidence of the commercial community.

"In connection with railway matters I desire to express satisfaction that provision has at last been made for the commencement of work in connection with the bridging of the Ganges by State agency at Sara Ghat. The proposal was originally mooted as far back as 1890, and after so long delay I venture to express the hope that Government will now steadily press forward with the scheme. When the bridge is completed the most serious of the difficulties which have hitherto beset the Eastern Bengal State Railway in the working of traffic to and from areas north of the Ganges will be removed. There will also be a great saving in working expenses not merely in reduced handling charges but in freedom from claims. In the evidence given before the Ganges Bridge Committee the cost of working the Ferry at Sara was estimated at 8¼ lakhs of rupees per annum. This estimate included Rs. 25,000 for loss or damage arising while goods were being dealt with at the Ferry. But besides ordinary claims there have been exceptional losses there, and in 1904 the burning of one flat necessitated the payment of no less than Rs. 89,000 in claims. I have entered into this aspect of the question in view of proposals which have been made that the management of the Eastern Bengal State Railway should be made over to the Bengal and North-Western Railway. Opinion in mercantile circles is strongly opposed to this proposal, partly because much advantage financially is expected from the savings which will be effected by the construction of the Bridge and the transhipment of all the traffic from wagon to wagon. It is felt that the effect of the great change on the net revenue of the railway should be ascertained and considered in connection with the terms of the working arrangement before any steps are taken to make over the line to Company management.

"Whatever the issue of such consideration may be it would be premature to say, for there is also a body of opinion, which shows signs of growing, in favour of the proposition that, so far as this particular railway is concerned, the State is more likely than any Company to give back in better service and reduced rates, at least a portion of any increase in the net profits on working. These profits are, for the reasons I have already given, expected to increase, and while under any contract a large proportion of the savings would come to the State whose proprietary interests are enormous, a company working mainly on behalf of its stockholders is bound to keep their interests ever in the foreground.

[*Mr. Apcar.*]

"There is a further point to which I desire to allude in connection with the Eastern Bengal State Railway. I refer to the frequent changes of its Managers. The question was referred to by the late Mr. Robertson in his 'Report on the Administration and Working of Indian Railways' where he pointed out that seven changes of Manager had taken place in five years. I would urge on Government the need for continuity of management and the advisability of making the remuneration of the Manager such that there need be no temptation to seek promotion elsewhere. A suggestion has also been made that a body of Railway Commissioners partly nominated by the Chamber of Commerce and other public bodies, on the model of the Port Trust, might be formed to advise or consult with the Railway Board regarding the requirements of the province and the means of providing for expected developments of traffic. This idea might be adopted experimentally in connection with the Eastern Bengal State Railway, and I commend it to the consideration of Government.

"The experiences through which we have recently passed have no doubt caused some modifications in the views held by the mercantile community as to the management of the Gold Standard Reserve on which is based the stability of our currency of monopoly rupees convertible only at the will of Government. It must be said that changes of policy with respect to this Reserve have given rise to misgivings in the minds of the commercial public and active but unavailing protests were made by Chambers of Commerce in 1906 against the decision to hold 4 millions sterling of this Reserve in *silver*. The fear that opportunism rather than sound economic principle dictated the policy of Government led the Bengal Chamber of Commerce in 1907 to recommend that the Indian Currency question should be once more thoroughly examined by a Commission of Experts. It was hoped that such a Commission would consider and advise especially as to the magnitude of the Gold Standard Reserve Fund and the manner of its investment. The limit of 10 millions mentioned by Lord Curzon in 1904 as giving 'a permanent guarantee for stability of exchange' has long since been exceeded, and in the light of recent experience one is rather inclined to agree with the opinion expressed by the Hon'ble Finance Minister in the Budget Debate of 28th March 1906 that 'there can be no limit to the Gold Reserve Fund.' 'So long,' he said, 'as India has a Gold Standard combined with a Currency which consists mainly of rupees, I consider that we are bound to set apart the whole of the profits on additions to the coinage.' After stating his reasons for this important expression of opinion he added—'We must therefore resist all temptation to use these profits for ordinary current expenditure.' Yet two years later it was decided that one-half of the profit on coinage should be diverted to meet the cost of railway construction. These changes in opinion and practice do not foster confidence, yet confidence in currency matters is of primary importance.

"The recommendation to appoint a Commission was made in September 1907. A few months later the combined influences of an adverse trade balance and the financial crisis in the United States gave unexpected but weighty support to this recommendation. When the Exchange value of the rupee fell in November 1907 to 1-3 $\frac{11}{16}$ for telegraphic transfers on London equal to about $1\frac{1}{2}$ per cent. below gold point, it could no longer be said that the question was one of academic interest only: the hard logic of facts had elevated the subject to the insistent region of things practical and urgent. Yet the policy of the Government during this time of crisis was notable only for inactivity. It was not till the end of March 1908, in spite of urgent representations from the Banks, that Government commenced to offer Sterling Bills on the Secretary of State in London in limited weekly offerings. In the period from 26th March to 13th August 1908, the total sales of such drafts aggregated over 8 millions sterling. Recent experience has, in my opinion, given added importance to the proposal that a further enquiry into the currency question in all its aspects should be held. I consider that a good case has been made out for such an enquiry, and that when it is held the public should be given an opportunity of expressing their views on the whole question.

[*Mr. Apcar; Mr. Gokhale.*]

" The orders recently issued by the Secretary of State on the recommendations of the Committee appointed in 1906 to enquire into the procedure for the purchase of Government stores are welcomed by manufacturers in this country. The orders prescribe that 'articles manufactured in India from imported materials shall in preference be purchased in India when the price is as low as that at which articles of similar quality can be obtained through the India Office.' Two years ago I referred to the fact that two Engineering Firms had recently put down wagon constructing plant, and that as about 60 per cent. of the cost of wagons is expended in the purchase of materials in Europe and about 40 per cent. on labour and materials in India, it was expedient, in the interests of India, the purchaser, that a larger share of the orders should be placed in this country. I further stated that manufacturers in India do not ask for preferential treatment as to price, but that, being limited to one market, whilst European manufacturers have many outlets for their production, steady employment is essential to enable them to give a reasonable return on their Capital. During the past year these concerns were without orders for wagons for more than six months and had to close the works entirely during the greater part of that period The more liberal treatment of local enterprise foreshadowed in the Government's communiqué, to which I have alluded, will, I trust, improve matters, but, as has been said more than once, on these occasions the rolling stock requirements of the Railway Companies should be made known some time ahead and manufacturers in India invited to quote for as many wagons as their works are capable of turning out. There seems no reason why steady employment throughout the year should not be given to our local manufacturers, who, as I have said, ask for no preferential treatment in the matter of price.

" I should be glad to see some legislation introduced dealing with the question of Life Assurance Companies. At the present moment any person can start a Life Assurance Company and collect premia from ignorant persons. Life Assurance stands on quite a different plane from ordinary business transactions. It is a thing which the State should encourage by every means in their power, and which they should safeguard in the interests of those who insure, in every possible manner. In England Life Assurance Companies before commencing business have to deposit a large sum with the Government as a guarantee of their good faith; they have also to furnish regular returns and the like. A similar procedure is much needed in this country, and in the Acts in the United Kingdom the Government will find all they want.

"Another year has passed and I would ask what progress has been made with the scheme for the improvement of Calcutta. I mention the subject because it is urgently needed."

The Hon'ble Mr. GOKHALE said:—" My Lord, the Hon'ble Member is entitled to the fullest sympathy of this Council and of the country in the difficult task with which he finds himself confronted at the very commencement of his tenure of office as Finance Minister of India. After a succession of surpluses extending over ten consecutive years, we have come, suddenly and almost without warning, to a year of a heavy deficit, and this abrupt change is accompanied by an uncertainty about the future, which aggravates the anxieties of the situation. It is true the Hon'ble Member estimates, on the assumption of a normal season, a revenue for next year fully equal to its requirements and he even budgets for a small surplus. But reading between the lines of his statement, one cannot help feeling that he regards the prospect before him with considerable uneasiness. The Hon'ble Member bases his figures of revenue on a normal season, though such estimating is, in his opinion, 'largely a gamble in rain.' The grave depression in trade, which has so seriously reduced our railway receipts during the current year, and which, as the Hon'ble Member says, is not local or peculiar to India but is 'one of those great reactions which periodically affect the whole civilized world,' has not yet passed away, and yet the Hon'ble Member takes for railway earnings a figure £ 2½ millions above that of the current year, thus placing our railway activity during next year

[*Mr. Gokhale.*]

'where it would have been in 1908-1909, if conditions had been normal, with a small extra margin for the increased mileage.' Finally the Hon'ble Member uses significant language when he says:—'I have no desire to minimise the difficulties, which it would be folly to ignore, attaching to Currency and Exchange, to the present position of the Gold Standard Reserve, and the weakness of our cash balances'. I doubt therefore if the Hon'ble Member himself feels much confidence in the estimates which he has laid before the Council, and I think that the position of equilibrium for which he has budgetted indicates more a suspension of judgment on his part than a reasonably confident anticipation of next year's revenue and expenditure.

"My Lord, a deficit of 3¾ millions sterling or over 5½ crores of rupees is the heaviest deficit we have had in any year during the last fifty years. And only once during the period has it exceeded 3 millions. That was in the year 1897, when the country was devastated by one of the greatest famines of the last century and when in addition there were prolonged military operations on the North-West frontier,—the famine costing in direct relief 3½ millions, and the military operations 2½ millions, and the accounts showing a deficit of 3½ millions. It is however necessary to remember that the current year's deficit includes a sum of £725,300 under railway charges, which should not be charged against revenue at all, being the portion of the annuity payments devoted to redemption of capital. The exclusion of this sum reduces the deficit from 3¾ millions to 3 millions. Even so, it is a heavy deficit, and in view of its serious nature I fear regret will be expressed in some quarters—I already notice a tendency in that direction—that the Government should have granted successive remissions of taxation since 1903. I think therefore that it will be useful to recall here the extent of these remissions and their true relation to the growth of our revenue in recent years. These remissions have been three reductions of the salt-duty, each by 8 annas a maund, reducing the duty altogether from Rs. 2-8 annas to Re. 1 a maund, the exemption from income-tax of incomes between Rs. 500 and Rs. 1,000 a year, the abolition of famine cesses in Northern India, and the abolition of certain local taxes on land in several Provinces. The total relief granted to the tax-payers by these various measures has been a little over four millions a year. Now to understand correctly the real bearing of these remissions on the general financial situation, it is necessary to glance briefly at the history of our finances since 1885. The first eleven years of this period were a time of extreme stress and anxiety for the Finance Minister, owing mainly to the fall in the exchange value of the rupee, which declined rapidly from over 19*d.* to about 13*d.*, while at the same time military expenditure was rising and the opium revenue going down. The Government met the difficulties of the situation by heavy and continuous additions to the taxation of the country, adhering rigorously to the canon of finance that the year's expenditure should come out of the year's revenues. The lowest point touched by exchange was in 1894-95, when it stood at 13-1*d.* to the rupee. And yet by raising the level of taxation high enough, the Government were able to realise even in that year a surplus of 70 lakhs of rupees. From that point onwards, exchange again rose steadily owing to the currency legislation of 1893, till at last in 1899-1900 it established itself firmly in the vicinity of 1*s.* 4*d.* And when, three years later, the first remission of taxation was granted, the position was this:—The rupee had risen from 13-1*d.* to 16*d.*; there had also been a considerable increase of revenue under most of the principal heads; but the level of taxation still stood where it had been pushed up when the rupee had fallen to 13-1*d.* Now a rise in exchange from 13-1*d.* to 16*d.* meant a saving of 3½ millions sterling in the cost of remittances to England necessary to meet the Home charges, taking these charges even at the lower figure of 1894-95. And this saving the Government were morally bound to return to the tax-payers, however they dealt with the general increase of revenue that had accrued. As the various remissions put together have amounted to about 4 millions a year, it is clear that the relief granted to the tax-payers during the last six years has not materially exceeded the saving effected in the cost of Home remittances by an artificial appreciation of the rupee. It may be

[*Mr. Gokhale.*]

noted that in spite of these remissions of 4 millions a year, the revenue to-day is higher than it was six years ago, the receipts under the principal heads for the current year being over 49 millions as against 45·6 millions for 1902-03, the year immediately preceding the first reduction of taxation.

"My Lord, the year about to close has been a famine year and it is instructive to compare it with the year of the last great famine—1900-01. That famine was admittedly one of the severest as it was the most extensive of any that have been known in India, and it cost over 4 millions in direct relief. This year's famine on the other hand was confined mainly to the United Provinces and the cost of relief has been only a million. The revenue under the principal heads for 1900-01 was 43·6 millions; that for the current year, in spite of the remissions of taxation granted in the interval, was over 49 millions. (The latter figure includes the revenue for Berar, which the former does not, but the former includes the proceeds of local rates, which are excluded from the latter.) In 1900-01, there was a saving in military charges owing to the absence of a portion of the troops in South Africa, against which may be set the windfall under opium during the current year. Under Railways there was a small net revenue of about ⅓ million in 1900-01 as against the loss in this year's Revised Estimates of a little under ½ million. The Government thus had in 1900-01 a smaller revenue and had to incur a much larger expenditure on famine relief than during the current year, and yet in the former year they were able to show a surplus of 1·7 millions whereas in the latter they have a deficit of 3 millions exclusive of the sum devoted to the redemption of railway capital. This shows the extent to which the ordinary expenditure of the country has grown during the last eight years. Of course a good part of this increased expenditure has been devoted to most worthy objects, such as extension of education, improvement of agriculture, police reform, grants to District Boards, grants for sanitation, and so forth. But there is also no doubt that a portion of the increase has been due to the fact that money was available and the need for economy was not obvious. The scales of pay, for instance, of the superior grades in most departments have been augmented during the last few years. And in this connection, I cannot help recalling the vigorous language used by His Honour Sir Edward Baker two years ago in speaking of the pressure constantly brought to bear on the Finance Department in the matter. 'I have now been', said His Honour, 'connected with the Finance Department of the Government of India for five years continuously, and during that period I do not believe that a single day has passed on which I have not been called upon officially to assent to an increase of pay of some appointment or group of appointments, to the reorganization of some Department or to an augmentation of their numbers. All experience proves that where revision is needed, either of strength or emoluments, the Local Governments and the Heads of Departments are only too ready in bringing it forward. Nor are the members of the various services at all backward in urging their own claims'. I am glad the Hon'ble Member proposes to enforce a policy of strict retrenchment in all directions. If he succeeds in doing so to any appreciable extent, the present deficit will have proved a blessing in disguise! One feature of the present financial situation, to which attention may be drawn, is the greater extent of the reliance which is now placed on net railway revenue to meet the ordinary recurring expenditure of the country. Our railways, after causing a net loss to the country year after year for half a century—amounting in all to more than fifty crores—began to show a small profit nine years ago. And during the last four years, this profit reached the high average of about three crores a year. Unfortunately they have failed us somewhat suddenly this year, and I fear it will be necessary to regard this source of revenue with a certain amount of distrust in the future.

"My Lord, the Hon'ble Member has adopted, if I may presume to say so, an entirely wise course in budgetting for a position of equilibrium for next year in spite of the heavy deficit of the current year. We all hope with him that the next season will be a normal one and that the depression in trade will soon pass away. We hope also that no new clouds will gather on the horizon. There is

[*Mr. Gokhale.*]

no doubt that in ordinary circumstances and in the absence of any special disturbing factors the financial position of the country is a strong one. And by this time next year, we shall be in a better position to judge whether the causes that have brought about the present disturbance are temporary or will continue longer in operation. I must, however, confess, my Lord, that the continued prevalence of high prices in all parts of the country appears to me to be an element of considerable anxiety in the present situation. Last year, in the course of the budget debate, I ventured to express my apprehensions on this subject, and further consideration has only strengthened those apprehensions. I think the quantitative theory of money holds good much more in the case of a backward country like India than in those of more advanced countries. Variations in the prices of individual commodities may be due to variations in the demand for them or in their supply. But a more or less general rise of prices can only point to a disturbance of the currency. Such rise need not be uniform in the case of all commodities, for in the view which I am stating, prices are a function of three variables—currency, demand and supply, and any general rise resulting from a disturbance of the currency may be modified in particular cases by one or both of the other two factors. The whole question requires a close and immediate investigation by a competent body of men, and I sincerely trust the Government have made up their mind to direct such an enquiry. The experience we have had this year of the Gold Standard Reserve must lead many of us to revise our ideas on that subject. The Government are being urged on all sides to build up a strong Reserve, but we seem to stand in this matter on the horns of a dilemma. If the mints continue idle as at present and no new rupees are coined, there will be no coinage profits and therefore no additions to the Gold Standard Reserve. On the other hand, if new rupees are coined, they will, I fear, tend to raise prices still higher in the country. And this will discourage exports and stimulate imports, and will exercise an adverse influence on our balance of trade.. It has been urged in defence of the heavy coinage of rupees in recent years that they were issued solely to meet the demands of trade. The course adopted does not however seem to be justified by the results. It is important to remember that the Fowler Committee had expressed itself strongly and clearly against such new coinage until a sufficient quantity of gold was in circulation in the country. 'The Government,' they wrote, 'should continue to give rupees for gold, but fresh rupees should not be coined until the proportion of gold in the currency is found to exceed the requirements of the public.' It seems to me that the only way now out of our difficulties is to follow the example of France and the United States, and while admitting the rupee to unlimited tender, stop the coinage of new rupees and coin gold pieces instead. Of course I express this opinion with great diffidence, for there are serious considerations on the other side and the whole subject is enveloped in great obscurity. But I fear that the present half-way house will not do, and unless we place our currecy on an automatic and self-adjusting basis, the clouds that are already over-head will thicken and not roll away.

"My Lord, I am sincerely pleased that as a result of this year's deficit, the special military grant of two millions a year, which has been placed at the disposal of His Excellency the Commander-in-Chief for the last four years for his re-organization scheme, will be abolished from next year. The relief afforded by the abolition to the finances is no doubt more apparent than real, for already in its place there is a permanent increase of expenditure of 1½ millions a year—£655,100 as the permanent charge left behind by His Excellency's completed special measures, and £813,300 for increased payments to the War Office and for increase of pay and allowances to Indian troops,—with an indefinite liability to find, as before 1904, whatever extra sums the military authorities may demand for 'indispensable' special measures. Still it is a matter for satisfaction that this fixed, heavy burden which we have borne for four years is for the present at any rate off our shoulders. It is somewhat disappointing that of the 8¼ millions spent out of the special grant since 1904, only about 3⅜ millions have been expended on measures included in His Excellency's original programme. It

[*Mr. Gokhale.*]

was expected that as a result of the completion of that programme there would ultimately be a saving in the military expenditure of the country. That expectation, I fear, will not now be realised, if only one-third of the scheme has so far been carried out. The increase, in the payment to the War Office, of £300,000 a year is regarded throughout the country as an unjust addition to our burdens and is deeply resented. It is understood that the Government of India protested strongly against this fresh imposition and the best thanks of the country are due to the Government for this. On the other hand the increase in the pay of Indian troops was quite necessary and has been received with sincere pleasure by all classes of the people.

"I have several times expressed my views on Railway finance in this Council and I will therefore make only a passing reference to that subject today. The Government propose to spend £10 millions next year as Capital outlay on Railways. Notwithstanding what has happened this year, I trust our Railways have now established their character as a commercial success. That being so, as a mere matter of finance—apart from questions, such as the relative importance of Railways and Irrigation—there can be no objection to the Government spending whatever amount they think desirable on railway construction, provided they raise the whole of that amount strictly by borrowing. This year's experience no doubt emphasises the need for caution even in railway construction out of borrowings, but I do not wish to dwell on that aspect of the question. The Government, however, have not in the past been satisfied with merely devoting loan-funds to the building of railways. They have in addition drawn on every other available resource for the purpose, and thus, during the last few years, surplus after surplus, arising out of current revenues, which might have been devoted with the utmost benefit to the people to meeting non-recurring expenditure in connection with primary education, technical education, sanitation, and such other needs of the country, has been swallowed up by this eternal, unending, insatiable railway construction! Year after year I have complained of this misapplication of our surpluses in this Council but without avail. Two years ago it did appear as though Sir Edward Baker might move a little from his position in the matter, but last year he decisively closed the discussion, so far as he was concerned, by declaring that 'the Hon'ble Member and the Government are irreconcilably divided and can only agree to differ.' My Lord, I mention these things in the hope that my contention might meet with a better reception at the hands of the new Finance Member. Our finance is the finance of a poor country, whose resources are small and whose needs in several directions are pressing and various. It is true that the application of a portion of our revenues to Railway construction leads to a corresponding reduction of our unproductive debt, but that should be no object with the Government, seeing what a mere trifle that debt is, being only about £37 millions sterling. The present year is a year of deficit, but the Hon'ble Member includes the small surplus for which he budgets for next year among the ways and means of meeting capital expenditure. This means that even if the expected surplus is not realised, the estimated amount will be devoted to railway construction out of cash balances. Again, as I have already pointed out, this year's deficit includes a sum of ¾ million under Railway charges, which represents the portion of annuity payments devoted to the redemption of capital. Thus our surpluses, whenever they are realised, are to go to railway construction, and in addition to that, a sum of ¾ million a year out of current revenues is to be devoted to the redemption of railway capital! My Lord, I protest respectfully but with all the emphasis at my command against this policy. It is, in the circumstances of India, unjust and unjustifiable, and even from the standpoint of sound financial administration, it is wholly unnecessary.

"My Lord, this is probably the last budget debate at which observations of a general character, unconnected with questions of finance, will be permitted, and I would like to say a few words on the situation in the country generally before bringing my remarks to a close. The acute anxieties of the last year

[*Mr. Gokhale.*]

are now happily over, and the situation has undergone during the last three months a change so striking and decisive that it is almost difficult to recall the crisis through which we have passed. When the Council closed its last Calcutta session twelve months ago, there was in the air a feeling of vague uneasiness as at some impending disaster. And the country was soon startled and shocked by the appearance of anarchists on the scene. It is true their numbers were utterly insignificant, but the danger was that for a time at any rate the more reckless and irresponsible spirits in the country would think more of the daring of these misguided young men than of the wicked and detestable character of their outrages. With such a danger confronting them, the Government could not afford to sit idle or lose time. But the drastic measures of repression which they found themselves driven to adopt, both to prevent the spread of general disorder and to strike at the root of political crime, deepened still further the gloom of the situation and added to the prevailing feeling of despair in the country. It was indeed a time of grave anxiety, for large numbers of young men were daily drifting away farther and farther from their allegiance to British rule and the whole conception of one's duty to the country was undergoing a rapid change in superficial minds. Happily at this critical juncture, the courage and statesmanship of Your Lordship's Government and of the Secretary of State came to our rescue and the announcement of a large and generous scheme of reforms in December last at once acted like a charm, and eased the tension of the situation. And today the position, in spite of its undoubted difficulties, is actually clearer and stronger than it has been for many years past. A new hope is gladdening the hearts of the people, and though certain causes of soreness exist, the minds of the educated classes are steadily reverting to their old faith in the higher purpose and character of British rule. The appreciation of the supreme importance of order for purposes of real progress is all the deeper and more distinct for having experienced the shock and horror of recent outrages. And on every side there are indications that a period of closer and more cordial relations between the authorities and the people is about to begin.

" My Lord, I have said that certain causes of soreness still exist. Of these one of the most serious is the deportation of nine Bengali gentlemen under the Regulation of 1818 in December last. I have no wish to go on the present occasion into the general objections that may reasonably be urged against a resort to the extraordinary powers conferred by the Regulation. Those objections are well understood and there is no satisfactory answer to them. I feel bound, however, to say one thing. In the course of a recent debate in the House of Commons on the subject, the Under Secretary of State for India stated that these nine men had been deported because it was believed that among them were 'some leading instigators of crime.' It is true that Mr. Buchanan did not say that every one of the nine gentlemen was a leading instigator of crime. But as none of them was expressly excluded from the description and as all nine have been deported, the suspicion of being an instigator of crime must attach to each one of them. Now two of these nine men I know very well personally—Babu Krishna Kumar Mitter and Babu Aswini Kumar Dutt. They are undoubtedly persons of the highest character and of deep piety, and it is incredible that either of them can have been even most remotely connected with crime. I recognize that in times of grave emergency, the Government have to decide quickly and act promptly, taking all risks —even the risk of being in the wrong. But it is now more than three months since the deportations took place. The situation throughout the country is rapidly improving. May we not hope that the Government will now reconsider this matter and take the earliest opportunity to restore these men to their homes? It will be an act of bare justice to the individuals and will give great satisfaction throughout the country.

" My Lord, certain provisions of the reform scheme have, as the Council knows, evoked keen and even excited controversy. Of these, the greatest opposition has been naturally encountered by the proposal to appoint an Indian member to your Lordship's Executive Council. The

[*Mr. Gokhale.*]

question, however, is now laid at rest by the announcement made five days ago that His Majesty the King-Emperor has been pleased to approve the appointment of Mr. S P. Sinha to succeed Sir Erle Richards as Law Member of the Council My Lord, the day when this announcement was made will always be remembered as a red letter day in the history of British rule in India. A momentous step has been taken and a most signal vindication offered to the people of this country of the noble pledges contained in the late Queen's gracious Proclamation. I am confident that the Government will have no cause to regret what they have done. The trust and courage which they have displayed will be repaid a hundredfold in the new ties of attachment and gratitude which will bind the country to British rule, and the administration will be all the stronger for coming closer to the hearts of the people. The opposition to clause III of the new Reform Bill has come principally from certain retired administrators and civilians, whose connection with India terminated sometime ago and who have not been in touch with the rapid changes of thought and sentiment which have taken place in the country during the last three years. Now that the tension has relaxed, these gentlemen would evidently like to part with as little real power as possible, and they have not hesitated to get the clause rejected by the House of Lords in the face of the opinion of the Government of India and the Secretary of State. Their action has caused deep and widespread disappointment throughout the country, for there is no doubt that administration by a Council is a higher form of Government than a single man rule, and the proposed change is needed to meet satisfactorily the altered requirements of the situation. There is room yet for the hope that the clause will in the end be restored after all, and it will be worse than unfortunate if this hope is not realised, for that will mean that the proposed scheme of reform has been put back in a most important particular. The third question connected with the reforms, round which controversy has raged for some time, is that of Mahomedan representation As this question is arousing a considerable amount of feeling in the country, I would like to state briefly my own view of the matter. That view is practically the same as that of the Government of India, and I have embodied it in the note which I had the honour to submit to the Secretary of State last September on the subject of constitutional reforms. I think the most reasonable plan is first to throw open a substantial minimum of seats to election on a territorial basis, in which all qualified to vote should take part without distinction of race or creed. And then supplementary elections should be held for minorities which numerically or otherwise are important enough to need special representation, and these should be confined to members of the minorities only. What minorities in the different Provinces should have special representation and how many seats should be assigned to each minority must depend upon the special circumstances of each Province. It will not do to be guided in the matter by a strict regard for numbers only; for it may be necessary at times to give special representation to a minority so small as not to be entitled even to a single member on a strict numerical basis. This was practically the plan advocated by the Government of India in their despatch as I understand it, and now that the idea of joint Electoral Colleges has been abandoned, I earnestly trust that it will be carried out. The great advantage of this plan is that it provides for composite action by all communities up to a certain point and then it prevents injustice, in practical operation, to minorities by giving them special supplementary electorates of their own. My Lord, it has been urged by some of my countrymen that any special separate treatment of minorities militates against the idea of the union of all communities in public matters. Such union is no doubt the goal towards which we have to strive, but it cannot be denied that it does not exist in the country today and it is no use proceeding as though it existed when in reality it does not. Not only this, but unless the feeling of soreness in the minds of minorities is removed by special separate supplementary treatment such as is proposed by the Government of India, the advance towards a real union will be retarded rather than promoted. One thing, however, must here be said. The idea of two water-tight compartments for Hindus and Mahomedans separately will not promote the best interests of the country, and moreover it is really not feasible. For there cannot

[*Mr. Gokhale.*]

be only two such compartments, unless all minorities other than Mahomedan are to be joined to the Hindus, in which case the division will practically be Mahomedans and non-Mahomedans. Further, where only one member is to be returned by a whole province, as in the case of land-holders or the non-official members of some of the Provincial Councils, any division of those who are qualified to vote into two or more groups becomes impossible. The objection has been raised that under the plan of the Government of India, members of minorities will vote in general election as also in their own supplementary election. But the matter must be looked at in a large way and in a practical spirit. The aim is not to secure a scientific accuracy of method but to obtain substantially just and satisfactory results. Let it be remembered that a member more or less for either the Hindus or the Mahomedans does not really much matter. The existence of the Government is not to depend upon the votes of non-official members, neither are its members to be drawn from those who are in a majority in the Councils. Let it also be remembered that the most important part of the proposed reform of Legislative Councils is the power that will be conferred on members to raise discussions on administrative questions in the Council and for this purpose the exact proportion of members returned by any community is a matter of small importance. My Lord, I respectfully suggest that the Government should take an early opportunity to make a clear and firm declaration on this subject, calculated to allay apprehensions and give reasonable satisfaction to all parties. It is necessary that the new arrangements should be inaugurated with the utmost good-will from all sections of the people. I earnestly appeal to my countrymen—both Hindu and Mahomedan—to exercise special mutual forbearance at this juncture and meet each other half way. We owe this to ourselves and to our country's future; we owe it also to those who are granting us these impoitant measures of reform.

"My Lord, in this connection may I offer a word of personal explanation on this occasion? I see from the papers that have arrived by the last English mail that the note on constitutional reforms which I submitted to the Secretary of State in September last and to which I have already referred here today has come in for a good deal of comment in England. Now what I want to say about that note is this. There was nothing surreptitious or private about it. It was submitted by me to the Secretary of State for India in my capacity as a representative of the Bombay Presidency Association, publicly deputed by that body to proceed to England and lay their views before the authorities there on the proposed reforms. The note was only a summary—with very slight modifications suggested by the discussions I had with a number of public men in England on the subject—of the views which the Association had already laid before the Government of India in an exhaustive memorial and before the Decentralisation Commission in another memorandum. On my return to India I noticed attempts made in certain quarters to rouse Mahomedan feeling against the reform scheme, as outlined in Lord Morley's despatch, by representing it as a result of Hindu intrigue in London. And after a time my name was openly mentioned in that connection. As the line I had taken on the Mahomedan question was practically the same as that of the Government of India, I thought—and several of my friends agreed with me in this view—that the best way to counteract this mischief, which threatened to grow quite serious, was to publish the views which I had laid before the Secretary of State. Before communicating the note to the Press, however, I sent a copy to Sir Herbert Risley, requesting him to include it, if possible, among any fresh papers on reforms that the Government might issue—a request that he at once and very courteously complied with I took this course because it was thought necessary in the best interests of our public life that no room should be left for the allegations of intrigue against Mahomedans, which were being openly and unscrupulously made. There was no thought of suggesting that it was the note that had influenced the Secretary of State in his decision, and no such suggestion has ever been made by me by word or by whisper. As regards the attacks made on the Indian Councils Bill by the opponents of that measure on the score of its supposed connection with my note, they are of course the usual amenities of party warfare in England.

[*Mr. Gokhale.*]

All the same they are most unfair. Any one who reads the despatches carefully will see that nine-tenths of the scheme, even in its final form, is really the Government of India's. And even in the few points in which the Secretary of State has gone beyond the Government of India's proposals, he had strong support of an official character behind him—a support that was bound to be far more influential than a note containing merely the views of a public body in India. Thus we all know that in regard to the appointment of an Indian to the Viceroy's Executive Council, had it not been for Your Lordship's strong personal interest in the matter, that reform would never have come. As regards Provincial Executive Councils, it is really the Decentralisation Commission that has pushed the question to the front. And in the remaining matters, it is known that the Secretary of State has acted on the recommendations of Lord Macdonnell and his colleagues on the Special Committee. It is true that some of the reforms which Indian public men have from time to time been advocating have found a place in the scheme finally adopted by Government. But that only shows that our proposals were not so very unreasonable after all, and that when they came to be officially examined in a serious spirit they were found to be quite practicable. The fact is that the path of constitutional reform in India is really extremely narrow and those who want to advance along that path have no choice but to have in view more or less the same stages and almost the same steps. To safeguard the essential elements of British supremacy, to associate the people of the country more largely with the administration of their affairs, and to do this cautiously, impartially and at the same time in accordance with ideas and aspirations which Western education has fostered in the land these factors of the problem do not leave a wide margin for differences of opinion except in regard to minor details. Of course those who do not want to advance do differ fundamentally from those who do ; also among those who want to advance there may be differences of opinion as to how many steps may be taken at a time. But there is not much room for any striking originality or novelty of solution in determining the path. Moreover, the interests involved are too large and too serious to permit of the authorities going in search of originality for mere originality's sake.

" These controversies, small and great, will however soon come to an end, and before long they will probably pass out of men's minds. But the reforms that will be inaugurated will remain, and they will open a new and important chapter to the people of this country. As far as one may foresee, the chief characteristic of the next few years will be a greater consideration for public opinion on the part of the authorities, a larger realization of the difficulties of the administration on the part of the people, and a closer co-operation between the two sides in promoting the moral and material interests of the country. It is idle to expect that with the introduction of the reforms all existing misunderstandings between the Government and the people will vanish ; and it will be even more idle to imagine that, as time rolls on, no new occasions of friction will arise or no fresh misunderstandings crop up. But there is no doubt that when the proposed reforms are completed, the administrative arrangements of the country will have been brought into reasonable harmony with the present requirements of the people; and as regards the future, we must be content to let it take care of itself. I think it is safe to say that when, in later times, the eyes of our countrymen turn back to these days, they will see two figures standing apart from the rest. One will be Your Excellency and the other Lord Morley. My Lord, I am at a disadvantage in speaking of Your Lordship in your presence; but the occasion is exceptional and I trust the Council will forgive me for any apparent breach of propriety. The country owes a deep debt of gratitude to Your Lordship, both personally and as the head of the Government of India, for these reforms. You had not been many months in the land before you recognized frankly and publicly that new aspirations were stirring in the hearts of the people, that they were part of a larger movement common to the whole East, and that it was necessary to satisfy them to a reasonable extent by giving the people a larger share in the administration of affairs. And throughout your purpose in this matter has

[*Mr. Gokhale; Mr. Harvey.*]

never wavered. Your Lordship started the first deliberations in your Council on the subject. The tentative proposals published in 1907, which had caused great dissatisfaction, were revised and recast under your own direction, and nine-tenths of the scheme in its final form is that of the Government of India. But this is not all. The throwing open of your Executive Council to Indians—which in some respects in the most notable part of the reforms—is principally Your Lordship's work. Serene, clear-sighted, supremely modest, Your Lordship has gone on with the work of reform with noble courage amidst extraordinary difficulties, and I am sure your greatest satisfaction will be that when you lay down the reins of office you will leave to your successor a task far less anxious than the one you inherited. My Lord, among the many great men who have held office as Governor General in this country, there are three names which the people cherish above all others – the names of Bentinck, Canning and Ripon. I venture to predict, both as a student of Indian history and as one who has taken some part, however humble, in the public life of the country for the last twenty years, that it is in the company of these Viceroys that Your Lordship's name will go down to posterity in India. Of Lord Morley I will say only this. It would have been a sad thing for humanity if his tenure of office as Secretary of State for India had produced nothing more than deportations and Press laws. One who has taught so highly and to whose name such great honour attaches even in distant lands cannot afford to be 'as other men are—a slave of routine and a victim of circumstance.' However, his great Liberalism has been amply and strikingly vindicated even in so difficult a position as that of the head of a vast bureaucracy, and the temporary misunderstandings of friends and the unworthy taunts of opponents will not have been borne in vain, when the full results of the present measures of reform show themselves in this country. That passage in his speech in the House of Lords, foreshadowing Mr. Sinha's appointment, with its phrase 'one of the King's equal subjects,' has touched a chord in Indian hearts which will keep vibrating for some time. It is a passage that will live in the history of this country—in any case it will remain engraved on the hearts of the people. My Lord, I sincerely believe that Your Lordship and Lord Morley have between you saved India from drifting towards what cannot be described by any other name than chaos. For however strong a Government may be, repression never can put down the aspirations of a people and never will."

The Hon'ble MR. HARVEY said:—" My Lord, the anticipations formed last year as to the probability of a decline in our sea-borne trade have unfortunately been only too completely realised. The causes which have operated to produce the depression in the world's markets, and the special circumstances which have aggravated it in this country, have been referred to in detail in my Hon'ble Colleague's Financial Statement, and it would be a waste of the time of this Council if I were again to enumerate them at length. I may, however, add with reference to one of our staple industries that, while locally manufactured cotton cloth is suffering from congestion of stocks in the same way as imported piece-goods, there has been some revival in the exports of yarn, and the results of the year have not been as unfavourable as general conditions might have led us to expect. Stocks in China are reported to have decreased materially and the prospects there have improved, but it is a matter of some regret that the exports of yarn to Europe, which began to develop recently, are shrinking in consequence chiefly of the want of conformity with European standards in point of reeling and count.

" The general outlook is on the whole encouraging and there are signs of a return to normal in the export trade. A larger area is returned as being under cultivation with oil-seeds and wheat, and substantial increases are expected in the outturns of rice and cotton. Freight rates are hardening in anticipation of an active wheat season in the western shipping ports, and if the expectation of improved prospects throughout the world is realised, the next few months ought

[*Mr. Harvey.*]

to show indications of a movement of a more healthy kind than has been present since the latter half of 1907.

"I will now refer to certain legislative measures of interest to the commercial public which have been undertaken or will shortly be introduced. At a previous meeting during this session, I stated that it was our intention to postpone the revision of our Companies Act until the consolidation and amendment of the English Companies Act which was then pending in Parliament had been carried out, as it has been decided that our law should follow as closely as possible that of England. The Bill has since become law, and we shall take into early consideration a similar revision of our Act. The necessity for this has been the subject of much discussion during the past year in the Press, and the amendments will take some time to prepare. In the meanwhile, we are proceeding with two small amendments both of which are sufficiently urgent to justify immediate action. Under the law as it now stands, companies registered in India are not permitted to pay dividends out of capital during construction, though two special Acts have in the past been introduced to permit of railway and tramway companies doing so. Recently, however, representations have been made to us that the success of certain important industrial undertakings was likely to be handicapped by the absence of any provision in the law permitting them to pay interest out of capital during the necessarily long period which must elapse before they pass out of the constructive stage, and we have decided to assist them in obtaining this concession which, subject to certain conditions, is enjoyed by all industrial companies registered in England. The second amendment is one which has been pressed upon us by the Bombay and Madras Chambers of Commerce and will empower joint stock companies in certain circumstances to re-issue and keep alive debentures. We trust that the Bill which has been drafted to give effect to these proposals may be passed into law before long.

"Legislation has been initiated and carried through, during the current year, to provide for several points of importance in the Merchant Shipping Law. It was brought to our notice that section 4 of the Indian Steamships Act, 1884, conferred an advantage on foreign vessels (carrying more than 12 passengers) as compared with British vessels, in the matter of obtaining a certificate of survey. This section has now been amended so as to place British and foreign vessels on the same footing. Similarly by providing that certificates of partial survey, granted by the Board of Trade or by a British Colonial Government, which were not hitherto recognized, shall be accepted, we have removed another disability formerly imposed on British vessels. The Indian Merchant Shipping Act, 1880, which deals with the safety of shipping, has also been amended, and foreign ships in Indian ports will now be required to conform to the Indian deck and load-line regulations in the same manner as British vessels.

"One of the special matters to which a reference was made last year was the amendment of the law relating to patents. The Bill which was then promised has been drafted, and in September last it was distributed to Local Governments, patent agents and others with the view of eliciting opinions from the manufacturing public and others concerned in the protection of inventions and designs. In its main lines the draft Bill follows the provisions of the United Kingdom Patents and Designs Act of 1907, though it has not gone quite so far as that Act in the matter of compulsory working in the country, for which India as yet is not sufficiently advanced. We have not yet received replies to all our references but we hope that legislation may be possible next season.

"It will be within the recollection of Hon'ble Members that in December 1906 the Government of India appointed a Committee, presided over by Sir Hamilton Freer-Smith, to inquire into the conditions of labour in textile factories in India. This Committee's inquiry was of a preliminary character only and a representative Commission was appointed in October 1907 to investigate the labour question in respect of all factories, and to consider the various suggestions and recommendations which the Committee had made. Their report was pub-

[*Mr. Harvey.*]

lished in July 1908, and the opinions of Local Governments and public bodies were invited with reference to the suggestions contained in it. These opinions have now been considered; a Bill has been prepared to give effect to the decisions finally arrived at and is being submitted to the Secretary of State. I am not yet in a position to explain the provisions of the measure, but I hope that it will be possible to allow a considerable period for criticisms before legislation is undertaken.

"The Hon'ble Mr. Dadabhoy has referred at some length to the policy of the Government of India in industrial matters, and has proposed, without any serious examination of financial or other effects, the imposition of protective duties, the grant of bounties, and other economic devices, the merits or feasibility of which he does not, I am certain, expect me to discuss on the present occasion. Most of the other points which he puts forward were dealt with at some length by the Hon'ble Sir John Hewett in his speech in this Council three years ago. The attitude of the Government of India and the lines on which the Department of Commerce and Industry proposed to proceed were fully explained and these have not altered in the period that has elapsed since then. But in the meantime a considerable advance has been made. It is impossible and would in any case be most undesirable to attempt to centralise work of this kind in any Department of the Government of India. Local circumstances and local needs can only be properly gauged by Local Governments; the last condition we seek to impose is uniformity. The Local Governments whose attention was invited at an early stage of the existence of the Department to the necessity of fostering industrial enterprise have responded most cordially, and during the current year we have forwarded to the Secretary of State, with our hearty support, the comprehensive scheme of industrial and technical education framed by the Government of the United Provinces. In Bengal and Eastern Bengal and Assam surveys of the industries and resources of the Provinces have been completed, and a conference has just been held at Dacca. In Madras a conference was held last year and a new Department of Industries created; in the Central Provinces a survey has been carried out and in Bombay the hand loom industry has been selected for special enquiry, and His Excellency the Governor has taken active steps for the foundation of a Chair of Commerce at the University. In this way a great mass of material has been collected and made available to the public, and schemes are on foot for the provision of further facilities for technical and industrial education. I do not think it can fairly be said that Government has not done much, but there is a point at which Government assistance must stop and the enterprise of the people must take up its part. I should be sorry to think with the Hon'ble Member that Indians are wanting in the business qualities which are required for success. Surely his experience of their great commercial and industrial prosperity in Bombay and the Central Provinces should have saved him from such an error. But we are passing through a period of depression aggravated by unrest; capital is shy, and enterprise, especially in the smaller centres, must be restricted until better times come. In the meantime Government will steadily pursue the policy to which I have referred. The Commercial Intelligence Department has been developed and is ready to supply much useful information of the character which is indicated as being required; it will, as part of our policy in connection with the purchase of locally manufactured articles, collect and publish information regarding local sources of supply; but it will not, as the Hon'ble Member seems to suggest it should, attempt to act the part of financial adviser to intending investors or advertiser of the wares of individual firms.

"In 1907-1908 important reductions were made in postal rates, and the revenue must be given time to recover before we can make a further advance in this direction. It has however been found possible to make a small concession in respect of weight, which will assist the newspapers.

"The Council will perhaps expect to hear something about the changes which have been introduced into our telegraph system. The various measures

[*Mr. Harvey.*]

introduced have attracted much attention from the public, each in turn has been discussed and debated, and the Department has had to carry on its work under quite exceptional difficulties. I have every hope, however, that the process of reorganization will eventually produce the most beneficial results. No Department can hope to escape from periods of stress when it is called on to put its house in order, to modernize its machinery and to bring its methods up to date. If in the case of the Telegraph Department the convulsion has been unusually violent and prolonged, the reason must be found in the fact that the task of reform had been postponed long after the proper time for undertaking it had come.

"The state of affairs which Government set itself to remedy may be summarized as follows. The methods of traffic management which were in force were antiquated and obsolete, and while they imposed an unfair strain on the staff, they were directly productive of delay in dealing with public telegrams. The staff itself was dissatisfied with its pay and prospects. At the same time the financial position of the Department was unsatisfactory. Government was involved in unnecessary and wasteful expenditure, while the rates for messages were such that a large part of the traffic was transmitted at a loss. The process of reform may, therefore, be said to have had three objects. In the first place the work of signal offices had to be so organized that a prompt and efficient service might be rendered to the public. In the second place it was necessary to ameliorate the conditions under which the staff worked, and to improve and simplify the scale of pay. In the third place the expenditure of the Department had to be narrowly scrutinized with a view to retrenchment, and the message tariff so fixed as to prevent or at least to minimize loss. All these three objects have been steadily kept in view. Economy and efficiency are inseparably connected, and with a discontented staff the attainment of either is impossible.

"There is, I think, every reason to congratulate the Department on wha has been accomplished in the direction of reform, and the public recognize and appreciate the improvement. Perfection is not attainable at once and the Department has still much to do, if the ground which has been gained is to be kept and the standard to be raised still higher. But at least a good beginning has been made, and the acceleration of all messages has been most striking. In March 1908 in the thirteen largest telegraph offices in India only 12·4 per cent. of the messages were despatched within ten minutes of receipt, while 54·8 per cent. were delayed for more than forty minutes. In January 1909, 55·6 per cent. of the messages in these offices were being despatched within ten minutes of receipt, and only 11·1 per cent. were delayed for more than forty minutes. The results obtained in certain smaller offices have been even better. We had some difficulties with the staff in the early part of the year, into the details of which I need not now enter. But I may say that we have introduced more suitable hours of work, and reduced Sunday and holiday duties as much as possible, and we have, at a cost of some Rs. 5½ lakhs per annum, redeemed our pledge to improve the pay and prospects of the men. They in their turn have co-operated loyally with their superior officers in the carrying out of reforms, and are entitled to a large share of the credit for the improvements which have been effected.

"A recent change, which affects the staff very little, but the public a great deal, must be referred to briefly, I mean the substitution of two classes of messages for three and the revision of the rates. The triple classification was fast becoming obsolete and the time had come to get rid of one class. Every acceleration in the transmission of messages meant that the percentage of deferred telegrams to the total increased; and as the four-anna telegram was entirely unremunerative, the financial position was serious. The result was that Government were compelled to raise the minimum charge for telegrams of the lowest class. The change was made with reluctance, for in a country like India telegrams must be cheap if the people are to use them to any great extent; but when the alternative was to fix on the general tax-payer an increasingly heavy burden for the maintenance of telegraphs, there was no option left.

[*Mr. Harvey.*]

"In the strenuous work of the year Government and the Department have had the benefit of the advice of Mr. Newlands, and are much indebted to him for the able and practical way in which the various reforms have been devised and the untiring energy with which he has assisted in their introduction.

"In the matter of Railway administration some important alterations were made during the year. The status of the Chairman of the Railway Board was raised to that of President with the power to overrule his colleagues; the Board and the establishments working under them were removed from the control of the Department of Commerce and Industry and constituted a separate Department of Government with the title of the Railway Department. The new system was brought into force with effect from the 1st October 1908 and has worked in the most satisfactory way. The abolition of Consulting Engineers to which I referred last year has in the Board's opinion resulted in an improvement in the disposal of work without any sacrifice of efficiency, and the Governments of Bombay and Burma have found it possible to dispense with the assistance of the officers who were temporarily entertained for railway work in their Secretariats until experience of the new methods had been gained.

"The effects of the general trade depression have been reflected very plainly in the earnings of our railways. The figures relating to these have already been fully explained and I need not go over the same ground again, but I am glad to be able to say that there are already some signs of improvement, and with the prospect of a favourable wheat crop in Northern India and the amelioration of famine conditions generally, it is hoped that the gross receipts will to a large extent recover their position in the coming year. The Budget Estimate has accordingly been fixed at a normal figure.

"A noticeable feature of the present year is the absence of general complaints from merchants and traders regarding the shortage of wagons, of which so much has been heard during the past few years. This, of course, is partly due to the depression in trade; but the strenuous endeavours which all railways have been making to improve their existing stock, and to supplement it by large additions, as well as the additional facilities which have been provided to enable stock to be economically used, have no doubt placed railways in a much stronger position to meet the demands of trade for transportation, and it is hoped that when trade revives, the full effect of this will be made apparent. During the year 1908, 395 engines, 679 coaching vehicles and 9,987 wagons were actually added to the stock of railways, and 444 engines, 2 063 coaching vehicles and 10,962 wagons were under supply, while sanction has been accorded for a further addition of 59 engines, 139 coaching vehicles and 2,334 wagons. These are figures which should prove very re-assuring to those using railway transportation.

"The Hon'ble Mr. Dadabhoy's criticisms on railway matters are of a somewhat intangible character, but I will offer a few remarks in reply to what appear to be the principal points. He remarks in the first instance that there is a universal protest from the people against the present scale of expenditure on railways. The Railway Board, however, report that this is very far from being the case and that the necessity for extension is being pressed on them by all classes of traders, and persons in various parts of India, and that their great difficulty lies in deciding which of the many schemes demanded should have precedence in the order of construction. Since 1902-1903 the net revenue on railways has been sufficient to meet all interest charges on capital raised and expended on railway construction, and to yield besides a handsome surplus to the country, and if in the last year we have had a set-back, we have every reason to believe that it is of a purely temporary character. It is true that our Budget for the coming year is necessarily cautious, and though provision for capital expenditure falls almost entirely outside it we have recognised the desirability of husbanding our ways and means by reducing our programme by Rs. 3¼ crores: more than this it is unnecessary to retrench. The bulk of the available funds will be devoted to bringing existing lines up to the standard required by the development of traffic. Expenditure under this head consists mainly of the

[*Mr. Harvey.*]

addition of new lines, the construction of yards and crossing stations, the purchase of new and more powerful rolling stock in addition to the existing supply and so forth, and schemes of this kind cannot, as the Hon'ble Member lightly suggests, be charged to Revenue, which already, as the current year's working charges show, bears the cost of very heavy improvements in the existing facilities and its full share of any replacements. I do not propose to attempt to deal with the complex question of State and Company ownership, about which so much has been said and written, but I think it is a fair statement to make that if India had not provided funds either directly or by means of guarantees for the construction of railways the development of these facilities would have been very materially retarded. And without adopting the view that all railways should be nationalised, a policy for which there is much national as well as individual authority, I may say that few people would hold that Government lay themselves open to any reproach by providing communications and means of transport, when these would otherwise be unprovided. It is unquestionable that the policy of Government in this matter has been in every way greatly to the advantage of the country, and the industrial development, on the necessity for which the Hon'ble Member has laid such stress, will naturally require increased facilities for the exchange of commodities. I do not quite understand what the Hon'ble Member proposes to substitute for the present system. We are apparently to find some organisation that will buy us out and will provide funds for all future construction and working; we are at the same time to reserve some sort of control as an appellate authority to enforce 'up-to dateness' and 'excellence in management'. I am afraid that any ideas of this kind give little promise of practical fulfilment. An administration working with its own capital would naturally want to be free as far as may be of Government interference, and it may be taken as a truism that for all control, other than that relating to the public safety and convenience, we have to pay in one form or another. We do not claim that our present system is an ideal one, but it has fulfilled a very useful purpose. We hope to attract more outside capital by giving Companies a greater direct interest in the lines which they manage for us, by offering, if the Secretary of State approves, more remunerative terms for the construction of branch lines, and in other ways, and we look to these means for an increase and not a reduction in our present rate of progress.

"In the preceding remarks a number of general criticisms which have been made have been replied to, but there are one or two specific matters to which I may briefly refer. The Hon'ble Mr. Macleod has referred to the policy of Government with regard to the encouragement of private enterprise in the matter of railway construction, and I would invite his attention to the recommendations of Sir James Mackay's Committee. The Government of India are inclined to encourage the construction of Branch lines by separate agencies and to give more favourable terms than those at present prescribed by the rules, and they are making a recommendation to this effect to the Secretary of State. It must not, however, be forgotten that what is ordinarily known as 'private enterprise' here generally requires a subvention in one form or another, from the State. I am not aware that since the establishment of the Railway Board Bombay has been deprived of a hearing in Railway matters, and I am certain that the Board will always be ready to give such advice and information as may be available.

"With reference to the Hon'ble Raja Sir Muhammad Ali's remarks regarding the accident at Dasna, I may say that he is mistaken as to the finding of the Board, and that we have no desire to shift the responsibility to higher powers. Most searching enquiries were held both departmentally and in the Courts, and it was clear that the human agency was at fault though it was impossible to establish the guilt of any one particular person. The working of the tablet system has been thoroughly enquired into and I am informed that safety and reliability have been secured.

"The curtailment of the programme will not interfere with the progress of work on the Lower Ganges Bridge at Sara, a project which after many vicissitudes has at last ceased to be the subject of continual controversy.

[*Mr. Harvey; Mr. Miller.*]

"A definite site below Sara has been selected; the alignment of the approaches is in course of being determined and proceedings for the acquisition of land will shortly be put in hand. As soon as the rains are over a commencement will be made with the extensive brick burning operations that will be necessary and arrangements will be undertaken for bringing the large quantities of material for the protection works to the site; the temporary lines and yards required for dealing with the material trains will be laid out and the erection of workshops and quarters will be proceeded with. Provision has also been made for the first requirements of rolling stock and plant which will be needed during construction. In the meantime the design for the bridge is being carefully considered.

"The site of the Sara Bridge having been settled, public attention in Calcutta has now been turned to the proposal of the Bengal and North-Western Railway to take over and work the Eastern Bengal State Railway. The relief from the necessity of providing funds annually for capital expenditure is the only attractive feature of the proposals, and we realise that there may be disadvantages which will more than counterbalance this. Reference has been made to the Local Governments and Chambers of Commerce who are interested in the matter, and their views will receive full consideration before the Government of India communicate their recommendations to the Secretary of State.

"I have, finally, a few remarks to make in amplification of the Press communiqué which was issued a few days ago announcing the decision of the Secretary of State in respect of the recommendations of the Stores Committee. It has been decided that their Report should not be published, but it may be of interest to mention a few of the principal conclusions which have emerged from the discussions that have taken place. It has been clearly brought out that partly owing to a defect in the form in which the rules were cast and partly owing to practical difficulties in applying the conditions laid down for deciding on the source of supply, officers of consuming Departments have not given, or have not in practice been able to give, full effect to the policy of Government regarding the encouragement of local manufactures. An examination of the indents of the chief consuming Departments for a year disclosed the fact that orders to the value of over £400,000 for articles, many of which could probably have been obtained of local manufacture, had been sent home and there is little doubt that the resources of Indian manufacturers were as a whole not being utilised to the full and that in the case of engineering trades in particular the larger firms at Calcutta and Bombay received more assistance from local bodies, railways other than those worked by the State, and general private enterprises than from Government. It has also been fairly established that on the whole Indian firms have been able to supply a sufficiently good article at a price which over a number of cases compared not unfavourably with home prices. Since the Committee's Report was submitted, we have been in correspondence with the Secretary of State, and it will be observed from the communiqué which we issued that a substantial modification of the present procedure has been agreed to. We have decided that it will be necessary, in order to ensure that full effect is given to these rules, to adopt some special measures to prevent indents being sent home for articles which can be obtained in India of local manufacture. We are now engaged in working out a scheme to provide for an inspection of such articles throughout India, and we have to settle in consultation with the Secretary of State the measures to be prescribed to enable departments to compare the home prices with those prevailing in India. We hope to be able to arrive at a decision in this matter in a short time, and to introduce the new rules, and we desire it to be understood that it is part of our settled policy to encourage the purchase of local manufactures, and that we shall expect our officers to give full effect to this policy as laid down in the comprehensive orders which will shortly issue."

The Hon'ble MR. MILLER said:—"We must all sympathise with our Hon'ble Colleague, the Finance Member, that the presentation of his first budget has followed a period of severe depression throughout the world generally,

[*Mr. Miller.*]

the effects of which have unfortunately been intensified in India by yet another season of serious drought.

"The Financial Statement gives a resumé of the main facts concerning the famine and scarcity, and I shall not take up the time of the Council by going into details. It is the less necessary to do so as a very complete and interesting account of the relief operations in the United Provinces, which were the most seriously affected, was issued some months ago, and attracted much attention in the Press. The public are, therefore, fully conversant with all the main facts of the famine campaign in those Provinces and I confine myself to a few general remarks.

"Towards the close of 1907 the situation appeared extremely gloomy. The rainfall returns were most unfavourable and indicated the possible addition of yet another great famine to those we have suffered from in the last twelve years. Over very large areas the monsoon rain was deficient and ill-distributed, and the position appeared to be in many places worse than in 1896-97. But distress did not develop nearly so rapidly as in that year, nor did it, except in the United Provinces, become so acute at any time. There cannot be any doubt, in my opinion, that the people were better off and better able to face a period of distress than in 1896-97, in spite of the fact that another great famine had occurred in the interval. The recovery from these successive calamities has fortunately been rapid; and that is one reason why the drought of 1907-08 was not so serious in its effects as some of its predecessors. But I doubt if the public have ever realised how serious it might have been, and to how great an extent it is owing to the admirable promptitude with which measures of relief were set on foot that the sufferings of the people were not much more severe. Suspensions or remissions of revenue were given at once, advances were made on an exceedingly liberal scale and all the preparations for relief were kept well in advance of actual necessities. The administration was in consequence never taken unprepared; it was ready for each new development. The result was that all acute distress was relieved; there were none of the usual grievous accompaniments of famine, and, what is perhaps more exceptional, there were few of the usual complaints against the administration. Of the intensity of the drought we are now having some disquieting indications in the withering of the trees over large areas in the Sub-Himalayan forests of Northern Oudh; but the sufferings which it threatened to cause were so effectually and sympathetically remedied by able and alert administration that the anxiety which the situation caused to the Government hardly communicated itself in the same degree to the public.

"The experience of the famine has shown that the conditions under which relief has to be given are changing. The readiness of labour to move in search of employment, the possibility of finding employment and the very great demand for labour have greatly altered the situation. To take an example near at hand: there was we know much distress in Orissa, due not entirely to drought. The able-bodied flocked to Calcutta, or went to Burma, but the care of those who were left devolved to a great extent on the State. The problem then was not so much to find labour as to provide for those who were incapable of it, and the same problem, to a greater or less extent, affected other tracts; gratuitous relief had to be expanded, relief works were not necessary to quite the same extent as before. This feature of the situation was fully realised in the Central Provinces, where, next to the United Provinces, the distress was most general and acute; and where it was met, as far as possible, by an expansion of ordinary works—useful works that would have been executed at some time even had there been no famine—and where special famine works were resorted to only where it was impossible otherwise to make sure that relief would reach those who were unfit for ordinary labour. It is, as Hon'ble Members know, a very difficult and delicate matter to follow in famine administration the narrow path that separates profusion and waste on the one side from a niggardly administration of relief on the other. One course that may be followed is to put the Famine Code into force and to leave the responsibility to the automatic working

[*Mr. Miller.*]

of its provisions. In the Central Provinces, the Chief Commissioner took the responsibility on himself. Famine relief on a large scale can hardly be administered, however carefully, without some demoralisation of its recipients. The Chief Commissioner gave assistance liberally, but he resolved to give it as long as possible without resort to special famine procedure. He trusted in the first instance to the expansion of ordinary works managed upon ordinary methods, and his thorough knowledge of the country and the experience which he and his officers had gained in previous famines enabled him to do so with complete success. The report on the administration of relief in these provinces states that—

'Throughout the hot weather and rains the system worked without a hitch, and it may be claimed that it has thoroughly proved its suitability for adoption in a year when distress rather than acute famine was to be feared. Its success in preventing waste and demoralisation is incalculable.'

"These claims are, I think, fully justified by the result. The administration has been economical, the ordinary operations of trade and agriculture and industry have not been interfered with, and the people have been trained to rely on themselves as far as possible. The relief given was liberal and sufficient, but only a small proportion of it took the form of direct famine relief, and the greatest part was given in forms that could not affect the independence and self-respect of the agricultural and labouring classes. A similar system would be more difficult to follow in the case of widespread and very severe famine, but it was admirably suited for the condition of the province in which it was applied; and as the country develops, I have no doubt that further scope will be found for action on somewhat similar lines.

"A very gratifying feature of the recent operations is the extent to which private individuals have co-operated with the State, both in giving relief themselves and in assisting in its administration.

"The shadow of distress still hangs over a large part of the country this year. The monsoon last year stopped prematurely, the cold weather rains were, except in a few places, light and scattered, or failed altogether; in parts of Behar there has been a complete failure of the crops and there we shall have famine relief operations on a fairly extensive scale, while some relief will also be required in the east of the United Provinces, and in portions of Eastern Bengal. In the South of India the outlook is very unsatisfactory in the State of Mysore, but the administration there is fully alive to the necessity of making all its preparations in good time. In Upper India the cultivated area was threatened with serious curtailment owing to the outbreak of a virulent form of malaria last autumn, but the accounts of the rabi crops there are becoming more sanguine, while in Burma there has been an excellent harvest. The outlook therefore, if not so bright as we should like, is by no means discouraging, and as we have found in the past so I have no doubt we shall find again that a single good season will lead to a rapid and complete recovery.

"One branch of the operations of the Agricultural Department has attracted unusual interest and attention during the past year. I mean the growth of the Co-operative Bank movement, and the question of agricultural credit generally. It may be found advisable, and, what is more doubtful, it may be found practicable to deal with this great question on both co-operative and non-co-operative lines, but at present I confine my remarks entirely to the former. When power was taken to start Co-operative Banks only a few years ago, the Government refused to commit itself to any sanguine expectation of early success, and as it at the same time declined to give any liberal pecuniary assistance, its motives were misinterpreted, and it was, and still though less frequently is, accused of merely playing with the subject, when nothing seemed easier to its critics than by some financial arrangement to provide the ryot with a cheap flow of the capital he stands so much in need of. State charity is always popular; it is not always as experience has shown of permanent benefit. The ryot unquestionably, like all producers in all countries, requires capital, and it is the case that he cannot obtain it at present except at

[*Mr. Miller.*]

very high rates. He is weak through ignorance and isolation, he cannot meet his creditor on equal terms. What the Government did was to set itself to remove these disabilities. It attempted to adapt to Indian conditions a system which would substitute some knowledge of business for ignorance and some scheme of organization for isolation. It desired to replace the weakness of the individual by the strength of a body of co-operators. It declined to bolster up the movement by lavish grants of Government assistance; it offered assistance, indeed, but on strictly limited principles. It ought not to be necessary to say that it was not from any niggardly feeling that Government refused to finance the Societies. During the last year, Government has advanced over two crores of rupees to the cultivators in the United Provinces alone for agricultural purposes and it would, with equal readiness, have found funds for the banks if it had thought that such a course would be for their ultimate benefit. But it was aware that State assistance has in other countries as well as in at least one previous attempt in India itself proved fatal to the movement. Co-operation is a plant which can thrive only on the soil of self-reliance, and for this reason the Government has made the Societies rely mainly on their own efforts. If they could not establish themselves and make co-operation a living force, they had to go to the wall. In one other respect, too, the Government has refused to give exceptional assistance to the Societies. Considerable pressure has been brought to bear to allow them to recover their dues through Government agency. No one doubts that if Government made itself responsible for recovery the scope of the Societies could at once be greatly enlarged, and capital could be attracted at much more favourable rates than is possible now. It seems unreasonable to many that this small assistance has been withheld, but it has been, and I think rightly, withheld up to the present. Government assistance must necessarily lead to closer Government supervision, possibly even to actual Government management, which would completely alter the character of the movement, and would at once eliminate many of the qualities we wish to encourage. There may be circumstances in which an experimental departure from these strict principles would be desirable; one need not be too pedantic, but up to the present, we have refused to admit the principle of Government recovery, and the opinion of those who have studied the subject under Indian conditions appears to me to be strengthening in favour of the policy we have adopted.

"The Societies as a whole therefore, and leaving out special cases where some departure from the ordinary procedure was held to be justified for experimental or other reasons, have received little financial assistance from Government; the Government share has mainly been the advice and guidance and audit of the Registrars who have all entered on their work with great enthusiasm, and whose confidence in the ultimate results seems to be fully justified by the remarkable progress that has been made.

"The number of Societies has increased in the past year from 843 to 1,201, the number of members from 91,000 to 149,000, the deposits by members from 5¾ lakhs to 9 lakhs, and the total capital from 23¾ lakhs to 44 lakhs. These are very significant figures, but to my mind even more important than figures is the interest which the movement has aroused outside of official circles. It is being recognised as a real development, worthy of the attention of all who have the interest of India at heart; and the banking and commercial world have paid it the compliment of serious consideration. The constant discussions of the subject in the Press; the interest excited by the Simla and Bombay Conferences; and the very clear and thoughtful examination of its economic and moral aspects by Professor Lees Smith are all indications, more important than statistics can give, of the degree of success attained up to the present.

"All this discussion has been most valuable; it has educated public opinion and has helped to secure a much more correct and thoughtful appreciation of the problems we have to deal with, which will, I hope, serve to safeguard the movement against attempts to press it too fast on doubtful lines. It is securing us help from non-official agency, which is warmly recognised in many

[*Mr. Miller.*]

of the reports, and it will be of great use in assisting in the further evolution of the system. At the present time when the resuscitation of village institutions is much before the public, I should like to quote the following remarks by one of the Registrars :—

'A village bank at once takes its place among the institutions of the village and arouses universal interest. It draws the best people of the village together, and creates a real sense of proprietorship. It causes the man of bad character to reform and the rent-defaulter to meet his engagements in order that he may have the privilege of belonging to the Society.'

"The Council may have seen a recent letter from the well-known authority Mr. Wolff—in which he says that—

'Nowhere has co-operative banking struck root so quickly or made such progress in its earliest stages as in India.'

"This is particularly gratifying in view of our abstention from giving the Banks assistance on lines that might have led to a much more rapid initial development, but that we did not think were sound. The Societies are now increasing beyond the powers of the Registrars to supervise and their further development is now a matter requiring much care and consideration. All indications point to the next step as being the grouping together of the village institutions; the co-operation of the individual Societies, so as to give them a status that will allow of their coming into touch with the other banking institutions of the country. Already some progress in this direction has been made, and with a fair degree of success.

"The introduction of co-operation into this one branch of rural life seems further likely to encourage its adoption for other purposes, and the need of co-operation in a society of small agriculturists has been shown by the experience of many other countries. That is a subject which I do not propose to follow up on this occasion, but apart from many instances on a small scale that have come to my notice of the tendency I should like to mention the co-operative scheme for cultivation in the Sunderbans recently set on foot by Sir Daniel Hamilton, whose interest in the advancement of the agricultural classes is well-known to this Council.

"I promised some time ago, in reply to a question, to explain more fully why expenditure on Irrigation had fallen short of the average expenditure recommended by the Irrigation Commission in its 20 years Programme—a programme that was accepted, though only as a general guide, by the Government of India and the Secretary of State.

"The programme contemplated an expenditure of 44 crores in 20 years, or 220 lakhs a year. Of the 44 crores, 15 crores were for Productive Works and 29 for Protective. It has always been the practice to finance Productive Works from loans or from surpluses, and the Commission recommended that the same procedure should be applied to all works on the ground of the great advantage of carrying such works through without the dispiriting and expensive necessity of curtailing and expanding the annual programme according to the financial vicissitudes of the day. The Government of India and the Secretary of State were, however, unable to accept this recommendation, and though the Commission gave strong arguments in favour of it, the decision was perhaps inevitable at a time when we were only beginning to embark on a programme which would, as far as direct expenditure and receipts were concerned, throw a permanent burden on the finances. It was arranged therefore that while a crore and a half should, if necessary, be provided annually for Productive Works, the expenditure on Protective Works should be charged against Famine Insurance, and should not exceed half of the amount allowed for that purpose, namely, 75 lakhs a year, this amount being subject to reduction if in any year there was actual expenditure on famine.

"As compared with the programme the arrangements made provided for the expenditure of double the amount contemplated for Productive Works, and

[*Mr. Miller.*]

of a little over half the amount required for the Protective programme. Moreover while the supply of funds for Productive Works was assured, the financing of Protective Works was left theoretically in a somewhat precarious position, as we might in any year, owing to the conditions made, find ourselves without funds to carry them on, but in practice the Government has been able to be more liberal, and a grant approaching 75 lakhs has always been made when required. The total provision which Government was prepared to make, and up to which the Irrigation Department might work, namely, 1½ crores for Productive Works and three-fourths of a crore for Protective, was a little in excess of the 220 lakhs a year contemplated by the Commission; though it was distributed in a different way; and the figures include provision for Burma which was outside the scope of the Commission's enquiries.

"There are a number of minor reasons for this difference, and one reason of importance. Productive Works we have long been accustomed to, and plans and estimates for very large works of this kind were ready or in an advanced stage of preparation. Protective Works, on the other hand, were exceptional; they did exist, but they were rather in the nature of experiments; and there was no system regulating their construction. Surveys had still to be made; the Commission could do little more than call attention to the most promising Works; their conclusions had to be verified, and patient investigations to be set on foot to decide whether on further examination their suggestions should be adopted, and a sufficiently strong case made out to justify the expenditure of public funds on works that were not directly remunerative. It was quite clear from the outset that it would be several years before the expenditure on Protective Works would exceed the provision of 75 lakhs.

"At the same time it had become evident that the scope for Productive Works, or works which it was hoped would be Productive, would be far greater than the Commission contemplated. This was chiefly owing to developments in the north-west of India,—in the Punjab, including the Frontier Province, and above all in Sind. For the Punjab the Commission estimated an annual expenditure of 10½ crores, or 7½ crores if we omit 3 crores for the project of irrigating the Sind Sagar Doab from the Indus—a project which does not at present seem likely to be undertaken at an early date. But the Works already under execution in the Punjab are estimated to cost 9½ crores, and over 4 crores more are likely to be required for other works that will probably be given precedence over the Sind Sagar project. Thus we may forecast an expenditure of 14 crores as compared with the 7½ of the Commission, or 17 crores compared with their 10½.

"For Sind the Commission suggested a small provision of a crore. But there is now under investigation a great scheme for giving that Province a system of perennial irrigation from the Indus to take the place of the Inundation Canals now in use. The utilizing of the Punjab rivers for irrigation on an extended scale will affect the working of the Inundation Canals lower down, and the substitution of a perennial system will avoid this and other drawbacks, and, it is expected, will form a great Productive Work. The Sind schemes have not yet been completed, but their ultimate cost may prove to be as much as 13 crores of rupees. In Madras also it is probable that there will be some addition to the productive programme.

"As regards Protective Works, I have no doubt that their scope will also greatly increase; there are signs of that development already. The Irrigation Commission only dealt with works that they thought might, if the results of investigations were satisfactory, be undertaken within 20 years. As far as these specified works go it seems improbable that we shall work up to the programme, chiefly owing to doubts about the comprehensive projects in Madras for which the programme provided 12 crores of rupees—the Tungabhadra and Kistna schemes. I cannot say what may be the ultimate fate of these projects, on the investigation of which much money has been spent, but it appears improbable that both will be carried out. On the other hand, in the Deccan, in the United Provinces, and in the Central Provinces, if the experimental works already

[*Mr. Miller.*]

undertaken prove as successful as we hope, the ultimate expenditure will probably be much greater than the Commission contemplated.

"Up to the present the expenditure on irrigation works has not reached the average amount contemplated by the Commission and for which the Government arranged conditionally to provide. In the present year we expect for the first time that it will reach the full amount of a crore and a half allowed for Productive Works, and I have no doubt that if we should require more for such works, the Finance Member will not, when the present position improves, be hard-hearted. It is not owing to any reluctance on the part of the Financial authorities that we have hitherto fallen short of the amount contemplated. The construction of irrigation works is not to be undertaken lightheartedly, and even when construction begins it is not possible to push on at more than a certain limited pace. Large works have a tendency to absorb the whole available labour supply; and the expense in canals is chiefly in the payment of labour on the spot. The Hon'ble Mr. Dadabhoy blames the Government for not immediately spending 200 lakhs on Irrigation to make up the deficiency that there has been in our expenditure in the past as compared with the forecast made by the Commission. The Hon'ble Member apparently thinks that Government has merely to say to its engineers: 'Here are so many lakhs, go and spend them.' There are as yet no large Irrigation works—no great canals—in the Province which the Hon'ble Member represents so energetically and in many respects so ably in this Council, and I am doubtful whether any explanation of the impossibility both on engineering and financial grounds of adopting such a proposal as he makes would be such as he could fully appreciate. I will merely ask him to consider the following figures which show in the most convincing manner that money cannot be spent without limit on irrigation, and that the short expenditure on irrigation up to the present is due not to the refusal of the Government to provide funds but to inability to spend even such moderate funds as were provided.

" In 1902-03 we budgetted for an expenditure of 114 lakhs. The actual expenditure was only 99 lakhs.

" In the following years the corresponding figures were :—

Years.	Provided lakhs.	Spent lakhs.
1903-04	125	98
1904-05	160	86
1905-06	182	128
1906-07	191	173
1907-08	195	189
1908-09	212	212 (Probable expenditure).

" It will be seen that our actuals and estimates are coming into much closer agreement, and that the actual expenditure has more than doubled in this short period. Even so however the pace does not satisfy those whose opinions are voiced by my Hon'ble friend. For my own part I think that their view is entirely unreasonable, and that if we plunged into schemes on the principles they advocate we should very quickly be pulled up not only by the Finance Member and the Secretary of State but by public opinion. It is possible that there may be a large increase in our productive expenditure, if we have works in hand in Sind and the Punjab proceeding simultaneously. But it will be temporary, and I do not think that too rapid an increase is desirable, if the works are all in the north-west of India. The large schemes on which we have embarked in recent years alter the whole face of the country; their effect is little appreciated except by those who are in actual contact with the facts. They bring under cultivation lands that formerly were desert; they provide outlets for the population of congested tracts; and raise the poorer tenants or even the labourers to the position of well-to-do farmers. They absorb a great part of the population that would otherwise have cultivated the lands of others, or have been employed in service of some kind. They affect the climate; they may render unprofitable the industries by which the rural population have hitherto been supported, such as camel-breeding. Such changes alter the economic aspects of the country; they

[*Mr. Miller.*]

limit the supply and therefore enhance the wages of labour, and if at the same time, as has happened in the Punjab, the population is attacked by epidemics the supply of labour may even be unequal to undertaking the agricultural operations required to take advantage of the large areas reclaimed from the desert. It is not desirable that such great changes should proceed too quickly; the country should work up to them gradually. A time comes when it is better to consolidate and improve than to aim at a still more rapid growth of the area commanded by canals.

"As regards Protective Works, however, the time has come when the rate of expenditure must probably be increased. I have explained that a provision of 75 lakhs a year was arranged for, subject to certain conditions. It has now been decided, with the consent of the Secretary of State, to raise the amount to 100 lakhs, but the former restrictions still apply, and for the coming year we cannot provide the full amount. The money has to be found from revenue, and the provision may be reduced in any year in which there is famine expenditure. It is impossible therefore to say definitely what amount will be available in any year, but the total provision allowed will, as far as can be foreseen, be ample for some time, if the future financial situation should permit of its allotment in full. It will allow of the more rapid progress which Bombay is anxious to secure; it will provide for the large project of irrigation from the Tendula in the Central Provinces, if that should be sanctioned; and it will probably permit of our embarking on more comprehensive projects in the United Provinces than were contemplated by the Irrigation Commission. With reference to the Hon'ble Mr. Macleod's remarks I may say that the allotment for protective works in Bombay is nearly 24 lakhs, a larger allotment than has been made to any other province.

"The total irrigation from State works during the year 1907-1908 has been:—

	Acres.
From Productive Works	14,458,015
From Protective Works	353,462
From Minor Works	6,153,054
TOTAL .	20,964,531

"That it is difficult to bring home to the mind the real significance of these figures is abundantly evident from the terms which the Hon'ble Mr. Dadabhoy has thought it necessary to use in depreciation of the work done by the State to develope irrigation in India. My Lord, I am glad that these remarks have been made openly in Council, because they give the opportunity of replying to ill-informed criticism that is by no means infrequent. My only regret is that it is my friend Mr. Dadabhoy who has identified himself with these objections, because there is only one explanation of the tone of the remarks made to-day, and that is ignorance of the facts. If the Hon'ble Member had confined himself to his own Province he would have been on surer ground; when he ranges over the whole field of policy in India he displays some want of acquaintance with the real position. If he would only go and see for himself; if he would spend a week on one of the great canal systems in this country, and then, if he chooses, compare what has been done in Egypt and America, we should not have to listen to the remarks we have heard today. He thinks to support his case by quoting from a great American orator, who made, if I recollect aright, a hurried rush across this country—a politician whose flow of eloquence has not secured him over-much credit in his own country. If the Hon'ble Member wants an American opinion, why does he not go for it to an American engineer? He would then very quickly learn that his own country, of whose efforts he talks so slightingly, has led and still leads the world in the matter of State irrigation, and that the recognised pre-eminence of India in this respect might well be the subject of some patriotic pride. What share Indian officers have had in the development of irrigation in Egypt is well known, but it is not so well known to what an extent other countries turn to India for advice and assistance.

[*Mr. Miller ; Sir Harvey Adamson.*]

One of our officers went to Australia to assist that country ; several have been required in South Africa ; one is, or was, engaged in Spain ; the Americans have unofficially utilised the advice of another; the Turkish Government has now engaged a famous Indo-Egyptian Engineer to advise it about Mesopotamia; an American Engineer is even now studying our system with a view to irrigation developments in the Philippines ; we have had enquiries or enquirers from Brazil, from Mexico, from Russia, and from Japan. Is it because irrigation has been shamefully neglected in India that all these other countries are so anxious to get the benefit of our experience ? The Hon'ble Member makes some comparisons with America and Egypt. Let us take Egypt, the country which, next to India, knows most of Canal Irrigation. Such irrigation is extending to Upper Egypt and has a great future before it, but up to the present it is chiefly Lower Egypt that has benefited. The whole cultivated area of Lower Egypt is some 3½ million acres, so that even if we suppose every acre of this to be canal irrigated the total is only one-sixth of the area which has in a single year received irrigation from sources provided by the State in this country. We have far greater scope here, and we have taken advantage of it to such an extent that comparison between Egypt and India as a whole can serve no useful purpose. Notwithstanding its magnificent developments under the guidance of Indian engineers, Egypt, to use a colloquial expression, is not in it. To those who judge by comparisons, I would suggest a method that is more likely to give results unfavourable to India. Let them compare what Egypt has done from the Nile with what India has done and is doing from a single one of her many great rivers—say from the Chenab. On such a comparison the Indian figures will, no doubt, come out second best ; but I am quite willing to accept this result in the full conviction that the Hon'ble Member and those who think with him will rise from the investigation with a much more correct appreciation of the great work done by the long line of engineers who have succeeded Cautley and Cotton, and whose names are perhaps better known in other countries than in this. It is more out of regard for their achievements than merely to defend the policy of the Government that I have dealt with this subject at some length. The statements made as to India's falling behind in Irrigation are entirely inaccurate, and I can attribute them only to that frame of mind which judges of the importance of any subject by the number of paragraphs about it in the newspapers. The Indian Irrigation Engineer has not mastered the art of self-advertisement ; it almost seems as if he had learnt, from the great rivers which he controls, the lesson of self-effacement. The stranger may admire some splendid aqueduct taking a canal over a river, or the crest and buttresses of some immense weir or barrage. Only the engineer knows that the work which is seen is a mere fraction of that which had to be done in conditions of constant anxiety and suspense. All the most difficult and all the most massive work is buried for ever below the water and the sand. The engineer seems to feel the effect of this example ; he buries the interesting part of his work—the part that might appeal to the public—under the masses of statistics and technical detail of his reports, and passes on from the tracts rendered fertile by his operations, looking not for fame or gratitude but for fresh deserts still to be conquered. The truth is that India is far ahead of any other country, and that the rate of progress was never so rapid as it is today. The allegations to the contrary are as a rule passed over by the engineer in silence ; but when they are countenanced by a Member of Your Excellency's Council they must cause astonishment, and if unchallenged by the Government they would give undeserved pain to a body of men who have achieved far more for the development of the irrigation resources of the country than has ever been attempted in any other part of the world."

The Hon'ble SIR HARVEY ADAMSON said :—" The sum allotted for Education in the Budget is 257 lakhs. The amounts expended in the last three years were 201, 222 and 252 lakhs, respectively. The increase provided for

[*Sir Harvey Adamson.*]

1909-10 is small, just five lakhs, but it is satisfactory that in a time of financial stress it has been found possible to give even a small increase. There is no subject in which there is more room for a liberal expenditure. Much attention has been devoted during the past year to maturing schemes of improvement, and Local Governments have them ready in hand for introduction when funds can be found. These schemes relate to Primary, Secondary, University, and Technical Education, and it is unfortunate that their progress is barred for the present by lack of money.

"Effect is gradually being given to the settled policy in respect of University Education. In 1904 an Imperial grant of five lakhs of rupees per annum for five years was given in aid of University Education. The period has now expired, but provision has been made in the Budget for continuing the grant or the coming year.

"The work of inspection of colleges has been pursued with great energy Owing to the devotion of the Vice-Chancellor, Dr. Mukerjee, and his colleagues on the Syndicate and Senate, the Calcutta University has been able to complete the work, and has obtained the orders of the Government of India in respect of the degree of affiliation to be enjoyed by almost every college within its jurisdiction. The effect of these labours was lucidly explained a few days ago by the Vice-Chancellor in his convocation speech. In the proceedings for the revision of affiliation two objects have been kept steadily in view. The first is to maintain a governing body capable of exercising a real financial and educational control for the benefit of the institution. The second is to prevent the dissipation of energy which resulted from the old system of sending up candidates on any and every subject, and to concentrate effort on those subjects only for which adequate instruction is provided. It is gratifying to find that the decisions of the University have as a rule been readily and loyally received by the institutions that are affected by them.

"The Calcutta University has also caused the schools which are recognized for the purpose of the matriculation examination to be inspected. These inspections have, I regret to say, disclosed somewhat unsatisfactory results. A large percentage of the schools have been found to be very inefficient. The University has very rightly dealt tenderly with them. In only a small number has recognition been withdrawn, and these have been mostly bad schools in the neighbourhood of good schools. In other cases time has been given varying from six to twelve months to comply with the requirements of the University. There never has been a desire to close a college or school which fulfilled a useful object. The aim has been to assist those in charge and to raise the institutions to a higher level.

"In respect of both colleges and schools there is a wide field for private munificence, and I hope that the earnest appeal which Dr. Mukerjee in his convocation speech made to his countrymen will meet with a liberal response.

"There is a reasonable prospect that the arduous labours of Dr. Mukerjee and his colleagues, for which they deserve public gratitude, will be crowned with conspicuous success.

"In carrying out the scheme of reforms which was the result of the recommendations of the Police Commission, the actual amount of the subventions which have been given to Local Governments, including the sum given in the Budget for 1909-10, is 141·42 lakhs. Something over one-third of this sum has been devoted to improving the pay of constables and head constables and to increasing their numbers so as to enable them to have a reasonable amount of time off duty and to get a reasonable amount of leave. The next largest item—nearly one-third of the whole—is on account of the increase of the pay of Sub-Inspectors, and the addition to their numbers which was required in furtherance of the policy that so far as possible the investigation of offences should be conducted by officers of not lower rank than Sub-Inspectors. This accounts for roughly two-thirds of the whole, and of the remaining third a large item is on account of Inspectors, while a considerable sum has been allotted for the new

[*Sir Harvey Adamson.*]

rank of Deputy Superintendent. The pay of Superintendents and Assistant Superintendents has also been increased and the prospects of the service are now sufficient to attract an excellent stamp of recruit.

"It must be remembered however that the reforms cannot be expected to produce their full effect at once. It takes time for police officers to be trained and to gain the necessary experience; but considerable improvement has already been made, and if the right class will come forward for the rank of Sub-Inspectors we may expect a marked change for the better. The success of the police however depends even more on the assistance given by the people themselves than on the detective abilities of the police officer. The iniquities of the police are a favourite theme; it would be profitable sometimes to dwell on the difficulties they have to encounter owing to the absence of that civic spirit which in other countries induces the people to co-operate with the police in bringing offenders to justice. The murder of Inspector Nanda Lal Bannerjee in the streets of Calcutta was witnessed by many people, yet when the police arrived on the spot a few minutes later, the street was deserted, every door was shut, and no one would admit that he had any knowledge of the occurrence. Compare with this the assistance which the London Police received from the people in the pursuit of the perpetrators of the recent Tottenham outrage. This is the spirit of co-operation that we should like to see in India and that newspapers and influential men should advocate. After all the police officer comes from the same class as the members of the learned professions and the public services, and his desire must be to work honestly and bring the guilty to justice. If the people will trust him and co-operate with him, volunteering information when they have it, and not shielding the offender, the antagonism between the police and the people must disappear.

"With reference to the Hon'ble Mr. Apcar's inquiry about the scheme for the improvement of Calcutta, I explained last year the difficulties of carrying out an immense project of this kind with celerity. A draft Bill for giving effect to the scheme as approved by the Secretary of State has been received from the Bengal Government. As indicating the complexity of the subject I may mention that the Bill contains 191 clauses. It is under examination at present and must be submitted to the Secretary of State for approval before it can be introduced in the Bengal Council.

"The Hon'ble Mr. Andrew asks that early orders may be passed on the scheme for the revision and redistribution of District and Divisional charges in the Madras Presidency. The scheme involved the consideration of complicated questions in respect of the strengthening and regrading of the district executive and judicial staff, the reorganization of office establishments, and the revision of the subordinate civil service, questions which necessitated considerable discussion. I am glad to announce that the Governments of India and Madras have now reached a complete accord, and that the proposals will be submitted immediately to the Secretary of State

"With reference to the Hon'ble Mr. Gokhale's remarks about certain persons who are now under deportation, the Hon'ble Member must be well aware that the Government have far better means of judging of the necessity of the step which they took than the Hon'ble Member, who bases his conclusions simply on personal acquaintance of these persons and on that knowledge assumes that the Government acted in error. I am very far from admitting that the Government acted on unreliable information or that there was any error at all in their action.

"I will now advert to a subject on which there has been of late a considerable amount of controversy. The Hon'ble Mr. Dadabhoy says that the introduction of the principle of class representation on the basis of the fancied importance of Mahomedans has taken away the chief merit of the Reform scheme and given umbrage to the great non-Moslem communities of India. Now let us look at the facts and see exactly what has been proposed. Excluding special Mahomedan representation the electorates which have been proposed for the Provincial Councils are the Universities, the corporations of the Presidency-towns, District Boards

[*Sir Harvey Adamson.*]

Municipalities, Landholders, Chambers of Commerce, Indian Commerce, Mill owners and Trades' Associations, and the planting community. The electorates proposed for the Imperial Council are the non-official members of Provincial Councils, Landholders, Chambers of Commerce, and Indian Commerce. In addition provision is made for representing small minorities occasionally by nomination. In the electorates which I have enumerated there is no class or religious representation. All classes and creeds vote together on an equal footing. But if we rest here injustice will be done. There are two classes in India which stand out in great prominence over all others, the Hindu majority and the large and important Mahomedan minority. Say what you please as to the desirability of bringing the great Hindu community and the great Mahomedan community into closer union, existing facts must be faced, and it is undoubtedly the case that at present Hindus and Mahomedans differ not only in religion but in almost everything else, to such an extent that it would be nearer the truth to say that they are in political antagonism than to say that they are in political harmony. The general electorates are open to Hindu and Mahomedan alike, but what will happen if we leave it at this, without making any special provision for securing an adequate representation for the Mahomedan minority? The result will be, as the past history of elections for District Boards and Municipalities has clearly shown, that the Mahomedan vote will be swamped by the Hindu vote, and that Mahomedans will not obtain a representation proportionate to their numbers and political importance. It is therefore necessary, as conditions stand at present, to provide some means by which Mahomedans may obtain such number of additional seats as will bring their representation into due proportion. There are two ways of securing this end—either by nominating Mahomedans to seats over and above those which they obtain in the general election, or by allowing the Mahomedan community itself to elect members for these seats. One way or the other must be adopted in order to meet existing conditions. The time may yet arrive when the Mahomedan community will have become sufficiently organized to secure for themselves a due proportion of representation at the general elections. But that time has not yet come. If it ever does come it will then be both unnecessary and unjust to give them further facilities for representation. Meanwhile we propose to frame the regulations so as to meet the existing condition, which is that Mahomedans cannot obtain due representation unless they are given something over and above what they may secure at the general election, and if this condition changes then it will be a simple matter to revise the regulations so as to meet the change. So far as I am aware no exception has ever been taken to the principle that nomination may be added to election so as to secure representation for minorities. Nay more, it has been universally admitted that in the case of Mahomedans nomination may properly be applied to save them from being disproportionately outnumbered in the Councils. The reservation of extra seats for Mahomedans is exactly the same principle, and whether these seats are filled by nomination from outside or by election from within is a matter which, it seems to me, can be of no concern to any but the Mahomedans themselves. It is gratifying to find that the action of the Government of India in this matter has been supported by so shrewd a politician as the Hon'ble Mr. Gokhale. There is a sentence in his able speech which puts the whole principle in a nutshell, and which will bear repetition—'The great advantage of the plan,' he says, 'is that it provides for composite action by all communities up to a certain point, and then it prevents injustice in practical operation to minorities by giving them special supplementary electorates of their own.' That is exactly the principle on which we have dealt with the great Mahomedan minority, and if we have not, as he suggests, extended it to other minorities, the reason is that simplicity in operation is desirable, and that there is no other minority at the present time that is so large and important as to call for similar treatment.

"As regards the elimination by the House of Lords of the provision for the creation of Provincial Executive Councils, I may say that for my part I should like to see it replaced, on the ground that the increasing burden of personal

[*Sir Harvey Adamson ; the Commander-in-Chief.*]

responsibility thrown on some of our Lieutenant-Governors is becoming heavier than can be borne. The quickening of the political spirit in India during the past four years has largely increased the personal volume of work of heads of provinces, and the work will be still further vastly increased when the reforms come into operation. Therefore I think that the present opportunity of Parliamentary legislation should be taken to assume the power of creating Executive Councils for provinces, a power which should not be exercised for all provinces straight away, but should be in reserve to be applied in the case of any particular province only when the necessity has been clearly demonstrated. But the creation of Provincial Executive Councils has in some quarters been advocated from another point of view, *viz.*, that it will always provide a place for an Indian in the government of a province. I confess that I have little sympathy with this view, not from a desire to exclude Indians, but because I think that when it is a question of appointment to a Council the member should be selected on the same ground as my friend the Hon'ble Mr. Sinha was selected for the Imperial Council, namely, that he is eminently qualified to hold the portfolio which is vacant. The appointment of any person, be he English or Indian, who has not a matured experience of administrative work, to the charge of any of the large executive departments of a province, cannot, in my view, be contemplated without dismay."

His Excellency THE COMMANDER-IN-CHIEF said:—" My Lord, as this is the last time that I shall have the opportunity of addressing the Legislative Council during a Budget debate, I think it is desirable to deal with Army administration at somewhat greater length than I have hitherto done on similar occasions.

"My colleagues will doubtless expect me to give some account of my stewardship during the six and a half years that I have had the honour to command the Army in India, and, as far as the time at my disposal will allow, some account of the results achieved—particularly the financial results. But, my Lord, although this is a sufficient cause, it is not my sole excuse. The present budget is, in several respects, exceptional, marking something of an epoch in Military finance. In the first place, it is the only military budget framed since I have been in India under circumstances of general financial stringency. In previous years the revenues of this country have been in such a prosperous condition that it was wise to place, out of our abundance, a certain amount to reserve by improving our military security. But, just as strongly as I hold that to have been a wise policy, so I consider that, under the present straitened circumstances, military expenditure should be kept as low as possible whilst duly providing for the maintenance of the present state of efficiency in the army. Then, again, as the Hon'ble Finance Member has already stated, the period of fixed grants for special military expenditure has now terminated, and we have reverted to the earlier system under which military expenditure was annually regulated. Lastly, this budget debate has a special importance of its own; for it is the first time that a Member of Your Excellency's Government has addressed this Council, charged, under Your Excellency's orders, with undivided responsibility for both the efficiency and the economical administration of the Army in India. On these grounds I ask Your Excellency to forgive me if I occupy a somewhat larger share than usual of the time available for the discussion of the budget.

" As Your Excellency is aware, and I am sure that my Hon'ble colleagues will believe, my sole aim, throughout my tenure of appointment as Commander-in-Chief, has been to place the administration of the army in India on a sound business footing. A modern army is not, as is sometimes erroneously supposed, a costly toy maintained for purposes of ceremonial and display, nor, on the other hand, is it an instrument of aggression to be used for national or individual aggrandisement. It is simply an insurance against national disaster; and the expenditure incurred on it is strictly comparable with private expenditure on similar precautionary measures.

[*The Commander-in-Chief.*]

"The first business condition necessary to justify our military expenditure is that the army maintained should be in a thoroughly efficient state, and, therefore, able, at all times of need, to carry out whatever may be expected from its numerical strength. Expenditure of money on an inefficient army can no more be defended than the payment of premia to an insolvent company. It is indeed less defensible; for the mere existence of such an army may lull a government and a nation into a false sense of security, which may vitally affect their policy and thus bring about the very disaster that it was intended to avert. But the application of business methods to army administration means more than this. It means that we must never for one moment lose sight of the fact that the efficiency of an army maintained as the ultimate guarantee of public security must be purchased at the lowest possible price. Therefore, every existing source of army expenditure has to be periodically scrutinised, and be shewn to contribute towards that security, or be discontinued; and the cost, as well as the utility, of every proposal for new expenditure must be most carefully considered before it is accepted.

"I have tried to administer the great responsibilities entrusted to me in accordance with these principles.

"The Hon'ble Finance Member has summarised briefly some of the more important measures of recent years; but Your Excellency will perhaps permit me to go somewhat more into detail.

"On my arrival in India in 1902, it naturally was incumbent on me to make a detailed study of the military problems of this country; of the grave responsibilities, both internal and external, which its army has to meet; and of the capacity of that army to fulfil its allotted task. In the course of my examination, I formed the opinion that the army itself, its officers and men, consisted, in the main, of splendid material, but that the best and most economical value was not being obtained from this material—partly because its location, organisation, and training were antiquated, and partly because money was being spent on numerous objects, which, whilst possibly desirable at one time, were not necessary any longer. As the result of my studies, I felt that the first essential step was to improve the organisation, training, and distribution of the army, and to provide for its thorough equipment for war; and I therefore put forward proposals to that end. These were approved in principle, and considerable progress has been made in carrying them into effect. We could now mobilise and place in the field an army consisting of 9 Infantry Divisions and 8 Cavalry Brigades. It is true that this could not yet be done for the whole force with the ease and absence of friction which, in an army run on business lines, should mark the transition from peace to war conditions; for we should still have to resort, to a certain extent in the later divisions, to improvised arrangements. But it is certain that the mobilisation could be carried out effectively and with a degree of rapidity previously unattainable, and that, in addition, we should leave in India a sufficient force, suitably organised and staffed, to maintain public security in every part of the country.

"One of the great difficulties a Commander in the field has to face is caused by variations in the fighting value or strength of the units under his command. Moreover, nothing renders an army so disunited and depressed as a recognised and well-founded consciousness of inferiority amongst a certain number of its units. Uniformity, therefore, so far as it can be obtained, is of great importance; and, in order to insure it, our regiments and battalions have been re-numbered as units of one army, thus obliterating the last traces of old Presidential distinctions, while their peace establishments, which had previously varied considerably, have been adjusted to uniform strengths and standards based on the requirements of the field army. With the same object, an original test of training was introduced, under which every battalion in India was examined and marked for proficiency in every branch of military training by a board of qualified inspecting officers, specially selected for the purpose. I do not think that the value of this test was fully realised. The result showed, however, that the standard of training in our best regiments was excellent; but it also brought to light, and enabled us to rectify, many weak points—among others the desirability of raising the fighting

[*The Commander-in-Chief.*]

value of certain units by the substitution, partially or wholly, of superior fighting races; and, as cases in point, I may mention the raising of the number of Gurkha Battalions from 16 to 20 and the formation of the 106th Hazara Pioneers. I hope that similar tests may be applied from time to time; for they give us a means of satisfying ourselves that a standard of uniform fighting value and proficiency is maintained in the army, though, of course, that standard may be, and is, surpassed in the best units.

"In order to obtain an efficient, well-trained and well-disciplined army, it is necessary to organise and train our troops as nearly as practicable in the same formations as will be employed during war, and under the same commanders and with the same staffs. The advantage of this has been shewn in the rapid operations that were conducted last year on the Peshawar border, and will be still more apparent in the case of larger operations or a serious war. It is with this object that the Divisional system has been introduced into India. Divisional and Brigade Commanders are now trained in peace to assume the heavy responsibilities that will fall on them in war. This Divisional system naturally replaced the previous "Commands", as well as the "Districts" subordinate to them, and has entailed an increase to the Army in India of 9 Brigadier Generals and 44 Staff Officers. In order to organise the units in these Divisions, so that they might be efficiently administered and trained, it was found necessary to redistribute a certain number of them, as has been done so that each Divisional General can mobilise and train a complete Division from his command without drawing upon others.

"Intimately connected with the training of the troops, is the question of the staff and of their higher professional knowledge; for we all know how the bravest troops can only fight at a disadvantage if they are inefficiently led, or the plans are faulty, or the orders given are obscure or defective. We have, therefore, created the Indian Staff College at Quetta, working in close touch with the similar institution at Camberley, from which we are annually turning out a body of highly-trained officers, who will be of the greatest value to us, both for training our troops in time of peace and in the field during war, and who will exercise a beneficial effect in establishing a more uniform standard in the higher branches of professional training and thought in the army. Moreover, by an improved distribution of staff duties, we have also been trying gradually to secure greater co-ordination and better staff work throughout the service.

"Whilst thus endeavouring to make the best of our existing material and to increase the fighting power of our available forces, we have recognised that the complete re-armament of the Artillery with quick-firing guns was essential; and this, in turn, owing to the more rapid rate of fire that is maintained in modern war, involved more ammunition, more wagons, more horses, and larger establishments. Then again, for similar reasons, we have been obliged to re-arm the whole of our troops with the new rifle. I am glad to say that both these expensive changes have now been practically completed. In doing so, we have borne in mind the importance of rendering India self-supporting as regards the manufacture and repair of all such war material. We are now able to manufacture in India, besides the new quick-firing guns and the latest rifle, all the shells, fuses, etc., as well as small arms ammunition, on a scale sufficient to meet the probable requirements of the army in the field.

"But every army, however well-equipped, and highly organised and trained, must have an adequate supply and transport service. The Supply and Transport Corps, which was formerly divorced from the general administration of the army, has now been brought into its organisation, so as to fulfil the requirements of divisions and brigades, both in peace and war, in an economical and efficient manner. The responsibility of the Divisional and Brigade Commanders for the effective supervision of supply and transport expenditure in their commands has been enforced, while a better system of grading officers has popularised the service and facilitated the selection of suitable candidates. We have, at the same time, increased, to a considerable extent, our carrying power and capacity for expansion. The decentralisation to Divisional Commanders has been attended with satisfactory

[*The Commander-in-Chief.*]

results, and has led to closer control of expenditure in respect of the economical employment of transport in peace, food and forage supply, and farm and dairy administration.

"Two years ago I referred to the necessity that would have to be faced sooner or later of bettering the conditions of service of the native ranks of the Indian army, and also of doing something to improve the position of the British Officer, especially in the junior ranks. As my Colleagues are aware, we had, from time to time, been considering how we could best do this within the means at our disposal. As a first step we doubled the kit money of the native troops, so that each man could have a free kit instead of having to pay a large part of the cost himself; we granted free passages to an increased number of men proceeding to their homes on leave; we gave a boot allowance to all unmounted combatants, and free fodder to the Native Cavalry on the march; we improved the pension rules, and also introduced scales of invalid pensions, as well as a revised scale of travelling allowances for all officers which prevents their being subjected to pecuniary loss when transferred or ordered on out-station duties. These measures tended to ameliorate the conditions of service of our Indian soldiers; and this year, as we know, His Majesty the King-Emperor has approved a substantial increase of pay and free firewood to all native ranks. The pay of the junior officers has also been materially improved.

"This account is only a brief outline of some of the more important measures that have engaged our attention during the last 6½ years; and I need not now delay the Council by referring to the other improvements that have been made, such as the augmentation of our reserves, etc.

"When, in 1904, the schemes for the redistribution and reorganisation of the army were brought forward and approved, it was decided to finance them by a fixed, special, annual grant. The aggregate of this fixed grant, up to the end of this financial year, when it ceases, amounts to a sum of £9,971,700; and, of this, we have, as the Hon'ble Finance Member has told you, spent £8,216,000.

"The expenditure of this special fixed grant may be divided under three heads:—

"*First.*—All 'special expenditure,' both initial and recurring, unconnected with the redistribution and reorganisation schemes.

"In this connection I may explain that since 1904-05, all military expenditure, additional to the items specifically excluded above and petty items, has been classed as "special expenditure." Buildings do not last for ever, and must periodically be renewed. Arms, ammunition, machinery, medical equipment and instruments—and many other and, as a rule, expensive articles—are gradually superseded by the march of time and the progress of science and invention, and sooner or later have to be replaced. Coast defences, once ample, become useless; and it becomes necessary to remodel and re-arm them. The ships of the Royal Indian Marine—the service of which is charged, in India, to the Military estimates—have to be replaced by new ones. And it is to unavoidable charges of this nature that we apply the term "special expenditure."

"*Secondly.*—The initial cost of the reorganisation and redistribution schemes.

"*Thirdly.*—The recurring expenditure resulting from those schemes. It is perhaps regrettable that this last item was provided for in the special grant and not charged annually to ordinary budget expenditure. For, within the special grant account, it formed a sort of supplementary military budget, and this recurring expenditure has thus, hitherto, been divorced from the economies that have been effected in other directions, confusing, to some extent, the results obtained—at any rate, to the uninitiated.

"Under the first head of expenditure, *viz.*, "special" we have spent £4,527,600 on the following main items—

	£
Re-arming the Artillery	1,750,000
Coast defences	432,000

[*The Commander-in-Chief.*]

	£
Royal Indian Marine, including the R.I.M.S. *Northbrook*	295,000
Buildings and lines	600,000
Staff College, Quetta	57,000
Electrical installations in barracks	44,000
Dairy and grass farms	80,000
Remount depôts and horse-breeding operations	55,000
Buildings and ranges for Volunteers	20,000
Ordnance machinery and stores	200,000
Medical stores	45,000

"Recurring expenditure and various minor items account for the balance.

"The expenditure under the second head, *viz.*, "redistribution and reorganisation," may be divided into two categories:—

1. Purchase of land and the building operations entailed by the redistribution scheme; and
2. Providing for the necessary preparation for war under the reorganisation scheme.

"The first of these categories has cost us £958,400, of which £153,600 was spent in providing barracks at Quetta for one British and two Indian battalions, and £132,000 in constructing the Nowshera Cavalry Cantonment. These are the only two places beyond the Indus where additional accommodation has been provided.

"Two years ago in this Council I explained that my policy of redistribution did not contemplate the massing of large numbers of troops on the North-West Frontier, and that I was entirely opposed to any such policy. Notwithstanding that declaration, I see that recently a distinguished General Officer, formerly Military Member of the Viceroy's Council, has stated, in a letter to the papers, that he knows far better than I do what my policy meant, and that the massing of troops on the frontier was the real intention of my redistribution scheme. I can only say that, if such was the case, I have signally failed in carrying it into effect; for I have only allotted £285,600 for accommodation on the frontier out of the total of £958,400 spent on additional buildings.

"On the second of these categories, *viz.*, 'preparing the army for war', the sum spent has been £1,959,000, and the main items of this expenditure have been:—

	£
Ammunition columns and other units added to the army	117,100
Increase of the reserve of artillery ammunition	327,100
Increase of the reserve of small arm ammunition	478,300
Increase of the reserve of machine guns and rifles	197,800
Increase of horses, mules and transport	399,100
Increase of field and general hospitals and medical equipment	89,400
Increase of veterinary field hospitals and equipment	18,300
Increase of mobilisation equipment, including small arms ammunition columns	305,500
Addition of 350 officers to the Indian Army	8,200
Minor items	23,200

making the total under this head, for both redistribution and reorganisation schemes combined, £2,917,400.

"The third head is the recurring charge caused by the redistribution and reorganisation schemes; and the cumulative expenditure of this amounts, naturally, to the balance which brings up the total expenditure to the figures stated by the Hon'ble Finance Member as being the cost of these schemes, *viz.*, £3,688,400. These annual recurring charges have been caused by the changes in, and additions to, the Army that have been made during the past five years. Their aggregate amount during this period has been £771,000, and the annual charge we have, by these measures, placed on the army estimates amounts to £271,400. The annual economies foreshadowed in my speech in this Council two years ago, and now realised, amount to £320,000 and may be placed against this

[*The Commander-in-Chief.*]

charge. I may mention that there are other economies that will fall in, in the near future. These charges and economies are now for the first time brought together in the regular budget for the ensuing financial year, which would have been a far more unsatisfactory production had we not had these economies to help us.

"The Hon'ble Finance Member has shewn that, in the five years ending with 1903-04, sums aggregating £5,951,000 were allotted for special military expenditure; and that, excluding cumulative recurring expenditure as was the practice previous to 1904-05, the sums actually expended in the five years ending 1908-09, aggregate £6,999,000, or an increase of £1,048,000. But, from a glance at the accounts, it will be seen that a quite new and very large special charge under one head has had to be met, *viz.*, 'the re-armament of the Artillery.' This alone represents no less than £1,750,000; and, if it had not been necessary to make this change in order to keep our armament up to date, our total special expenditure would have been over £700,000 less than the amounts allotted for the previous five years.

"I pass now to the military budget estimate for the coming year, in the preparation of which we have had to provide for a large increase of expenditure in three directions as compared with the budget of last year. The first of these is the additional payment to the War Office in respect of the cost of providing recruits and reliefs for the portion of the British Army serving in India. The second is the increase of pay and free firewood granted to the Native Army on the 1st January this year. The third is the increase in the cost of food and forage due to the present high prices. For these items taken together we have had to provide an additional sum of £818,300.

"With such a burden to carry, and having regard to the present tightness in the resources of the country, the pruning knife has had to be used with some vigour. Our building programme has had to be curtailed, and the numbers of the workmen in our ordnance factories reduced. Moreover, several undoubtedly useful projects for the improvement of the Army have had to be postponed for the present—to be taken up again, I hope, at a more financially propitious moment.

"We have, in the budget for 1909-10, made adequate provision for the usual services necessary to maintain the Army at its present established strength, and have been able to provide funds to proceed with certain measures, such as:—

1. Completion of our additional Royal Horse and Field Artillery ammunition columns.
2. Developing the local manufacture of quick-firing guns and ammunition.
3. Increase of the Indian Army reserve.
4. The carrying on to completion the building works now in progress.
5. Special defences, and items of minor importance, as well as providing funds to enable us to proceed with a tentative scheme to create a Cavalry School for India.

"If I may detain the Council for a short time longer, I should like to compare the military estimates now under discussion with those of the budget prepared before my arrival in this country, *i.e.*, the budget for the year 1902-03. The net expenditure in the military estimates for that year amounted to £18,094,000, on which the estimates for 1909-10 show an apparent increase of £1,559,000. This figure must be corrected in the first instance by deducting £313,000 on account of the net cost of certain services (the chief of which is the Hyderabad Contingent) which have been transferred from the civil to the military estimates. On the other hand, if we deduct the expenditure classed as special in the two years (£1,128,300 in 1902-03, and £474,900 in 1909-10), and the special provision of £93,000 made in the 1902-03 estimates for the Delhi Durbar and Coronation ceremonies, the increase to be accounted for is raised to £1,992,400. This increase is to some extent discounted by the fact that

[*The Commander-in-Chief.*]

our ordinary budget now provides, under the ordnance grant, for the local manufacture of a large amount of war material, which in 1902-03 had to be purchased from home, and the cost of which was treated as special expenditure. Apart, however, from this difference of classification, I think I can show that practically the whole of the increase in expenditure has been forced upon us by causes beyond our control, such as the increased cost of obtaining recruits and reliefs from home for the British Army out here, and the general rise in prices in India. The budget estimates for 1909-10, as compared with those for 1902-03, provide for new or increased charges under the following heads:—£450,000 for the service or proficiency pay of British soldiers; £300,000 on account of the increased payment to the War Office for British recruits and reliefs; £67,000 for the additional cost of trooping arrangements to and from England and the colonies; £131,000 on account of the automatic increase of pensionary and other non-effective charges; and £650,000 for the extra cost of food and forage due to the rise in prices. These charges, which are practically uncontrollable, aggregate £1,598,000, and leave a balance of only £394,400 to be accounted for. This balance is more than covered by the various increases of pay and allowances which it has been found necessary to grant to the officers and men of the Army in India at a total cost of £586,700. The necessity for these increases has been admitted on all sides, and I submit that they may be fairly classed as unavoidable. If these items are deducted, we get a balance of £192,300 in favour of the estimates for the ensuing year.

"But the Army establishments in 1902-03 are not identical with those of the reorganised army of the present day for which we are providing in this budget. The 1902-03 establishment of officers, non-commissioned officers and men of British troops amounted to 74,113. We now have 75,270, or an increase of 1,157, almost entirely due to the requirements of the re-armed artillery. In the Native Army, in 1902-03 we maintained 150,586 officers, non-commissioned officers and men, against the present total of 162,093, or an increase of 11,507. Of these, 7,654 represent the Hyderabad Contingent, for which credit has already been taken in the financial comparison. The further increase is due to the readjustment of establishments, minor increases in the Army, and 350 officers added to the Indian army. Of mobile guns, in 1902-03 we had 460, and we now have 480, or an addition of 20, representing 2 new mountain batteries and 2 heavy batteries. Maxim guns have been increased from 287 to 422; and the horses maintained from a total of 34,975 in 1902-03, to 44,447 at present, giving an increase of 9,472. Of these, however, 2,312 came with the Hyderabad Contingent and have been taken credit for. The remaining increase is due to the extra horses required by the artillery and ammunition columns; to an increase to the reserve of 500 horses; and to an increase in the establishment of horses in British cavalry regiments. In 1902-03 we had 25,191 mules, whilst we now keep 34,179, or an increase of 8,988. Of these, 7,200 have gone to increase the carrying power of our transport; and the remainder to provide for the two new mountain batteries, for supplying Pioneer battalions with equipment mules, and for the increase of Maxim guns. In staff officers the number in 1902-03 was 901 and is now 965. I have already mentioned the increase of 53 of these, and the balance is composed of additional Supply and Transport officers.

"The annual cost of maintaining these additions to the Army is evidently more than the increased sum provided in the 1909-10 budget. Therefore while you are paying your soldiers, both British and Native, individually considerably higher than in 1902-1903, the cost of their service in the Army is less.

"The question naturally arises how has this been accomplished? I think that an answer may be found in the relation that now exists between the military and financial authorities in India.

"Formerly they had very little in common. The military authorities had but slight interest in economy, while the financial authorities concerned themselves as little with considerations of military efficiency. That two great departments of

[*The Commander-in-Chief.*]

the same Government should thus regard each other as adversaries, rather than as allies working together to obtain results satisfactory to both, was clearly opposed to all business principles. It is not a matter of surprise that the Finance Department failed to secure possible economies, or that the military authorities were hampered in their struggles for efficiency. Two main factors have brought about an alteration—and I hope a permanent alteration—in this respect. On the one hand, the fixing, for a term of years, of an annual maximum beyond which special military expenditure could not be incurred, has taught the soldiers that economical administration is a military as well as a financial interest, and has accustomed them to scrutinise every demand for money with the utmost care before it is put forward, lest, by supporting measures which are merely desirable, they should jeopardise those which are essential. On the other hand, the creation of a special branch of the Finance Department, to deal with military expenditure, in close connection with the Army Department, has, I think, given the financial authorities an insight—perhaps I may say a sympathetic insight—into the real requirements of the Army, which was formerly lacking.

"Your Excellency has placed some of the ablest officers of the Finance Department in charge of the Military Finance Branch. My thanks are due to those officers for the ready and valuable assistance they have afforded, not only to myself, but also to the Heads of Divisions at Army Head-Quarters, by pointing out, at an early stage, the true financial results to be expected from particular proposals, and thus enabling such proposals to be examined with fuller knowledge, and to be dropped or persevered in, in the light of that knowledge. In this connection, I should like to draw attention to an alteration in the form of the India Army Budget Estimates, now made for the first time, and which is the outward and visible sign of an underlying principle to which I attach great importance. I am convinced that real economy in Military expenditure must be the work of the officers of the Army themselves. They, and they alone, are in a position to recognise unhesitatingly the sources of waste, the expenditure which is not necessary to maintain efficiency, and that which, though consecrated by long usage, can be terminated advantageously. But the enforcement of true economy is at best a thankless and disagreeable task. No man undertakes it willingly unless he knows that his efforts will be recognised and acknowledged. Given responsibility, and the knowledge that praise or blame await on the manner in which that responsibility is upheld, I have no doubt whatever that the officers of the Army will prove themselves capable of sound and economical administration. This year, therefore, the India Army Estimates have been compiled on a Divisional basis, shewing clearly all sums, for the administration of which each General Officer Commanding a Division or Independent Brigade is responsible. At the same time a decentralisation of the Military Accounts Department has been carried out, by means of which each Divisional General has been provided with a Financial Adviser. The scrutiny and the comparison of results will now be easy; the responsibility will be clearly defined; and I hope for the best results from this seemingly simple reform.

"In concluding these remarks, which are the last that I shall have the honour to address to this Council, I hope that I may be allowed to say a word about the system of army administration.

"A glance at the history of the army in India shows that though, in the long run, good results have been attained in the past, they were only obtained by following very devious roads and therefore took much time to accomplish, while the methods employed were far from economical and the policy was lacking in continuity. The system of dual advice to the Viceroy on all army matters by two separate members of His Excellency's Council was the main cause of this. The personality of these two high officials had, no doubt, a marked effect on army policy. At times the Commander-in-Chief was the most trusted adviser of the Viceroy, while, at others, it was the Military Member of Council that was listened to. No Viceroy, however, would be likely always to take the advice of one member and discard that of the other. At times the advice of

[*The Commander-in-Chief; the Lieutenant-Governor.*]

the less influential member would naturally be accepted; and thus a breach in continuity would probably be established, leading to unexpected deviations and developments. Then again, the member whose advice had been rejected had always to put into execution his share of the accepted policy, of which, of course, he disapproved. I am sure that this was, as a rule, loyally carried out, as far as possible; but I ask, can any independent high official give effect to another's policy of which he disapproves, without introducing any of his personal convictions into it? I trow not.

"India is the only country under the British Crown which maintains a large army and can carry out a continuous policy for its improvement. My advice to the Government of India is not to lose the system which you now possess, or change it back to the dual control which has been abandoned and abolished. Continuity of policy in army affairs is essential, in order to attain economical efficiency. If you duplicate your advisers, you will reel through the mazes of military technicalities, leaning first on the shoulder of one and then on that of the other, and continuity will, and must be, lost.

"We have strengthened very considerably the staff which surrounds and supports the combined Army Member and Commander-in-Chief; and you need have no fear that they and he will not lead you by straighter and cheaper paths to the possession of an efficient, up-to-date army, than was previously possible. Their responsibility is now complete and personal, and cannot be avoided or passed on, by specious arguments, to other shoulders.

"Many other reasons against the dual system exist. I will not now labour the subject, or detain you further. But, for the welfare of the army in India, which I have commanded with so deep an interest and whose future success I have so keenly at heart, I cannot help impressing upon you, as strongly as I can, my conviction that it is only by continuity in military policy that the army can be maintained always able and ready to fulfil its grave responsibilities."

His Honour THE LIEUTENANT-GOVERNOR said:—"My Lord, I hope that Sir Guy Wilson will allow me, as a late Finance Minister, to tender him my congratulations on the courage and skill with which he has dealt with a difficult situation. The large deficit in the current year is due partly to the famine in Northern India, and partly to the large grants which have been assigned to various Local Governments, including 30 lakhs to the fortunate United Provinces over and above the whole of their famine expenditure. But, as the Finance Minister points out, it is principally due to the signal failure of the Railways to earn the net returns which were anticipated.

"In so far as that failure is due to a shrinkage of gross earnings, it is likely to be of merely temporary duration, and need cause little apprehension.

"But, so far as I can understand, the great slump in net earnings is due not nearly so much to a reduction in gross traffic receipts, as to an enormous increase in what are called working expenses. The loss under the first head is stated by the Railway Board to be £876,000, whereas the increase of working expenses is shown in the account to be £1,410,000.

"That however is not nearly all. If the gross traffic receipts have fallen off by nearly £900,000, the cost of moving the reduced traffic should, naturally, have fallen off by, let us say, £400,000. It follows that the excess which has to be explained is considerably more than a million and three-quarters. I am constrained to say that the explanation presented in the Memorandum of the Railway Board seems singularly inadequate. Something is doubtless due to the cost of coal, though we are not told what it amounts to. Grain compensation is said to amount to $23\frac{1}{2}$ lakhs, or £157,000, *i.e.*, less than $\frac{1}{10}$th of the total excess. Floods on the North Western Railway are called in to account for some unspecified part of the remainder; but I seem to remember hearing of similar floods for several years before on that line. A great deal is attributed to repairs and renewals, and we are told that commitments had been entered into which could not be stopped. I will not stop to consider the question whether any Railway Administration is at liberty to enter

[*The Lieutenant-Governor.*]

into commitments of this kind which cannot be modified or contracted if the ensuing year is one of deficit. But I do affirm without hesitation that any Administration which contemplates doing so is bound by all the canons of finance and common sense to provide for the corresponding expenditure in its estimates. And in the present instance we have to face the plain fact that the working expenses, in spite of a heavy reduction in the traffic carried, have exceeded the estimate by not much less than a million and a half.

"My Hon'ble friend, in balancing his budget for the ensuing year, has taken credit for an increase of net Railway receipts of 2½ millions sterling. So far as gross earnings go, his estimate may very fairly be justified. But I will venture to offer a word of warning in regard to the net receipts. Recent experience indicates how mournfully these estimates are liable to be falsified; and unless Railway Administrations can be made to understand that in matters of expenditure they must work within their Budget allotments, like all other great spending departments, and that no excess can be permitted except for the purpose of carrying an unexpected volume of additional traffic, I fear that great trouble lies ahead.

"In making these remarks, I need scarcely say that I have no desire whatsoever to embarrass the Finance Minister. On the contrary, my sole object is, so far as lies in my power, to strengthen his hands in dealing with a danger which had already risen above the horizon in my own time, and which has since become threatening and acute.

"Mr. Gokhale has returned to the charge once more on the subject of our surpluses; he maintains that these should be expended on such matters as primary education, sanitation and the like, and he complains that we were not justified in expending them on railway construction.

"I do not know that it is worth while to discuss this at any length, for the Hon'ble Member and the Government of India must agree to differ. But perhaps I may say that in my judgment, in the interest of economy, no better application could be made of any surplus funds than the reduction of debt. If more money is required for expenditure on education or sanitation, let it be provided in the budget. But after that has been done, then, when a surplus does occur, let it be applied in India, as I believe it is applied in most other civilized countries, to reducing the public indebtedness.

"There are only two other points in the Financial Statement and the speeches of the Hon'ble Members to which I desire to allude.

"The Hon'ble Mr. Apcar has made some observations on the subject of exchange, and has criticized the action of Government in respect of the measures taken to support it.

"As regards the future, or even the present, I do not feel called upon to say anything, for it is only the Finance Minister of the day who can state the views and intentions of this Government with authority.

"But Mr. Apcar has made a statement regarding the past, in which he has unwittingly committed an inaccuracy, and has done less than justice to the Government of which I was then a member. He has told us that when exchange fell in November 1907 to 1*s*. 3$\frac{11}{16}$*d*. the question became one of practical urgency. 'Yet the policy of Government during this time of crisis was notable only for inactivity. It was not till the end of March 1908, in spite of urgent representations from the Banks, that Government commenced to offer sterling bills on the Secretary of State in London.'

"The suggestion thus made is quite incorrect. If the Hon'ble Member had referred to paragraphs 95 to 98 of last year's Financial Statement, he would have found a complete account of the measures taken in the winter of 1907-08 to maintain exchange, and also of their effect. These measures were, firstly, the stoppage of the sale of bills by the Secretary of State; and, secondly, the release by the Secretary of State of his currency gold in London. This currency gold is our first line of defence, and it was clearly right to use it before falling back on the Gold Standard Reserve. The first million of currency gold was

[*The Lieutenant-Governor.*]

released on the 25th November 1907, and further sums of one million and half a million were released on the 6th and 18th December respectively. It was also arranged with the Banks that if exchange should fall below gold export point, Telegraphic Transfers on London should be sold in India at a fixed rate. The effect of these measures was immediate. By the 30th November exchange had recovered and stood above gold export point: and it remained at that level till the end of March 1908. The reason, the obvious and sufficient reason, why bills on London were not offered for sale till the 26th March was that till that date exchange had not fallen below export point. There was no need to sell them, and no possibility of doing so.

"I trust that my Hon'ble friend the Finance Minister will not consider that I have encroached unduly on his province by offering this explanation.

"The only other matter on which I desire to trouble the Finance Minister is the urgent necessity for undertaking a revision of the present Provincial Settlement of Bengal, and for concluding a new one on terms more commensurate with the size, population and importance of the Province, and with its present necessities.

"At the present time we are paying over 9 lakhs a year on account of grain compensation, and during the four years ending with 1909-10 we shall have spent over 33 lakhs on this item, for which the present settlement makes no provision whatever. Similarly, we have to provide over 9 lakhs in the ensuing year for famine relief, over and above the Imperial portion of the charge; during the same period of four years we shall have spent some 19 lakhs on this item; and for this also the Settlement makes no provision whatever. We are also spending a very large sum—I cannot give the exact figure—under the heads of Police, Law Charges and Jails, in connection with the special measures for the maintenance of order and the repression and punishment of anarchical crime. It would be criminal folly to relax any of these precautions at present, and the money must be found for them at any cost. During the four years beginning with 1906-07 and including the ensuing year, we shall have spent on these three groups of charges more than 69 lakhs of rupees; and our cash balance, which on the 1st April 1906 stood at 61 lakhs, has now been reduced to zero; it would indeed have been a *minus* quantity had not the Government of India come to our aid and wiped out the deficit.

"I am well aware that every Province is expected to make some provision for unforeseen charges from the normal growth of its revenues; but it is manifest that no Province can hope to do so on such a scale as this, without crippling its internal administration. That is what has happened in Bengal. Our public works grant has been cut down to 45 lakhs, the bare standard fixed four years ago, with absolutely no allowance for natural and legitimate expansion. As a consequence, while we have provided 17 lakhs for completing or continuing certain works which are actually under construction, we have been unable to undertake a single new work of any description, though the demands upon us are of the most imperative character. The Ranchi College, which has been sanctioned by the Government of India and the Secretary of State, is indefinitely postponed because we have no money, and are unable to fulfil the conditions on which the Maharaja of Burdwan made a generous contribution of a lakh of rupees towards it last year. Land has been acquired for an extension of the Presidency College—a most urgently necessary measure—but it has to lie vacant because not a single rupee can be found for erecting the buildings. The University Regulations involve largely increased expenditure on our colleges, if they are to escape disaffiliation; we are endeavouring to compel the private colleges to comply with the new requirements, and yet we are unable to make the requisite provision even in our Government institutions. Well devised schemes for the improvement of secondary and technical education, of which Bengal stands in need at least as much as any other part of India, are indefinitely postponed for want of funds. An acute epidemic of small-pox is raging in Calcutta; the small-pox hospital at Sealdah is a disgrace to

[*The Lieutenant-Governor ; Sir Guy Fleetwood Wilson.*]

the city and a danger to the population: yet I am quite unable to provide funds for a new one. Most of the Bengal jails are unsuited to the class of prisoners with whom we have now to deal; but there is no possibility of remodelling them. I will not weary the Council with further details; but wherever I go on tour I am forced at every turn to refuse the most reasonable requests for local expenditure, and even to reject generous offers of private contributions, because I am unable to meet the Government share of the outlay. The position is becoming impossible. It cannot fail to produce a general feeling of apathy and discontent which must greatly increase the difficulty of our task in dealing with the political situation. In the course of the year, if there should be signs of an improvement in the financial situation, I shall submit proposals for a revision of the Provincial settlement on juster and more liberal lines; and I earnestly hope that they will receive the sympathetic consideration of Your Excellency's Government and of the Hon'ble Finance Minister; and that Bengal may be allowed the first call upon whatever funds may be available in the Imperial exchequer."

The Hon'ble SIR GUY FLEETWOOD WILSON said:—"Before dealing with the points which have been so ably dwelt upon by the Hon'ble Members who have spoken, I would ask to be allowed to make a passing allusion to the lamented death of one who filled with conspicuous ability the post which I have the honour at present to hold. I allude to Sir Edward Law. It may be said that the predominant feature of his character was his almost passionate love for India and his desire to promote the welfare of her teeming population. I feel sure that I am voicing the feelings of all those present, as well as of all others who were brought in contact with him, when I give expression to the sympathy we feel for Lady Law in her sad bereavement. I would ask you, my Lord, to allow me to make one other allusion of a personal character. I would ask to be allowed to bear testimony to the great value of the work done by one who for a period of several months so successfully discharged the duties of Finance Member of Council. Mr. Meston's work has been typical of that marked ability and that superb loyalty which are the proud characteristics of that service which may claim to be the finest in the world—the Civil Service of India. Personally I owe him a deep debt of gratitude.

"I will now deal with the speeches delivered by Hon'ble Members in so far as they concern my Department.

"No one can possibly take exception to the tone of the debate.

"The criticisms on the Budget have been expressed with force and lucidity, but they have been marked as well by a courtesy and consideration for which I would ask Hon'ble Members to accept my respectful thanks. I am also deeply grateful for the sympathy and support which have been so generously accorded me in the difficult and unpopular task of curtailing expenditure. Dealing first with the Army, I do not think after the full and remarkably clear statement of His Excellency the Commander-in-Chief that it is necessary for me to allude to more than two points.

"In the first place I can and do give the assurance that neither efficiency nor reserves have been made to suffer in effecting economy. Having spent in the last few years over 2 millions in increasing our war reserves under the re-organisation scheme, we are able to reduce the expenditure without depleting the reserves and army efficiency is being fully maintained at its present high standard.

"The second point to which I wish to allude is the increase of £300,000 in the Indian military contribution.

"No useful purpose would, I think, be served by going now into the details of this question. The statements which have been made in the House of Commons, and which have no doubt been brought to the cognizance of Hon'ble Members, show that in the opinion of the War Department at home India does not even now pay its full share. I do not think that we need discuss

[*Sir Guy Fleetwood Wilson.*]

that point at the present moment. What we have to deal with is an accomplished fact. The question whether or no India pays too much, enough, or too little, was referred to an exceptionally strong Committee, presided over by one of England's ablest judges, and included two representatives from India of the highest standing. The subject had to be approached from an actuarial and very technical standpoint which it would have been extremely difficult to place clearly before the public and which, even if that had been possible, the public would have found it difficult to appreciate

"The outcome of the negotiations resulted in an agreement between the two Secretaries of State, under the conditions indicated by Mr. Buchanan quite recently in the House of Commons.

"I am well aware that the Government of India had entered a protest against any increase of charge being thrown on India; but when it is remembered that the two representatives from India were Sir John Edge and Sir Beauchamp Duff, it must be conceded, I think, that the Indian case was presented with consummate ability. It must further be borne in mind that the decision arrived at was agreed to by a Secretary of State who, as is generally recognised, has always given evidence of his great sympathy with India, and who has never hesitated to keep well in the forefront the interests of the Indian people. I think the only course open to us now is to accept the decision arrived at as a final one.

"The next subject I will allude to is Railways.

"On the broad lines of our policy of railway development, we have heard a good deal of interesting criticism, much of which is mutually destructive, inasmuch as it represents two diametrically opposite schools of opinion. Fortunately it does not fall to my lot to answer our critics, as my Hon'ble Colleague, Mr. Harvey, has dealt with them. There is one minor point however on which I may be allowed to supplement the remarks which fell from him. I have seen questions in the Press regarding the exact significance of my statement last week that the railways were worked at a net loss during the year now closing. An answer to these questions will be found in the figured tables attached to the Financial Statement. But I have been asked more particularly whether it is a fact that we have debited against the current earnings of the old guaranteed railways the annuity payments which represent instalments of the cost of purchasing those lines. My answer to this is that we do charge the annuity payments in the manner indicated, and that we do so deliberately. I readily recognize that it is unsound finance to build or to buy railways out of revenue, more especially when they are remunerative property. But in respect of these particular lines, there is much to be said for the course pursued. It was decided to purchase these lines by means of terminable annuities instead of by cash payments, for the good reason that, under the terms of the contracts, that method was the more profitable to Indian revenues. There is in practice very little to distinguish a terminable annuity from a sinking fund; and the purchase having been effected in this particular way, we necessarily debit the annual charges to revenue. A sinking fund chargeable against capital is a contradiction in terms which would be hardly defensible.

"The Hon'ble Mr. Apcar has expressed regret that the necessities of the year have compelled the capital expenditure on State Railways to be fixed at 15 crores, instead of 18¾ crores. I believe—as Mr. Apcar hopes—that the postponement of the higher scale of expenditure is only temporary, and that the Secretary of State will sanction an 18¾ crore programme as soon as the financial position permits. The provision of funds for the programme is a matter which is very largely in his hands, our capital resources in India being extremely limited. Mr. Apcar has deprecated with much earnestness the employment of any part of the profits on coinage for railway purposes. It should be remembered, if that source of revenue is withdrawn, how comparatively little remains at our command in India. Let us consider what we have available. A revenue surplus, which in lean years may be attainable with difficulty, and only as the result of pinching the general administration. A part of the

[*Sir Guy Fleetwood Wilson.*]

Famine Insurance grant, which in times of scarcity automatically fails us. The net incomings of our Post Office Savings Banks and a few miscellaneous funds, from which the return, though fairly sure, is not substantial. And finally, our annual rupee loan which exhausts the local market, we are told, when we try to put it higher than from 2 to 3 crores. From this enumeration of our Indian resources, it is obvious how largely we are dependent on loans in England for the development of our railways. And considering the recent state of the market in England for Indian investments, I confess to a feeling of surprise, not that the railway programme had to be curtailed, but that we have been able to pitch it at so high a figure as 15 crores.

"I come now to Provincial Finance.

"We have heard a good deal today about the growing needs of Provincial Governments, and about the defects of certain of the provincial settlements. I have neither written nor said anything which can be taken as indicative of want of sympathy with Local Governments in the many pressing claims upon them and in the many admirable schemes which they would undertake if their finances permitted. My sympathy with them is genuine, all the more so that the Government of India are experiencing to the full the same inconveniences and the same disappointments. But we must all unite in the painful process of cutting our coat according to our cloth; and we must trust that better times will come for Provincial as well as Imperial revenues. The Government of India have not been sparing of their aid to Local Governments in the past, and in the present circumstances we count on their co-operation in the economies which have become imperative.

"As regards the provincial settlements, I speak with entire impartiality, inasmuch as the whole of the existing settlements (with the exception of certain details relating to the United Provinces) were arranged before I took office. I have, however, had an opportunity of studying the system of settlements. They were designed to allot to each Local Government a substantial share of its growing revenues, to dispense with the necessity of periodical doles and earmarked grants from Imperial resources, and to place the province in the position of being able to adjust the growth of its administrative needs to the growth of its income in practical permanency. I believe I am not wrong in saying that my predecessor Sir Edward Baker regarded the settlements as liberal ones; and I hold entirely to the same view. They have started badly in certain provinces, partly owing to the recent famine, partly owing to the burden of high prices, partly owing to the special difficulties of administration in the last year or two, and partly owing also, as in Burma, to a temporary set-back in the revenues. There is no reason to doubt that these causes will disappear in time; and there is every reason to expect that the Local Governments will tide over their period of trouble without risking the permanency of their settlements, which seems to me one of the strongest factors in their financial independence. I fully recognize that the Local Government must advance with the times; and there are many incessant demands upon them, such as the improvement of secondary education and the development of technological education, with which the Government of India are in complete sympathy: It would be entirely wrong, in my position, to hold out any definite promises; but, should we return to the happy era of large surpluses, I have little doubt that the Government of India will be ready to share their good fortune with those provinces which genuinely require assistance in the carrying out of such projects.

"Turning now to the particular provincial settlements upon which Hon'ble Members have spoken today, I need only deal lightly with that of Madras. The last revision of the settlement with that province was entirely of the nature of an adjustment, intended to give Madras the same shares of the principal heads of revenue as the other provinces and to replace fixed and inelastic assets by growing resources. In spite of his criticism upon sundry details in the figures, I am sure that my Hon'ble friend Mr. Andrew recognises how liberal the settlement was, and the fairest proof of its success lies in the fact that the province has greatly to its credit now built up a balance well in excess of a crore of rupees.

[*Sir Guy Fleetwood Wilson.*]

"The grievances of Burma have been voiced with much moderation and fairness by the Hon'ble Maung Bah Too. I have studied the records of the last Burma Settlement with considerable care; and I can assure my Hon'ble friend that he is entirely mistaken in his fear that the distance of his province from the head-quarters of the Government of India has prejudiced its case. I think that, on the contrary, there was particular anxiety to ensure that the province should not suffer *in absentiâ*, and that special efforts were made to provide it with adequate resources. It must be confessed however that, since the settlement was made, there has been some arrest in the progress of the provincial resources. The Forest-revenue in particular, which is one of Burma's greatest assets, has not answered expectations. From all that I can gather, this set-back is temporary; and I trust that Burma will be patient until either its revenue recovers or there is clear evidence that we permanently over-estimated its resources. In the meantime, a careful scrutiny of the Burma estimates suggests that there have been a certain number of items of expenditure which it was not unreasonable to ask the province to postpone or abandon pending the results of a few years' test of the operation of its settlement.

"Next, I come to the United Provinces, which are put in a somewhat invidious position by the very high figures of the grants which the Local Government has received at a time when retrenchment was being stringently enforced elsewhere. I wish to make it perfectly clear to the Council that this is not the result of any differential treatment to the United Provinces, but of the severe trial out of which they are now emerging. Famine fell upon them in 1907, when the province was working under a settlement which was admittedly inadequate. It swept away the whole accumulated balances of the Local Government, the cost of direct relief alone being over 30 lakhs; and we had to give special help to the Local Government to enable it to open the current year and its new settlement with the prescribed balance. In 1908-1909, famine and its concomitants again paralyzed the provincial finance, which had to find $62\frac{1}{2}$ lakhs for direct relief expenditure and $10\frac{3}{4}$ lakhs for irrecoverable loans, to say nothing of heavy indirect losses due to the same cause.

"The two specific items of loss that I have mentioned represent very closely the sum (72·92 lakhs to be exact) which we have given the Local Government in order to place it in the position we intended it to occupy at the outset of its new settlement. The additional 10 lakhs was a special initial grant with which the Secretary of State has allowed the new settlement to be inaugurated.

"I regret that the two Hon'ble Members who represent the province regard the grant as inadequate: I can only assure them that we were neither able, nor would we have been allowed, to give more.

"There remains Bengal. With regard to it, I trust I am not unjust in the suspicion that it had begun not only to live up to its means, but in some measure to discount the future, before the special troubles befell it which are now straining its resources. The existing settlement was made only three years ago; it was considered an adequate and even liberal provision for the province; it had been preceded two years before by a special grant of 50 lakhs, and when the settlement began, there was a total credit balance of nearly 63 lakhs. A few months ago, when our Hon'ble Colleague, the present Lieutenant-Governor, took over charge of the province, the balances had disappeared and there was every prospect of a very heavy deficit. Under Sir Edward Baker's orders, no time was lost in curtailing expenditure; but it was too late to avoid a considerable overdraft upon Imperial funds. (I neglect the 50 lakhs in the Provincial balances which is earmarked for the Calcutta Improvement Scheme.) We have decided to write off that overdraft and to give the province such a measure of help as will enable it to close next year with a *nil* balance. It was quite impossible, in the face of our own difficulties, to do more. But we recognize the gravity of the task which confronts Sir Edward Baker, and if our own position improves, the Government of India will give their most careful consideration to the weighty plea which the Lieutenant-Governor has put forward today on behalf of the great province which is entrusted to his care.

[*Sir Guy Fleetwood Wilson*.]

"Before leaving this subject, I would add a word of explanation regarding the grants for University Education to which the Hon'ble Sir Harvey Adamson has alluded. The grants will not be found in provincial budgets because I had not received the Secretary of State's sanction to them in time to do more than show them as a lump provision in the India Estimates. The actual distribution will be as follows:—

	R
Central Provinces	10,000
Eastern Bengal and Assam	20,000
Bengal	1,60,000
Punjab	60,000
Bombay	65,000
	3,15,000

Madras and the United Provinces have received their grants through their provincial settlements. The subsidies are for one year only, and the necessity for further Imperial assistance will have to be reconsidered before next year.

"It is to me a matter of very genuine regret not to be able to give a sympathetic reply to the eloquent appeal which has been made in more than one quarter in regard to dear food compensation.

"In regard to this I may say that for some years past the difficulty which the Finance Member has had to face has been the equitable allotment of surplus funds. This is not my good fortune. This year we are only just able to escape fresh taxation and there are no surplus funds to allot.

"Next I will deal with the miscellaneous criticisms which have fallen from Hon'ble Members today. Among them the question of sanitation has received some attention. There seems little doubt that, under the stress of their general financial difficulties, most of the Local Governments have been obliged to defer schemes for sanitary improvement which might otherwise have made progress. But the Nawab Saiyid Muhammad is mistaken in thinking that we have withdrawn the grant of 30 lakhs which was given last year for sanitary purposes with special relation to plague preventive measures. That grant, as Sir Edward Baker explained in paragraph 65 of last year's Financial Statement, was an annual one, and it has been again allotted to the different provinces in their budgets for the coming year.

"Next, I would allude to a suggestion by the Hon'ble Mr. Andrew that District Boards in Madras may be allowed to borrow within limits from Provincial funds for the construction of local lines, without those lines being thereby brought on to the Railway programme. The Government of India have watched with much interest the energy and enterprise with which the Madras Boards have set to open up their districts by feeder railways, and it is a sincere gratification to hear of their success. But I am afraid that the privilege which my Hon'ble friend asks for is impracticable. The Railway programme is more than a mere forecast of railway projects. It is also an estimate of the whole of our resources available for railway construction. Those resources are necessarily diminished by any loans which are made from our general cash balances to District Boards; and the result of excluding lines which the Boards build from public funds would simply be a *pro tanto* reduction of our programme. In other words, the feeder lines in Madras districts would be given a prior claim on our general resources to the lines of more Imperial interest. I am afraid we could not contemplate this result with equanimity, however desirable these local works may be in themselves. If the Boards wish to keep their lines outside the programme they must finance them either by guarantees or from their own savings or by loans in the open market.

"The question has been raised of the valuation of the securities held in the Currency reserve, and exception has been taken to their being valued at 12 crores, when we all know that there has been a considerable fall in values since they were purchased. I take it that Hon'ble Members are aware that the investments of the Currency reserve are shown not at their face value,

[*Sir Guy Fleetwood Wilson.*]

but at the price which we paid for them. This is the procedure which the legislature has directed, and our published accounts are therefore in strict conformity with the requirements of the law.

"I should not adopt the expedient however of sheltering myself behind a technical defence of the provisions in the Act if there were any substantial or permanent deterioration in the value of our Currency investments. In such a case I fully recognize that something equivalent to a depreciation account would be not unreasonable. But the facts are as follows:—

"The total valuation of the securities is 11·17 crores as against the 12 crores which we paid for them. The deficiency is not serious and a slight revival in gilt-edged securities would wipe it out. I do not think therefore that there would be advantage in attempting periodical adjustments, so as to keep the value of the actual paper up to its original cost price. So long as the fiduciary element in our circulation is kept within moderate bounds, we need not be anxious about minor fluctuations in the value of the securities held against it.

"The two subjects in regard to which I now invite your attention are both subjects of first importance.

"They are currency and the prevailing high prices. I will take them in the order named.

"Our currency policy in general and the position of our Gold Standard Reserve in particular have figured most prominently in today's debate. It is right and fitting that the subject should have the prominence it has received, for there is no other factor in our Indian finances which is so intimately associated with the commercial interests of the country, and through those interests with the well-being of the great mass of the people. Holding these views I am glad to find that I am not called upon to defend our currency policy against any attacks upon its main features. Upon those, so far as I can judge from the speeches we have heard today, the Council is in virtual agreement. We may differ regarding the location of our gold or the pace at which it should accumulate; but we are all agreed that a strong holding of gold is essential to our salvation. We may have divergent views about the most effective manner of supporting exchange; but we are at one regarding the importance of active intervention when it falls below specie point. We may not agree as to the effect of our coinage on prices; but it is hardly suggested that we should re-open the Mints and allow the rupee to find its own level.

"Such being the position as regards the cardinal points of our policy, I cannot see that any good purpose would be served by holding a formal enquiry into currency matters generally. The need for such an enquiry has been eloquently urged by the Hon'ble Mr. Apcar; and I am aware that suggestions for a new Currency Commission have been received from several Chambers of Commerce. We have had a good many Commissions lately, and I am disposed to think that India in that respect deserves a rest. Commissions are always expensive, not always conclusive, and are usually somewhat unsettling bodies, and the one thing that our currency policy requires is that it should be allowed to settle down into regular habits. Nor can I admit that our currency policy, as based on the broad principles enunciated by Lord Herschell's Committee, has departed so materially from those principles as to demand a fresh special investigation. Currency is a living organism and must adapt itself to changing circumstances. The changes in our policy have been adaptations rather than variations. Fault has been found for example with Government for building up a silver reserve in India. That measure was justified by my predecessor on a previous occasion, and calls for no further defence from me; but the same complaint has been repeated today. I am afraid that the public memory in regard to public finance is sometimes short; and in face of the scarcity of gold which is the prominent feature of our position today, some of us are apt to forget that the time has been, and may come again, when the scarcity of rupees constitutes an imminent danger. The comparatively small silver reserve of 4 millions

[*Sir Guy Fleetwood Wilson.*]

was not attempted until we had accumulated 12½ millions of gold, and it was a pressing necessity at the time. In regard to the other diversion from our original policy for which we are frequently taken to task, namely, the appropriation of a part of our coinage profits for railway capital purposes, I do not think I can do more than refer our critics to the views of that strong Committee of financial and commercial experts upon whose advice this particular step was taken by the Secretary of State. I doubt whether another Currency Commission would disperse our silver reserve, or add to the data upon which Sir James Mackay's Committee based their recommendations.

"I readily admit however that the events of 1907 and 1908 have thrown a vivid search-light upon our currency policy, and it is incumbent on us to see that the results are not lost sight of. In passing, I should like to acknowledge the ability, the courtesy and the clearness with which those results were summarised by the Hon'ble Mr. Proctor in his speech at the annual meeting on the Bombay Chamber of Commerce on the 3rd of this month.

"Turning from principle to practice, I find very little to add to what the Council already know regarding our action during the recent period of low exchange. There were two stages in that period, one prior to, and the other subequent to, March 1908. The action taken by Government during the earlier stage has been vindicated by my predecessor, Sir Edward Baker, in his last Financial Statement and again in his remarks today. The later stage has been one of steady perseverance on the lines already laid down. We have parted with our gold freely, both in England and in India; we have kept exchange successfully up to specie point; and we close the year with £9½ millions in gold and gold securities (£1½ millions in the Currency Reserve, and £8 millions in the Gold Standard Reserve). We are thus far from being defenceless in a further campaign against exchange, should another year of adverse trade again force it upon us, a contingency which at present I hope we need not dread. Nor is the result one of which we need be ashamed, seeing that the Gold Standard Reserve is not yet eight years old, and that this is the first occasion on which it has been put to the test. For the future I can only reiterate what I have said in the Financial Statement, that it is our clear duty to develop and strengthen our gold resources by every means in our power.

"My Lord, I turn now to an economic feature of recent years, which yields to no other in importance, and which has found its fitting place in several of the speeches today: I allude to the rise in prices. I approach the subject with great reserve, both on account of its complexity and because it is at present under discussion between the Government of India and the Secretary of State.

"But it would be a poor compliment to the sincerity and skill with which the subject has been handled by previous speakers if I were to keep silence regarding it. I can however but touch the fringe of the subject and I must make it apparent at the outset that I put forward no remedy for high prices, and that I approach it purely from the point of view of trying to make clear some of our ideas on the subject. Nor can I make any announcement yet regarding an enquiry into prices, for the manner and agency of the enquiry are still under the Secretary of State's consideration.

"The first aspect of the case to which I would invite attention is the vast extent to which the rise in prices concerns Government. Some of our critics write and speak as if Government were responsible for the phenomenon. Others, without going so far, appear to believe that Government are languid and uninterested spectators of the rise in prices. Nothing could be further from the truth. The high prices affect all Local Governments and the Imperial Government gravely and directly. In the increased charges for food and forage in the Army, in the heavy payments by all the Civil Departments as compensation for the dearness of food-grains, in the high dietary charges of jails, and in many other ways, the high prices fall very heavily on Government. They also react upon Government sharply and constantly, through the unceasing pressure on the part of Government employés of nearly all grades for better pay in

[*Sir Guy Fleetwood Wilson.*]

consequence of the increased cost of living. It is impossible for Government to shut its ears to the demand of its servants; and I hope the Council will pardon me if I digress for a moment to explain some of the liabilities entailed on Government, as a large employer of labour, by the recent upward movement in prices.

"The main provision for meeting the distress caused among our subordinates by the exceptional rise in prices consists of course in the authority given to Local Governments to grant compensation for dearness of food-grains, This grant was till lately available only for men drawing Rs. 16 or under; we have now made it available for men drawing Rs. 30 or under, and during 1908-1909 the sum paid to civil employés on this account amounted to no less than £597,000. We have, however, at the same time freely recognised that in addition to these exceptional measures, it is necessary to take steps to recast the scales of pay of the lower paid officials in many of our services. The work can only be done gradually: each case has to be considered on its merits, and any attempt to raise the scale of pay universally would not only be disastrous financially, but would react on the labour market and prejudice private employers of labour. Much, however, has been done in the past years by Provincial Governments, while the cost of the projects for the improvement of the pay of purely subordinate officials which have come before the Imperial Government in the last two years and have been sanctioned by them amounted in 1907 to 60 lakhs per annum and in 1908 to 53 lakhs per annum. In addition to this, we have obtained the sanction of the Secretary of State to institute a General Provident Fund, open to all Government servants. Every one must have met with distressing cases in which Government servants die before they are able to make suitable provision for their families. The new Fund will do much to meet such cases. Subscription will for the future be obligatory on all Europeans and Eurasians drawing over Rs. 100 per mensem and optional for all natives of India on any rate of pay. We have introduced this distinction because we recognise that Indian employés frequently have advantageous means of employing their savings in the improvement or acquisition of private estates; and because we were unwilling to take any step which would compel them to curtail expenditure such as that on the provision of dowries, or marriage and other ceremonies, which religion or custom renders obligatory in their case. Compound interest will be allowed at 4 per cent, and the sum which accumulates to the credit of the subscriber will be his absolute property, and will be handed over to him unconditionally on his retirement or in the case of his death to his heirs.

"I hope I have shown Hon'ble Members that high prices are not viewed with indifference by Government, but that, on the contrary, they are a source of grave anxiety to us, if it were only for their effect on our salary charges. There is another and more subtle danger inherent in high prices, to which Government are exposed in common with the whole community. The cheapness of India's produce and of her labour has been the main reason why she meets her obligations with ease. If prices should rise to a level which interferes seriously with the demand for her products in foreign markets, our export trade would decline and our capacity to pay our debts be diminished. There was at one time some fear that this danger would influence the wheat exports of the season which is now approaching; the market fortunately is strong, and I understand that prices are now adjusting themselves to the position.

"A section of Indian publicists associate high prices with the refusal of Government to discourage the export of food-grains by a heavy export-duty. This view has been recently expressed by our Hon'ble Colleague, the Maharaja of Darbhanga, and it is obviously entitled to the most respectful consideration. There is, on the other hand, a very strong body of informed opinion that the view is based on economic fallacy. I do not propose, however, to discuss it on grounds of economic theory: I wish only to place before the Council a few plain facts which I have drawn from our published statistics for the years 1904—1907. These were three years of very active export and of normally good harvests; and they may be taken as giving tangible evidence of the extent to which the

[*Sir Guy Fleetwood Wilson.*]

food supply of the country is depleted by export. During those three years the export of food-grains totalled 11½ million tons. The production of food-grains in British India and the Native States is not ascertainable with any-thing like the same certainty; but a careful estimate suggests that it was not less than 200 million tons; for rice and wheat alone the outturn was about 115 million tons. If any reliance is to be placed on these figures, then the export during the busy triennium which we are considering did not exceed 6 per cent. of the supply. Within the same triennium, however, the price of rice and wheat in India rose by 25 per cent. and most of the other food-grains showed a similar movement. Can it be seriously argued that an export trade which diminishes the food-supply of the country by only 6 per cent. is directly responsible for such a remarkable change in values?

"We do not deny the importance of the movement in prices, the many hardships which it entails, and the dangers which attend it. We are prepared to ascertain the facts with the utmost care and to give our best consideration to any suggestions which are based on knowledge and on accurate data. But we cannot accept in silence the criticisms which lay high prices at the door of Government, or which pretend that Government could alter the position by a stroke of the pen. There are deeper causes than Governmental action at work. India by its adoption of a gold standard has been switched on to the currency gauge of the rest of the world: and is undoubtedly bearing its share in the price fluctuations to which the rest of the world has been subject. Indeed a careful study of the gold prices in Europe during recent years and of the general prices of commodities in India reveals a close parallelism. This country is undergoing great economic changes, and the change in money values is one of them. Whether the change will ultimately result for the good of India, it is difficult to say. We all hope so, and Government will gladly take any part that it prudently can take in forwarding that end.

"There remains but one other subject on which I wish to touch.

"One of the most interesting of the recent developments in our currency system, and one on which I do not think that public opinion has ever been divided, is the universalisation of our 5-rupee currency note. In paragraph 70 of the Financial Statement, I mentioned that further proposals in the same direction were engaging our attention. I am now in a position to outline those proposals. It must of course be fully understood that they are still merely proposals. Before they can be carried into practice, legislation will be necessary, and before legislation is passed it will be incumbent on us to take counsel, fully and formally, with the commercial and other interests affected.

"There is abundant evidence of a general desire that the privileges of the universal 5-rupee note, *i.e.*, legal tender throughout India and free encashment at any currency office, should be extended to the 10-rupee note. We are in full sympathy with that desire. The 5-rupee note has been an unquestioned success; and the more easily convertible we make our currency notes, the more chance have we of increasing their popularity and extending their use as a genuine medium of circulation. We propose therefore to meet the wishes of the representative public bodies who have pressed us to institute an universal 10-rupee note. But I propose to go further than this, and to make all our currency notes universal up to and including the 50-rupee note. This very large expansion of the area of the universal note will manifestly impose heavy responsibilities upon us in the way of ensuring convertibility; and we propose accordingly to abolish the sub-circle arrangements and the special concession by which foreign notes are received in payment of Government dues and at railways and post offices. These are minor privileges which, though always inconvenient to Government, may have been defensible under a rigid system of watertight-compartment currency circles; but they are not required under the more liberal scheme which we now contemplate. To make sure however that the withdrawal of these concessions shall cause no genuine inconvenience to inland trade, I am prepared to lower our rates for treasury and currency transfers as soon as the new arrangements are introduce'

[*Sir Guy Fleetwood Wilson ; The President.*]

"Important and far-reaching though these proposals are, I should not have been averse to the still bolder step of making our R100 note universal. We should then have been able to divide our paper currency into two distinct categories — notes of R100 and under, which would be legal tender in the whole of India, and notes of higher denominations which would be current only within their own circles ; the former to feed the true circulation, and the latter to be used mainly as stores of value. The project was a tempting one: but it was considered more prudent to stop for the present at the R50 note. We have, however, the Secretary of State's permission to announce that, if the universal R10 and R50 notes prove a success, and do not cast an unduly heavy burden on us in the movement of specie, the further development to which I have alluded will be undertaken and a universal R100 note inaugurated.

"It has devolved on me to present my first budget under conditions which will probably be entirely changed before the next budget discussion takes place.

"The reforms which have been decided upon and which will presumably become operative before this time next year will unquestionably vastly increase the labour and the difficulties of the Finance Member.

"I do not fear the change.

"Undoubtedly it will lead to increased and more searching criticism, but I believe that the criticism will be the outcome not of an intention to embarrass a public servant who is honestly trying to do his duty, but rather of a desire to help him to effect improvement.

"I shall welcome criticism because I believe my critics will be actuated by the same impulse, the same desire, which will influence me—a common desire to improve the work of those who govern and the condition of those who have to bear taxation."

His Excellency THE PRESIDENT said :—"My Hon'ble Colleague, Sir G. Fleetwood Wilson, has assumed charge of his high office at a period of grave anxiety in the history of Indian finance, at a moment requiring the most careful consideration of existing economic conditions together with an unexaggerated forecast of the probabilities and possibilities affecting the future revenues of India. I venture to congratulate him on the clearness with which he has explained the position which confronts us. Till some two years ago a continued prosperity and ever-increasing surpluses may perhaps have rendered us pardonably forgetful of the insecurity of our sources of revenue till the rude awakening of 1907 brought us face to face with those climatic conditions, which from time immemorial have so often been the cause of cruel want and suffering. There was a failure of the monsoon a failure conveying perhaps little meaning to the well-fed Western world, but full of sad forebodings to the teeming population of the plains of India.

"We closed the financial year 1907-1908 with but a small margin to our credit ; and notwithstanding the fairly favourable monsoon of 1908, we were called upon to meet serious demands on behalf of famine relief, whilst later in the year malarial fever accompanied by a heavy mortality went far to incapacitate the populations of Northern India for the agricultural work upon which their every-day welfare depends.

"In addition to these troubles my Hon'ble Colleague has told us, how a great depression in trade has weighed not only upon India but upon the world in general, our railways consequently suffering from an immense diminution in those imports and exports from the distribution of which they to a great extent derive their revenues. It is very disappointing to be told that, for the first time since 1898-99, our railway system has been worked at a loss to the State, still more so to admit the necessity for a reduction of 2½ millions of expenditure on our railway programme, upon which we believe the development and consequent prosperity and happiness of the people of this country so largely depend. Yet recognising the policy which has hitherto directed

[*The President.*]

the administration of our Indian railways, I cannot think that even the increased development we aspire to would have justified a railway expenditure undoubtedly entailing increased taxation as its immediate consequence. We have had to decide between a choice of evils, and my Hon'ble Colleague has to the best of my belief advised us to follow the safest course. Moreover, we must remember that, though famine, sickness, depression in trade, and loss of railway revenue are the most evident evils with which we have been called to deal, a number of other causes to which my Hon'ble Colleague has alluded have combined to diminish the receipts upon which at the commencement of the last financial year it appeared that we could reasonably rely; that the country is generally poorer not only in respect to revenue, but as to individual wealth, than it was at the time of our big surpluses; and that it has become all the more incumbent upon us to avoid increasing present unavoidable burdens even for the sake of the attractive promises of future development.

"We are called upon to face the financial position as it stands today.

"My Hon'ble Colleague has carefully analysed it for us. He tells us, naturally enough, that with a deficit of over £3½ millions we must not be optimistic, but that, with conditions which it is not unreasonable to anticipate, there is no sufficient cause for pessimism. We must earnestly hope that those conditions will be fulfilled. The most rigid economy is necessarily demanded, not only from the Government of India, but from Local Governments, who have readily and loyally appreciated our difficulties, and I confess that the sacrifices necessarily entailed upon them are exceptionally hard—implying, as they must, the discontinuance or postponement of many useful public works, when possibly the stress of approaching poverty may not have been at first so evident to them as to the Government of India.

"We must hope for better times, and the Hon'ble Mr. Miller has told us that, though the agricultural outlook is not as bright as it might be, it is not discouraging, and that with a single good season we may look forward to a rapid return to prosperity. Certainly we have experienced many misfortunes, but amongst them we have at any rate one consolation—the plague has been much less severe than in past years. We are, however, in no way relaxing our efforts to cope with it—strenuous efforts to combat it in accordance with the best teachings of science are still maintained; and though these efforts may not entirely account for the decrease in mortality, it seems probable that they have largely contributed to it. But though there has been a diminution in plague the serious outbreak of malaria, to which I have already alluded, was the cause of much misery in the Punjab, in the United Provinces, and in the city of Bombay, in coping with which, as well as with plague, our Medical officers have been indefatigable in their labours. Much has been done, too, by scientific research, and we may congratulate ourselves in possessing in the Indian Medical Service officers who, in scientific investigation, competence, and enthusiasm, have few equals in any country in the world.

"His Excellency the Commander-in-Chief has given us an account of his stewardship for the 6½ years during which he has held his high command. I am sure I am only voicing the opinions of my Colleagues in telling him that we have listened to the story of his military administration, not only with deep interest, but with a sincere appreciation of his work and its results. It is no disparagement to his many brilliant predecessors to say that he has evolved from the factors of a somewhat scattered mass of splendid fighting mateial an Army complete in its component parts. The crippling centralization, which must in bygone days have well nigh broken the hearts of over-worked officers, he has dispersed amongst his Divisional Commanders; in fact, the key to his organisation has been the perfection of a system in which the responsibility for the efficiency of each division in all its branches should rest with the General Officer Commanding it—a responsibility which that officer must again himself demand from the Brigadiers and Regimental Commanders under him.

[*The President.*]

"It has been Lord Kitchener's object so to distribute these divisions throughout India, as to facilitate either their mobilisation for a great campaign, or their capacity to furnish at short notice flying columns for some frontier expedition, or to meet sudden demands for internal defence. Notwithstanding much ignorant criticism both as to the intentions of this redistribution, and the manner in which it has been carried out, the objects in view have been ably fulfilled. At the same time a very great deal has been done to bring military equipment, in the broadest sense of the word, up to date, to better the pay and allowances of the native ranks of the Indian Army, and to improve the position of its British officers.

"But in addition to the creation and distribution of military machinery, which the Commander-in-Chief has explained to us, there is the greater question of the future policy which is to direct the high administration of the Army. With the abolition of the Supply Department so well presided over by General Scott, whose personal services this Council will much regret to lose, the last traces of dual military control and dual advice to the Viceroy will disappear, and Lord Kitchener will be the first Commander-in-Chief to unite entirely in himself the command of the Army and the administration of the Army Department. I have no intention of going over the weary arguments for or against a system which has now become obsolete, but it may not be out of place for me to say a few words on the one really vital question affecting a prolonged dispute. Will the new system of Army administration ensure for the Government of India the necessary constitutional control over the Commander-in-Chief? I unhesitatingly assert, after an experience of some years of the results of the transfer to the Commander-in-Chief of the powers and much of the work of the Military Member, that the change of system whilst giving him wider administrative authority has materially detracted from his independence of action. I can understand the apprehensions of my predecessors as to their want of control over him, for though the proposals of a Commander-in-Chief may often have been checked by the interference of the Military Member, the former was in many matters free to act on his own initiative, there was no direct channel of communication whatever between him and the Viceroy, there was no Secretary to Government answerable to the Viceroy for a clear explanation of the Commander-in-Chief's views. The post of Secretary to the Army Department will now always be held by a distinguished General Officer, on the same footing as a Secretary to Government in every other Department—fully entitled to differ with the head of his Department, and with free access to the Viceroy.

"Again as to military finance,—for the careful supervision of which we have to thank Lord Kitchener,—a full acquaintance with any extravagant expenditure proposed by a Commander-in-Chief is much more directly and promptly available to the Viceroy and the Government of India than in the days of the Military Member, for the Secretary to the Military branch of the Finance Department is Joint-Secretary to the Finance Department itself, with the same access to the Viceroy and the same powers as any other Secretary to Government. I believe therefore that the higher administration of the Army has now been placed on a constitutionally safe and thoroughly sound footing, and that the Government of India will do wisely in following Lord Kitchener's advice to safeguard the continuity of that military policy which he has done so much to inaugurate.

"But all of us assembled here today must, I am sure, feel that great as has been the change in the conduct of military affairs, it is small in comparison with the amelioration of long-established systems of administration, the possibility and advisability of which have for the last few years called for the most careful consideration of the Government of India.

"This is the last Budget Debate, the last meeting of the Imperial Legislative Council, which will take place in this hall in accordance with the procedure which has been in existence since the Councils Act of 1892 came into force. At the close of the Budget Debate of last year I expressed a hope that,

[*The President.*]

when this Council next assembled, measures would have been adopted by His Majesty's Government which would go 'far to meet the aspirations of those who have the welfare of the Indian people at heart.' Those measures have been fully discussed by the public in India and in England and are now passing through the last stages of Parliamentary criticism—the fulfilment of my hopes for their success must depend largely on the spirit in which they are finally received by the people of India and upon the honest endeavours of Indian political leaders to further the objects for which they have been framed. But we cannot conceal from ourselves that the origin of those measures, and the conditions which they were intended to meet, have, to a great extent, been lost sight of, or misrepresented. Attractive side-issues have arisen and have eclipsed the main objects the first framers of the reform scheme had in view, and the fact that they were the first framers of that scheme, has either been buried in oblivion, or their action has been attributed to ignoble concession, to unlawful agitation, or to unjustifiable nervousness.

"A true conception of what has been the attitude of the Government of India throughout the history of these reforms is of such immense public importance in respect to the qualifications of that Government to administer the affairs of India that I will venture to quote to my Colleagues the words I made use of in replying to the Hon'ble Mr. Gokhale in the spring of 1907. I said:—

'I recognise with him that politically India is in a transition state; that new and just aspirations are springing up amongst its people, which the ruling power must be prepared not only to meet but to assist. A change is rapidly passing over the land, and we cannot afford to dally. And to my mind nothing would be more unfortunate for India than that the Government of India should fail to recognise the signs of the times. I have deemed it all important that the initiation of possible reforms should emanate from us. I have felt that nothing would be more mischievous to British administration in India in the future than a belief that its Government had acted on no conviction of their own, but simply in submission to agitation in this country and in accordance with instructions conveyed to them from home. If there has been misconception as to this, I hope I may be allowed this opportunity of correcting it. The story, as far as I can tell it at present, is simply this—that last autumn I appointed a Committee of my Council to consider the possibility of a development of administrative machinery in accordance with the new conditions we were called upon to face. That Committee's report was considered by my Council, and a Despatch expressing the views of my Colleagues and myself has been forwarded to the Secretary of State. What I would impress upon you is that this move in advance has emanated entirely from the Government of India.'

"That is what I said two years ago, and I repeat it again today all the more strongly. The material from which the Bill now before Parliament has been manufactured, was supplied from the Secretariats of Simla, and emanated entirely from the bureaucracy of the Government of India. The deliberations and correspondence of which the Bill now before Parliament is the result commenced over 2½ years ago. It was in August 1906 that I drew the attention of my Council in a confidential Minute to the change which was so rapidly affecting the political atmosphere of India, bringing with it questions which we could not afford to ignore, and which we must attempt to answer, pointing out that it was 'all-important that the initiative should emanate from us, that the Government of India should not be put in the position of appearing to have its hands forced by agitation in this country or by pressure from home, that we should be the first to recognize surrounding conditions and to place before His Majesty's Government the opinions which personal experience and a close touch with the every-day life of India entitle us to hold.' I consequently appointed the Arundel Committee. That Minute was the first seed of our reforms, sown more than a year before the first anarchist outrage had sent a thrill of shocked surprise throughout India by the attempt to wreck Sir Andrew Fraser's train in December 1907. The policy of the Government of India in respect to reforms has emanated from a mature consideration of political and social conditions, whilst the administrative changes they have advocated, far from being concessions wrung from them, have been over and over again endangered by the commission of outrages which could not but encourage doubts as to the opportuneness of the

[*The President.*]

introduction of political changes, but which I have steadfastly refused to allow to injure the political welfare of the loyal masses of India. As to the reforms themselves, putting aside points which have from time to time formed part of our proposals but have been in no way vital to them, the original pith of our scheme was the enlargement of the Imperial and Legislative Councils on a basis of wider representation of the most stable elements constituting the populations of India—and in a popular sense, I mean in respect to the effect such enlargement of representation will have on the people of this country, that is still the most imporant point in the changes about to be introduced. I have no intention of embarking this afternoon upon any expression of opinion as to the intricate machinery the creation of such representation may require, but I have listened with pleasure to the broad-minded remarks with which my Hon'ble Colleague Mr Gokhale approached the peculiar necessities of representation in this country. My Hon'ble Colleague also alluded to the opposition clause III of the Reforms Bill has met with at home. I need only say that the Government of India fully recognise the effect the enlarged Councils must have in the future position of Lieutenant-Governors and the transaction of the increasingly heavy duties that will be imposed upon them, and are in full accord with the Secretary of State as to the necessity of the powers the clause confers.

" My Hon'ble Colleagues will, I know, join with me in the regret with which I realize that the term of office of the Hon'ble Sir Erle Richards is about to come to a close. He has filled that office with marked distinction, and we shall miss the able assistance and advice upon which we have so long relied.

" His Majesty the King on the recommendation of the Secretary of State has selected the Hon'ble Mr. Sinha to succeed Sir Erle Richards. I extend to him a hearty welcome, in which his many friends will share, on his appointment to my Executive Council, to a post for which his great attainments, his professional ability, and the high public esteem in which he is held have preeminently qualified him.

" The Hon'ble the Nawab* has reminded me of the deputation which addressed me on the 24th of last December. I shall always look upon that occasion as one of the most memorable of my career in India. The moment was one of great anxiety when it had for long been impossible to say what the immediate future might bring forth, and when the reassuring words I listened to were exceptionally full of meaning—all the more so because they were spoken, as the Hon'ble Nawab has told us, with a thorough honesty of purpose by men who, though they might differ from each other on many points, were prepared on behalf of their countrymen to recognize not only the promises of a new political future, but the responsibilities which it must entail.

" It is upon the recognition of those responsibilities by the leaders of Indian thought, it is upon the political tolerance, which it rests with them to encourage amidst a diversity of interests and beliefs, that the happiness of the future of India so largely depends."

The Council adjourned *sine die.*

J. M. MACPHERSON,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 29th March 1909.

APPENDIX III.*

Speech of the Hon'ble Nawab Bahadur SIR KHWAJA SALIMULLA of Dacca which in his unavoidable absence was read by the Secretary under the orders of the President.

"My Lord, it is indeed a matter of regret that after a long succession of prosperity budgets, it should have fallen in the first year of his office to the lot of my Hon'ble friend Sir Fleetwood Wilson to face a deficit budget; but the admirable manner in which he has been able to get Your Excellency's Government to meet its difficulties, and from what we know of the resources and the capability of the country, we may, I think, safely agree with my Hon'ble friend, that in this deficit 'there is no evidence of any adequate cause for pessimism, and I can see no reason why, with a due regard for economy, favourable harvests, and a period of peace, we should not look forward to a return of that prosperity which has characterised former years.' And I feel sure with an expert financier at the helm, who within the short period of five months has been able to so completely master the intricacies and mysteries of Indian finance, we may safely confide in him to restore our financial equilibrium at no distant date. We have to thank Your Lordship that instead of resorting to fresh taxation, in order to meet the growing needs of the country, Your Excellency has adopted the more statesmanlike policy of retrenchment, refraining from launching into new experiments in the administration of the country, and in the raising of loans to meet the capital expenditure of the year. I am one of those who belong to that school—I believe somewhat discredited now-a-days—who approve of making posterity share in the expenditure of which it will derive the most benefit. We are indeed much obliged to our Finance Minister for the interesting statement he has given of the national debt of 16 of the chief countries in the world; if anything was wanting to show how light is the national debt of this country, here we find India occupies something like the eighth place amongst the great countries and states in the world, in the matter of our public debt, but which is the lowest of all the 16 countries in the matter of its debt as per head of the population, *viz.*, £1-1-3 per head, and is only three times the amount of our annual revenue. And therefore the raising of loans to meet our capital expenditure is a satisfactory expediency, and in the light of these remarks if my honourable friend could see his way - by increasing the amount of the loan he is going to raise,—to meet the requirements of the Railway Board it would be money well laid out.

"Turning to the salient features of the budget, my Lord, when I ventured to record my humble protest last week, at this Government being forced to carry out the orders of the Secretary of State, even when 'the men on the spot are very doubtful of the expediency of the orders in question, I confess I had in my mind's eye the fearful increase in the Military expenditure foisted on this country by the Romer Committee, and in which I believe Your Excellency's Government was not consulted, but for the payment of which my Hon'ble friend the Finance Minister at Your Excellency's bidding has fully provided for.

"My Lord, I must thank you sincerely that in the midst of this financial depression and retrenchment, Your Excellency's Government is manfully keeping to its policy of making the hard lot of the subordinate service as little irksome as possible to these the most deserved class of public servants, and that the increase of £55,600 shown as increase under the head of 'Salaries and expenses of Civil Department' will go mainly to the amelioration of their hard lot.

"My Lord, in the midst of these monetary depressions and gloom there are however one or two matters over which I beg to offer Your Excellency my sincere and heartfelt congratulations, not the least amongst these I hold is the return to moderation and sobriety in the political activities of the agitators. We have all looked on with the greatest satisfaction at the tone of their utterances at the Madras Congress and elsewhere, and I for one have no hesitation in holding that had these, the representatives as they call themselves of the

* *Vide* p. 128.

educated Indians, said and done half as much as they are saying and doing now some two years ago, Your Excellency's Government would have had no need of putting the repressive acts of the last six months on the Statute-book, or that rapine, murder and disorder would have taken so strong a hold of the country as we have witnessed. I feign would hope that the good example set by the Hon'ble Mr. Gokhale will be zealously taken up and adopted by those of his party who are still holding back, and that the distant rumbling of thunder we are just beginning again to hear at Faridpur and at the recent Town Hall meeting may, by his sound advice and personal influence with his friends, pass away without breaking the calm that now appears to prevail.

"My Lord, another cause of congratulation and great rejoicing are the reform proposals of Lord Morley, now before the Parliament, as the Indian Councils Bill—and most of us have much to say on this magnificent piece of statesmanship, due to the perseverance, patience and singleness of purpose of, I believe, Your Excellency's Government alone. My only regret is that the rules of this Council could not permit Your Excellency giving us a special whole day to discuss this question in Council, and as all of us will be saying our say on this subject, I will try to be as brief as possible and confine myself in the remarks I am going to make to the broad features of the policy of the reform instituted by Your Excellency's Government. When the long—and anxiously—looked forward to papers on this reform were simultaneously made public, both here and in England on the 18th December last, there was an universal echo throughout the country of thankfulness and gratitude to the Secretary of State and to Your Lordship,—we see in them a grand idea justifying the claim made by Sir Fitzjames Stephens some 50 years ago that 'the Government of India is a Government of great ideas;' and when we, the natural and the self-elected representatives of the various peoples and nations of India—Muhammadans, Hindus, Parsees, Jews, Europeans, etc., etc., approached in deputation Your Excellency, to express our heartfelt and sincere thanks to Your Excellency and to the Secretary of State, it was attempted in certain quarters to show these rejoicings were not spontaneous, but made to order; but I for one am prepared to deny this calumny. For, though there are certain portions of the scheme which do not entirely fit in with what some of us want, yet I was wholly in agreement with what Your Excellency declared in Council that 'we may assume that we are about to enter on a new administrative era, based upon a recognition of the advance of political thought and the justness of many political ambitions,' and it would have savoured of rank ingratitude had we not all joined to, in Your Lordship's happy words, 'welcome this honest attempt to ameliorate the administration of the country'; and I feel certain everyone who attended that deputation did so with the same sole object, *viz.*, to welcome with gratefulness the 'honest attempt made to recognise the advance of political thought and justness of political ambition'. But when I have said this much, Your Lordship, I trust, will give me and others the credit of honesty of purpose where we differ from each other, as well as in certain details in the working out of this magnificent scheme.

"In the same way, when I cordially joined my Moslem brethren in the representation of the All-India Moslem League made by my friend, Mr. Syed Ali Imam, as Chairman of the League at its sessions at Amritsar, it was not that I individually had not some tinge of regret at the total removal of what I and many others think was the greatest feature of Your Excellency's original scheme outlined in the Home Department letter to the Local Governments under No. 2310—17, dated 24th August 1907, and this regret I take this opportunity, with Your Excellency's permission, to place on record.

"My Lord, in my speech at the Budget meeting of two years ago I said 'my own idea is, that instead of the microscopic minority of English-speaking natives alone being invested with increased power of guiding and advising Government, if the Princes, Chiefs and the landed gentry were taken into consultation by Government and given greater facilities of being heard and consulted, there would be greater chance of Government arriving at a policy of administration which would be more conducive to the peace and prosperity of the country. In this speech I spoke at some length on the undesirability of placing increased administrative and political powers in the hands of the professional or so-called

educated classes. But the virulent opposition which the 'Council of notabilities' encountered itself showed that the boot had been put on the right foot, and that it had hit the mark it was intended for, and the lawyers and the vakils who govern and rule our native Press shouted down the very idea which was fatal to their interests, and which Your Lordship has correctly summarised in your now ever memorable despatch No. 21 of 1st October 1908, as 'on the other hand the leaders of the professional class regard the Advisory Councils as superfluous and illusory; they protest against class electorates for the Legislative Councils, and they demand the formation of territorial constituencies on a scale which would render their own influence predominant.' And it is indeed with very, very great regret I see the Secretary of State has, unfortunately, eliminated from the scheme even the Advisory Council of Notabilities to the Government of India. The grounds on which this has been done are, I am forced to say, most flimsy; anyhow it is impossible for me to believe that the combined wisdom of Your Excellency's and the Secretary of State's Councils could not have designed and constructed a scheme which would have minimised, if not altogether have removed, the difficulties noticed in paragraph 4 of Your Excellency's despatch No. 21, and in paragraphs 3 and 4 of the Secretary of State's No. 193. It seems to me this is only another instance of 'how not to do a thing we do not wish to do,' and that the interests of the territorial magnates and those of the masses have been sacrificed at the altar of concessions to the lawyers and pleaders. For, my Lord, however much we landholders and zamindars wish not to in any way wreck and destroy this magnificent scheme of reform, I fear the rock on which it will be shattered will be this very elimination of the Council of notabilities, and I still hope that in good time this Advisory Council will form a permanent part of the administration of the country. For until a higher tone of education—instilling a moral character of duty and appreciation of right and wrong is imbued into the scions of our aristocracy, you will not find there will be many of my class to contest against the pleaders, lawyers and the professional classes, who will naturally monopolise the enlarged Legislative Council of the country, and till that much wished for time arrives, when the young men of my class will hold it a sacred trust, and not think it derogatory to their dignity and position, to enter the arena of a political election, till then I respectfully submit, my Lord, the Advisory Council Your Lordship suggested in the original scheme is the only body which could be of any real and genuine use to Government; as we, the natural representatives of the people, are the only intermediaries between the officials and the masses; their interests and ours are one; their joys and sorrows are ours and ours theirs; we have a common bond of union, having grown up on the same land from generation to generation; there is almost a feudal attachment between us, which as yet Western innovations have not invaded or broken down; and this position, I unhesitatingly say, cannot be attained, my Lord, in the life-time of this Council and of many a successor of the enlarged ones, by the pleaders, lawyers and mukhtears; the interests of the professional class have nothing in common with those of the masses. The people never co-mingle or go to them, for aught else than litigation, and it is thus that the Advisory Councils would have served to be a link between the Government and the masses, and which under the circumstances the enlarged Councils can hardly be. My Lord, from the recent debate in the House of Lords I see that Lord Lansdowne is in favour of these Advisory Councils.

"As regards the representation of my friend Mr. Ali Imam on behalf of the All-India Moslem League, what has been urged therein has my fullest support; but I need not enlarge on it here inasmuch as Lord Morley has acceded to our main request, both from his seat in the House of Lords and in his reply to the deputation that waited on him under the auspices of my venerable friend Mr. Syed Ameer Ali, and for the expression of his opinion on both these occasions we Muhammadans are most sincerely grateful to His Lordship. My Lord, it indeed wanted a firmness of purpose to have withstood the bitter and violent character of opposition the representation to Your Lordship of Mr. Ali Imam, has met with in this country. But this very violence has made Lord Morley see the necessity of granting us our boon and admitting the validity of the considerations on which he has promised the increased and special electorates for our representation. I need only mention one of these considerations, *viz.*, that it was felt that unless

the scheme was substantially modified, it would work most injuriously to the Muhammadans by subjecting their interests to the goodwill of another community; and without the modification asked for, their representation on the enlarged Council would be nominal and worthless. We Musalmans have sought our shares in the political privileges about to be conceded by these reform proposals, such as would, to use the language of Your Excellency, be commensurate with our number, and with our political and historical importance, and the weight of these and the other considerations advanced in Mr. Ali Imam's representation to Your Excellency, and those advanced by the deputation that waited upon Lord Morley, has not in the least been lessened or reduced by what has been urged at the Town Hall meeting of Wednesday last, while in support of our just claim to special representation I beg to cite the weighty words of Lord Reay, perhaps the most able and single-minded of our latter day Governors. His Lordship in the recent debate in the House of Lords, I see, said: 'He was glad the Secretary of State had yielded to the claims of the Mahomedans for separate representation. It was of the utmost importance that the Mahomedan community should be represented by those in whom they have confidence; and any one who have followed their great world movement—and it must be remembered, they numbered 245 millions—were aware of their determination to defend with intensity their own faith.'

"The virulence of the Native Press appears to me to have been directed more against our claim to historical and political importance, the Aga Khan and Mr. Ali Imam personally and the Moslem League in particular, than to the merit of our representation; as regards our claim to historical and political importance Your Lordship has graciously admitted the same when receiving our deputation at Simla. As regards the League and my friends, they need no advocate to defend them, as their work is before an intelligent, discerning and impartial public and they are prepared to be judged by it.

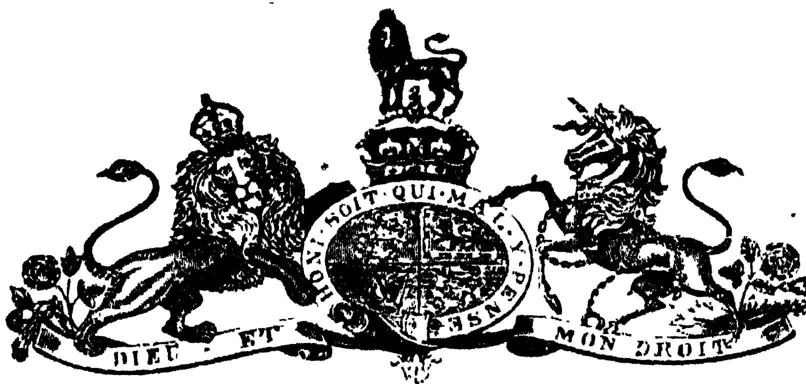
"My Lord, there is one other matter in connection with these reform proposals that I desire, with Your Lordship's permission, to bring to Your Lordship's notice; my Lord, there was, if anything, but one jarring note in the interesting debate in the House of Lords on the India Councils Bill, and that note has raised wide and various expectations in the minds of the people of this country; my Lord, Lord Macdonald went out of his way to declare 'the partition of Bengal to be the greatest blunder since the days of Clive.' I have always felt that this chance expression of His Lordship was never intended to be taken seriously; but, my Lord, it was just the opportunity to rouse the fading and dying energies of those who have unreasonably cried themselves hoarse and have set themselves to see the partition reversed or modified, and they have again commenced beating the big drum (as it is evident from their recent proceedings at Faridpur and at the Town Hall) to see if they can secure the reversal of the settled fact, on a promise and assurance of their unanimous support to the reform proposals of Your Lordship, and I suppose on the principle that, if they could make as many impossible demands as a condition precedent, for their support and co-operation, they may get Your Lordship and the Secretary of State to make at least some one of the concessions they are asking for as the price for their acquiescence to the reform scheme. But, my Lord, though I think neither of Your Lordships are men capable to withdraw from your pledged word solemnly given to a great, historical, and political nation, yet I must publicly raise my humble voice as a warning that if the least of these concessions be granted to them, it will in no way satisfy them; for seeing how concession after concession can be got out of the Secretary of State and Your Excellency, they will, like Oliver Twist, be asking for more, or rather I would say like the Irish Home Rulers they would take what they can get hold of, as an earnest for more to be got. On the other hand, I assure this Council that should any one of the conditions precedent—which are being openly asserted in the Bengali Press—to their accepting these reforms, namely, the reversal of the Partition, the release of the deportees and political prisoners who Government has strong reasons to believe are mainly responsible for the unrest in the country, the separation of the judicial and executive functions of the district officers—be just now conceded or given to them, it will be a political blunder, the consequence of which will be disastrous to

the country; for Your Lordship will then be giving not peace but a sword to those who have stood by Government through all these troublous times, and who share the burden of the defending of the country to a far larger extent than any other nation or race in India. To Lord Macdonald and to the fanatics (I use Babu Mitter's own words in retort) of the Town Hall meeting I would only ask to read the annual administration reports of the various departments of the public service of the new Province and say whether the progress to be found therein by leaps and bounds within the short period of five years in the political and material advancement of this long forgotten and neglected part of the country—in the matter of education, sanitation, and protection of life and property which we see around us—can be said to be due to a blunder?

"And here I desire to take the opportunity of thanking Your Excellency for, and of congratulating my friend the Hon'ble Mr. Sinha on, his appointment of an Ordinary Member of Your Excellency's Executive Council. Under the circumstances of its being in the nature of an experiment, a heavy responsibility rests on my Hon'ble friend, for all will depend upon the way he discharges the onerous duties of his high office that the future advancement of Indians in the higher offices in the public service will rest, and from what I know of him I feel sure he will be equal to the occasion.

"My Lord, with Your Lordship's permission I will conclude these observations of mine by briefly alluding to the questions Your Lordship has from time to time permitted me to ask in this Council during the sessions. My Lord, I have to tender my grateful thanks to His Excellency the Commander-in-Chief and to the Hon'ble Mr. Miller for their replies to my questions, whether Kashmeerees are debarred from enlisting in the Indian Army, and those residing in or without the borders of Amritsar are included in the definition of cultivator in the Punjab Land Alienation Act. The grievances of these Kashmeerees were bought to my notice by the people during my recent visit to Amritsar, where I went to preside at the All India Moslem Educational Conference, and is an apt illustration of what I have urged today in support of the Advisory Councils, that the lawyers and pleaders who predominate and govern the political associations and the vernacular Press of the country are never in touch with the needs and wants of the people, and in fact the masses never look on them as their friends; for, my Lord, in the northern parts of India I found they had quite as many political associations as we have in these parts, but no one ever thought of removing these grievances of the ryots, which was apparently to be done for the mere asking; I have received countless letters from the Punjab, thanking me for the information my Hon'ble Colleagues have been pleased to convey on behalf of Your Excellency's Government. These replies have given great satisfaction and will lead to a speedy relief of these grievances of the people of those parts, which now turn out to be an imaginary grievance.

"My Lord, the answer to my questions regarding the Registration of Partnership has disclosed a more curious state of affairs; the Council was supplied with copies of the letter from the Government to the Bombay and Calcutta Chambers of Commerce, the replies of those two bodies and the final reply of Government being 33—4, dated 6th January 1909. To sum up briefly the interesting correspondence:—the subject of the Registration of Partnerships is admitted to be a public necessity, it has been under consideration at various times during the last 40 years, but hitherto it has not been found possible to devise a measure suited to the peculiar condition of business in India. 'The Calcutta Chamber of Commerce, tired out by waiting, got their legal advisers to draft a Bill which is sent to Government and which is sent by them for the opinion of the various Chambers of Commerce and is approved *in toto* by the Chambers of Commerce of Madras and Karachi, and subject to one single exception in each case was also accepted by the Upper India and Rangoon Chambers of Commerce.' The Bombay Chamber of Commerce took a strong objection to it, and a mighty Government knuckles down to a single commercial body against the almost unanimous approval of all the other commercial bodies in India. Government sent back the draft Bill to the Bengal Chamber of Commerce for reconsideration and concludes their letter to the Chamber, paragraph 8, as follows:—'In conclusion I am to say that the Government of India



fully recognise that there has been a general and continued demand for legislation on this subject and are quite prepared to consider proposals for legislation. They believe, however, that it will be readily admitted that they cannot move in the matter until the several Chambers of Commerce in India are in close agreement as to their precise requirements or until it can be conclusively shown that the difficulties with which the matter is beset can be satisfactorily overcome.' And it is inconceivable that though legislation on the subject has been called for and urged by the public in no uncertain tone, yet it was allowed to be hung up because of the opposition of a single Chamber, while the replies to the Government letter by the Chambers of Bombay and Calcutta are indeed curious reading; the Secretary of the Bombay Chamber writes: 'My Committee are, however, of opinion that there is a general and continued demand for legislation on this subject, that Government itself should proceed in the matter. They contend that if Government submitted a draft Bill, embodying the most practical suggestions of the Bombay, Bengal, and other Chambers, it is very possible that these various bodies would agree to a compromise and support Government in passing the desired Act, and my Committee therefore see no advantage in further deferring the consideration of the proposed special legislation of this Act.' While the Secretary of the Calcutta Chamber is still more solicitous. He writes: 'As regards the difference between the Chambers, the Committee do not consider that these are of such consequence as to be a bar to legislation. They notice that the Bombay Chamber has suggested that the matter should not be further delayed, but that the Government should draft and publish for criticism a Bill embodying the most practical proposals which have been put forward; the Committee earnestly trust that Government will now proceed with the preparation of the required Bill and not allow the fact that difference exists, as indeed as they must in such matters, to be a reason for delaying legislation for which it is believed there is a very real and continuous demand.' The reply of the Government of India to these two communications is still more curious, that Government regret that they are unable to modify the decision which was communicated to the Chambers in paragraph 8 of the Home Department letter, *viz.*, 'That they cannot move in the matter until the several Chambers of Commerce in India are agreed as to the form which the proposed legislation should take, or until it can be shown clearly that the difficulties with which the question is beset can be overcome.' What are we to say to this? With the two well-equipped Departments of Law and Commerce and Industry, the Government to cry *non possumus* is, to say the least of it, curious reading. May I beg Your Excellency to see personally to this matter, which from the public comments in the papers arising out of my question appears to call for speedy action and no more delay.

"My Lord, the answer to my three questions in the matter of the formation of the Indo-European Trading Society, Limited (referred to in the *Truth*), whether the attention of Government has been drawn to the comments of the Press in India to the necessity of legislation to check and control the formation of commercial and industrial undertakings, the chief aim of which really is the formation of bogus companies for the benefit and advantage of Company promoters, and whether early steps can be taken for the consideration of such legislative measures as may help to the encouragement and formation of healthy and stable commercial and industrial undertakings in India, are also curious reading. All the answers are in the affirmative. The Government of India are aware of the facts I have brought to their notice, but there is not a word to say whether the Indo-European Company hails from the India House, Highgate, or why we should wait until an innocent and illiterate people is overwhelmed by another 'South Sea Bubble' or a Back Bay speculation, or why we cannot take the initiative or move independently of the process of legislation on this subject in England. In connection with this subject I beg to draw Your Excellency's attention to the judgment of Mr. Stuart, C.S., Sessions Judge, Meerut, published in the *Statesman* of the 26th. My Lord, I fail to see the object and necessity of the department of Commerce and Industry and of the Department of the Law Member if all they have to do is to wait and take a leaf out of the Statute Book of the English Parliament and we pass it off as our own.

"My Lord, another question of mine to which I desire to specially refer before I conclude is that regarding the separation of the judicial and executive functions of district officers. I am sorry that I was unable to attend last year's budget meeting of this Council, in which Your Lordship and particularly my Hon'ble friend Sir Harvey Adamson mentioned the intention of Government to try the experiment of separation. To this subject I had, however, at some length drawn Your Lordship's attention and that of the Council in my speech at the Budget meeting of two years ago. To what I then said it does not appear any reference was made in the debate wherein Your Excellency's Government came to the determination to give the separation a trial. But from the printed record of our proceedings of last year's meeting, I find that the subsequent Government circular letter to the various Provincial Governments and High Courts (calling for their views and through them of those of the Political Associations and public bodies and men under them) is mostly a reprint of what my Hon'ble friend Sir Harvey Adamson stated in this Council, and I intended not to broach this subject until it was ripe for adjudication by Your Excellency's Government. But the reply of the Hon'ble Member of the Home Department to the question put by my Hon'ble friend Mr. Dadabhoy, whether Government has finally decided upon the scheme of the separation on the lines laid down by the Hon'ble Home Member last year, that Your Excellency's Government 'has not yet decided and that it has referred to the Governments of Bengal and Eastern Bengal and Assam and the Calcutta High Court proposals for the introduction into selected districts of the two provinces, and when all the replies are received, the scheme will be further examined by the Government of India and a reference will then be made to the Secretary of State. It is therefore impossible to say when the final orders on the proposal will be passed,' made me think that I ought to put the question I did, whether the reply of my friend Nawab Syed Ameer Hosain, C.I.E., to the Government of Bengal, calling for his opinion had been seen by the Government of India, and if so could a copy be sent to those official bodies to whom the Government proposals have been submitted and a copy of the Nawab's letter be placed on the Council Table. I further availed of this opportunity to draw the attention of Your Excellency's Government to the fact that the experiment of the separation by the Government of Mysore, where it has been in operation for the last two years, has not proved a success, and that the Dewan of Mysore in the Mysore Representative Assembly refused to further extend the experiment. My object of putting that question in that form was that my friend Syed Ameer Hosain, who has taken considerable trouble to show as it were the whole history of this question, and had quoted views of every Lieutenant-Governor of Bengal and of the various Viceroys who had previously dealt with the question, ranging from 1837 to that of Lord Curzon, and of the High Court Judges, and has explained the now famous letter of the 12 distinguished retired officers who had been got to subscribe their signatures to the memorial to the Secretary of State and with which memorial my Hon'ble friend had been somewhat impressed and as I thought that the reply of my friend Syed Ameer Hosain was so clear an exposition of the views of those against the separation, that it was desirable that the Government of Eastern Bengal and Assam and the present day High Court Judges of Calcutta as well as the members of our Council should have a copy of this letter before them, and finding from the Madras papers that the scheme of the separation of the two services in the Mysore State has not proved a success, and the Dewan has refused to extend the experiment; I venture to draw the attention of Your Excellency's Government to the fact in order that it may induce Your Lordship to accede to my request made in my speech of two years ago, to stay your hands from the demolition of a system which in the backward state of the masses has been their chief stronghold and protection. The reply to my question is not satisfactory to me, for Your Lordship has refused to submit what I may call the judgment of the referees of our side of the case. While Your Excellency appears to have been satisfied as to the successful working of the system in Mysore by the fact that the Dewan in the Representative Assembly has remarked: 'The experiment has worked well, so far as it has gone, but any further extension of its scope appears likely to entail additional expenditure and has on

that account to be deferred for the present.' But the *Hindu* of Madras of the 20th January last makes the following comments and which speak for themselves:—'However, the experiment of separating the two functions has commenced even before October 1907, since then it has been tried in the districts mentioned above (the same as those referred to by the Hon'ble Member in his reply). In his address to the Representative Assembly of 1908 the Dewan referred to the progress in the working of the new arrangement and added (the very words given by my Hon'ble friend that it is on account of the additional expenditure that a further extension was postponed).' The *Hindu* then goes on: 'What the additional expenditure that the proposal might involve he did not choose to tell the assembly. In fact no detailed scheme would appear to have been worked out, there was nothing to show that the administration was really in earnest about the carrying out of the scheme, or that the question of ways and means was fully in the way of its doing so. In the very speech in which the Dewan proposed to defer the further question on the ground of additional expenditure, he was congratulating the whole of Mysore on the wonderful surplus of the State finances in the preceding three years. In the three years therefore we have been able to save nearly 48 lakhs; with the anticipated saving of 12 lakhs 47 thousand of rupees in the current year's estimate, the total balance to the credit of the Government will be one crore and four lakhs. How hollow does the plea of want of funds sound by the side of this boasted surplus, not of one year, but of three years in the past, and an additional one in prospect. The truth of the matter seems to be that the Government do not much care for the Reform.' The paper also states that the Judges of Chief Court of Mysore have declared in their administration report that 'The experiment has retarded the prompt disposal of Civil Court work and the order of the Mysore Government on the Chief Court report is that it will wait further experiment of the working of the system before deciding on any extension or change.' This state of affairs surely does not show that the experiment has been postponed for want of funds, but for giving it a further trial. However, I am thankful to Your Excellency for calling for reports from the Political Agents of those States where the experiment is being tried, and that with our heavy deficit, the huge expenditure it will involve if the experiment be put into force in British India, I am happy in the thought that the poor illiterate ryot will still be protected in the matter of his life and person, by his friend the district officer, whom he has always trusted, for some years to come.

"My Lord, I had intended to refer to the China and Straits Opium Commission Reports and to the opium question in general, the quinquennial report of the Director General of Education, and particularly to Mahomedan Education, and to the Decentralisation Commission report, but I have, I fear, already trespassed too long on Your Excellency's time. I however cannot conclude without begging Your Excellency to permit me to bid farewell to three of our Colleagues. The Hon'ble Sir Erle Richards and the Hon'ble Major General Scott will be leaving us in a couple of days, and this is the last occasion on which we shall see His Excellency the Commander-in-Chief at this Council Board in Calcutta. It has been a source of sincerest gratification and pleasure to me to have associated myself with three such brilliant gentlemen of distinction and ability, and I heartily wish them long life, health and prosperity wherever they may be."

SUPPLEMENT TO

The Gazette of India.

No. 14 } CALCUTTA, SATURDAY, APRIL 3, 1909.

OFFICIAL PAPERS

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI *of the* GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

Report of the Central Executive Committee of the Indian Famine Charitable Relief Fund, 1909.

Owing to the premature stoppage of the monsoon rains in the autumn of 1907, the country was called upon to face a famine in practically the whole of the United Provinces, in some of the Protected States in Central India and in parts of the Punjab, Bengal and Central Provinces, and His Excellency Lord Minto at a Meeting held in the Town Hall, Calcutta, on the 17th March 1908, appealed to the general public for charitable assistance on behalf of the suffering people. In the course of his speech, His Excellency dwelt on the vast field existing for private benevolence outside the scope of the State system of relief.

It was decided at the meeting that a Charitable Fund should be formed for the relief of distress in the famine-stricken districts of India, such relief being supplementary to the operations of Government and designed to meet cases not clearly or adequately covered by official efforts. Reference was also made to the statement of objects, to which private subscriptions could be legitimately devoted as set forth by the Government in the *Gazette of India* of the 9th January 1897, and to the organization therein suggested for the collection and administration of subscriptions to the Fund. A General Committee on these lines was framed, composed of 209 members with His Majesty the King-Emperor as patron, His Excellency the Viceroy as President, the Heads of Local Governments and Administrations and His Excellency the Commander-in-Chief as Vice-Presidents and the Hon'ble Chief Justice of the High Court, Calcutta, Chairman, and an Executive Committee, consisting of 25 members with Mr. O. T. Barrow, C.S.I., as Honorary Secretary.

The objects of the Fund were (1) to supplement the subsistence ration which alone was provided from public funds by the addition of small comforts, whether of food or of clothing for the aged or infirm, for the patients in Hospitals, for children,

and the like, (2) to provide for the maintenance of orphans, (3) to relieve the numerous poor but respectable persons who endure privation in preference to applying for Government relief, accompanied as it must be by inquisitional enquiry, and (4) to restore to their original position when acute distress subsides, those who may have lost their all in the struggle for existence and to give them a fresh start in life.

Proceedings of the Executive Committee.

Since the Fund was inaugurated, eleven meetings have been held from time to time to consider applications for grants for relief of distress and considerable grants have been made to the United Provinces, Central India, and Central Provinces. Smaller contributions have also been made to Bengal, Eastern Bengal and Assam, Madras and Bombay.

During the Chairman's absence on leave from 22nd May to 8th November 1908 the Hon'ble Mr. A. A. Apcar, C.S.I., acted for him and on the departure of Mr. O. T. Barrow, C.S.I., on leave on 24th September 1908, Mr. F. C. Harrison took his place as Secretary.

Receipt and expenditure.

The following table shows the Receipts and Expenditure of the Fund :—

RECEIPTS.

	R	a.	p.
Subscriptions to the Central Fund at Calcutta	3,31,170	9	4
Ditto to the Bombay Branch	49,011	3	6
Ditto to the Madras Branch	58,000	0	0
Ditto to the Burma Branch	88,799	3	5
Ditto to the Eastern Bengal and Assam Branch	27,035	13	8
Ditto to the Punjab Branch	20,927	8	3
Received from the Indian People's Famine Trust	4,71,498	11	10
Interest, etc.	716	8	2
Monthly grant from Government	1,807	6	8
	10,48,967	0	10

EXPENDITURE.

	R	a.	p.
Grants made to United Provinces	7,15,000	0	0
Ditto Central India	1,15,000	0	0
Ditto Central Provinces	30,000	0	0
Ditto to Contai } Bengal	1,000	0	0
to Puri } Bengal	2,000	0	0
Ditto to Ganjam (Madras)	4,000	0	0
Ditto to Delhi	5,500	0	0
Ditto to Leper Asylum, Nasik	500	0	0
Ditto to Rajshahye	1,638	0	0
Other Charges	3,216	7	5
	8,77,854	7	5

The Fund closed with a cash balance of R1,71,112-9-5 in hand which will be made over to the Indian People's Famine Trust. R375 remain to be realized in Calcutta.

R. I. SCALLON,

Secretary to the Government of India.

RAILWAY DEPARTMENT.

(RAILWAY BOARD.)

NOTIFICATION.

Simla, the 8th April, 1909.

No. 106.—The following is published for general information :

No. 617-R.T., dated the 6th April 1909.

RESOLUTION—By the Railway Board.

Adoption on the Rohilkund and Kumaon Railway system of the modification of rule 64, Chapter III, Part I, of the General Rules of 1906 for working open lines of railway.

READ—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. $\frac{8\text{-A.}}{5}$, dated the 8th September 1906.

Railway Board's notification No. 57, dated the 27th February 1908, and Railway Board's resolution No. 422 R. T., dated the 24th February 1908.

Railway Board's notification No. 91, dated the 18th March 1909, and Railway Board's circular No. 476 R. T., dated the 12th March 1909.

READ ALSO—

Letter No. 1955 W.—19, dated the 19th March 1909, from the Agent of the Rohilkund and Kumaon Railway Company.

RESOLUTION.—The Agent of the Rohilkund and Kumaon Railway Company has recommended the adoption on the Rohilkund and Kumaon Railway system of the modification, promulgated under Railway Board's circular No. 476 R. T., dated the 12th March 1909, and published under their notification No. 91, dated the 18th March 1909, of rule 64, Chapter III, Part I, of the General Rules of 1906 for working open lines of railway in British India, which rules were sanctioned for adoption on the Rohilkund and Kumaon railway system in Railway Board's resolution No. 422 R. T., dated the 24th February 1908, read in the preamble above.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, under section 47, sub-sections (1) and (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the modification of the said General Rules, cited in paragraph 1 above, on the Rohilkund and Kumaon railway system.

ORDER.—Ordered, that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3), of the Indian Railways Act, 1890 (IX of 1890); also that the modification cited in paragraph 1 above, which has already been published in the *Gazette of India*, be kept open for inspection at railway stations as directed by sub-section (6) of the same section, and that this resolution be communicated to the Senior Government Inspector of Railways, Circle No. 3, Lucknow, and to the Agent of the Rohilkund and Kumaon Railway Company, for information.

R. C. F. VOLKERS,

Secretary, Railway Board.

H. A. STUART,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 8th April 1909, based on the Indian Daily Weather Reports of the period.

The meteorological conditions of the past week were those of the ordinary hot weather type, and large and sudden changes in temperature and humidity were occasioned by local thunderstorms, which occurred chiefly in Burma, Assam and the south of the peninsula. Baluchistan received light rain from an ill-defined disturbance transmitted from the west, but practically no rain occurred in the rest of northwest India.

Burma.—Light rain fell in most parts of the province. Skies were moderately clouded, and temperature was normal in Lower Burma but in Upper Burma the maximum was considerably lower than usual.

Northeast India including Orissa.—Rainfall occurred at all stations in Assam and at a few places in the remainder of the division. Skies were lightly to moderately clouded, and temperature was approximately normal.

The United Provinces, Central India and the Central Provinces.—Indore, Amraoti, Nagpur and Chanda reported light falls of rain. Skies were clear or lightly clouded. Temperature did not differ much from the normal.

Northwest India.—Rain fell in Baluchistan and light falls were also reported from Sonemarg, Murree and Udaipur. Skies were cloudy on most days of the week. Temperature was somewhat higher than usual in the North-West Frontier Province and the west of the Punjab.

The Peninsula.—Thunderstorms gave local falls of rain in most parts of the division. Skies were clear or lightly clouded. Temperature was normal or in defect.

The following summarises the chief rainfall amounts of the week as reported each day at 8 hrs. :—

April 2nd. Mergui 1·30".

" 3rd. Port Blair 1·49", Slipper Island 2·14", Yamethin 2·50", Mysore 3·07" and Coimbatore 1·26".

" 4th. Yamethin 1·50" and Mymensingh 1·1[illegible]".

" 6th. Salem 2·25".

" 7th. Berhampore 1·15".

" 8th. Silchar 1·96".

The rainfall of the week has been much heavier than usual at the stations in the Bay, in Upper Burma and in Mysore, and the seasonal rainfall of Upper Burma is now normal, while a week ago it was 80 per cent. in defect.

DIVISION.	Rainfall data for week ending on 8th April 1909.			Rainfall data from 4th December 1908 to 8th April 1909.				
	Average actual rainfall in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Average actual rainfall of season to date in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Seasonal percentage departure from normal. This week.	Seasonal percentage departure from normal. Last week.

GEO. C. SIMPSON,
for Director-General of Observatories.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 3rd April 1909.

Burma.—Slight showers of rain fell during the week in most districts. Clearings for hill side cultivation and harvesting of miscellaneous, island and other crops are progressing satisfactorily. Standing crops are in good condition except in parts of Bhamo where spring rice was partially destroyed by hail-storms. The price of unhusked rice has risen in five centres and has fallen in three.

Eastern Bengal and Assam.—Most districts had light showers during the week. Sowings have commenced in many places but preparatory cultivation of soil for autumn crops and winter rice are still in progress. Prospects of standing crops on the whole are fair, although the summer rice has greatly suffered from want of timely rain. Pressing of sugarcane, hoeing for tea and harvesting of tobacco continue in some places. The numbers on test relief works are:—6,984 in Dinajpur and 971 in Rangpur. About 1,800 persons are also working daily on District Board relief works in Bogra. The average price of common rice has fallen by about 1 per cent. since last week. Cattle disease prevails in several districts.

Bengal.—Light showers fell in parts of the Presidency, Orissa and Chota Nagpur divisions and also in Midnapore and Howrah. Preparation of lands for the next season's crops continues. Sowing of early crops have commenced in some districts but more rain is urgently wanted both for ploughing and sowing. Planting of sugarcane is still going on in some places. Harvesting of spring crops is nearly completed. Prospects are poor in the unirrigated tracts of North Bihar. The *mahua* crop is good in Hazaribagh and in the Sonthal Parganas and vegetables are doing well in Orissa. The price of common rice has risen in Burdwan, Birbhum, Jessore, Shahabad, Muzaffarpur, Monghyr, Darjeeling, the Sonthal Parganas, Cuttack, Balasore, Sambalpur and Ranchi; has fallen in Nadia, Gaya and Saran; and is stationary elsewhere. Cattle disease exists in several districts. Reports of insufficiency of fodder have been received from Midnapore, Jessore, Khulna, Gaya, Champaran, Monghyr, Purnea and the Sonthal Parganas. The water supply is becoming scarce in parts of North Bihar and in the Burdwan and Presidency divisions. Measures are being taken for the excavation of tanks and for the boring of wells in North Bihar. 3,232 persons attended test works in Muzaffarpur and Bhagalpur and 56,263 persons were on famine relief works in Darbhanga. 23,956 persons were gratuitously relieved in Muzaffarpur, Darbhanga, Bhagalpur, Purnea and Palamau and 558 in Puri.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—Workers exclusive of dependants 56,263; on gratuitous relief—(*a*) dependants of workers 9,015; (*b*) poor-houses or kitchens 2,983; and (*c*) village doles or other relief 8,588; total gratuitously relieved 20,586. Grand total on relief 76,849. Distress continues to be acute. Numbers on relief works show a large increase owing to the return of labourers from the spring harvest. The workers are in fair condition and the people are resorting to works freely. There is no wandering. Some emaciation chiefly among old people and small children has been noticed in the Sadar thana. Children of workers are being relieved in kitchens opened at the works. Private aided works continue to supplement Government relief. Prices 12 to 13 seers per rupee.

United Provinces.—Except for insignificant falls in Dehra Dun, Jhansi, Hamirpur and Banda the week was rainless. Harvesting continues and in places is nearing completion. Sowing and irrigation of sugarcane and extra crops are in progress. Standing crops are suffering from want of rain in parts of Dehra Dun and Garhwal and in Budaun. Prospects in unirrigated tracts are not good and in Kheri the spring outturn is bad. In general however standing crops are doing well and the outturn promises well. Cattle disease is reported from ten districts but on the whole the condition of agricultural stock is good. Fodder continues to be deficient in the Mat tahsil of the Muttra district and is also scarce in Sultanpur. The water supply is inadequate in parts of Fyzabad and Mirzapur. Prices have risen in one district; have fallen in twenty-seven; and are stationary elsewhere.

The weekly report on the famine and scarcity is as follows:—The condition of the people relieved is fair to good. Crime is normal in Bijaigarh and Kera Mangraur and below normal in Basti. One civil work, seven aided works and one unaided work are in progress and one poor-house is open in Bijaigarh. One civil work and two aided works are in progress in Kera Mangraur. The first departmental charge was opened in Basti during the week. One poor-house and three aided works were also opened in this district. From 1st April scarcity has been declared in the Nanpara tahsil and the Bhinga and Bahraich parganas of the Bahraich tahsil in the Bahraich district. In this tract one poor-house and two charges are open. The numbers relieved in Bijaigarh and Basti show a slight falling off. The numbers on civil works in Kera Mangraur have also fallen owing

to the closing of one civil work. The numbers on aided works in this tract are, however, increasing. The total numbers on relief are:—on civil works 1,079; on aided works 7,284; on unaided works 186; on gratuitous relief 4,901; in poor-houses 127; on test works 929; dependants 175; on private works 328; total 15,009.

Punjab.—No rain of importance fell during the week. Spring crops are being harvested in several districts. The condition and expected yield of spring crops on irrigated areas are generally good to average and on unirrigated areas are average to below the average. Sowings of extra spring and autumn crops continue. Prices are high but show a slight downward tendency. Cattle are generally in good condition. Fodder is sufficient except in Lahore, Sialkot, Lyallpur, Jhang, Multan and in parts of Gurgaon, Amritsar and Mianwali.

North-West Frontier Province.—No rain fell during the week except 2 cents in Bannu and 5 cents in the Tank tahsil of the Dera Ismail Khan district. Rain is wanted all over the Province especially for unirrigated tracts. Standing crops are generally in good condition on irrigated areas and from average to below average on unirrigated lands. Pressing of sugarcane still goes on in the Bannu district and the outturn is reported to be average. Harvesting of oilseed crops has commenced in the Dera Ismail Khan district. Sugarcane and extra spring crops are being sown. The water supply in canals is sufficient. Irrigation from the Paharpur canal in the Dera Ismail Khan district continues. Fodder is sufficient. The condition of cattle is generally good except in the Daman tract of the Dera Ismail Khan district where drinking water is reported to be scarce. Cattle disease still exists in one village of the Bannu district. The public health is good. Prices show a slight downward tendency. Prices:—wheat 8 11/16 to 11½; gram 11 to 13; maize 12 to 18½; and *bajra* 13 to 14½ seers per rupee.

Jammu.—There was slight rain during the week. Prices are fluctuating. Wheat sells from 7½ to 14 and maize from 13 to 20 seers per rupee. The condition of standing crops is fair. Fodder is sufficient. Lands are being prepared for the next autumn crops.

Kashmir.—The weather was bright except for slight rain. There is no disease among cattle. Fodder is sufficient. Prices are unchanged.

Rajputana.—Harvesting of spring crops is completed in Banswara and continues elsewhere. The estimated outturn is fair to good. Standing crops are doing well but slight damage is reported in Tonk. The condition of cattle is generally good. Cattle disease is prevalent in Alwar and Bharatpur. The fodder and water supply is sufficient. Prices generally show a tendency to fall but have risen in Jaipur. A slight rise is also noticeable in Jaisalmer, Bundi and Kotah.

Central India.—Rainfall *nil*. Harvesting of spring crops is completed in Indore and is in progress elsewhere. Agricultural stock are satisfactory except for some cattle disease. Prices have fallen in Gwalior and are high but stationary elsewhere. Extraction of opium is in progress The report from Bundelkhand has not been received.

Central Provinces.—The weather was warm and occasionally cloudy. Light showers were received during the week in sixteen districts but the quantity registered was insignificant except in the districts of the Nagpur country (except Balaghat) and Buldana where the fall amounted to about half an inch. Harvesting, threshing and winnowing of spring crops are in rapid progress everywhere. Prospects are generally satisfactory. The probable outturns are reported to be good in Seoni, Betul, Nagpur, Bhandara and Balaghat. Picking of *mahua* continued in Narsinghpur, Chanda, Balaghat and Raipur. The *mahua* crop has been slightly damaged by cloudy weather in Mandla, Nimar and Bhandara. The supply of fodder and water is adequate everywhere. Agricultural stock are in good condition. Prices:—in Bhandara gram and *juar* became cheaper by 2 and 2½ seers per rupee, respectively. Prices were steady elsewhere. The number of weavers on relief was 1,599.

Feudatory States.—During the week five States had a sprinkling of rain not exceeding 28 cents. Reaping, threshing and winnowing of spring crops continued. Construction of field embankments and preparation of land for sowing of the next autumn crops are in progress. Fodder and water are sufficient. Prices:—gram became cheaper by 6 seers per rupee in Sirguja. Prices are otherwise steady.

Bombay.—Slight rain fell during the week in parts of the Panch Mahals, Kanara, the Deccan, the Karnatak, Kathiawar, Baroda, Cutch, Rewa Kantha and Kolhapur. Standing spring crops have been slightly damaged by insects in parts of Karachi; by frost in parts of Ahmedabad; and by disease in parts of Poona. Cotton has been damaged by frost in parts of Ahmedabad. Standing crops are generally in fair to good condition elsewhere. Harvesting of spring crops has been completed in Sholapur and Cutch; it is nearly over in East Khandesh, Satara and Bijapur and generally continues elsewhere. Threshing is in progress in parts of Kaira, Colaba, West Khandesh, Ahmednagar and Mahi Kantha. Cotton-picking continues in parts of Gujarat, the Karnatak, Kathiawar, Baroda, Cutch, Rewa Kantha and Kolhapur. Lands are being prepared for next season in parts of Hyderabad, the Konkan, the Deccan, the Karnatak, Baroda and Kolhapur. The supply of fodder is adequate except in parts of West Khandesh, Bijapur, Belgaum and Kolhapur. Agricultural stock are sufficient except in parts of the Deccan and Cutch and are generally in good condition. The supply of drinking water is adequate except in parts of West Khandesh, Nasik, Bijapur and Belgaum. Water for irrigation is sufficient except in parts of West Khandesh, Nasik, Poona, Belgaum, Bijapur and Kathiawar. Prices of food-grains have fallen slightly in Sukkur, the Upper Sind

Frontier, East Khandesh and Poona; have risen slightly in Ahmedabad, Broach, Ahmednagar, Bijapur and Dharwar; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 22 to 40 per cent.; in Gujarat 20 to 62 per cent.; in the Konkan 3 to 25 per cent.; in the Deccan 17 to 42 per cent.; and in the Karnatak 32 to 79 per cent. less than normal. Stocks of grain are adequate. Emigration on a small scale is in progress in Bijapur. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. The numbers on relief in Bijapur are:—workers 503; on gratuitous relief 8.

Hyderabad.—The rainfall during the week was 4 cents. The rain has injured the spring crop. Its harvesting is almost over. The condition of spring crops is fair throughout except in parts of the Raichur district and other isolated tracts. The late rice crop is generally fair. Harvesting has commenced in parts. Lands are being prepared for the next monsoon sowings. Cattle disease is prevalent in thirteen talukas. Prices:—wheat 6½; coarse rice 6½; and *juar* 14 seers per rupee. White *juar* is selling in Hyderabad City at 12 seers per rupee. Yellow *juar* is not available. The highest price is 9 seers in the Paloncha taluka of the Warangal district and the lowest 23 seers in the Rajura taluka of the Bidar district.

Mysore.—Slight rain fell during the week in parts of the State. Prices of food-grains are steady. Markets are moderately well supplied. Prospects of the season are uncertain Cattle are generally healthy except in some localities. Water and fodder are procurable with some difficulty.

Coorg.—Rainfall 54 cents. Coffee blossoms are out in parts. Prices of food-grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was good in Malabar; light to fair in the Vizagapatam Agency, Guntur, Bellary, Anantapur, Salem, Trichinopoly, South Canara, Madura, Tinnevelly, Coimbatore, Ganjam and the Nilgiris; and *nil* elsewhere. Irrigation supplies are insufficient in parts of all districts except Chingleput, South Arcot, Coimbatore, Trichinopoly, Tinnevelly, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair but some in parts of Salem require more rain and some in parts of Kurnool, Bellary, North Arcot and South Canara are withering or have withered. Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of the Circars, the Deccan, Nellore, Salem, Coimbatore, Trichinopoly, Tinnevelly, Malabar and South Canara. Fodder is scanty in parts of Vizagapatam, Guntur, the Deccan, North Arcot and Salem. The condition of cattle is generally good. The price of rice is stationary in twelve districts; has fallen in six; and has risen in five. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eleven districts; has fallen in seven; and has risen in three. *Cholam* is stationary in four districts; has fallen in six; and has risen in four. *Cumbu* is stationary in nine districts; has fallen in three; and has risen in three. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the *Gazette of India.*

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief."

No.	Name of Provinces, Districts and Native States.	Area in Sq. miles.	Population.	FOR THE WEEK ENDING SATURDAY, THE 20TH MARCH 1909.

C. F. ANDERSON, *Capt., R.E.,*
for Secretary, Railway Board.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 10, 1909.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1909

From the 3rd April next till further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 27th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*"

J. P. HEWETT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 8th April 1909.

NOTIFICATIONS.

No. 1386 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 5th April 1909 :—

No. 167 of 1909. Robert Knox, plumbing inspector, of 91a Princes street, in the city of Dunedin, in the dominion of New Zealand. *An improvement in fresh air level inlets for house or other drainage.*

No. 168 of 1909.—John McGlashan, refinery manager, of the Cawnpore Sugar Works, Limited, in Cawnpore, British India. *A process for the manufacture of sugar from jaggeries (raw sugar derived from cane) or from cane juices.*

No. 169 of 1909.—Haripada Dass, attorneys' clerk of 18 Bethune Row, Calcutta. *The composition of levers by which a greater reaction is producible that the original action employed.*

No. 170 of 1909.—Georg Kirkegaard, electrical engineer, of the city of New York, Borough of Brooklyn and state of New York, United States of America. *Improvements in bottle stoppers.*

No. 171 of 1909.—Georg Kirkegaard, electrical engineer, of the city of New York, Borough of Brooklyn and state of New York, United State of America. *Bottle capping machines.*

No. 172 of 1909 —Georg Kirkegaard, electrical engineer, of the city of New York, Borough of Brooklyn, and state of New York, United States of America. *Improvements in Feeding mechanism for bottle capping machines.*

No. 173 of 1909.—Poyyai Krishnan, Vatikkakam Desam, Tellicherry, Malabar. *A new self-acting water-pump.*

No. 1387 P.—THE undermentioned design has been registered, under the provisions of the Inventions and Designs Act, 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay and Burma. This and other designs are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2, Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 12-D of 1909.—Pirbhu Dial and Lachman Das, sarrafi, residing at Sattays Ghara, Delhi. *A disc for necklaces bearing specified words on each side.*

No. 1388 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A M. to 3 P.M., at the Secretary's office, 2, Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 511 of 1907.—Ausootosh Mookerjee, a Government pensioner, now a commission agent at No. 3 New Chinabazar street, Calcutta, and a resident at Chandernagore. *Pigmentum amoveo or a specific for removing paints.* (Specification filed 30 January 1909.)

No. 315 of 1908.—Ramanath Mundul, proprietor, of Messrs. Mundul and Company, No. 3 Bow Bazar street, Calcutta. *Improved harmonium reeds and improved hand and portable harmoniums.* (Specification filed 9 February 1909.)

No. 351 of 1908.—Saxby & Farmer (India), Limited, railway signal engineers, of 17 Convent road, Entally, Calcutta, British India. *A new or improved table for bending flat iron used in the construction of lattice posts for railway signals and the like purposes.* (Specification filed 29 March 1909.)

No. 402 of 1908.—Sorabji Byramji Patel, mechanical engineer, residing at Quetta. *Improvements in hydraulic baling presses.* (Specification filed 22 March 1909.)

No. 72 of 1909.—Reginald Aubrey Fessenden, electrical engineer, of Brant Rock in the state of Massachusetts, United States of America. *Improvements in the electric transmission of energy without wires.* (Specification filed 26 March 1909.)

No. 84 of 1909.—Ozonair Limited and Edward Lionel Joseph, managing director, both of 27 Chancery lane, in the county of London. *Improvements in the ventilation of buildings.* (Specification filed 26 March 1909.)

No. 85 of 1909.—Ozonair Limited and Edward Lionel Joseph, managing director, both of 27 Chancery lane, in the county of London. *Improved method of and means for effecting the sterilization of water by means of ozone or other gaseous agent.* (Specification filed 26 March 1909.)

No. 1389 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 197 of 1897.—Edward Anderson Blanton. *Improvements in and connected with means for securing cams and the like upon shafts.* (From 2 July 1909 to 2 July 1910.)

No. 21 of 1902.—Arthur Kitson. *Improvements in or relating to vapour burning apparatus.* (From 8 April 1909 to 8 April 1910.)

No. 213 of 1902.—Heinrich Severin. *Improvements in the manufacture of hollow glass articles and in apparatus therefor.* (From 8 August 1909 to 8 August 1910.)

No 176 of 1903.—The Brown Hoisting Machinery Company. *Composite piling.* (From 23 October 1909 to 23 October 1910.)

No. 151 of 1904.—Georg Kirkegaard and Fridtjof Jebsen. *Bottle stoppers.* (From 8 August 1909 to 8 August 1910.)

No. 390 of 1904.—Frank George Price. *Improvements in washers for waterproofing bolt holes in corrugated metal sheeting.* (From 4 September 1909 to 4 September 1910.)

No. 509 of 1904.—Frank George Price. *A device for retarding corrosion and preventing leakage in galvanized corrugated iron roofing.* (From 24 November 1909 to 24 November 1910.)

No. 164 of 1905.—Luther Peter Friestedt *Improvements in metal sheetpiling.* (From 2 September 1909 to 2 September 1910.)

No. 1390 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased :—

No. 102 of 1901.—Mokshagundam Visvesvaraya. *Improving the automatic action of sluice gates of dams or waste weirs of storage reservoirs.* (Filed 2 January 1902.)

Fee in respect of the continuance of an exclusive privilege—

4 (*d*) After the expiration of the sixth year and before the expiration of the seventh year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905, 1906, 1907 and 1908, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified : or if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. A new and revised edition is now on sale. Royal 8vo volumes, paper cover, price one rupee or 1*s*. 6*d*. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

A copy of the Bill, which it is proposed to introduce to amend the law relating to the protection of Inventions and Designs, together with a statement of objects and reasons and notes on clauses, has been placed in the visitors' room of the Patents Office for inspection. Copies, price one rupee, may be obtained on application to the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

G. M. PORTER, Colonel, R.E.,
Master of the Mint.

HIS MAJESTY'S MINT;
Calcutta, the 6th April 1909.

THE HONOURABLE THE RESIDENT IN MYSORE.

NOTIFICATIONS.

Bangalore, the 24th March 1909.

No. 25.—In supersession of this office Notification No. 14, dated 14th February 1908, the Hon'ble the Resident is pleased to issue the following rules regarding the grant to Government servants and to indigent persons unconnected with the public service, in the Civil and Military Station of Bangalore, of concessions designed to enable them when bitten by a rabid animal to proceed without delay to the Pasteur Institute at Coonoor for treatment.

Concessions to Government Servants.

I. Any Government servant who has been bitten by a rabid animal, and who is too poor to proceed to Coonoor at his own expense, may, provided that he is drawing not more than R100 a month, be granted by the officer hereinafter authorised to grant the concession:

(i) his actual travelling expenses to Coonoor and back, namely, (*a*) a single fare each way by railway of the class by which he is entitled to travel on duty; (*b*) for journeys by road the actual cost of transit, not exceeding the amount admissible under rule. The expenses for the return journey will be paid to the patient at Coonoor, after the treatment has been undergone, by the Treasury Officer at that station on production of a discharge certificate from the Director of the Institute;

(ii) an advance of one month's pay;

(iii) one month's casual leave, or, if the officer's absence gives rise to the necessity for the appointment of a substitute, one month's extra privilege leave, any leave required in excess being treated as ordinary privilege or sick leave.

II. Any Government servant who has a difficulty in finding at once the means to enable him to proceed to the Institute, and whose pay exceeds R100 but does not exceed R500 a month, may be granted an advance not exceeding the amount admissible under Rule I (i) and may also be given the concessions specified in Rule I, (ii) and (iii).

III. All advances made to Government servants under Rule II will be recovered in three equal monthly instalments as provided in Article 137 (*b*) of the Civil Account Code, provided that the Hon'ble the Resident may permit repayment in more than three but not more than twelve instalments when he considers that repayment in three instalments would cause hardship.

Concessions to Indigent Persons.

IV. Any indigent person unconnected with the public service or any Government pensioner drawing a pension of not more then R100 *per mensem* who is unable, in the opinion of the officer hereinafter authorized to grant the concession, to proceed to the Pasteur Institute at Coonoor at his own expense, may be granted his actual travelling expenses to Coonoor and back, namely, (*a*) a single third class fare each way by railway, (*b*) for journeys by road the actual cost of transit, (*c*) maintenance allowance at the following daily rates:—

Europeans and Eurasians R1 during the journey and R2-8-0 during treatment; Natives 4 annas during the journey and 6 annas during treatment.

V. A third class pass or ticket from Bangalore to Coonoor and back by the shortest and cheapest route on the terms allowed by the Railway Company will be procured for the patient by the officer who despatches him to Coonoor.

VI. The patient may receive in advance the actual cost of transit for journeys by road, when necessary, and maintenance allowance for the period of his journey to Coonoor.

VII. The maintenance allowance of the patient while under treatment at Coonoor and for the period of the return journey and also, if necessary, the cost of transit for journeys by road on the return journey will be disbursed by the Treasury Officer at Coonoor, on production of a certificate from the Director of the Institute that the patient has been under treatment at the Institute.

VIII. Women, children under 16 years of age, and men who are, by reason of age or other sufficient cause, incapable of travelling alone, may be allowed an attendant to accompany them to the Institute at Coonoor. Any such attendant will be granted—

(i) travelling expenses and maintenance allowance at the rate sanctioned for patients;

(ii) wages, not exceeding four annas a day, in cases where the despatching officer is satisfied that the patient is unable to pay the daily expenses of the attendant. The charges of the attendant will be borne by the fund to which the charges on account of the patient are debited. Only one attendant may be sent at the public expense with each patient or patients of the same family.

IX. The despatch of each indigent person to Coonoor for treatment at the public expense will a once be reported to the President of the Municipal Commission. The report should state—

(a) the amount of travelling allowance (by rail or road) advanced, and

(b) the number of days for which and the rate at which maintenance allowance has been advanced.

General.

X. When any prrson is bitten by a rabid animal and is desirous of proceeding to the Pasteur Institute at Coonoor but is unable to meet the expenses of the journey, he should appear before the Residency Surgeon, Bangalore, or, in his absence, before the Senior Assistant Surgeon of the Bowring Civil Hospital, who will, after satisfying himself that the case is a fit one for treatment at a Pasteur Institute, grant him a certificate accordingly.

Such person will thereupon without loss of time appear before the Collector and District Magistrate, Civil and Military Station, or in his absence before the 2nd Magistrate, who, after satisfying himself that the patient is unable to proceed to the Pasteur Institute at his own expense and is deserving of help from public funds, authorise him to proceed at once to the Institute at Coonoor and arrange for the grant of the concessions specified in Rules I, II, IV and VIII, as the case may be.

XI. The charges incurred in respect of the persons referred to in Rules I and II will be debited to or advanced from the revenues of the Assigned Tract, as the case may be, while the expenditure incurred in respect of the persons falling under Rules IV and VIII will be met from the funds of the Municipal Commission of the Civil and Military Station of Bangalore.

XII. When expenses for the journey to Coonoor are advanced to a Government servant or indigent person by the Government officer alluded to in Rule X, an intimation of the fact should be sent forthwith and, if possible, with the patient, by that officer direct to the Director of the Pasteur Institute stating:—

(a) whether the person relieved is (i) a Government officer, or (ii) indigent person;

[NOTE.—When the information about the incidence of the charge is not available at once it should follow the intimation to the Director as soon as possible.]

(b) the class to which the person, if a Government servant, has been treated as belonging for the purpose of travelling allowance;

(c) the amount of travelling allowance (by rail and road) advanced;

(d) the number of days for which and the rate at which maintenance allowance has been advanced.

XIII. Such expenses will be treated as final charges, not advances, under the head "32.—Miscellaneous—Miscellaneous charges for the treatment of patients at the Pasteur Institute" and will be finally passed in audit on receipt of the Director's certificate of treatment.

XIV. The Director's certificate should be prepared in duplicate: one copy of it should be despatched by him to the Government servant responsible for the original advance and the other copy should be attached to the bill for travelling allowance for the return journey which will be presented for payment at the Coonoor Treasury.

XV. The bill for travelling allowance for the return journey should be at the same rates as were allowed for the journey to the Institute and should also be supported by the original intimation received from the officer who is responsible for the original advance.

XVI. Maintenance charges for days spent at Coonoor and for the days of the return journey may be advanced on separate bills drawn by the Director, who will certify thereon the class to which the patient belongs and the days that he was under treatment or will be occupied in the journey.

XVII. Charges under Rule XV will be finally passed by the Accountant-General of Madras, if supported by the certificate and intimation referred to, and those under Rule XVI on the Director's certificate and signature. All such charges will be treated as final charges under a special detailed head, *viz.*, under the head "32. Miscellaneous—Miscellaneous charges for the treatment of patients at the Pasteur Institute," except where the cost is debitable to municipal funds, in which case the charges will be passed on to the Collector and District Magistrate of the Civil and Military Station for recovery.

XVIII. Any recoveries of overdrawals to be effected in consequence of a Government servant having been allowed travelling allowance in excess of that to which he was entitled will be made by the Accountant General, Madras.

XIX. The Director may make advances to indigent persons who come to Coonoor at their own expense but are unable to maintain themselves there or to pay for their

return journey. In such cases, the Director should communicate with the Collector and District Magistrate, Civil and Military Station of Bangalore, and inquire whether the amount advanced can be recovered or is irrecoverable. On receipt of intimation on this point the Director may draw the amount from the treasury, using the Collector and District Magistrate's letter as a voucher. If the amount is recoverable, the Accountant-General, Madras, will pass on the debit to the Collector and District Magistrate of the Civil and Military Station: otherwise the charge will be adjusted finally in his books under the head "32.—Miscellaneous—Miscellaneous charges for the treatment of patients at the Pasteur Institute, Coonoor."

The 29th March 1909.

No. 28.—The following draft of the rules which it is proposed to make in exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), as applied to the Civil and Military Station of Bangalore and to the railway lands in Mysore territory over which jurisdiction has been ceded to the British Government, is published for the information of all persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration on or after the 1st May 1909.

Any objection which may be received from any person in respect of the said draft before the date aforesaid will be considered by the Resident in Mysore.

Draft Rules to regulate the importation, possession, and transport of Petroleum.

In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), as applied to the Civil and Military Station of Bangalore and to the railway lands in Mysore territory over which jurisdiction has been ceded to the British Government, the Hon'ble the Resident in Mysore, with the previous sanction of the Governor General in Council, is pleased to make the following rules to regulate the importation, possession, and transport of petroleum in the said Civil and Military Station and the railway lands.

All rules heretofore made by the Hon'ble the Resident in Mysore under the said Act for regulating the importation, possession, and transport of petroleum are hereby cancelled.

PART I.

PRELIMINARY.

Definitions. 1. In these rules,—

(a) "Part" means a part of these rules;

(b) "certificated petroleum" means petroleum certified to be non-dangerous petroleum by a certificate of such description as the Resident in Mysore may, from time to time, by written order prescribe granted at the port of shipment;

(c) "petroleum in bulk" means petroleum in quantities exceeding five hundred gallons, contained in any one receptacle;

(d) "installation" means a place specially prepared for the storage of petroleum in bulk or for bulk combined with non-bulk storage, and may be either a major or a minor installation;

(e) "major installation" means an installation—

(1) capable of containing an amount of oil, whether in bulk only or in combined bulk and non-bulk storage, exceeding fifty thousand gallons, or

(2) in which tin-making operations are carried on;

(f) "minor installation" means an installation—

(1) capable of containing an amount of oil, whether in bulk only or in combined bulk and non-bulk storage, not exceeding fifty thousand gallons, and

(2) in which no tin-making operations are carried on;

(g) "storage-shed" means a building used for the storage of petroleum otherwise than in bulk, and may or may not form part of an installation;

(h) "protected works" includes buildings in which persons dwell or assemble, docks, wharves, timber yards, other petrolenm stores, and any other place not forming part of an installation, which the Resident in Mysore may by notification declare as such;

(i) "motor-vehicle" means any vehicle or vessel propelled by a motor, in which petroleum is used as fuel; and

(j) "owner," as applied to a motor-vehicle, includes a person who hires or is otherwise entitled for the time being to use or work a motor-vehicle.

PART II.

POSSESSION AND TRANSPORT OF PETROLEUM.

CHAPTER I.—POSSESSION OF PETROLEUM.

Smoking prohibited.

1. No smoking shall be permitted inside any installation or storage-shed.

Supervision of operations within installation or storage-shed.

2. All operations within any installation or storage-shed shall be conducted under the supervision of a responsible agent or supervisor.

Cleanliness of installation.

3. The ground in the interior of an installation shall be kept clean and free from goods of a combustible nature, vegetation and rubbish.

Supply of sand or dry earth in installation.

4. A supply of sand or dry earth shall always be kept in an installation for the purpose of extinguishing fire.

Marking of capacity of tanks.

5. The capacity in gallons of every tank in an installation shall be conspicuously marked on it, and shall be calculated at the rate of 6.25 gallons per cubic foot ;

Protection from lightning.

6. Every tank or other receptacle for the storage of petroleum in bulk except a tank or receptacle which is not of sufficient capacity to contain ten thousand gallons of petroleum, and which is so situated as not to be liable to cause danger in the event of the petroleum being ignited, shall be protected by an efficient lightning-conductor.

Explanation.—A tank or receptacle shall be deemed to be so situated as not to be liable to cause danger in the event of the petroleum being ignited, if it is not in close proximity to any other tank or receptacle, or to any building not forming part of the installation, and if it is surrounded by a wall or embankment, or sunk in an excavation, the enclosure thus formed being sufficient to contain the whole contents of the tank or receptacle.

Testing of lightning-conductor by licensee.

7. Not less than once in every year the licensee of an installation shall test or cause to be tested the efficiency of the conductor in such manner as the Chief Inspector of Explosives may, by general or special order, declare to be sufficient, and a certificate showing the date of the last test shall be posted in a conspicuous place within the installation.

Official testing of lightning-conductor.

8. Any officer appointed by the Resident in Mysore in this behalf may enter any installation for the purpose of testing the efficiency of the conductor, at any time after sunrise and before sunset.

Time for work in installations or storage-sheds.

9. No installation or storage-shed shall be open, and no work in any installation or storage-shed shall be permitted, between sunset and sunrise: provided that in cases where electric lighting is exclusively used, night working may be permitted by the Resident in Mysore on the recommendation of the Chief Inspector of Explosives.

Closure of pipes and openings.

10. Where there are any pipes or openings for draining out water in any enclosure wall, arrangements shall be made whereby they can be closed, and they shall only be kept open when actually necessary for drainage purposes. The nature of such arrangements shall be shown in the specifications which are required under Rule 10 of Chapter IV of this Part to be submitted with the application for a license.

Material for storage-sheds.

11. All storage-sheds in an installation shall be built of uninflammable material.

Posting up of rules and conditions.

12. There shall be hung up in a conspicuous place in every installation and storage-shed, for which a license has been granted, copies, in English and the vernacular, of the rules contained in this Chapter, and of the conditions endorsed on the license.

CHAPTER II.—TRANSPORT OF PETROLEUM.

(Deals only with transport by water and not applicable to the Civil and Military Station of Bangalore.)

CHAPTER III.—GENERAL PROVISIONS RELATING TO LICENSES.

Applications for licenses.

1. All applications for licenses for the possession or transport of petroleum shall be made to the District Magistrate.

Licensing authority.

2. Licenses—

(*a*) for the possession of non-dangerous petroleum not being petroleum in bulk,

(*b*) for the possession of non-dangerous petroleum in a minor installation,

(*c*) for the possession or transport of dangerous petroleum in quantities not exceeding forty gallons, and

(*d*) for the transport of petroleum, not being dangerous petroleum, otherwise than by a pipe line,

may be granted by the District Magistrate or by such other authority as the Resident in Mysore may from time to time by order in writing appoint in this behalf. In all other cases the licensing authority shall be the Resident in Mysore:

Provided that in the case of renewals of existing licenses the Resident in Mysore may delegate his powers under this rule to the District Magistrate or to such other authority as the Resident in Mysore may from time to time by an order in writing appoint in this behalf.

Refusal of license.

3. The licensing authority may for reasons to be communicated to the applicant, refuse a license in any case:

Provided that the licensing authority shall not refuse a license for the possession of petroleum in a minor installation, unless such authority has first made a reference to the Chief Inspector of Explosives and obtained his concurrence.

Forfeiture of license.

4. Every license granted under these rules shall be liable to be forfeited for any contravention of the Act or of any rule thereunder, or of any condition contained in such license, or for any other reason deemed by the licensing authority to be good and sufficient, and recorded by him in writing.

Particulars of license.

5. Every license and pass granted under these rules shall be held subject to the conditions endorsed on it, and shall contain all the particulars which are contained in the form prescribed for it by these rules.

Provided that in the case of installations and storage sheds in existence before these rules were made, the license may contain in lieu of the particulars contained in the form prescribed for it by these rules, either such particulars as may have been entered in the license granted for such installation or storage shed under the rules heretofore in force, or such particulars as may in each case be approved by the Chief Inspector of Explosives.

Renewal of licenses.

6. (1) Every application for the renewal of a license shall be made in the same manner as an application for an original license.

(2) Every such application shall be made at a date not less than thirty days before the date on which the original license expires, and, if the application is so made the premises shall be held to be duly licensed until such date as the licensing authority issues the renewed license or until an intimation that the renewal of the license is refused has been communicated to the applicant.

(3) The same fee shall be charged for the renewal of a license as for a new license.

Supply of rules to licensee.

7. When any license is granted for the possession or transport of petroleum a copy of the rules contained in Chapter I of this Part in the case of a license for possession, printed in English and the Vernacular, shall be given, together with the license to the licensee.

Procedure on death or disability of licensee.

8. Where a licensee dies or becomes insolvent or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Act or these rules for acting under the license during such time as may reasonably be necessary to allow him to make an application for a new license in his own name for the unexpired portion of the original license.

Loss of license.

9. Where a license granted under these rules is lost or accidentally destroyed, a duplicate may be granted.

CHAPTER IV.—LICENSES FOR THE POSSESSION OF PETROLEUM.

Continuance of license.

1. Every license for the possession of petroleum shall remain in force until the 31st of December next following the date of issue of the license.

Petroleum not in bulk, other than dangerous petroleum.

2. Licenses for the possession of petroleum, not being dangerous petroleum, otherwise than in bulk, may be granted in Form A.

Dangerous petroleum not in bulk.

3. Licenses for the possession of dangerous petroleum not in bulk, in quantity exceeding forty gallons may be granted in Form B.

Dangerous petroleum not exceeding forty gallons.

4. Licenses for the possession of dangerous petroleum in quantity not exceeding forty gallons may be granted in Form C.

Transfer of certain licenses.

5. (1) The holder of a license in Forms A, B or C, may, at any time before the expiry of the license, apply for permission to transfer his license to another person.

(2) Such application shall be made to the District Magistrate, who shall, if he approves of the transfer enter upon the license, under his signature, an endorsement to the effect that the license has been transferred to the person named.

(3) A fee of R1 shall be charged on each such application.

(4) The person to whom the license is so transferred shall enjoy the same powers and be subject to the same obligations under the license as the original holder.

Possession of dangerous petroleum in receptacles containing more than forty gallons each.

6. Special licenses for the possession of dangerous petroleum in receptacles containing more than forty gallons, but not more than 500 gallons each may be granted on such terms as the Resident in Mysore may prescribe on the recommendation of the Chief Inspector of Explosives.

Storage in major installations.

7. Licenses for the possession of any stated quantity of petroleum not being dangerous petroleum, in major installations in accordance with such specifications and plans as the Resident in Mysore, on the recommendation of the Chief Inspector of Explosives, may from time to time, by general or special order, approve, may be granted in Form D.

Storage in minor installations.

8. Licenses for the possession of any stated quantity of petroleum not being dangerous petroleum in minor installations, in accordance with such specifications and plans as the Chief Inspector of Explosives may from time to time, by general or special order, approve, may be granted in Form E.

Dangerous petroleum for use on motor-vehicles.

9. (1) Licenses in Form F may be granted free of charge for the possession of dangerous petroleum for use on motor-vehicles and for its transport thereon, for the purpose of use therein.

(2) The provisions of the ordinary rules relating to the possession of dangerous petroleum shall regulate the possession of dangerous petroleum for use on motor-vehicles, save in so far as these provisions are varied by the conditions of the license.

Particulars to be given in applications for licenses for the possession of petroleum other than licenses under rules 4 and 9.

10. Every application for a license for the possession of petroleum other than licenses under rules 4 and 9 of this Chapter shall specify :—

(*a*) the description and quantity of petroleum which the applicant desires to keep,

(*b*) the name and position of the premises intended to be used for the storage of such petroleum, and whether the said premises fulfil the conditions prescribed by Form A, Form B, Form D, or Form E, as the case may be,

(*c*) the amount of petroleum, if any, already licensed to be kept on the same premises.

If the application be made for the first time in respect of any major or minor installation or if the quantity of petroleum to be stored in such an installation is to be increased, the application shall be accompanied by specifications and plans drawn to scale.

Certificate of safety to be furnished.

11. Before petroleum is stored in any major or minor installation, for which a license has been granted for the first time, a certificate shall be furnished to the licensing authority to the effect that all enclosure walls and embankments required to be constructed under the conditions of the license are sufficient to ensure safety. The certificate shall be signed by an engineer accepted as qualified for the purpose by the licensing authority. When the license is not granted for the first time but is granted for an increased quantity of petroleum, a certificate shall similarly be furnished to the licensing authority before any quantity of petroleum exceeding the amount which was admissible under the former license is stored in the installation.

Particulars to be given in applications for licenses under rules 4 and 9.

12. Every application for a license under rules 4 and 9 of this Chapter shall specify :—

(*a*) whether the applicant is the owner of a motor-vehicle,

(*b*) the amount of dangerous petroleum the applicant desires to store,

(*c*) the exact position and nature of the premises intended to be used for the storage of such dangerous petroleum, and whether the said premises fulfil the conditions prescribed by Form C or Form F, as the case may be.

CHAPTER V.—LICENSES FOR THE TRANSPORT OF PETROLEUM.

General licenses for the transport of non-dangerous petroleum.

1. General licenses for the transport of petroleum, other than dangerous petroleum, may be granted for a period of twelve months in Form G.

General licenses for the transport of dangerous petroleum.

2. General licenses for the transport of dangerous petroleum otherwise than in bulk may be granted for a period of twelve months in Form H.

Effect of general license.

3. Licenses granted under rules 1, 2 and 9 of this Chapter may authorise the holders to transport petroleum without restriction as to destination or total quantity.

Pass for transport of petroleum.

4. The holder of a general license granted under rules 1, 2 or 9 of this Chapter shall, with each consignment of petroleum conveyed under cover of his license, issue to the person, who takes charge of the petroleum for the purpose of transporting it, a numbered pass in Form I.

Special license for the transport of petroleum other than dangerous petroleum.

5. Special licenses may be granted for the transport of petroleum, other than dangerous petroleum, in quantities exceeding five hundred gallons, in Form J.

Special licenses for the transport of dangerous petroleum.

6. Special licenses may be granted for the transport of dangerous petroleum other than in bulk in Form K.

Effect of special license.

7. A special license granted under rules 5 and 6 shall only cover the transport of the particular consignment entered in the license and shall be valid for such period as may be entered in it.

Particulars to be given in applications for special licenses.

8. Applications for special licenses for the transport of petroleum by rail or by road, or by both, shall specify the description and quantity of petroleum to be transported, and the places from and to which, respectively, the petroleum is to be conveyed, and shall describe the receptacles in which it is to be contained.

Transport of dangerous petroleum by motorists otherwise than on a motor-vehicle.

9. General licenses in Form L to transport dangerous petroleum up to a maximum of sixty gallons at a time, otherwise than on a motor-vehicle, may be granted for a period of twelve months to owners of motor-vehicles holding licenses under rule 9, sub-rule (1) of Chapter IV of this Part, to possess petroleum and use or transport it on a motor-vehicle.

CHAPTER VI.—FEES.

Method of levying fees.

1. (1) Where the proceeds of fees leviable for licenses under these rules have been assigned by the Resident in Mysore to any local authority, the fees shall be levied in such manner as the local authority may from time to time direct.

(2) In all other cases the fees shall be paid in cash on receipt of a notice from the licensing authority that a license will be granted.

(3) The court-fee stamp of the value of eight annas, representing the fee chargeable under Schedule II, Article 1 (*b*) of the Court Fees Act on an application for a license presented to a Magistrate should be attached to the application.

2. The following fees shall be charged for licenses for the possession of petroleum, namely:—

FEES FOR LICENSES FOR POSSESSION OF PETROLEUM.

Non-dangerous petroleum.

	R	
(*a*) When the quantity to be stored exceeds five hundred but does not exceed one thousand gallons.	12	
(*b*) When the quantity to be stored exceeds one thousand but does not exceed five thousand gallons.	12	for the first one thousand gallons *plus* Rs. 2 for every additional one thousand gallons or part thereof.
(*c*) When the quantity to be stored exceeds five thousand gallons, but does not exceed fifty thousand gallons.	20	for the first five thousand gallons *plus* Rs. 4 for every additional one thousand gallons or part thereof.
(*d*) When the quantity to be stored exceeds fifty thousand gallons.	250	

Dangerous petroleum.

	R	
(*e*) When the quantity to be stored does not exceed forty gallons.	3	
(*f*) When the quantity to be stored exceeds forty gallons, but does not exceed five hundred gallons.	8	
(*g*) When the quantity to be stored ex-		the same fees as those laid down for

3. The following fees shall be charged for licenses for the transport of petroleum:—

FEES FOR LICENSES FOR TRANSPORT OF PETROLEUM.

Non-dangerous petroleum.

Special license—

	Rs.
(*a*) When the quantity to be transported exceeds five hundred but does not exceed five thousand gallons.	1
(*b*) For every additional five thousand gallons or part of five thousand gallons.	1
General license for the transport of non-dangerous petroleum by rail, by road, or by water for twelve months.	100

Dangerous petroleum.

Special license—

	R	
(*i*) When the quantity to be transported does not exceed forty gallons.	2	
(*ii*) When the quantity to be transported exceeds forty gallons but does not exceed four hundred and eighty gallons.	2	for the first 40 gallons *plus* 8 annas for every additional forty gallons or part thereof.
(*iii*) When the quantity to be transported exceeds four hundred and eighty gallons.	8	for the first four hundred and eighty gallons *plus* Rs. 2 for every additional four hundred and eighty gallons or part thereof.
General license for the transport of dangerous petroleum by the owner of a motor-vehicle by road or rail up to a maximum of sixty gallons at a time.	5	
General license for the transport of dangerous petroleum by dealers by rail or road.	50	

4. A fee of one rupee shall be charged for a new license for the unexpired portion of an original license granted to any person applying for the same in accordance with the provisions of rule 8 of Chapter III of this Part.

Fee for license granted for unexpired portion of an original license.

5. A fee of eight annas shall be charged for a duplicate of a license granted in accordance with the provisions of rule 9 of Chapter III of this Part.

Fee for duplicate licenses.

FORM A.

(Rule 2 of Chapter IV of Part II.)

License to possess petroleum (other than dangerous petroleum), otherwise than in bulk.

No. Fee, R

License is hereby granted to for the storage, in the storage-shed described below, of gallons of petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated , and to the further conditions on the back of this license.

District Magistrate or authority appointed under rule 2 of Chapter III of Part II.

The 190 .

(Description of the storage shed above referred to.)

Endorsement on Form A.

CONDITIONS OF THE LICENSE.

1. If the licensing officer call on the holder of a license, by a notice in writing, to execute any repairs of the storage shed which may, in the opinion of such officer, be necessary for the safety of the shed, the holder of the license shall execute the repairs within such period, not being less than one month from the date of receipt of the notice, as may be fixed by the notice.

2. The storage-shed shall be constructed of masonry or other uninflammable material with terraced, tiled or iron roofs and with tiled or paved or earthen floors, but the beams, rafters, columns, windows and doors may be of wood.

3. Either the doorways and other openings of the storage-shed shall be built up to a height of two feet above the level of the road or street, or the floor sunk to a depth of two feet below the level of the road or street, so that the petroleum cannot flow out from the building in case of its escape from the receptacle in which it is contained, or the building itself shall be surrounded with a masonry wall or embankment or both not less than two feet high. When the quantity of petroleum stored exceeds 16,000 gallons the height or depth shall be three feet.

A combination of these methods is permissible.

4. The following distances shall be kept clear round the building:—

Distances to be kept clear round buildings or enclosure walls.	Number of gallons to be stored.
None	5,000 and under.
20 feet	over 5,000 and up to 50,000
30 "	Unlimited.

5. No light, except a light of such strength, position and character as is not liable to ignite any inflammable vapour, nor fire of any description, shall be permitted within the storage-shed.

FORM B.

(Rule 3 of Chapter IV of Part II.)

License to possess dangerous petroleum, otherwise than in bulk, in quantity exceeding forty gallons.

No. Fee Rs.

License is hereby granted to for the storage, in the storage-shed described below, of gallons of dangerous petroleum, subject to the rules for the storage of petroleum published in notification No. , dated , and to the further conditions on the back of this license.

First Assistant Resident.

The 190 .

(Description of the storage-shed above refered to.)

Endorsement on Form B.

CONDITIONS OF LICENSE.

1. If the licensing officer call upon the holder of a license, by notice in writing, to execute any repairs of the storage-shed, which may, in the opinion of such officer, be necessary for the safety of the shed, the holder of the license shall execute the repairs within such period, not being less than one month from the date of receipt of the notice, as may be fixed by the notice.

2. The license-holder is prohibited from delivering any quantity of dangerous petroleum exceeding three gallons to any one who has not a license under section 5 or section 6 of the Act or any less quantity of such petroleum, except in accordance with the conditions of the proviso to section 6 of the Act as to the vessels in which the petroleum must be contained.

3. The petroleum shall be stored in gas-tight tinned or galvanized sheet iron, steel or lead plate receptacles containing each not more than forty gallons and fitted with well-made filling holes and well-fitting screw plugs, or fitted with screw cap or other cap with metal airtight undercap. Such receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch; provided that wood cases shall not be necessary when the receptacles are made of tinned or galvanized sheet iron or steel, and have the following thickness of metal:—

	Not less than
(1) When the capacity does not exceed two gallons	27 B. W. G.
(2) When the capacity exceeds two gallons but does not exceed four gallons	22 B. W. G.
(3) When the capacity exceeds four gallons but does not exceed eight gallons	20 B. W. G.
(4) When the capacity exceeds eight gallons but does not exceed twenty gallons	16 B. W. G.
(5) When the capacity exceeds twenty but does not exceed thirty gallons	14 B. W. G.
(6) When the capacity exceeds thirty but does not exceed forty gallons	12 B. W. G.

4. An air-space of at least one-tenth of its capacity shall be left in each receptacle at the time of filling.

5. The receptacle shall be so substantially constructed and secured as not to be liable except under circumstances of grave negligence or extraordinary accident, to be broken or become defective, leaky or insecure.

6. The receptacles shall be labelled in accordance with the provisions of section 7 of the Act.

7. Any receptacle, before being repaired, shall be cleared of all dangerous petroleum and of all dangerous vapours arising from the same.

8. The storage-shed shall be constructed of masonry or other uninflammable material with terraced, tiled or iron roofs and with tiled or paved or earthen floors.

9. Either the doorways and other openings of the storage-shed shall be built up to a height of two feet above the level of the road or street, or the floor sunk to a depth of two feet below the level of the road or street, so that the petroleum cannot flow out from the building in case of its escape from the receptacle in which it is contained or the building itself shall be surrounded with a masonry wall or embankment or both not less than two feet high. When the quantity of petroleum stored exceeds 16,000 gallons the height or depth shall be three feet.

A combination of these methods is permissible.

10. All ventilating openings in the storage-shed shall be protected by strong wire gauze.

11. No light, except a light of such strength, position and character as is not liable to ignite any inflammable vapour, nor fire of any description, shall be permitted at any time within the storage shed.

12. All due precautions shall be taken for the prevention of unauthorised persons having access to any dangerous petroleum kept and to the vessels containing or having actually contained the same.

13. Every person managing or employed on or in connection with the storage-shed shall abstain from any act whatever which tends to cause fire or explosion and which is not reasonably necessary, and shall prevent any other person from doing such act.

14. The drum or other receptacle containing dangerous petroleum shall only be opened on the licensed premises at or immediately adjoining the storage shed and for the time necessary for drawing off the petroleum and during such drawing off every reasonable precaution shall be adopted for preventing the escape of dangerous petroleum or the vapour therefrom.

15. The following distances shall be kept clear from protected works round the storage-shed :—

Quantity to be stored.	Distances to be kept clear.
Not exceeding 500 gallons	20 feet.
From 500 to 1,000 "	25 "
" 1,000 to 5,000 "	30 "
" 5,000 to 15,000 "	40 "
" 15,000 to 25,000 "	50 "
" 25,000 to 35,000 "	60 "
" 35,000 to 50,000 "	70 "
" 50,000 and over "	100 "

Provided that these distances may be reduced by the Resident in Mysore on the recommendation of the Chief Inspector of Explosives in cases where screen walls are provided or other special precautions taken, or where there are special circumstances that in the opinion of the Chief Inspector of Explosives warrant the reduction.

16. Provided that when the quantity to be possessed does not exceed 60 gallons, the provisions of conditions 8, 9 and 15 shall not apply, but the licensee shall observe the following conditions :—

(i) The storage-shed in which the dangerous petroleum is stored shall be well ventilated and constructed of uninflammable material, provided, however, that the doors and windows may be of wood.

(ii) Where a storage-shed forms part of or is attached to another building, and when the intervening floor or partition is of an unsubstantial or inflammable character or has openings therein, the whole of such building shall be deemed to be the storage-shed and no portion of such storage-shed shall be used as a dwelling house or as a place where persons assemble. The storage-shed shall have a separate entrance from the open air distinct from any building or dwelling in which persons assemble.

17. The storage-shed shall be liable to inspection by an officer not being of lower rank than an Inspector of Police authorised by the Resident in Mysore in this behalf.

FORM C.

(Rule 4 of Chapter IV of Part II.)

License to possess dangerous petroleum in quantity not exceeding forty gallons.

No. Fee R3.

License is hereby granted to for the storage, in the storage-shed described below, of gallons of dangerous petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated , and to the further conditions on the back of this license.

District Magistrate or authority
appointed under rule 2 of Chapter III of Part II.

(Description of the storage-shed above referred to.)

Endorsement on Form C.

CONDITIONS OF LICENSE.

1. If the licensing officer call upon the holder of a license, by notice in writing, to execute any repairs of the storage-shed which may, in the opinion of such officer, be necessary for the safety of the shed, the holder of the license shall execute the repairs, within such period, not being less than one month from the date of receipt of the notice, as may be fixed by the notice.

2. The license-holder is prohibited from delivering any quantity of dangerous petroleum exceeding three gallons to any one who has not a license under section 5 or section 6 of the Act, or any less quantity of such petroleum, except in accordance with the conditions of the proviso to section 6 of the Act, as to the vessels in which the petroleum must be contained.

3. The petroleum shall be stored in gas-tight tinned or galvanized sheet iron, steel or lead plate receptacles containing each not more than ten gallons and fitted with well-made filling holes and well-fitting screw plugs, or fitted with screw cap or other cap with metal air-tight undercap. Such receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch ; provided that wood cases shall not be necessary when the receptacles are made of tinned or galvanized sheet iron or steel, and have the following thickness of metal:—

	Not less than
(1) When the capacity does not exceed two gallons . . .	27 B. W. G.
(2) When the capacity exceeds two gallons but does not exceed four gallons	22 B. W. G.
(3) When the capacity exceeds four gallons but does not exceed eight gallons	20 B. W. G.
(4) When the capacity exceeds eight gallons	16 B. W. G.

4. An air-space of at least one-tenth of its capacity shall be left in each receptacle at the time of filling.

5. Receptacles shall be so substantially constructed and secured as not to be liable, except under circumstances of grave negligence or extraordinary accident, to be broken or become defective, leaky or insecure.

6. The receptacles shall be labelled in accordance with the provisions of section 7 of the Act.

7. Any receptacle, before being repaired, shall be cleared of all dangerous petroleum and of all dangerous vapours arising from the same.

8. The storage-shed in which the dangerous petroleum is stored shall be well ventilated and constructed of uninflammable material ; provided, however, that the doors and windows may be of wood.

9. All ventilating openings in the storage-shed shall be protected by strong wire gauze.

10. No light, except a light of such strength, position and character as is not liable to ignite any inflammable vapour, nor fire of any description, shall be permitted at any time within the storage-shed.

11. All due precautions shall be taken for the prevention of unauthorised persons having access to any dangerous petroleum kept and to the vessels containing or having actually contained the same.

12. Every person managing or employed on or in connection with the storage-shed shall abstain from any act whatever which tends to cause fire or explosion and which is not reasonably necessary and shall prevent any other person from doing such act.

13. The drum or other receptacle containing dangerous petroleum shall only be opened on the licensed premises at or immediately adjoining the storage-shed and for the time necessary for drawing off the petroleum, and during such drawing off every reasonable precaution shall be adopted for preventing the escape of dangerous petroleum or the vapour therefrom.

14. Where a storage-shed forms a part of or is attached to another building and where the intervening floor or partition is of an unsubstantial or inflammable character, or has openings therein, the whole of such building shall be deemed to be the storage-shed and no portion of such storage-shed shall be used as a dwelling or as a place where persons assemble. The storage-shed shall have a separate entrance from the open air distinct from any building or dwelling in which persons assemble.

15. The storage-shed shall be liable to inspection by an officer not being of lower rank than an Inspector of Police, authorized by the Resident in Mysore in this behalf.

FORM D.

(Rule 7 of Chapter IV of Part II.)

License to possess petroleum not being dangerous petroleum in a major installation.

No. Fee R

License is hereby granted to for the storage, in the place described below, of gallons of petroleum, not being dangerous petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated , and to the further conditions on the back of this license.

First Assistant Resident.

The 190 .

(Description of the place above referred to.)

Endorsement on Form D.

CONDITIONS OF LICENSE.

1. Each tank shall either be separately surrounded by a wall or embankment of substantial construction, or shall be partially sunk in an excavation. The enclosure thus formed shall be of dimensions sufficient to contain 10 per cent. more oil than the tank is capable of containing, and shall be so constructed as to prevent the escape therefrom of any oil in the form of liquid, whether under the action of fire or otherwise. Settling or measuring tanks* may be situated within the wall or excavation, but otherwise the space enclosed by such wall or excavation, and not occupied by the tank, shall be kept entirely clear and unoccupied.

2. In the case of all storage-sheds within the installation either the doorways and other openings of the building shall be built up to a height of three feet above the level of the ground outside it or the floor shall be sunk to a depth of three feet below the level of the ground, or the building itself shall be surrounded with a masonry wall or embankment, or both, not less than three feet high.

3. The height of any storage tank shall not be more than three-fifths of its diameter.

4. A distance of not less than one hundred feet shall be kept clear between one storage tank and another or between a storage tank and a storage shed, the distance being measured between the nearest points of the perimeters of the storage tanks or storage-sheds, as the case may be.

5. A distance of not less than one hundred and fifty feet shall be kept clear between any storage tank or shed and any protected work.

6. The distances specified in conditions 4 and 5 may be reduced by the Resident in Mysore on the recommendation of the Chief Inspector of Explosives in cases where screen walls are provided or other special precautions taken or where there are special circumstances that, in the opinion of the Chief Inspector of Explosives, warrant the reduction.

7. No fire or lights other than those necessary for soldering purposes, shall be permitted within the installation except in the office, living quarters, engine room, boiler house and smithy.

* These tanks shall not have a greater capacity than 30,000 gallons.

FORM E.

(Rule 8 of Chapter IV of Part II.)

License to possess petroleum not being dangerous petroleum in a minor installation.

No. Fee, R

License is hereby granted to for the storage, in the place described below, of gallons of petroleum, not being dangerous petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated , and to the further conditions on the back of this license.

District Magistrate or authority appointed under rule 2 of Chapter III of Part II.

The 190 .

(Description of the place referred to.)

Endorsement on Form E.

CONDITIONS OF LICENSE.

1. Every tank of which the capacity exceeds fifteen thousand gallons shall either be separately surrounded by a wall or embankment of substantial construction, or shall be sunk in an excavation. The enclosure thus formed shall be of dimensions sufficient to contain the total quantity of oil capable of being contained in the tank and shall be so constructed as to prevent the escape therefrom of any oil in the form of liquid, whether under the action of fire or otherwise. The space enclosed by such wall or excavation and not occupied by the tanks, shall be kept entirely clear and unoccupied.

2. The distance to be kept clear between a tank and the walls or embankments which surround it shall be, measuring from the ground level—

(a) for horizontal tanks, not less than one-third the height of the tank;

(b) for perpendiicular tanks not less than one-half the height of the tank.

3. The height of walls or embankments surrounding the installation shall be not less than two feet six inches from the ground level.

4. The following distances shall be kept clear between protected works not forming part of the installation and the enclosure walls or embankments : —

Where the number of gallons stored is—	Distance to be kept clear.
5,000 and under	Not less than 15 feet.
Over 5,000 and up to 20,000	Do. 20 „
Over 20,000 and up to 50,000	Do. 30 „

Provided that these distances may be reduced by the Resident in Mysore on the recommendation of the Chief Inspector of Explosives in cases where screen walls are provided or other special precautions taken, or where there are special circumstances which in the opinion of the Chief Inspector of Explosives warrant the reduction.

5. Soldering shall only be permitted in a separate room or building placed as far from the tanks as can be conveniently arranged, in which no storage or filling shall be permitted. No more tins shall be allowed in the soldering room at any one time than are necessary for expeditious working.

6. No fire or lights, except those necessary in the soldering room and watchman's house, shall be permitted.

7. If the installation contains tanks of which the capacity does not exceed fifteen thousand gallons, either—

(a) each tank shall be separately enclosed in the manner prescribed in condition 1, or

(b) the entire installation shall be surrounded by a masonry wall or embankment or a combination of these forming an enclosure of dimensions sufficient to contain, and prevent the overflow of, all the oil that may be stored at any one time within such walls or embankments.

8. In the case of all storage sheds within an installation, which is not surrounded by a masonry wall or embankment as provided in clause (b). of condition 7 either the doorways and other openings of the building shall be built up to a height of two feet above the level of the ground outside it, or the floor sunk to a depth of two feet below the level of the ground, so that the petroleum cannot flow out from the building in case of its escape from the receptacle in which it is contained, or the building itself shall be surrounded with a masonry wall or embankment or both not less than two feet high. When the quantity of petroleum stored exceeds 16,000 gallons the height or depth shall be three feet.

A combination of these methods is permissible.

FORM F.

(Rule 9 of Chapter IV of Part II.)

Special license to possess and transport dangerous petroleum for owners of motor-vehicles.

No. Free of charge.

License is hereby granted to owner (or hirer) of a motor-vehicle (or vehicles) for the possession of gallons of dangerous petroleum for use therein at* and for its transport on the said motor-vehicle (or vehicles) for the purpose of use therein, subject to the rules for the possession and transport of dangerous petroleum published in Notification No. , dated , and to the conditions at the back of this license.

When the quantity exceeds 40 gallons. — First Assistant Resident.
When the quantity does not exceed 40 gallons. — District Magistrate or authority appointed under rule 2 of Chapter III of Part II.

The 190 .

Endorsement on Form F.

CONDITIONS OF THE LICENSE.

1. The dangerous petroleum shall not be kept, used or transported except in gas-tight tinned or galvanized sheet iron, steel or lead plate drums or receptacles containing each not more than 4 gallons and fitted with well-made filling holes and well-fitting screw plugs or fitted with screw cap or other cap with metal air-tight undercap. Such drums or receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch. Provided that wood cases shall not be necessary when the drums or receptacles are made of tinned or galvanized sheet iron, or steel, and have the following thickness of metal :—

	Not less than;
(1) When the capacity does not exceed 2 gallons	27 B. W. G.
(2) When the capacity exceeds 2 gallons	22 B. W. G.

2. The drums or receptacles shall be so substantially constructed and secured as not to be liable, except under circumstances of gross negligence or extraordinary accident, to be broken or become defective, leaky or insecure.

3. Every such vessel, not forming part of a motor-vehicle, when used for transporting or keeping dangerous petroleum, shall bear the words "Dangerous Petroleum—Highly Inflammable" legibly and indelibly stamped or marked thereon, or on a metallic or enamelled label attached thereto.

4. An air-space of at least one-tenth of its capacity shall be left in each drum or receptacle at the time of filling to allow for expansion of the dangerous petroleum.

5. Before repairs are done to any such vessel, that vessel shall, as far as practicable, be cleaned by the removal of all dangerous petroleum and of all dangerous vapours derived from the same.

6. The storage shed in which the dangerous petroleum is stored shall be well ventilated and constructed of uninflammable materials, provided, however, that the doors and windows may be of wood.

7. Where a storage-shed forms part of, or is attached to, another building, and when the intervening floor or partition is of an unsubstantial or inflammable character, or has an opening therein, the whole of such building shall be deemed to be the storage-shed, and no portion of such storage-shed shall be used as a dwelling, or as a place where persons

*Situation and description of storage shed above referred to.

assemble. A storage shed shall have a separate entrance from the open air distinct from that of any dwelling or building in which persons assemble.

8. The amount of dangerous petroleum to be kept in any one storage-shed, whether or not upon motor-vehicles, shall not exceed sixty gallons at any one time.

9. The filling or replenishing of any vessels with dangerous petroleum shall not be carried on, nor shall the contents of any such vessel be exposed, in the presence of fire or artificial light except a light of such construction, position and character as not to be liable to ignite any inflammable vapour, and no artificial light shall be brought within dangerous proximity of the place where any vessel containing dangerous petroleum is being kept.

10. In the case of all dangerous petroleum kept or transported for the purpose of, or in connection with any motor-vehicle, (*a*) all due precautions shall be taken for the prevention of accidents by fire or explosion and for the prevention of unauthorized persons having access to any dangerous petroleum kept or transported and to the vessels containing, or having actually contained the same, and (*b*) every person managing or employed on or in connection with any motor-vehicle shall abstain from every act whatever, which tends to cause fire or explosion, and which is not reasonably necessary, and shall prevent any other person from committing such act.

11. The storage-shed shall be liable to inspection by an officer not being of lower rank than an Inspector of Police, authorised by the Resident in Mysore in this behalf.

FORM G.

(Rule I of Chapter V of Part II.)

General license to transport petroleum other than dangerous petroleum.

No. Fee, R100.

Under fifteen years' service.

R. D. VIZARD, Colonel,
Commanding 1st Manchester Regiment.

YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 7th and 8th June 1909, at 10-30 A.M., both days :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)	100	50
Dictation (spelling, punctuation, etc.)	100	50
Arithmetic (the whole)	240	160
Mensuration (*a*) (the whole)	60	30
Book-keeping (*b*) mercantile	100	50
TOTAL	600	...

Minimum required in all papers collectively, 400.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Hall and Hamilton.
"Book-keeping," by double and single entry, by W. Inglis (Chambers' Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted, either at the College, or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed ; but the officer who will conduct the examination may make his own arrangements, in regard to the *place* and *hour* of examination, with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is not already in pensionable service he will be eligible only for appointment to the non-pensionable establishment on State Railways.

*This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch ; but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth) not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's handwriting.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of application of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts, in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants, and over 25 years of age, are allowed to appear at the examination at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College not later than 30 days previous to the examination; the application to be accompanied by the fee of Rupees ten.

B. HEATON,
Principal, Civil Engineering College.

SIBPUR,
The 31st March, 1909.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Apprentice Department.

SESSION 1909-10.

Admissions will be made :—

(1) To the 3rd year class, of candidates who pass the Sub-Overseer Examination, provided their ages are between 17 and 19.

(2) To the 2nd year class, of candidates who pass the B. Final Examination, provided their ages are between 15 and 18.

(3) To the 1st year class, of candidates who have passed the Matriculation Examination of the Calcutta University, for Indians, or Standard VII of Middle School Examination of the Code of European Schools for Europeans; ages must be between 15 and 17.

The selection of candidates for admission is in the hands of the Principal. Preference will be given in the following order—(a) to the 3rd year class, (b) to the 2nd year class, (c) to the 1st year class, and the total number of candidates admitted to all three classes shall not exceed 60. Thirty per cent. of the vacancies will, as far as possible, be reserved for candidates domiciled in Eastern Bengal and Assam.

Applications for admission to the Apprentice Department must reach the Principal's office not later than the following dates :—

To the 3rd year class .	April 26th.
To the 2nd year class . .	April 19th.
To the 1st year class . .	May 6th.

The session of the 2nd year class will commence on April 14th, and of the 3rd year class on May 3rd; of the 1st year class on June 7th.

Twelve vacancies will be reserved for Europeans and Eurasians.

There will be the following minimum number of vacancies on the Reduced Fee List :—

For Indians 10.

For Europeans 10 and on the Free List one.

Election to these vacancies will be made by the Board of Visitors at special meetings for European candidates in the month of May, for Indian candidates in the month of June.

Forms of application for admission to the Reduced Fee Lists may be had from the Principal's office. All applications from European candidates must reach the Principal's office before May 6th.

The tuition fee of students of the Apprentice Department is R3 monthly for each month of the year, vacation included. Students of the Free and Reduced Fee Lists pay no tuition fees.

Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eye-sight.

Before an applicant is admitted to the College his parent or guardian must sign an agreement in the prescribed form.

Candidates who fail to secure admission to the 1st year class of the Apprentice Department are informed that they are eligible for admission to the Sub-Overseer classes at—

The Behar School of Engineering (preference given to Beharis).
The Government Industrial School, Ranchi, } in Bengal.
The Technical School, Burdwan, } in Bengal.
The Technical School, Midnapur, } in Bengal.
The Dacca School of Engineering } in Eastern Bengal and Assam.
The Technical School, Comilla, } in Eastern Bengal and Assam.
The Technical School, Barisal, } in Eastern Bengal and Assam.
The Technical School, Pabna, } in Eastern Bengal and Assam.
The Technical School, Rungpur, } in Eastern Bengal and Assam.
The Technical School, Rajshahi, } in Eastern Bengal and Assam.
The Victoria School, Kurseong (for Europeans only).

For terms of admission apply to the Head Masters of the Institutions concerned.

B. HEATON,
Principal, C. E. College.

Government of India Notifications, Appointments, Promotions, &c.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla the 15th April, 1909.

No. 1970.—THE Governor General in Council directs that the following rules regarding the use of uniform by officers in civil employ shall be substituted for those published with the notification of the Government of India in the Home Department no. 2531, dated the 23rd September 1907:

Rules regarding the use of uniform by officers in civil employ.

[These rules will not apply to officers holding political appointments, whose uniform will continue to be regulated by the orders issued in the Foreign Department.]

1.—The uniform to be worn by officers in civil employ will be that shown in the schedule appended to these rules.

II.—Civil officers who do not hold purely political appointments, but merely have some political work to do in addition to the ordinary duties of their office, are not entitled to wear political uniform.

III.—An officer is not entitled to continue to wear the uniform of an office which he has ceased to hold.

IV.—At Levées, Drawing Rooms and State ceremonials, officers of the Army in civil employ, for whom no political or special uniform is prescribed, shall wear the uniform of the Corps or Department to which they belong: and, on all occasions on which military mess dress is worn by officers in military employ, it may also be worn by military officers in civil employ. But when a military officer is appointed substantively to any civil office for which uniform is prescribed, he shall wear the uniform of that office.

V.—An officer appointed temporarily to an office, for which a uniform is prescribed, need not wear that uniform.

VI.—Retired civil officers, who, when last on duty in India, were entitled to wear uniform, will be permitted to wear their uniform at the Court of His Majesty the King-Emperor; such officers will, when living in India, be permitted to wear their uniform at Government Houses and on any occasion on which, before their retirement, they would have worn it.

VII.—Civil officers whose retirement is due to misconduct will not enjoy the privilege conferred by rule VI.

VIII.—Members of the Indian Civil Service, when on leave in England or otherwise present there during their service, will be permitted to wear their uniform at the Court of His Majesty the King-Emperor.

When attending Full Dress functions, such as Courts and State Balls, in England, officers entitled to wear uniform of the first and second classes described below, should wear breeches, hose and shoes, as described in the extract from the publication entitled "Dress worn at Court," Edition 1908, reprinted below, instead of trousers and boots.

SCHEDULE.

OFFICES AND APPOINTMENTS THE HOLDERS OF WHICH ARE ENTITLED TO WEAR UNIFORM.

PART I.

Officers holding appointments in or under the Government of India.

Office and appointments.	Uniform to be worn.
1. Ordinary Members of the Council of the Governor General.	The uniform prescribed for officers of the second class in the publication entitled "Dress worn at Court," Edition 1908 (extract annexed).

Commerce and Industry. Private Secretary to His Excellency the Viceroy when not an officer of the Army.	First class, as shown in the "Description of Civil Uniform" appended.

PART I—*contd.*

Officers holding appointments in or under the Government of India—contd.

Office and appointments.	Uniform to be worn.
3. Heads of Departments subordinate to the Government of India, *viz.*:— Chairman, Railway Board. Members, Railway Board. Comptroller and Auditor-General. Director-General of the Post Office of India. Director-General of Telegraphs. Director of Railway Construction. Commissioner, Northern India Salt Revenue Inspector-General of Forests. Director, Geological Survey of India. Director-General of Education in India. Secretary, Railway Board. Director-General of Commercial Intelligence. Director-General of Archæology. Inspector-General of Agriculture in India Director-General of Observatories. Controller of Printing, Stationery and Stamps.	First class, as shown in the "Description of Civil Uniform" appended.

PART II.

Heads of local Governments and Administrations and officers holding appointments subordinate to them

Office and appointments.	Uniform to be worn.
1. The Governors of Madras and Bombay	The uniform prescribed for officers of the first class in the publication entitled "Dress worn at Court," Edition 1908 (extract annexed).
2. Lieutenant-Governors . . .	The uniform prescribed for officers of the second class in the publication entitled "Dress worn at Court," Edition 1908 (extract annexed).
3. Ordinary Members of the Councils of the Governors of Madras and Bombay.	The uniform prescribed for officers of the third class in the publication entitled "Dress worn at Court," Edition 1908 (extract annexed).
4. Chief Commissioner of the Central Provinces.	First class, as shown in the "Description of Civil Uniform" appended.
5. Secretaries. Heads of the Principal Departments. Commissioners of Divisions and Revenue officers superior to them. The Superintendent of Port Blair. Settlement Commissioners under local Governments. Private Secretaries to Governors when not officers of the Army.	First class ditto ditto.
6. Private Secretaries to Lieutenant-Governors when not officers of the Army. Under Secretaries in the Political Department. Personal Assistant to the Chief Commissioner of the Central Provinces when not an officer of the Army.	Second class ditto ditto.

NOTE.—Lieutenant-Governors and Ordinary Members of the Council of the Governor General, or of the Governors of Madras and Bombay, may wear the evening dress prescribed in the "Description of Civil Uniform," and at open air functions the undress helmet.

Extract from the publication entitled "Dress worn at Court," Edition 1908.

FULL DRESS.

*Coat for 1st and 2nd classes. Blue cloth, single-breasted, stand collar. The collar and gauntlet cuffs are of black velvet, and the pocket flaps of blue cloth. Nine buttons up the front showing between the two embroidered edges (which are made to hook) two at the waist behind, and two at the bottom of the back skirts. White silk linings. A white collar may be worn inside the collar of the coat.

Gold oak-leaf embroidery on the fronts as follows:—

1st class, not more than 5 inches wide and the 2nd class not more than 4 inches wide at the base of each front, but to broaden across the chest according to figure.

The embroidery on the cuffs should not exceed the following widths:—1st class, 5 inches; 2nd class, 4 inches. The 1st class has a purl edging and the 2nd a saw edge.

The collar, pocket flaps, back, skirts, and back-skirts are also embroidered.

Buttons.—Gilt, mounted, the Royal Arms with supporters.

Coat for 3rd, 4th and 5th class. The coat described below under Levée Dress.

Hat.—1st class. Black beaver cocked hat, black silk cockade. Treble gold bullion loop with tassels and hangers. White ostrich feather border.

2nd class, as above, with double gold bullion loop, plain gold tassels without hangers.

3rd, 4th and 5th classes as above with plaited gold bullion loop and *black* ostrich feather border. No tassels.

Breeches.—White kerseymere with three covered buttons and gilt buckles at the knees.

Hose.—White silk.

Shoes.—Black patent leather with gilt buckles.

Sword.—Of Regulation pattern with black scabbard and gilt mountings.

Sword Knot.—Gold lace strap with bullion tassel.

Sword Belt.—White web, with white cloth frog.

Gloves.—White.

LEVÉE DRESS.

Coat.—Blue cloth, single-breasted, stand collar. The collar and gauntlet cuffs are of black velvet, and pocket flaps of blue cloth. Nine buttons up the front (to button), and two at the waist behind, and two at the bottom of the back skirts. Black silk linings and a black silk stock at the front of the neck. A white collar may be worn inside the coat.

Buttons.—Gilt, mounted, the Royal Arms (without supporters) surmounted by the Imperial Crown

The 1st and 2nd classes have gold embroidery on the collar, cuffs, pocket flaps, and between the buttons at the waist behind, as on the full dress coat.

The 3rd and 4th classes have embroidery with a saw edge on the collar, cuffs, back, and pocket flaps. The embroidery on the cuffs of the 3rd class is 3 inches wide, and on the cuffs of the 4th class 2 inches wide. The 5th class has an edging of purl embroidery on the collar, cuffs, and pocket flaps only.

Trousers.—Blue cloth, with gold oak-leaf lace on the side seams.

The width of lace as follows:—

1st and 2nd classes, 2½ inches.
3rd and 4th classes, 2 inches.
5th class, 1 inch.

NOTE.—The Full Dress coat prescribed for the Governors of Madras and Bombay, Lieutenant-Governors and Ordinary Members of the Council of the Governor General should only be worn in India with knee breeches. [On certain ceremonial occasions in England the Full Dress coat is sometimes worn with trousers, *viz.*, at Royal Weddings and when His Majesty opens Parliament.]

The two classes of uniform should be worn on the following occasions respectively:—

Full Dress.—State Balls and Drawing Rooms, and all State ceremonies in the evening at which ladies are present.

Levée Dress.—State dinners, Levées, and Official arrivals and departures.

Boots.—Plain, military, patent leather are worn with trousers.

Hat.—
Sword.— } The same as full dress.
Sword Knot.—

Sword Belt.—A blue cloth frog is worn with Levée Dress.

Gloves.—White.

For Mourning—A black crepe band 3½ inches wide, worn above the elbow on the left arm.

Description of Civil Uniform.

FIRST CLASS.

FULL DRESS.

The Levée Dress prescribed for officers of the 3rd class in the annexed extract from the publication "Dress worn at Court," Edition 1908.

Shoulder cords.—Of gold wire Lancer shoulder strap cord, on each shoulder.

For Lieutenant-Governors and Members of Council—
4 cords twisted.
,, Class I.—2 cords twisted.
,, ,, II.—2 ,, straight.

Buttons on cuffs.—For Lieutenant-Governors and Members of Council—4 buttons.
,, Class I.—3 buttons.
,, ,, II.—2 buttons.

Trousers.—White cotton drill over-alls with black leather foot straps.

Buttons.—Lieutenant-Governors and Members of Council will wear gilt mounted buttons with the Royal Arms, with supporters. The buttons to be worn with the other two classes of uniform should be gilt mounted bearing the Royal Arms without supporters, surmounted by the Imperial Crown.

Helmet, boots, spurs, forage cap, sword and sword belt.—As for undress. Lieutenant-Governors and Members of Council to wear the same as 1st class officers. Belt to be worn under the coat.

NOTE.—This uniform will be worn in substitution either for the full dress or undress uniform during such periods of the year as the local Government may prescribe. Local Governments are authorised to declare that officers need not provide themselves with it unless an occasion arises when they will require it. When the uniform is worn as full dress, medals and decorations will be worn. When it is worn as undress, ribbons only will be worn. No separate evening dress is prescribed for the hot weather.

In rule 25—

(a) The following shall be inserted after the first sentence:

" Explosives, other than those referred to in rule 18, which have undergone the test prescribed by the rules made by the Governor of the Straits Settlements in Council under the Explosives Ordinance, 1899, to regulate the

manufacture, use, sale, storage, transport, importation and exportation of explosive substances,* may be imported by sea from Penang into the port of Victoria Point under a license granted under rule 20 without re-testing, but subject, in the case of such explosives as are mentioned in rule 13, clause IX, to the production of a certificate as provided by the rule in force in the Straits Settlements";

(b) for the word "certificate" at the beginning of the second paragraph the word "certificates" shall be substituted;

(c) the following shall be inserted after the second paragraph :

"Explosives, other than those referred to in rule 18, which have already undergone the test prescribed by rules 22 and 23 at the port of Rangoon, may also be re-imported into the ports of Akyab, Sandoway, Kyaukpyu, Tavoy, Mergui or Victoria Point, under a license granted under rule 17 without re-testing, but subject to the conditions laid down in the foregoing paragraphs of this rule relating to the production of a certificate in the case of explosives mentioned in rule 13, clause IX."

No. 346.—Captain Cyril James Keith Pollard, R.A., resigns his commission. Dated 31st March 1909.

Nilgiri Volunteer Rifles.

No. 347.—Harry Russell Vaughan to be Second-Lieutenant to fill an existing vacancy. Dated 16th March 1909.

CANTONMENTS.

No. 348.—The Governor-General in Council is pleased to notify, for the information of all persons likely to be affected thereby, that the local area heretofore comprised in the Sutna Cantonment, has ceased to be a Cantonment for the purposes of the Cantonments Act, 1889, (XIII of 1889).

The Notification of the Government of India, in the Foreign Department, No. 35-M., dated the 15th March 1878, published at page 134 of Part I of the *Gazette of India* of the 16th *idem*, describing the boundaries of the said cantonment, is hereby cancelled.

R. I. SCALLON, *Major-General,*
Secretary to the Government of India.

MARINE DEPARTMENT.

Simla, the 16th April 1909.

APPOINTMENTS.

No. 14.—Commander C. S. Hickman, Royal Indian Marine, Assistant Surveyor, 1st Class, Marine Survey of India, is appointed to officiate as Surveyor in Charge, Marine Survey of India, *vice* Commander W. G. Beauchamp, Royal Indian Marine, on deputation, with effect from the 17th March 1909.

No. 15.—Commander N. F. J. Wilson, Royal Indian Marine, is appointed to officiate as Port Officer, Karachi, *vice* Commander G. S. Hewett, Royal Indian Marine, on leave, with effect from the 26th March 1909.

No. 16.—Engineer W. C. Constable, Royal Indian Marine, is appointed Engineer-in-Charge of the Factory, Bombay Dockyard, *vice* Engineer F. B. Phillips, Royal Indian Marine, with effect from the 1st April 1909.

LEAVE.

No. 17.—Commander G. S. Hewett, Royal Indian Marine, Port Officer, Karachi, is granted seven months' leave out of India on private affairs under paragraph 131, Marine Regulations, India, Volume I, Part II, with effect from the 26th March 1909.

RETIREMENTS.

No. 18.—Sub-Lieutenant F. V. Wilson, Royal Indian Marine, is permitted by the Right Hon'ble the Secretary of State for India to retire from the service, with effect from the 18th March 1909.

R. I. SCALLON, *Major-General,*

Secretary to the Government of India.

RAILWAY DEPARTMENT.

(RAILWAY BOARD.)

NOTIFICATIONS.

H. A. STUART,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 15th April 1909, based on the Indian Daily Weather Reports of the period.

Weather was feebly unsettled over almost the whole Indian region during the past week, and skies were unusually cloudy. The disturbed conditions resulted in thunderstorms and duststorms in all parts of the country, but it was only in Burma, northeast India, the central parts of the country and the south of the peninsula that the accompanying rainfall was of importance.

Burma.—Rain fell at most stations, the heaviest amounts being reported on the 14th. Skies were lightly to moderately clouded, and in Upper Burma the weather was cooler than usual.

Northeast India, including Orissa.—Rainfall occurred on every day of the week, chiefly in Eastern Bengal and Assam and Bengal. Skies were moderately to heavily clouded, and during the last three days of the week temperature was much below the normal.

The United Provinces, Central India and the Central Provinces.—Light rain fell locally in the eastern half of the Central Provinces. Skies were clear or lightly clouded. Temperature was generally in defect in the Central Provinces and the west of Central India and nearly normal elsewhere.

Northwest India.—Light falls of rain were recorded in Baluchistan, upper Sind, the southwest of the Punjab, the North-West Frontier Province and Kashmir. Cloud was generally light in the plains, and was moderately heavy in the hills. From the 13th to the end of the week temperature was in general defect.

The Peninsula.—Local falls of rain occurred in all parts of the peninsula, except the Konkan and the Bombay Deccan. Skies were clear or lightly clouded. The weather was cooler than usual in the Deccan.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day :—

April 9th. Hyderabad (Deccan) 1·93" and Tinnevelly 2·78".
" 10th. Yamethin 1·10", Sibsagar 1·03" and Nagpur 1·31".
" 11th. Mergui 1·10", Narayanganj 1·88" and Bangalore 2·58".
" 12th. Cherra Poonjee 11·85" and Barisal 2·91".
" 13th. Silchar 1·64", Chittagong 1·72", Madura 4·27" and Madras 2·57".
" 14th. Mergui 1·36", Bassein 1·39", Toungoo 2·00", Monywa 1·72", Jalpaiguri 1·02", Balasore 1·70" and Tinnevelly 1·50".
" 15th. Dinajpur 1·70".

Seasonal rainfall is now 69 per cent in excess in Upper Burma; at the end of last week it was normal. The deficiency shown in northeast India and south Hyderabad has decreased considerably.

GEORGE C. SIMPSON,
for Director-General of Observatories.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;
The 15th April 1909.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 10th April 1909.

Burma.—Slight rain fell during the week practically throughout Upper Burma. Clearing of hill sides for cultivation is progressing. Transplanting of spring rice continues. Reaping and harvesting of miscellaneous, island and other crops are advancing satisfactorily. The condition of standing crops is good. The price of unhusked rice has risen in five districts and has fallen in two. It is about normal at the principal centres, except Akyab, where it is unusually high.

Eastern Bengal and Assam.—All districts except Dinajpur have had good showers during the week. Prospects of all growing crops have improved and ploughing and sowing of jute, paddy and other monsoon crops have been greatly facilitated. The average price of common rice was practically the same as last week. There were 981 persons on test relief works in Rangpur, and 7,155 in Dinajpur. About 1,700 persons are employed on District Board relief works in Bogra Cattle disease prevails in several districts. Fodder and water are scarce in most places.

Bengal.—Rain fell during the week in almost all the districts of the Burdwan, Presidency and Orissa divisions and also in Darjeeling, the Southal Parganas, Ranchi, Manbhum and Cooch Behar. In Cooch Behar the fall was 4·07 inches and in Nadia, Murshidabad, Jessore, Khulna, Darjeeling and Balasore it was between 1 and 2·5 inches. In other districts from which the rainfall has been reported the fall was below an inch. Preparation of lands for autumn crops continues and sowings have commenced in Nadia, Muzaffarpur, Monghyr and Cooch Behar, but more rain is urgently needed both for ploughing and sowing Planting of sugarcane is still going on in many districts. Harvesting of spring crops is approaching completion. Prospects are poor in the unirrigated tracts of North Bihar Standing crops are doing well in Orissa and Chota Nagpur. The price of common rice has risen in Burdwan, Patna, Gaya, Saran and Sambalpur; and has fallen in Nadia. Shahabad and Champaran. Cattle disease exists in several districts. Reports of insufficiency of fodder have again been received from Midnapore, Jessore, Khulna, Gaya, Champaran, Monghyr, Purnea and the Southal Parganas. The water supply is still scarce in parts of the Burdwan and Presidency divisions and in North Bihar. Measures are being taken for the excavation of tanks and for the boring of wells in North Bihar. 1,854 persons were on test works in Muzaffarpur and Bhagalpur and 60,606 persons were on famine relief works in Darbhanga. 27,838 persons were relieved gratuitously in Muzaffarpur, Darbhanga, Bhagalpur, Purnea and Palamau and 544 in Puri.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—Workers exclusive of dependants 60,606; on gratuitous relief—(*a*) dependants of workers 11,129; (*b*) poor-houses or kitchens 2,958, and (*c*) village doles or other relief 9,551; total gratuitously relieved 23,638. Grand total on relief 84,244. Distress continues to be acute. The increase in numbers on relief works is due to the return of labourers from the spring harvest. Workers are in fair condition and the people are resorting freely to works. There is no wandering except amongst some beggars. The public health is generally good. Private aided works continue to supplement Government relief. Prices 12 to 13 seers per rupee.

United Provinces.—Except for insignificant falls in Dehra Dun, Almora, Agra, Fatehpur, Allahabad, Jhansi and Banda the week was rainless. Harvesting and threshing of spring crops and irrigation and sowing of sugarcane and extra crops continue. Standing crops are suffering in parts of Dehra Dun for want of rain. In Garhwal their prospects are not good, and the spring outturn in Kheri is bad. Otherwise standing crops and prospects are generally good. Cattle disease is reported from fourteen districts but agricultural stock in general are in good condition. Fodder is still deficient in the Mat tahsil of the Muttra district and in Sultanpur. The water supply is inadequate in parts of Fyzabad and in pargana Bijaigarh of the Mirzapur district. Prices have risen in seven districts; have fallen in eighteen; and are stationary elsewhere.

The weekly report on the famine and scarcity is as follows:—The condition of the people relieved is fair to good. Crime is normal in Bijaigarh, Kera Mangraur and Bahraich and below normal in Basti. Two civil and five aided works and one unaided work are in progress and one poor-house is open in Bijaigarh. One civil work and two aided works are in progress in Kera Mangraur. Five aided works are in progress and one poor-house is open in Basti. The first Departmental work was started in this district from the 5th April and the second charge is expected to be opened from the 20th. In Bahraich five charges and one poor house are open. The numbers relieved have increased in Bijaigarh, Bahraich and Basti, the rise in the last district being due to the contraction of the demand for field labour. The numbers relieved in Kera Mangraur have fallen. The total numbers on relief are:—on relief works 6,412; on aided works 6,823; on unaided

works 146; on gratuitous relief 5,396; in poor-houses 130; dependants 258; on private works 103; total 19,268. Prices:—Bijaigarh 12½; Kera Mangraur 15; Basti 16; an Bahraich 14 seers per rupee.

Punjab.—Slight rain has fallen in parts of Jullundur, Rawalpindi, Lyallpur, Jhang and Multan. Spring crops are being harvested in several districts. Their condition and expected yield on irrigated areas are generally good to average and on unirrigated areas are average to below the average. Sowings of extra spring and autumn crops continue. Prices are high but show a slight downward tendency. Cattle are generally in good condition. Fodder is sufficient except in Lahore, Sialkot, Lyallpur, Jhang, Multan and parts of Gurgaon and Amritsar.

North-West Frontier Province.—Slight showers fell during the week and were beneficial to standing crops. Rain is still wanted all over the province especially for unirrigated tracts. The condition of standing crops is generally good on irrigated lands and from average to below the average on unirrigated areas. Harvesting of gram and barley on lands cultivated by rain has commenced in the Bannu district. Rapeseed is also being reaped in the Mardan tahsil of the Peshawar district. Sugarcane, rice and extra spring crops are being sown. The water supply in canals is sufficient. Irrigation from the Paharpur canal in the Dera Ismail Khan district continues. Fodder is procurable. Cattle are generally in good condition except in the Daman tract of the Dera Ismail Khan district where drinking water is said to be scarce. The public health is good. Prices are fluctuating. Wheat sells from 8¼ to 11; gram 11⅞ to 13; maize 11 1/16 to 18¼; and *bajra* 13 to 14¼ seers per rupee.

Jammu.—There was slight rain during the week. Prices are fluctuating. Wheat sells from 7 to 14 and maize from 12 to 20 seers per rupee. The condition of standing crops is not good. Cattle disease is prevalent in some part of the Kathua tahsil. Fodder is sufficient.

Kashmir—The weather was bright with slight rain. There is no disease among cattle. Fodder is sufficient. Prices are unchanged.

Rajputana.—Rain accompanied with hail was received in Abu amounting to 81 cents. Slight rain also fell in Jodhpur, Udaipur, Banswara, Kotah, Jhalrapatan, Bharatpur, Karauli and Ajmer. Harvesting of spring crops continues. Standing crops are doing well. The condition of cattle is generally good. The fodder and water supply is sufficient. Prices have fallen by 1 to 2 seers in Bikanir and Jaipur; and have risen to the same extent in Jaisalmer, Shahpura, Karauli and Ajmer. Fluctuations are less noticeable elsewhere.

Central India.—Slight showers of rain fell in parts of Malwa and Bhopawar and *nil* elsewhere. Harvesting of spring crops has been completed in Indore and is progressing elsewhere. Agricultural stock are satisfactory except for some cattle disease. Prices have fallen in parts of Gwalior, Indore and Bundelkhand and are high but stationary elsewhere. Opium extraction has almost been completed.

Central Provinces.—The weather was generally unsettled and thunder-storms gave local showers in all districts except Nimar and Bilaspur. Wardha and Nagpur received 1 and 1¾ inches of rain respectively. Elsewhere the rainfall ranged from 95 cents in Seoni to 1 cent in Akola. It was accompanied by hail in Akola, Amraoti and Buldana but no damage is reported. Harvesting of spring crops is completed in most districts. Threshing and winnowing are nearing completion. Preparation of land for the ensuing crop and repairs of field embankments are in progress. Prospects are generally good. Picking of *mahua* continues but the crop has suffered slightly from cloudy weather, the damage being considerable in Wardha. Fodder and water are sufficient. Cattle are doing well. The price of gram in Mandla and of wheat in Bhandara rose by 3 and 2¼ seers per rupee respectively. Elsewhere the prices of staple food grains were steady or varied slightly exhibiting a tendency to rise. The number of weavers on relief was 1,599.

Feudatory States.—Light showers were received during the week in seven States and the quantity registered in Kanker amounted to 1½ inches. Harvesting of spring crops is practically completed and threshing and winnowing are in progress. Picking of *mahua* continues in Raigarh, Sarangarh and Sakti. Preparation of land for the sowing of the next autumn crops and construction of field embankments are proceeding everywhere. Fodder and water are adequate. Prices remained stationary or fluctuated slightly.

Bombay.—Slight rain fell during the week in parts of Sind, Kanara, the Deccan, the Karnatak, Rewa Kantha and Kolhapur. Standing spring crops have been slightly damaged by insects in parts of Karachi and by frost in parts of Ahmedabad. Cotton has been damaged by frost in parts of Ahmedabad. Standing crops are generally in fair to good condition elsewhere. Harvesting of spring crops has been completed in the Panch Mahals and the Karnatak; it is nearly over in East Khandesh, Nasik, Poona, Satara and Rewa Kantha and generally continues elsewhere. Threshing is in progress in parts of Hyderabad, Kaira, Broach, Colaba, West Khandesh, Nasik, Ahmednagar and Mahi Kantha. Cotton picking has nearly been completed in the Karnatak and continues in parts of Broach, Gujarat, Baroda, Cutch, Rewa Kantha and Kolhapur. Lands are being prepared for next season in parts of Hyderabad, Ahmedabad, the Konkan, the Deccan, the Karnatak, Baroda and Kolhapur. The supply of fodder is adequate except in parts of West Khandesh, Bijapur, Belgaum and Kolhapur. Agricultural stock are sufficient

except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water is adequate except in parts of West Khandesh, Nasik, Bijapur and Belgaum. Water for irrigation is sufficient except in parts of West Khandesh, Nasik, Poona, Belgaum and Bijapur. Prices of food grains have fallen slightly in Ratnagiri; have risen slightly in the Upper Sind Frontier, Ahmedabad, Kanara, Ahmednagar and Sholapur; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 26 to 40 per cent.; in Gujarat 20 to 62 per cent.; in the Konkan 3 to 25 per cent.; in the Deccan 17 to 42 per cent.; and in the Karnatak 32 to 79 per cent. less than the normal. Stocks of grain are adequate. Emigration on a small scale is progressing in Bijapur. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. The numbers on relief in Bijapur are:—workers 537; on gratuitous relief 8.

Hyderabad.—The rainfall during the week was 50 cents. It fell all over the State except in parts of the Aurangabad, Parbhani, Warangal, Adilabad and Karimnagar districts. The highest fall was over 2 inches in the Bidar taluka of the Bidar district. Three talukas received close on 2 inches of rain; three talukas received 1½ inches; five about 1 inch; six about ½ inch; and the rest received between 50 and 11 cents. The spring harvest is nearing completion and is fair except in parts of the Raichur district and other isolated tracts. Spring and late rice crops are generally fair but are reported to have suffered from rain during the week. Harvesting of these crops has begun in parts. Cattle disease prevails in twelve talukas. Prices shew a downward tendency. Prices:—wheat 6¾; coarse rice 6⅞; and *juar* 14½ seers per rupee. White *juar* is selling in Hyderabad City at 12 seers per rupee. Yellow *juar* is not available. The highest price is 9 seers in the Kushtagi and Paloncha talukas of the Raichur and Warangal districts respectively and the lowest 22 seers in the Rajura taluka of the Bidar district.

Mysore.—Slight rain was generally received throughout the State. Prices of food grains are steady and markets are fairly well supplied. Prospects of the season have improved slightly. Cattle are generally healthy except in some localities. Fodder is procurable with some difficulty.

Coorg.—Rainfall 1 inch 7 cents. Coffee blossoms are out in parts. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was *nil* in North Arcot, Tanjore and South Canara; and light to fair elsewhere. Irrigation supplies are insufficient in parts of all districts except Chingleput, South Arcot, Coimbatore, Trichinopoly, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair but some in parts of Salem require more rain and some in parts of North Arcot and South Canara have withered or are withering. Harvests continue with outturn poor to normal. Pasture is sufficient in Chingleput Madras, South Arcot, North Arcot, Tanjore, Madura, Tinnevelly and the Nilgiris. Fodder is scanty in parts of Vizagapatam, Guntur, the Deccan, North Arcot, Salem and Tanjore. The condition of cattle is generally good. The price of rice is stationary in nineteen districts; and has risen in four. The prices of millets have fluctuated as follows:—*Ragi* is stationary in fourteen districts; has fallen in four; and has risen in six. *Cholam* is stationary in four districts; has fallen in five; and has risen in five *Cumbu* is stationary in seven districts; has fallen in two; and has risen in six. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the *Gazette of India*.

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief."

C. F. ANDERSON, *Capt., R.E.,*
for Secretary, Railway Board.

Simla, the 15th April 1909.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, APRIL 17, 1909.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1909.

From the 3rd April next till further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 27th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

Rates of subscription.	Per annum. R	a.	p.
Subscription for *Gazette* and Supplement	15	0	0
Postage	5	8	0
Subscription for Parts I, II, and III, or any of them	6	0	0
Postage	2	8	0
Subscription for Parts IV, V, and VI, or any of them	4	0	0
Postage	2	8	0
Subscription for Supplement only	5	0	0
Postage	3	0	0
Subscription for Supplement and Part VI	5	0	0
Postage	3	0	0
For a single copy of the *Gazette* and Supplement	0	8	0
For a single copy of Parts I, II, and III, or IV, V, and VI, or Supplement	0	4	0

A special price will be fixed for specially heavy issues of the *Gazette* or any particular Part.
Postage on single copies varies according to weight.
Rules and Notifications issued under Legislative Acts, and having the force of law, may be obtained separately at, per page, 2 pice.

By order of Government, all subscriptions must be paid *in advance*.

Applications for the supply of the *Gazette* on the *public service* should be addressed to the Home Department.

Complaints regarding non-receipt of any number of the *Gazette* should be forwarded within a week after the date on which it is due.

J. J. MEIKLE,
Publisher, *Gazette of India*.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 15th April 1909.

NOTIFICATIONS.

No. 1424 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 12th April 1909 :—

No. 174 of 1909.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, North Britain. *Improvements in connection with apparatus for drying tea leaves, or analogous produce.*

No. 175 of 1909.—Syed Mohamad Wajih, sub-registrar, of Hilsa, district Patna. *A water-lift called "Mojib's water-lift."*

No. 176 of 1909.—Edward Lionel Joseph, managing director, of 27 Chancery lane, in the county of London, England, and Ozonair Limited, of 27 Chancery lane, in the county of London, England. *An improvement in or relating to the manufacture of tea.*

No. 177 of 1909.—Walter Smith, Merchant's Clerk, of 22 Netherford road, Clapham, London. *Improvements in the winding of cotton, wool, worsted, silk and other fibres.*

No. 178 of 1909.—John George Henrich, merchant, of Milton House, 5 Clifton road, Camden Square, London, England. *Improvements in valved stoppers for siphon and like bottles.*

No. 179 of 1909.—Societe Generale D'Etudes et D'Application Des Procedes D'Assechement et D'Assainissement Knapen, manufacturers, of 140 Boulevard Haussmann, Paris, in the republic of France. *Improvements in or relating to the drying of building structures and materials.*

No. 180 of 1909.—Alfred Parry, of "Staveley" Sandheys, Waterloo, Liverpool (address in Calcutta c/o A. H. Abbott, 14 Old Court House street, Calcutta). *Improvements in apparatus for rolling tea leaves and the like.*

No. 181 of 1909.—Cecil McKenzie Dowie, engineer, of 40 Park street, Calcutta. *Improvements in apparatus for making gas for heating or lighting purposes from petrol or the like.*

No. 1425 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2, Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 352 of 1908.—William Matthews Thomas, engineer, of 52 Cantonments, Cawnpore, British India. *Improvements in double roofs or floors and the like.* (Specification filed 5 April 1909.)

No. 549 of 1908.—Louis Tasman Reichel, electrician, of 86 Rolleston street, and Edwin Frederick Reichel, electrician, of 83 Wright street, both of Wellington, New Zealand. *An improved fire alarm.* (Specification filed 6 April 1909.)

No. 1426 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 361 of 1899.—Edward Waller Stoney. *Improved silent self-lubricating punkah wheels.* (From 25 April 1909 to 25 April 1910.)

No. 393 of 1899.—Francis Hugh Fox. *Improvements in and relating to puttees or leg and other bandages and in their construction or method of manufacture.* (From 20 April 1909 to 20 April 1910.)

No. 303 of 1900.—William Wilson and Thomas Bennett. *Improvements in or in connection with life saving guards for tramcars and like vehicles.* (From 6 March 1909 to 6 March 1910.)

No. 386 of 1900.—Guglielmo Marconi and Marconi's Wireless Telegraph Company, Limited. *Improvements in apparatus employed in wireless telegraphy.* (From 1 May 1909 to 1 May 1910.)

No. 453 of 1901.—Isaac Shone and Edwin Ault. *Improvements in the mode of and means for ventilating and flushing house drains and other drains and sewers.* (From 17 June 1909 to 17 June 1910.)

No. 257 of 1902.—H. A. L. Hepper. *An improved electric key transmitting apparatus.* (From 7 April 1909 to 7 April 1910.)

No. 439 of 1902.—Marconi's Wireless Telegraph Company, Limited. *Improvements in receivers suitable for wireless telegraphy.* (From 27 May 1909 to 27 May 1910.)

No. 151 of 1903.—Alfred Moul. *Improvements in target apparatuses and the like where no projectile is employed.* (From 21 December 1909 to 21 December 1910.)

No. 386 of 1903.—Frank Reddaway. *Improvements in or connected with woven driving belting.* (From 3 May 1909 to 3 May 1910.)

No. 429 of 1903.—George Jones Atkins. *Improvements in or connected with the poles or electrodes of electrolytic apparatus and the like.* (From 11 May 1909 to 11 May 1910.)

No. 43 of 1904.—Thomas Franklin Pedley. *Fr ventilation of buildings.* (From 20 May 1909 to 20 May 1910.)

No. 57 of 1904.—Charles Loxton Rothwell-Jackson and Edward Wilson Hunt. *Improvements in machines for chemicing, souring, bleaching, dyeing, mercerising, washing, or similarly treating textile fabrics in the open state.* (From 31 August 1909 to 31 August 1910.)

No. 62 of 1904.—John Thomas Blackett. *An improved boring machine for use in coal or ironstone mines or the like places.* (From 8 August 1909 to 8 August 1910.)

No. 63 of 1904.—Frederick Dwight Johnson. *Improvements in and relating to pneumatic percussive tools and the like.* (From 8 August 1909 to 8 August 1910.)

No. 109 of 1904.—Harry Smith Wainwright. *Improved draught producing and spark arresting apparatus for locomotive engines.* (From 13 July 1909 to 13 July 1910.)

No. 110 of 1904.—Harry Smith Wainwright. *Improved draught producing and spark arresting apparatus for locomotive engines.* (From 13 July 1909 to 13 July 1910.)

No. 537 of 1904.—James Holden and Edmund Spenser Tiddeman. *Improvements in and relating to spark arresting apparatus.* (From 28 July 1909 to 28 July 1910.)

No. 482 of 1905.—Erste Triester Reisschal-Fabriks Actien-Gesellschaft. *Improvements in the manufacture of sizing or finishing media.* (From 8 December 1909 to 8 December 1910.)

No. 1427 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 210 of 1904.—Antonio Ribeiro da Silva Braga. *Manufacture of extract of meat compressed or in powder.* (Specification filed 6 January 1905.)

No. 211 of 1904.—Antonio Ribeiro da Silva Braga. *Manufacture of liquid extract of meat or soft extract of meat.* (Specification filed 6 January 1905.)

No. 238 of 1904.—Henry Chitty. *Improvements in rotary electric machines.* (Specification filed 3 January 1905.)

No. 239 of 1904.—Henry Chitty. *Improvements in dynamo electric machines.* (Specification filed 3 January 1905.)

No. 247 of 1904.—Conrad Regenbogen and Edwin Ruud. *Improvements in or relating to igniter mechanism for internal combustion engines.* (Specification filed 6 January 1905.)

No. 258 of 1904.—Planters Compress Company. *Improvements in baling presses.* (Specification filed 6 January 1905.)

No. 325 of 1904.—Seymour Wentworth Bonsall. *Improvements in combination hangers.* (Specification filed 6 January 1905.)

No. 336 of 1904.—Ernst Stoffler. *Improvements in the manufacture of lime and sand bricks or blocks.* (Specification filed 4 January 1905.)

No. 365 of 1904.—Fritz Eisenbeis and Ferdinand Garelly. *Improvements in and relating to cutters or tools for coal cutting, channelling and like machines.* (Specification filed 6 January 1905.)

No. 384 of 1904.—John Alexander Colquhoun. *Improvements in keys for keying railway rails to chairs.* (Specification filed 6 January 1905.)

No. 421 of 1904.—Starrett Cotton Gin Company *Improvements in cotton gins.* (Specification filed 6 January 1905.)

No. 427 of 1904.—Alfred Clarkson. *Humidifiers.* (Specification filed 7 January 1905.)

No. 442 of 1904.—Standard Mouth Piece Machine Company. *Improvements relating to cigarettes or cigars or to mouthpieces therefor, and to apparatus for making and applying said mouthpieces.* (Specification filed 7 January 1905.)

No. 459 of 1904.—George Sonnenthal and Joseph Elsner. *Improvements relating to lifting and transporting apparatus.* (Specification filed 7 January 1905.)

No. 471 of 1904.—Chemisch-Technische Fabrik Dr. Alb R. W. Brand Co. *Improved process for colouring natural stone.* (Specification filed 7 January 1905.)

No. 475 of 1904.—Thomas McClelland de Bingham and Percy Arthur Everest Wood *Improvements in or relating to tyres.* (Specification filed 3 January 1905.)

No. 501 of 1904.—James Hodson. *Improvements in and connected with camp and like folding furniture.* (Specification filed 4 January 1905.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not " designs " within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905, 1906, 1907 and 1908, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified : or if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. A new and revised edition is now on sale. Royal 8vo volumes, paper cover, price one rupee or 1*s*. 6*d*. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

A copy of the Bill, which it is proposed to introduce to amend the law relating to the protection of Inventions and Designs, together with a statement of objects and reasons and notes on clauses, has been placed in the visitors' room of the Patents Office for inspection. Copies, price one rupee, may be obtained on application to the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

H. G. GRAVES,

Secretary under the Inventions and Designs Act, V of 1888.

SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. Quinine is for sale only to Government officers. Cinchonidine is for sale to Government officers and to dealers. Both Quinine and Cinchonidine are for sale for cash only and may be obtained from the Superintendent, Royal Botanic Garden, Sibpur, near Calcutta.

The rates from 1st April 1908 are as follows :—

To Government officers.

Quinine.	R	a.	p.	Post-free. R	a.	p.

Wiggins, R., Gunner, Madras Artillery	John M. Wiggins (son).

* Claim received, but claimant has not yet appeared to receive payment.

C. W. BUTLER, Captain,
For Deputy Controller of Military Accounts.

OFFICE OF THE DEPUTY CONTROLLER OF MILITARY ACCOUNTS,
SECUNDERABAD DIVISION, BOLARUM;
1st April 1909.

YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 7th and 8th June 1909, at 10-30 A.M., both days :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)	100	50
Dictation (spelling, punctuation, etc.)	100	50
Arithmetic (the whole)	240	160
Mensuration (*a*) (the whole)	60	30
Book-keeping (*b*) mercantile	100	50
TOTAL	600	...

Minimum required in all papers collectively, 400.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Ball and Hamilton.
"Book-keeping," by double and single entry, by W. Inglis (Chambers' Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted, either at the College, or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed ; but the officer who will conduct the examination may make his own arrangements, in regard to the *place* and *hour* of examination, with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it ; but if he is not already in pensionable service he will be eligible only for appointment to the non-pensionable establishment on State Railways.

*This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch ; but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth) not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's handwriting.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of application of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts, in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants, and over 25 years of age, are allowed to appear at the examination at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College not later than 30 days previous to the examination: the application to be accompanied by the fee of Rupees ten.

B. HEATON,
Principal, Civil Engineering College.

SIBPUR,
The 31st March, 1909.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Apprentice Department.

SESSION 1909-10.

Admissions will be made :—

(1) To the 3rd year class, of candidates who pass the Sub-Overseer Examination, provided their ages are between 17 and 19.

(2) To the 2nd year class, of candidates who pass the B. Final Examination, provided their ages are between 15 and 18.

(3) To the 1st year class, of candidates who have passed the Matriculation Examination of the Calcutta University, for Indians, or Standard VII of Middle School Examination of the Code of European Schools for Europeans; ages must be between 15 and 17.

The selection of candidates for admission is in the hands of the Principal. Preference will be given in the following order—(*a*) to the 3rd year class, (*b*) to the 2nd year class, (*c*) to the 1st year class, and the total number of candidates admitted to all three classes shall not exceed 60. Thirty per cent. of the vacancies will, as far as possible, be reserved for candidates domiciled in Eastern Bengal and Assam.

Applications for admission to the Apprentice Department must reach the Principal's office not later than the following dates :—

To the 3rd year class .	April 26th.
To the 2nd year class . .	April 19th.
To the 1st year class . .	May 6th.

The session of the 2nd year class will commence on April 14th, and of the 3rd year class on May 3rd ; of the 1st year class on June 7th.

Twelve vacancies will be reserved for Europeans and Eurasians.

There will be the following minimum number of vacancies on the Reduced Fee List :—

For Indians 10.

For Europeans 10 and on the Free List one.

Election to these vacancies will be made by the Board of Visitors at special meetings for European candidates in the month of May, for Indian candidates in the month of June.

Forms of application for admission to the Reduced Fee Lists may be had from the Principal's office. All applications from European candidates must reach the Principal's office before May 6th.

The tuition fee of students of the Apprentice Department is R3 monthly for each month of the year, vacation included. Students of the Free and Reduced Fee Lists pay no tuition fees.

Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eye-sight.

Before an applicant is admitted to the College his parent or guardian must sign an agreement in the prescribed form.

Candidates who fail to secure admission to the 1st year class of the Apprentice Department are informed that they ar ble for admission to the Sub-Overseer classes at—

The Behar School of Engineering (preference given to Beharis).

Government of India Notifications, Appointments, Promotions, &c.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Simla, the 19th April, 1909.

No. 478.—The Honourable Sir Henry Erle Richards, K.C.S.I., K.C., Barrister-at-Law, resigned his office as an Ordinary Member of the Council of the Governor General of India, with effect from the 18th April 1909.

No. 479.—A vacancy having occurred in the office of an Ordinary Member of the Council of the Governor General of India by the resignation of the Honourable Sir Henry Erle Richards, K.C.S.I., K.C., Barrister-at-Law, His Majesty the King, Emperor of India, has been graciously pleased to appoint the Honourable Mr. Satyendra Prasanna Sinha, Barrister-at-Law, to be an Ordinary Member of the Council of the Governor General of India.

The Honourable Mr. Sinha has, on this day, taken upon himself the execution of his office under the usual salute.

EXAMINATIONS.

The 14th April, 1909.

No. 157.—The following amendments are made in the rules for the encouragement of the study of oriental languages among the junior members of the Indian Civil Service, published with the Home Department notification no. 632, dated the 20th December 1907. They will come into force from the 1st January 1910:

In rule XI, in the list of subjects for the Degree of Honour examination in Hindustani and also in the list of authorised or recommended text-books substitute "Taubatu-n-Nasuh" for "Fisāna-'i-'Ajā'ib" and "Nazm-i-Muntakhab" for "Dīwān of Atash, 1st half." The new text-books may be obtained from the Board of Examiners, Calcutta.

MEDICAL.

The 21st April, 1909.

No. 381.—Surgeon-General Sir G. Bomford, M.D., K.C.I.E., I.M.S. No. 382.—Lieutenant-Colonel C. P. Lukis, M.D., F.R.C.S, I.M.S. (Bengal), Principal and Professor of Medicine, Medical College, Calcutta, and First Physician, College Hospital, is appointed to officiate as Director General, Indian Medical Service, during the absence on leave of Surgeon-General Sir G. Bomford, M.D., K.C.I.E, I.M.S. (Bengal), or until further orders.

The 22nd April, 1909.

No. 387.—Lieutenant-Colonel H. W. Pilgrim, M.B., F.R.C.S., I.M.S., Surgeon Superintendent of the Presidency General Hospital, Calcutta, is, with effect from the 21st April 1909, granted privilege leave for two months and one day with special leave on urgent private affairs for three months and twenty-nine days in continuation.

No. 388.—Major E. E. Waters, M.D., I.M.S., is appointed to officiate as Surgeon Superintendent of the Presidency General Hospital Calcutta, during the absence on leave of Lieutenant-Colonel H. W. Pilgrim, M.B., F.R.C.S., I.M.S., or until further orders.

SANITARY.
PLAGUE.

The 23rd April, 1909.

No. 682.—The following telegram is published for general information:

Telegram dated Pera, the 21st April 1909.

From—His Britannic Majesty's Ambassador Extraordinary and Plenipotentiary at Constantinople,

To—His Excellency the Viceroy.

Quarantine reduced to medical visit on vessels coming from Muscat and Bahrein.

JAILS.

The 19th April, 1909.

No. 125.—*Corrigendum.*—In the Home Department notification no. 99, dated March 19th, 1909, granting leave to Major I. M. Macrae, I.M.S., insert the words "on medical certificate" after the words "22nd September 1908."

JUDICIAL.

The 23rd April, 1909.

No. 579.—Sir Lawrence Hugh Jenkins, Kt., K.C.I.E., took his seat as Chief Justice of the High Court of Judicature at Fort William in Bengal on the 19th April 1909.

H. A. STUART,

Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE.

NOTIFICATIONS.

LAND SURVEYS.

Simla, the 21st April, 1909.

No. 427—52-2.—Brevet Major E. T. Rich, R.E., Officiating Deputy Superintendent, 2nd grade, Survey of India, is granted privilege leave for two months combined with special Mohmand leave for one month and furlough for one year and nine months, under Articles 233, 260 and 308 (*b*) of the Civil Service Regulations and Finance Department's Resolution No. 4226-P., dated 21st July 1908, with effect from the 15th May 1909, or the subsequent date on which he may avail himself of it.

FORESTS.

The 21st April, 1909.

No. 464—100-2-*F*.—*Corrigendum*.—In the Notification of this Department, No. 183—220-32-F., dated the 22nd January 1909, for the date "2nd January 1909" shown opposite the names of Messrs. H. S. Gibson and A. J. W. Milroy, *substitute* "31st December 1908."

R. W. CARLYLE,

Secretary to the Government of India.

PUBLIC WORKS DEPARTMENT.

NOTIFICATIONS.

Simla, the 19th April, 1909.

No. 40—Mr. W. A Bagley, Executive Engineer, Punjab, is appointed to officiate as Superintending Engineer, with effect from the 9th April 1909, during the absence on combined leave of Mr. C. H. Barratt.

The 23rd April, 1909.

No. 41.—In exercise of the powers conferred by Sections 4 (1) and 40 of the Indian Electricity Act, 1903 (III of 1903), the Governor-General in Council is pleased to sanction the following license under the aforesaid Act being granted to the Rangoon Electric Tramway and Supply Company, Limited, whose registered office is situate at 14, Dale Street, Liverpool, England, for the supply of energy to the public for the purpose of general supply and to particular consumers under special agreements, but not for electric traction, within the limits of the Cantonment of Rangoon :

RANGOON (CANTONMENT) ELECTRIC LICENSE, 1909.

License granted by the Governor-General in Council under the provisions of the Indian Electricity Act, 1903, to the Rangoon Electric Tramway and Supply Company, Limited, whose registered office is situate at 14, Dale Street, Liverpool, England, for the supply of energy to the public for the purpose of general supply and to particular consumers under special agreements but not for electric traction within the limits of the cantonment of Rangoon.

Short Title.

1. This license may be cited as "The Rangoon (Cantonment) Electric License, 1909."

Preliminary.

2. This license shall be read and construed subject in all respects to the provisions of the Indian Electricity Act, 1903, and of the rules thereunder and the several words,

terms and expressions to which by that Act or by the said rules meanings are assigned shall have in this License the same respective meanings provided that in this license—

(i) The expression "The Act" shall mean the Indian Electricity Act, 1903.

(ii) The expression "The Licensees" shall mean and include the Rangoon Tramway and Supply Company, Limited, and their permitted assigns.

(iii) The expressions "first annexure," "second annexure" and "third annexure" shall mean the first, second and third annexures to this license, respectively.

(iv) The expression "deposited map" shall mean the plan of the area of supply deposited with the Secretary to the Government of India in pursuance of the terms of the Act and the rules thereunder and which plan is signed by the Secretary to the Government of India in the Public Works Department and on behalf of the applicants.

Commencement of License.

3. This license shall come into force and have effect upon the day when the notification of its having been granted is published in the *Gazette of India* which date shall be deemed the date of the commencement of this license.

Area of supply.

4. The area of supply which is more particularly delineated upon the deposited map and thereon coloured red is the whole of the area described in the first annexure.

Purchase of the Undertaking.

5. The option of purchasing the undertaking accorded by section 7, sub-section (1) of the Act, shall first be exercisable on the 1st day of October 1947 and on the expiration of every subsequent period of ten years during the subsistence of this license.

List of private streets, railways, etc.

6. The list of streets, railways, bridges, canals and rivers required by rule 6 (*Gazette of India* notification No. 481, dated 23rd December 1903) of the rules made under section 33 of the Act is given in the second annexure.

Maximum charges.

7. The prices charged by the licensees for energy supplied shall not exceed those specified in the third annexure.

Statement of the purposes for which supply is to be given.

8. Subject to the provisions of this license and the Act the licensees shall during the continuance of this license be entitled to supply energy within the area of supply—

(a) To the public for the purpose of general supply.

(b) To particular consumers under special agreements.

General description of works and system of supply.

9. (1) The supply may be on the polyphase or single phase alternating current system or on the continuous current system.

(2) The distribution for public lamps may be on the alternating current system or on the continuous current system.

(3) The distribution for other purposes may be on the 2-wire, 3-wire or 4-wire constant potential system to and from constant potential transformers or on the continuous current system.

(4) The voltage of the distribution to constant potential transformers shall be within the limits of high pressure and the voltage of distribution from such transformers shall be within the limits of low pressure.

(5) The frequency of the system shall not be less than 50 nor more than 60 cycles per second.

(6) The neutral conductor of the 3-wire system and of the 4-wire system may be connected to earth.

(7) Mains, distributing mains and service lines may be aërial or underground or partly aërial and partly underground.

(8) All aërial lines shall be erected in accordance with the rules provided that—

(a) Where a transformer is carried upon a support of a high pressure conductor the high pressure and low pressure aërial lines to and from the transformer may be carried on that support provided that the low pressure aërial lines are not carried on the same side of the pole as the high pressure aërial lines.

(b) Where connecting wires are led off from aërial lines to incandescent public lamps such wires may with the approval of the Governor-General in Council be at a less height from the ground than 20 feet provided that the said wires cannot be reached except by means of a ladder or other special device.

(9) For the purposes of section 40 (1) of the rules transformers shall be deemed to "be in suitable places in the sole occupation and charge of the licensees" when carried upon poles or other supports in such position that they cannot be reached except by means of a ladder or other special device.

(10) Where poles erected by the licensees for the purposes of electric traction are available public lamps may be supported therefrom together with any conductors supplying energy to such lamps.

(11) The generating station shall be without the area of supply.

ANNEXURES.

FIRST ANNEXURE.

Description of Area of Supply.

The area comprised within the limits of the cantonment of Rangoon coloured red on the deposited map.

SECOND ANNEXURE.

List of streets not repairable by the Local Government or a Local Authority and of railways, tramways, bridges, canals and rivers referred to in clause 6 of this license—

(1) All bridges within the area of supply under the control of the Rangoon Cantonment Committee.

(2) All railway lines and lands within the area of supply under the control of the Burma Railways Company Limited.

(3) All bridges over the Burma Railways Company's Limited lines within the area of supply under the control of the Burma Railways Company Limited.

(4) Streets (*Nil*).

(5) Canals (*Nil*).

(6) Rivers (*Nil*).

THIRD ANNEXURE.

Maximum Prices.

The maximum prices which licensees shall be entitled to charge for energy supplied at the following rates per kilowatt hour (*i. e.*, per unit) shall be:

(1) For energy supplied by the licensees for other than public lamps—8 annas per unit.

(2) For energy supplied for power—4 annas per unit.

(3) For energy supplied to any motor which drives a generator furnishing energy used for lighting as well as for power the licensees may charge for such energy supplied by them at the rate mentioned in above clause (1) unless the consumer elects to record by meter the proportions of the energy furnished by the said generator which are used for lighting and power in which event the licensees shall charge for the corresponding proportions of the energy supplied by them at the rates mentioned in the above clauses (1) and (2).

No. 42.—Mr. W. E. T. Bennett, Superintending Engineer, 2nd class, Punjab, is appointed to officiate as Chief Engineer and Secretary to the Government of the Punjab, Irrigation Branch, with effect from the 21st April 1909 during the absence of Mr. J. EXPLOSIVES.

The 23rd April, 1909.

No. 2933—24.—In exercise of the powers conferred by Section 17 of the Indian Explosives Act, 1884 (IV of 1884), as applied to Berar by Government of India, Foreign Department Notification No. 4742-I., dated the 4th November 1887, and in supersession of the rules published by Government of India, Foreign Department Notification No. 1236-I. B., dated the 22nd March 1901, the Governor-General in Council is pleased hereby to declare that—

I.—Picric acid when in process of manufacture shall (for whatever purpose used or manufactured) be deemed to be an explosive within the meaning of the said Act, subject to the following exception:

(*a*) When the picric acid is mixed with not less than half its own weight of moisture in every process of manufacture, it shall be exempt from being deemed to be an explosive within the meaning of the said Act.

II.—Picric acid when kept, conveyed, imported or sold shall (for whatever purpose used or manufactured) be deemed to be an explosive within the meaning of the said Act, subject to the following exceptions:

(*a*) Picric acid mixed with not less than half its own weight of water shall be exempt from being deemed to be an explosive within the meaning of the said Act.

(*b*) Picric acid which does not fall within the exemption (*a*), when the quantity does not exceed two thousand pounds in any one ship, boat, carriage, building or place, shall be exempt from being deemed to be an explosive within the meaning of the said Act; provided that such picric acid is so kept and conveyed as not to be liable, whether under the action of fire or otherwise, to come in contact with any substance specified in the schedule hereto, or with any fire or light capable of igniting such picric acid:

Provided also that such picric acid when dry is so packed in a substantial barrel or case that the contents cannot escape; and that no metal other than aluminium, or an alloy containing not less than ninety per centum of aluminium, is used in the construction of any package containing such picric acid, and that each barrel or case is legibly marked "Picric Acid."

Picric acid when not subject to the above exemptions must be packed and marked as laid down in the rules* relating to the packing of explosives in force in Berar.

* Rules for the Transport of Explosives in Berar.

III.—Picrates and mixture of picric acid with any other substance (for whatever purpose used or manufactured) shall be deemed to be explosives within the meaning of the said Act, subject to the following exceptions:—

(*a*) A picrate mixed with not less than half its own weight of water shall be exempt from being deemed to be an explosive within the meaning of the said Act.

(*b*) Picric acid thoroughly mixed with not less than three times its own weight of—

(i) anhydrous sulphate of soda,

(ii) crystallized sulphate of soda, when packed in hermetically closed packages, or

(iii) potash alum,

shall be exempt from being deemed to be an explosive within the meaning of the said Act.

IV.—Acetylene when liquid or when subject to a pressure greater than $1\frac{1}{20}$th atmospheres shall be deemed to be an explosive within the meaning of the said Act:

Provided that, subject to the conditions hereinafter specified, acetylene, when in admixture with oil-gas, shall not be deemed to be an explosive within the meaning of the said Act, when under compression—

(1) The acetylene shall be generated only by the Atkins Dry Process.

(2) The proportion of acetylene shall not exceed fifty parts by volume in every one hundred parts of the mixture of acetylene and oil-gas.

(3) The acetylene and oil-gas shall be mixed together in a chamber or vessel before the gases are subjected to compression.

(4) The mixture shall not be compressed to a pressure exceeding one hundred and fifty pounds per square inch.

Schedule.

Any of the following metals or metallic oxides, namely, lead, oxide of lead, oxide of iron, potash, baryta, lime, soda, oxide of zinc, oxide of copper; and any compound of such metal or oxide (other than a metallic sulphate); or any chlorate, nitrate, or other oxidizing agent; or any other substance declared by a Notification of the Government of India to be capable of forming with picric acid a dangerous compound:

Provided that this schedule shall not be deemed to include any metal, or oxide unavoidably formed on any metal, used in the construction of any ship, boat or carriage, or contained in any paint, where the packages containing picric acid are protected from direct contact with such metal or paint.

B. ROBERTSON,
Secretary to the Government of India.

ARMY DEPARTMENT.

Simla, the 23rd April 1909.

APPOINTMENTS.

No. 120.—The following is published for general information :

No. 684-R.T., dated the 19th April 1909.

RESOLUTION—By the Railway Board.

Adoption on the Assam Bengal Railway system of the modification of rule 64, Chapter III, Part I of the General Rules of 1906 for working open lines of railway.

READ—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Department of Commerce and Industry, notification No. 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No. R. T. $\frac{89\text{-A.}}{5}$, dated the 8th September 1906.

Railway Board's notification No. 102, dated the 1st May 1907, and Railway Board's resolution No. 76 R. T., dated 22nd April 1907.

Railway Board's notification No. 91, dated the 18th March 1909, and Railway Board's circular No. 476 R. T., dated the 12th March 1909.

READ ALSO—

Letter No. 3132, dated the 26th March 1909, from the Agent of the Assam Bengal Railway Company.

RESOLUTION.—The Agent of the Assam Bengal Railway Company has recommended the adoption on the Assam Bengal Railway system of the modification, promulgated under Railway Board's circular No. 476 R. T., dated the 12th March 1909, and published under their notification No. 91, dated the 18th March 1909, of rule 64, Chapter III, Part I of the General Rules of 1906 for working open lines of railway in British India, which rules were sanctioned for adoption on the Assam Bengal Railway system in Railway Board's resolution No. 76 R. T, dated the 22nd April 1907, read in the preamble above.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, under section 47, sub sections (1) and (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the modification of the said General Rules, cited in paragraph 1 above, on the Assam Bengal railway system.

ORDER.—Ordered, that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3), of the Indian Railways Act, 1890 (IX of 1890); also that the modification cited in paragraph 1 above, which has already been published in the *Gazette of India*, be kept open for inspection at railway stations as directed by sub-section (6) of the same section, and that this resolution be communicated to the Senior Government Inspector of Railways, Circle No. 1, Calcutta, and to the Agent of the Assam Bengal Railway Company, for information.

R. C. F. VOLKERS,
Secretary, Railway Board.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 22nd April 1909, based on the Indian Daily Weather Reports of the period.

During the first three days of the week the distribution of pressure favoured an inflow of damp air over northern India from both the Bay of Bengal and the Arabian Sea, and these conditions were intensified by the appearance in northwest India of a depression from Persia. The depression was the cause of an unusual burst of rain over practically the whole of northern India during the last four days of the week. An abnormally large fall of temperature followed the rainfall, and maximum temperatures from 20° to 30° below the normal were recorded at a number of stations.

Weather was comparatively dry in Burma and the peninsula.

Burma.—There were only a few falls of rain and these occurred chiefly in Upper Burma. Skies were clear or lightly clouded. Temperature was approximately normal.

Northeast India, including Orissa.—Rainfall occurred in all parts of the division. Skies were moderately clouded and temperature was in moderate to large defect.

The United Provinces, Central India and the Central Provinces.—No rain was reported on the 16th and 17th with the exception of a few falls in the Central Provinces, but the extension of easterly winds up the Gangetic plain gave rain along the hills on the 18th and rainfall spread southwards until on the 21st and 22nd it was recorded in all parts of the division. Skies were moderately to heavily clouded during the greater part of the week, and from the 19th to the 22nd abnormally low temperatures were registered.

Northwest India.—There was no rain on the 16th and 17th but the approach of the depression from Persia then set up conditions which resulted in widespread rain throughout the division excepting Kashmir, Sind and Gujarat where only a few falls occurred. Skies were moderately to heavily clouded and from the 19th to the end of the week temperature was very much lower than usual.

The Peninsula.—A few falls of rain were reported, chiefly from the east coast. Skies were generally clear or only lightly clouded, and temperature was nearly normal.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day :—

April 16th. Jalpaiguri 1·75" and Raipur 1·51".

" 17th. Mysore 1·20".

" 18th. Sibsagar 1·03", Chittagong 1·10" and Darbhanga 0·89".

" 19th. Saugor Island and Berhampore 1·10", Bareilly 1·50", Cocanada 1·06" and Madras 3·29".

" 20th. Mergui 1·47", False Point 1·07" and Sambalpur 1·78".

" 21st. Jessore 1·34", Burdwan 4·60", Lucknow 5·10", Bahraich 2·40", Pendra 1·20", Delhi 1·35", Lahore 1·12", Montgomery 0·94", Udaipur 1·61" and Cocanada 1·64".

" 22nd. Chaibassa 1·93", Meerut 1·10", Delhi 1·61", Sirsa 1·65", Ludhiana 1·13", Raipur 1·26", Cochin 1·18", Madras 1·50" and Gopalpur 1·15".

The defect in the seasonal rainfall shown a week ago in north-east India, the United Provinces, the Punjab, Rajputana, Gujarat, Central India and the Central Provinces has now disappeared in most parts, and in some has been replaced by an excess.

DIVISION.	Rainfall data for week ending on 22nd April 1909.			Rainfall data from 4th December 1908 to 22nd April 1909				
	Average actual rainfall in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Average actual rainfall of season to date in inches.	Average normal rainfall in inches. GEORGE C SIMPSON,
for Director-General of Observatories.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;
The 22nd April 1909.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturay, 17th April 1909.

Burma.—Slight showers of rain fell during the week in several districts of the Lower and Upper Provinces and the Shan States. Transplanting of spring rice is practically finished and reaping is in hand. Clearing of hill sides for cultivation is going on. Reaping of miscellaneous, island and other crops is in progress. Standing crops are in good condition. The prices of unhusked rice are about normal. There is a slight upward tendency in prices in the principal export marts.

Eastern Bengal and Assam.—The rainfall during the week was general. Sowing of jute, rice and other monsoon crops are in full swing everywhere. Harvesting of spring rice and plucking of tea have commenced in some places. Prospects of all crops have improved. The average price of common rice is about 1 per cent higher than last week. There were 905 persons on test relief works in Rangpur. About 1,400 persons are employed on District Board relief works in Bogra. Returns of numbers on test relief works in Dinajpur have not been received. Cattle disease is still prevalent in several districts. Scarcity of fodder and water is disappearing.

Bengal.—Good rain has fallen in all districts except Palamau and Singhbhum; Champaran, Muzaffarpur, Darbhanga and Purnea have been specially fortunate. Standing crops have been greatly benefited and agricultural operations are in full swing. Sowings of autumn crops have commenced in many districts. The harvesting of summer paddy has commenced in Orissa and Midnapore. The outturn of *mahua* is good. Mango crops in Purnea have suffered from a storm. The price of rice has risen in Birbhum, Nadia, Jessore, Patna, Gaya, the Sonthal Parganas, Cuttack and Hazaribagh and has fallen in Puri and Sambalpur. Cattle disease is reported from several districts. The Collectors of Jessore, Khulna, Gaya and the Sonthal Parganas report that fodder is insufficient. Water is still scarce in parts of Birbhum, Murshidabad, Jessore, Khulna and Gaya. The recent rain has greatly benefited North Bihar in this respect. Test works in Muzaffarpur and Bhagalpur were attended by 3,006 persons and the famine reliefs works in Darbhanga by 54,438. In Muzaffarpur, Darbhanga, Bhagalpur, Purnea, Palamau and Puri 31,591 people received gratuitous relief.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—Workers exclusive of dependants 54,438; on gratuitous relief—(*a*) dependants of workers 11,197, (*b*) poor-houses or kitchens 2,865, and (*c*) village dole, or other relief 11,402, total gratuitously relieved 25,464. Grand total on relief 79,902. There was good and general rain during the week which will be very beneficial. It has reduced the numbers on relief works and a further reduction is expected. The rainfall will greatly advance the progress of agricultural operations which were almost at a standstill. Workers are in fair condition. There is no wandering. Emaciation is still noticeable to some extent among old people and small children. The condition of children has generally improved on account of the kitchens opened at the works. Private aided works continue to supplement Government relief. Prices 12 to 13 seers per rupee.

United Provinces.—Rain has fallen in thirty-seven districts but the falls have been light or insignificant. More rain has fallen in a few districts since the close of the week. The weather is cloudy and unsettled. Harvesting is nearing completion and threshing and winnowing are in progress. Irrigation and sowing of extra crops and sugarcane continue. Standing crops are suffering from drought in parts of Dehra Dun and are poor in Almora. In Kheri the spring outturn is poor and in Garhwal the winter outturn is also very small. Several hundreds of persons are employed on special District Board works. Elsewhere standing crops are doing well and prospects are good. Malarial fever is prevalent in parts of Mirzapur and Bahraich. Cattle disease is reported from fifteen districts. Fodder continues inadequate in the Mat tahsil of the Muttra district and in Sultanpur Prices have risen in eight districts; have fallen in twelve; and are stationary elsewhere.

The weekly report on the famine and scarcity is as follows:—The condition of the people relieved is good in Bijaigarh, Kera Mangraur and Bahraich and fair to good in Basti. Crime is below normal in Basti and normal elsewhere. Three civil and five aided works and one unaided work are in progress and one poor-house is open in Bijaigarh; one civil work and 2 aided works in Kera Mangraur; 5 civil works and one poor-house in Bahraich; and one departmental work, 8 aided works and one poor-house in Basti. In this district a second departmental charge will be opened this week. The numbers on relief have increased generally owing to the contraction of the demand for field labour. The total numbers on relief are:—on relief works 9,369; on aided works 7,531; on unaided works 232; on gratuitous relief 7,198; in poor-houses 142; dependants 258; on private works 151; total 24,881. Prices:—Bijaigarh 15; Kera Mangraur 15; Basti 16; and Bahraich 14 seers per rupee.

Punjab.—Light rain fell during the week and was almost general. Hailstorms are reported from Gurgaon and Ferozepore. Spring crops are being harvested. Their condition and expected yield on irrigated areas are generally good to average and on unirrigated areas average to below the average. Sowings of extra spring and autumn crops continue. Prices are high and have risen slightly in some districts. Cattle are generally in good condition. Fodder is sufficient except in Lyallpur and Multan and in parts of Gurgaon, Amritsar and Jhang.

North-West Frontier Province.—The rainfall during the week was 82 cents in Hazara and 34 cents in Bannu. Showers were also received elsewhere. More rain is needed all over the Province especially for unirrigated tracts. Standing crops are generally in good condition on irrigated areas and from average to below the average on unirrigated lands. Harvesting of gram, barley and oilseeds is in progress in the Bannu and Dera Ismail Khan districts. Barley and rapeseed are also being reaped in the Peshawar district. The outturn of spring crops is expected to be average. Sugarcane and extra spring crops are being sown. The water supply in canals is sufficient. Irrigation from the Paharpur canal in the Dera Ismail Khan district continues The condition of cattle is generally good except in the Daman tract of the Dera Ismail Khan district where drinking water is reported to be scarce. The public health is good. Prices are fluctuating. Prices:—wheat 7¾ to 11¾; gram 11⅛ to 13½; maize 11⅛ to 18½; and *bajra* 12¾ to 14¾ seers per rupee.

Jammu.—Slight rain fell during the week. Prices are stationary. Wheat sells from 6 to 14 and maize from 11 to 24 seers per rupee. The condition of standing crops is fair. Fodder is sufficient.

Kashmir.—The weather was bright with slight rain. There is no disease among cattle. Fodder is sufficient. Prices are stationary.

Rajputana.—The rainfall registered in cents was:—26 in Bundi; 24 in Jaipur; 49 in Bharatpur; and 40 in one district of Jaisalmer. Slight showers were also received in Bikaner, Udaipur and parts of Ajmer. Spring crops are being harvested and the estimated outturn is fair to good. Standing crops are doing well except for slight damage in Tonk. Cattle are generally in good condition. Fodder and water are sufficient. Prices have fallen by 1 to 3 seers per rupee in Jaisalmer, Shahpura, Kotah, Kishangarh, Alwar, Karauli and Ajmer and have risen by 1 seer in Partabgarh.

Central India.—Rainfall *nil*. Harvesting of spring crops has been completed in Gwalior and Indore. Land is being prepared for autumn crops in parts of Malwa. Agricultural stock are satisfactory except for some cattle disease. Prices are falling in parts of Bundelkhand; are rising in parts of Malwa; and are stationary but high elsewhere. Opium extraction is almost completed.

Central Provinces.—The weather continued to be unsettled and thunder-storms gave almost general rain except in Wardha and Berar. The principal falls (in inches) were:—Raipur 3; Drug 1¾; Chanda 1½; and Damoh and Mandla each 1¼. Elsewhere the rainfall did not exceed 97 cents. It was accompanied by hail in Seoni, Bhandara, Damoh, Mandla, Chanda and Raipur but no damage is reported except to the *mahua* and mango crops in Seoni, Bhandara and Hoshangabad. The spring harvest is over and agricultural operations are confined to threshing and winnowing and preparation of land for the next monsoon sowings. Gathering of *mahua* continues. Fodder and water are adequate everywhere. Agricultural stock are in good condition. Prices are steady except that gram and *juar* rose by 2 and 1 seer per rupee respectively in Bhandara and Chhindwara. The number of weavers on relief was 1,476.

Feudatory States.—During the week light to moderate rain fell in nine States ranging from 11 cents in Chhuikhadhan to 2½ inches in Bastar. The rain was accompanied by hail in Raj Nandgaon and Korea. Threshing and winnowing of spring crops and the usual preparation of fields for sowing of next autumn crops continue. Fodder and water are sufficient Prices:—wheat fell and *kodon* rose in Chhuikhadhan by 2 and 3½ seers per rupee respectively. Elsewhere prices were steady or fluctuated slightly.

Bombay.—Slight rain fell during the week in parts of Hyderabad, the Upper Sind Frontier, Kaira, Bijapur, Dharwar and Kolhapur. Standing spring crops have been slightly damaged by frost in parts of Ahmedabad. Cotton has been damaged by frost in parts of Ahmedabad. Standing crops are generally in fair to good condition elsewhere. Harvesting of spring crops has been completed in the Panch Mahals and Bijapur; it is nearly over in Karachi, Kaira, East Khandesh, Nasik, Satara and Rewa Kantha; and continues in parts of Sind, Ahmedabad, Broach, Kanara, West Khandesh and Baroda. Threshing is in progress in parts of Sukkur, Hyderabad, Broach, Colaba, West Khandesh, Ahmednagar and Mahi Kantha. Cotton-picking has been completed in Bijapur and Dharwar. it is almost over in Belgaum; and continues in parts of Gujarat, Kathiawar, Baroda, Cutch, Rewa Kantha and Kolhapur. Lands are being prepared for next season in parts of Karachi, Hyderabad, Ahmedabad, Kaira, the Konkan, the Deccan, Kathiawar, Baroda and Kolhapur. The supply of fodder is adequate except in parts of West Khandesh, Nasik, Belgaum and Kolhapur. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water is adequate except in parts of Kanara, West Khandesh, Nasik, Bijapur and Belgaum. Water for irrigation

is sufficient except in parts of Surat, West Khandesh, Nasik, Poona, Bijapur and Belgaum. Prices of food grains have risen slightly in Broach and Ahmednagar and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 26 to 40 per cent.; in Gujarat 20 to 63 per cent.; in the Konkan 3 to 25 per cent.; in the Deccan 17 to 42 per cent.; and in the Karnatak 32 to 79 per cent. less than the normal. Stocks of grain are adequate. Emigration on a small scale is progressing in Bijapur. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. The numbers on relief in Bijapur are:—workers 717; on gratuitous relief 10.

Hyderabad.—The rainfall during the week was 51 cents. Good showers were received in Nander, Gulbargah, Raichur, Bidar, Medak, Mahbubnagar, Nalgonda and Karimnagar. Hyderabad City received 2 inches 87 cents. The highest fall was 4 inches 75 cents in the Umrabad taluka of the Mahbubnagar district. The harvesting of crops which was in progress has suffered throughout from the rains. The spring harvest is almost over. The crop is fair except in parts of Raichur and other isolated tracts. The late rice crop is fair throughout though injured somewhat by the rains. Cattle disease is reported in 10 talukas and fodder scarcity in 2. Prices show a downward tendency. Prices:—wheat 6¾; coarse rice 6½; and *juar* 14¼ seers per rupee. White *juar* is selling in Hyderabad City at 1[illegible] seers per rupee. Yellow *juar* is not available. The highest price in districts is 9 seers in the Kushtagi taluka of the Raichur district and the Paloncha taluka of the Warangal district and the lowest 22 seers in the Rajura taluka of the Bidar district.

Mysore.—One inch 63 cents of rain fell during the week in Bangalore and more or less general rain was received throughout the State. Prices of food grains continue steady and markets are well supplied. Ploughing operations are in progress. Prospects of the season have been slightly improved by the recent rainfall Cattle are generally healthy but cattle disease is prevalent in some parts. Fodder is procurable with some difficulty.

Coorg.—The rainfall during the week was 8 cents. Coffee blossoms are out in parts. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was good in Madras, the Vizagapatam Agency, Madura, Godavari, Ganjam and the Nilgiris and light to fair elsewhere. Irrigation supplies are insufficient in parts of all districts except Ganjam, Chingleput, Coimbatore, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair but some in parts of North Arcot and South Canara are withering. Harvests continue with outturn poor to normal. Pasture is sufficient in Chingleput, Madras, South Arcot, North Arcot, Salem, Tanjore, Madura and the Nilgiris. Fodder is scanty in parts of Vizagapatam, Guntur, the Deccan, North Arcot and Tanjore. The condition of cattle is generally good. The price of rice is stationary in sixteen districts; has fallen in six; and has risen in one. The prices of millets have fluctuated as follows:—*Ragi* is stationary in seven districts; has fallen in eleven; and has risen in three. *Cholam* is stationary in five districts; has fallen in five; and has risen in four. *Cumbu* is stationary in six districts; has fallen in six; and has risen in three. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the *Gazette of India.*

" Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under " village doles or other relief."

H. A. STUART,
Secretary to the Government of India.

No. 2896—2908—44.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

EMIGRATION.

RESOLUTION.

Dated Simla, the 22nd April 1909.

The following translation of an order passed by the Governor of German New Guinea, respecting the immigration and introduction of non-indigenous natives into the Protectorate of German New Guinea is published for general information :—

TRANSLATION.

Order of November 1st, 1908.

In virtue of Section 15, of the Protectorate Law (Reichs-Gesetzblatt, 1900, page 813) and of the Imperial Chancellor's Decree of September 27th, 1903, (Deutsches Kolonialblatt, 1903, page 509), the following is decreed for the Protectorate of German New Guinea.

SECTION 1.

Non-indigenous natives may only immigrate or be introduced into the Protectorate of German New Guinea by the ports that are open to foreign traffic.

Anyone who wishes to introduce such natives under a definite labour contract otherwise than by the ports that are open to foreign traffic, must obtain the written permission of the registration authorities (Meldebehörde) of the port of entry.

Ship-masters must present to the registration authorities of the port of entry a list of the non-indigenous natives to be landed there.

SECTION 2.

Every non-indigenous native immigrating into the Protectorate must within 3 days after landing report himself to the authorities of the port and make a statement for purposes of identification. Thereupon a certificate will be given to him.

The authorities may order a medical inspection.

If a person who is under the obligation to report himself leaves the Protectorate or changes his domicile within the Protectorate from one district to another, he must announce his arrival and departure in the same manner.

SECTION 3.

Whoever in the Protectorate introduces non-indigenous natives under a definite labour contract is bound to deliver to the authorities within 3 days from the landing a copy of the contract and a list of names in duplicate. If there is no labour contract, one must be drawn up before the authorities of the port of landing.

The obligation of making an announcement to the authorities of the place where the work is carried out takes effect in the same manner on the renewal

or prolongation of an existing arrangement or contract for working. The authorities may order the native to appear personally and be medically examined.

The costs of the examination and reception of needy or sick persons into an institution are borne by the employer and not by the official authorities.

The workmen introduced may only be employed after the facts of their having reported themselves and being fit to work have been certified on the second copy of the list of names.

SECTION 4.

The authorities must supervise the arrangements for working and must especially examine the lodging, provisioning, medical attendance and wages of the workmen. The authorities have the right to undertake inspections or to order inspections to be made by suitable experts or by a committee, and to take steps to remove evils. Should the inspection show that the employer is not fulfilling his obligations, he must bear the costs of such inspection.

SECTION 5.

On the authorities' demand the employer is bound on the termination of the labour contract to send the workmen back to the place where they were engaged, or to pay the costs of the return. This obligation is cancelled after the space of one year from the termination of the arrangement.

The employer is obliged to announce to the authorities the termination of the arrangement and the return of the workmen to their home, and he is obliged to give information on demand concerning each workman in his service.

The authorities may order a medical examination of the workmen to be sent home to be made at the cost of the employer.

SECTION 6.

Any workman who after the conclusion of his working arrangement with the employer still remains in the Protectorate, is bound to report himself in accordance with Section 2 to the competent authority for his place of residence.

SECTION 7.

The authorities to whom such reports must be made are the Imperial District Offices and Stations for their Districts.

SECTION 8.

A fee for these declarations is to be paid for each person in accordance with Section 3; it amounts to 10 Marks in the old Protectorate, 20 Marks in the Island Territory and 30 Marks in case the contract lasts longer than 2 years.

If a labour contract or agreement is renewed or prolonged, the same fees are charged.

SECTION 9.

Infringements of the provisions of this Order are punished by a fine not exceeding 600 Marks or by imprisonment for a period not exceeding 3 months.

SECTION 10.

This Order comes into force on April 1st, 1909.

The non-indigenous natives already settled in the Protectorate on that day are bound to report themselves in accordance with Section 2 within a space of 3 months; in accordance with Section 3 the employers must, within the same period, report the names of the workmen in their service on the day when the Order comes into force.

SECTION 11.

On the day when this Order comes into force the following will be cancelled.

The Order of the Governor of German New Guinea of February 1st, 1904, concerning the immigration and introduction of Chinese into the Protectorate of German New Guinea with the exception of the Island Territory of the Carolines, Pelew and Mariannes (Deutsches Kolonialblatt, 1904, page 253) and the provisions for carrying out this Order, of February 1st, 1904, also the change in the Order regarding the engagement and introduction of coloured workmen of January 20th, 1907. (Deutsches Kolonialblatt, page 387).

HERBERTSHOHE;
November 1st, 1908.

HAHL,
Imperial Governor.

ORDERED that the foregoing paper be published in the Supplement to the *Gazette of India*, for general information, and that copies be forwarded to the Local Governments and Administrations named in the margin, for information, with the request that the paper may be published in the local *Gazette*.

The Government of Madras.
" " " Bombay.
" " " Bengal
" " " the United Provinces.
" " " the Punjab.
" " " Burma.
" " " Eastern Bengal and Assam.
The Hon'ble the Chief Commissioner, Central Provinces.
The Hon'ble the Resident at Mysore and Chief Commissioner of Coorg.

Ordered, also, that a copy be forwarded to the Chief Commissioner of Ajmer-Merwara, and the Honourable the Agent to the Governor-General and Chief Commissioner, North-West Frontier Province, for information, and to the Foreign Department, for information and communication to Native States.

B. ROBERTSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

RAILWAY DEPARTMENT.

(RAILWAY BOARD).

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1909.

From the 3rd April next till further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 27th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher, at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

No. 201 of 1909.—Oscar Kjellberg, engineer, of Kvillegatan, Gothenburg, Sweden. *Improvements in or relating to electric welding or soldering.*

No. 202 of 1909.—Dr. Lazar Edeleanu, chemist, of 15 Strada Sf. Constantin, Bucharest Roumania. *Improvements in purifying crude petroleum, or petroleum products, or distillates.*

No. 203 of 1909.—William Adolf Freymuth, chemist, of Balthazar's Buildings, Merchant street, Rangoon. *An improved process and apparatus for the mixing of the wax and resins derived from lac with or without the addition of other matter.*

No. 204 of 1909.—Louis Julian, mechanical draftsman, residing at Arathoon road, Royapuram, within the local limits of Madras. *Trapped silt chamber and surface box, hinged and locked.*

No. 1512 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2, Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 328 of 1908.—Charles Mc Lachlan Graham, civil servant, of 16 Isabella street, Malvern, in the county of Burke, state of Victoria, commonwealth of Australia. *An improved reinforced wooden support for insulators.* (Specification filed 7 April 1909.)

No. 333 of 1908.—Alexander McCoig Lees, engineer, of 24/2 Sheriff's lane, Ripon street, Calcutta. *Improvements in railway signal locks.* (Specification filed 14 April 1909.)

No. 366 of 1908.—James Malcolm Bell, engineer, East Indian Railway, of Howrah. *An improved hopper for grain, crushed food and the like.* (Specification filed 7 April 1909.)

No. 456 of 1908.—William Blair Motheral and Frederick Eberhard Happel, gentlemen, both of Washington, District of Columbia, United States of America. *Improvements in boats.* (Specification filed 30 March 1909.)

No. 457 of 1908.—William Adolf Freymuth, chemist, of Balthazar's Buildings, Merchant street, Rangoon, British Burmah. *A new or improved process and apparatus for refining lac.* (Specification filed 19 April 1909.)

No. 537 of 1908.—Jens Lassen La Cour, electrical engineer, and Allmanna Svenska Elektriska Aktiebolaget, manufacturers, both of Westeras, Sweden. *Improved means for regulating polyphase commutator machines.* (Speci fication filed 8 April 1909.)

No. 10 of 1909.—Alfred John Hill, civil engineer, of "Pynes", Woodford Green, Essex, England, and Frederick Cyril Duncombe Mann, engineer, of Hayes, Kent, England. *Improvements in and relating to means for electrically igniting gas burners or lamps.* (Specification filed 6 April 1909.)

No. 124 of 1909.—Tozaburo Suzuki, of No. 401 Jibeishinden, Sunamura, county of Minami-Katsushika, province of Tokyo, Japan. *Continuous crystallising pan.* (Specification filed 8 April 1909.)

No. 1513 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 74 of 1896.—Charles Hodson. *A method of ensuring safety in the working of railway points and signals and apparatus for that purpose.* (From 2 June 1909 to 2 June 1910.)

No. 365 of 1899.—Allibhoy Vallijee & Sons. *An improved tin despatch box.* (From 28 April 1909 to 28 April 1910.)

No. 19 of 1901.—Bissun Dutt. *Improvements in portable sugarcane mills.* (From 28 May 1909 to 28 May 1910.)

No. 52 of 1901.—Daniel Kemp West. *Improvements in presses for baling hay or other fodder for transport.* (From 17 May 1909 to 17 May 1910.)

No. 111 of 1901.—Solar Motor Company. *Improvements in solar generators.* (From 21 June 1909 to 21 June 1910.)

No. 235 of 1901.—A. P. Roy. *Roy's tiled walling.* (From 15 April 1909 to 15 April 1910.)

No. 397 of 1902.—John Phillips. *Improvements in the construction of commutator trimming apparatus.* (From 28 April 1909 to 28 April 1910.)

No. 38 of 1905.—Archibald A. Crawford. *Improved method for supply of electric current to lamps and fans, especially on railway carriages deriving electricity from axle-driven dynamos in combination with storage cells.* (From 29 May 1909 to 29 May 1910.)

No. 564 of 1905.—Sydney Solomon Lawrence. *Improvements in dust and glare protectors and the like.* (From 29 May 1910 to 29 May 1911.)

No. 1514 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased :—

No. 157 of 1904.—Beaumont Richard Harrington. *A portable refuse incinerator.* (Specification filed 14 January 1905.)

No. 256 of 1904.—Charles George Landseer Judge. *A new or improved machine for making green tea.* (Specification filed 9 January 1905.)

No. 294 of 1904.—H. F. Marker. *Improvements in copy books.* (Specification filed 9 January 1905.)

No. 437 of 1904.—Edward Smethurst. *Improved means for controlling the speed of screw propelled ships, and for manœuvring the same.* (Specification filed 13 January 1905.)

Fee in respect of the continuance of an exclusive privilege—

4 (a) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 505 of 1903.—John Boyd. *Improvements in mechanism for guiding and applying tension to spindle driving bands of spinning, twisting, winding and like machines.* (Specification filed 16 January 1904.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

The sum of R50 for the above invention.

No. 367 of 1900.—John Harvey Kellogg. *An improved process of preparing cereal cakes.* (Specification filed 9 January 1901.)

Fee in respect of the continuance of an exclusive privilege—

4 (*e*) After the expiration of the seventh year and before the expiration of the eighth year from the date of the filing of the specification—

The sum of R50 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not " designs " within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905, 1906, 1907 and 1908, entitled " Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified : or if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. A new and revised edition is now on sale. Royal 8vo volumes, paper cover, price one rupee or 1*s*. 6*d*. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

A copy of the Bill, which it is proposed to introduce to amend the law relating to the protection of Inventions and Designs, together with a statement of objects and reasons and notes on clauses, has been placed in the visitors' room of the Patents Office for inspection. Copies, price one rupee, may be obtained on application to the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

DEPARTMENT OF MINES, GOVERNMENT OF INDIA.

L. E. PRITCHARD,
Accountant General, Punjab.

OFFICE OF ACCTT. GENL., PUNJAB,
LAHORE;
19th April 1909.

YEARLY EXAMINATION OF CANDIDATES FOR FOURTH GRADE OF ACCOUNTANTS.

The yearly examination of candidates for fourth grade of Accountants, Public Works Department, will be held at the Civil Engineering College, Sibpur, on Monday and Tuesday, the 7th and 8th June 1909, at 10-30 A.M., both days :—

SUBJECTS.	Full marks.	Minimum pass marks.
Writing (neatness, clearness, and rapidity)	100	50
Dictation (spelling, punctuation, etc.)	100	50
Arithmetic (the whole)	240	160
Mensuration (*a*) (the whole)	60	30
Book-keeping (*b*) mercantile	100	50
TOTAL	600	...

Minimum required in all papers collectively, 400.

(*a*) Todhunter's Mensuration for Beginners.
(*b*) "Book-keeping" by Hall and Hamilton.
"Book-keeping," by double and single entry, by W. Inglis (Chambers' Educational Course).

1. The examination is held annually at the Civil Engineering College, Sibpur, on the 1st Monday in June. The examination will be conducted, either at the College, or by an Examiner, Public Works Accounts (including Railway and Telegraph), in Bengal, Assam, and Burma only. The examination will be *ipso facto* vitiated, if it be not held (begun and completed) on the dates fixed ; but the officer who will conduct the examination may make his own arrangements, in regard to the *place* and *hour* of examination, with the candidates.

Candidates will not be examined in any of the Calcutta offices.

A candidate already in permanent Government employ* may be allowed to compete in the examination, even if he is more than 25 years of age, and may be appointed to an accountantship if he passes it; but if he is not already in pensionable service he will be eligible only for appointment to the non-pensionable establishment on State Railways.

*This term includes employment under Local Boards and foreign bodies, if such is pensionable by the British Government.

The candidate should apply to an Examiner of Public Works Accounts, not later than 30 days previous to the date fixed for the examination, and obtain his consent to conduct the examination, if examination at the College is not convenient. The application must bear the address of the candidate, must be accompanied by a fee of R10 and the following certificates, and must be forwarded by him, not direct to the Principal, but through the Examiner.

Certificates may be submitted in original, or true copies attested by an officer of the Engineer or Accounts Branch ; but none will be returned :—

(1) Certificate of good character signed by applicant's immediate official superior, or by the instructor under whom he has been educated, or by some other superior under whom he may have been brought up or employed, or to whom he may be well known. (This certificate must have special reference to the two years immediately preceding the application).

(2) Certificate of age (baptismal or of birth) not required, if the candidate is already in permanent Government employ.

(3) Certificate that the application is in the candidate's handwriting.

NOTE.—A candidate already in Government service should, in like manner, submit his application, through his immediate official superior, to an Examiner of Accounts qualified to hold the particular examination, and should state whether he desires to be examined at the office of the Examiner of Accounts concerned or at the College.

It will rest with the Examiner of Accounts, to whom the candidate submits his application, to decide, on a consideration of the certificates submitted, whether the candidate should be allowed to appear for the examination, or whether his application should be rejected. The Examiner of Accounts will then forward to the Principal for registration the names of the accepted candidates. The names of these candidates should be entered in a statement showing their ages and their addresses, and also showing where each candidate is to be examined, whether at the College or at the office of the Examiner of Accounts. This statement, together with the fees, should be transmitted to the Principal not later than 15 days after the dates fixed in paragraph 2 for the submission of application of candidates.

3. Examination papers that are issued for examination need not be returned.

4. Each examination is complete in itself. A candidate who has failed in an examination and presents himself for examination on a subsequent occasion, must undergo the full examination and furnish fresh fee and certificates.

5. If from any cause a candidate fails to appear for the examination, the fee paid will not be refunded.

6. Passed candidates should apply, not to the Principal of the College, nor to the Accountant-General, Public Works Department, but direct to the Examiner of Public Works Accounts, in the province or railway under whom they may desire to be employed.

7. It must be distinctly understood that the passing of this examination does not give any claim to an appointment, and that in making appointments, preference will be given to qualified persons who are already employed in the Department.

8. The Civil Engineering College acts solely as an examining body in reference to admission to the 4th grade of Accountants, Public Works Department.

9. Candidates for the 4th grade Accountantship examination, who are not Government servants, and over 25 years of age, are allowed to appear at the examination at the Sibpur College centre only, but, even if successful, they are debarred from employment in the service of Government, and their names will be excluded from the list of passed candidates which is furnished to the Accountant-General, Public Works Department.

10. Candidates over 25 years of age should apply in writing to the Principal of the Civil Engineering College not later than 30 days previous to the examination: the application to be accompanied by the fee of Rupees ten.

B. HEATON,
Principal, Civil Engineering College.

SIBPUR,
The 31st March, 1909.

CIVIL ENGINEERING COLLEGE, SIBPUR.

Apprentice Department.

SESSION 1909-10.

Admissions will be made :—

(1) To the 3rd year class, of candidates who pass the Sub-Overseer Examination, provided their ages are between 17 and 19.

(2) To the 2nd year class, of candidates who pass the B. Final Examination, provided their ages are between 15 and 18.

(3) To the 1st year class, of candidates who have passed the Matriculation Examination of the Calcutta University, for Indians, or Standard VII of Middle School Examination of the Code of European Schools for Europeans; ages must be between 15 and 17.

The selection of candidates for admission is in the hands of the Principal. Preference will be given in the following order—(*a*) to the 3rd year class, (*b*) to the 2nd year class, (*c*) to the 1st year class, and the total number of candidates admitted to all three classes shall not exceed 60. Thirty per cent. of the vacancies will, as far as possible, be reserved for candidates domiciled in Eastern Bengal and Assam.

Applications for admission to the Apprentice Department must reach the Principal's office not later than the following dates :—

To the 3rd year class . .	April 26th.
To the 2nd year class . .	April 19th.
To the 1st year class . .	May 6th.

The session of the 2nd year class will commence on April 14th, and of the 3rd year class on May 3rd; of the 1st year class on June 7th.

Twelve vacancies will be reserved for Europeans and Eurasians.

There will be the following minimum number of vacancies on the Reduced Fee List :—

For Indians 10.

For Europeans 10 and on the Free List one.

Election to these vacancies will be made by the Board of Visitors at special meetings for European candidates in the month of May, for Indian candidates in the month of June.

Forms of application for admission to the Reduced Fee Lists may be had from the Principal's office. All applications from European candidates must reach the Principal's office before May 6th.

The tuition fee of students of the Apprentice Department is R3 monthly for each month of the year, vacation included. Students of the Free and Reduced Fee Lists pay no tuition fees.

Every applicant before admission to the College will be examined by the College Surgeon as to his physical strength, fitness for manual labour and eye-sight.

Before an applicant is admitted to the College his parent or guardian must sign an agreement in the prescribed form.

Candidates who fail to secure admission to the 1st year class of the Apprentice Department are informed that they are eligible for admission to the Sub-Overseer classes at—

The Behar School of Engineering (preference given to Beharis).

The Government Industrial School, Ranchi,
The Technical School, Burdwan,
The Technical School, Midnapur, } in Bengal.

The Dacca School of Engineering
The Technical School, Comilla,
The Technical School, Barisal,
The Technical School, Pabna,
The Technical School, Rungpur,
The Technical School, Rajshahi, } in Eastern Bengal and Assam.

The Victoria School, Kurseong (for Europeans only).

For terms of admission apply to the Head Masters of the Institutions concerned.

B. HEATON,
Principal, C. E. College.

SIBPUR;
The 3rd April 1909.

THE CIVIL ENGINEERING COLLEGE, SIBPUR.

ENGINEER DEPARTMENT.

SESSION 1909-10.

The following course is offered. A 4-year course leading to the Bachelor of Engineering degree of the Calcutta University in the Civil Engineering branch.

The session begins on November 1st, 1909.

Two classes of students will be admitted :—

(1) *Regular students* who must reside at the college (Number to be admitted limited to 32).

(2) *Special students* (for whom 8 vacancies are reserved).

Regular students are students from Bengal, Burma and Eastern Bengal and Assam who intend to go through the Regular course of study leading to the degree of Bachelor of Engineering. Candidates with the following qualifications are eligible for admission as regular students :—

(1) B. Sc.'s
(2) B. A.'s } must be below 23 years of age on January 1st, 1909.

(3) Intermediate in Science.

(4) Intermediate in Arts (with Physics or Chemistry).

(5) First Arts.

Candidates in (3), (4) and (5) must be under 21 years of age on January 1st, 1909.

The age statement as given on the Calcutta University Entrance Examination certificate alone is accepted.

The selection of candidates for admission is entrusted to the Principal, who will take into account the following factors.

The standard by which the applicant has qualified, the subjects in which he has qualified, his position on the list of merit, and his age.

Candidates for admission must apply to the Principal on the prescribed form not later than June 15th, they shall produce with their application a detailed statement obtained from the Registrar of the Calcutta University showing the marks obtained by them at the B.Sc., Intermediate Science or other Examination upon which they base their claim for admission. The application must be accompanied by a registration fee of one rupee which will not be returned.

The tuition fee for regular students is payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (first two years) R10 monthly.

Graduate Course in Engineering (last two years) R15 monthly.

Scholarships:—

The following scholarships are offered, their award will be made after the admissions are completed, they will not be tenable by students who hold other Government or University scholarships:—

Open scholarships tenable for two years from the opening of the session in November—

One of R20 monthly.
" " R15 "
Six of R10 "

Reserved for Europeans and Eurasians—

One of R20 monthly.
" " R10 "

Every applicant for admission to the college must produce with his application for admission a medical certificate in the prescribed form signed within one month of its submission by a Civil Surgeon or by the Resident Medical Officer in charge of the college. No other form will be accepted. If the Report is unsatisfactory the application will be rejected.

Applicants wishing to obtain a certificate from the college Resident Medical Officer should present themselves at the Dispensary at the Civil Engineering College on Wednesdays and Saturdays between the hours of 7 and 10 A.M.

Special students include the sons of professional men (Engineers), owners of landed or mineral property, and others who wish to receive training in connection with engineering business or the development of the country and its resources.

They are not eligible for any posts guaranteed to regular students, for scholarships or prizes and shall in no case be transferred to the list of regular students.

Special students are admitted to the 1st, 2nd, 3rd or 4th years of the College Course at the discretion of the Principal, they shall have as nearly as possible the same educational qualifications as regular students and no limits of age are imposed.

Special students are required to submit a certificate of good character on admission and must apply before July 1st, their applications must be accompanied by.—

(1) A satisfactory proof of their educational attainments.

(2) A full statement as to why the candidate is seeking admission as a special student.

(3) A statement of the course of study the candidate wishes to follow.

Special students taking the regular course are required to appear at the ordinary College Examinations and if eligible at the University Examinations also

The Tuition Fees for special students are payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (1st two years) R15 monthly.

Graduate Course in Engineering (last two years) R20 ,

A candidate for admission as a special student is not required to submit a medical certificate.

For copies of the Rules of the Engineer Department, forms of application for admission and any other information apply to the undersigned.

B. HEATON,
Principal, Civil Engineering College, Sibpur.

No. 61.—Khan Sahib Abdul Hakim Khan, an accepted candidate for the post of Extra Assistant Commissioner, is appointed to act temporarily as an Extra Assistant Commissioner and is posted as Treasury Officer, Dera Ismail Khan, with effect from the date on which he assumes charge of his duties.

The 17th April 1909.

No. 62.—In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899, and with the previous sanction of the Governor-General in Council the Chief Commissioner is pleased to make the following rules to regulate the possession and transport of petroleum in the North-West Frontier Province in supersession of all previous rules issued on the subject:—

RULES UNDER SECTION 9 OF THE INDIAN PETROLEUM ACT, 1899, FOR THE IMPORTATION, POSSESSION AND TRANSPORT OF PETROLEUM IN THE NORTH-WEST FRONTIER PROVINCE.

PART I.

PRELIMINARY.

1. In these rules,—

Definitions

(*a*) "Part" means a Part of these rules;

(*b*) "certificated petroleum" means petroleum certified to be non-dangerous petroleum by a certificate of such description as the Local Government may, from time to time, by written order, prescribe, granted at the port of shipment;

(*c*) "petroleum in bulk" means petroleum in quantities exceeding five hundred gallons, contained in any one receptacle;

(*d*) "installation" means a place specially prepared for the storage of petroleum in bulk, or for bulk combined with non-bulk storage, and may be either a major or a minor installation;

(*e*) "major installation" means an installation—

(1) capable of containing an amount of oil, whether in bulk only or in combined bulk and non-bulk storage, exceeding fifty thousand gallons, or

(2) in which tin-making operations are carried on;

(*f*) "minor installation" means an installation—

(1) capable of containing an amount of oil, whether in bulk only or in combined bulk and non-bulk storage, not exceeding fifty thousand gallons, and

(2) in which no tin-making operations are carried on;

(*g*) "storage shed" means a building used for the storage of petroleum otherwise than in bulk, and may or may not form part of an installation;

(h) "protected works" includes buildings in which persons dwell or assemble, docks, wharves, timber yards, other petroleum stores, and any other place not forming part of an installation, which the Local Government may by notification declare as such;

(i) "testing officer" means the testing officer appointed by the Local Government under section 10 of the Act for any port at which petroleum may be imported under these rules;

(j) "motor vehicle" means any vehicle or vessel propelled by a motor, in which petroleum is used as fuel; and

(k) "owner," as applied to a motor-vehicle, includes a person who hires, or is otherwise entitled for the time being to use or work a motor-vehicle.

PART II.

POSSESSION AND TRANSPORT OF PETROLEUM.

NOTE.—Dangerous petroleum may be kept without a license up to three gallons, provided it is stored as required by section 6 of Act VIII of 1899 and other petroleum may be possessed up to 500 gallons without a license.
(License for amounts less than the above may be required under the Municipal Act or Cantonment Code.)

Chapter I.—Possession of Petroleum.

Smoking prohibited.

1. No smoking shall be permitted inside any installation or storage shed.

Supervision of operations within installation or storage shed.

2. All operations within any installation or storage shed shall be conducted under the supervision of a responsible agent or supervisor.

Cleanliness of installation.

3. The ground in the interior of an installation shall be kept clean and free from goods of a combustible nature, vegetation and rubbish.

Supply of sand or dry earth in installation.

4. A supply of sand or dry earth shall always be kept in an installation for the purpose of extinguishing fire.

Marking of capacity of tanks.

5. The capacity in gallons of every tank in an installation shall be conspicuously marked on it, and shall be calculated at the rate of 6·25 gallons per cubic foot.

Protection from lightning.

6. Every tank or other receptacle for the storage of petroleum in bulk, except a tank or receptacle which is not of sufficient capacity to contain ten thousand gallons of petroleum and which is so situated as not to be liable to cause danger in the event of the petroleum being ignited, shall be protected by an efficient lightning-conductor.

Explanation.—A tank or receptacle shall be deemed to be so situated as not to be liable to cause danger in the event of the petroleum being ignited, if it is not in close proximity to any other tank or receptacle, or to any building not forming part of the installation, and if it is surrounded by a wall, or embankment, or sunk in an excavation, the enclosure thus formed being sufficient to contain the whole contents of the tank or receptacle.

Testing of lightning-conductor by licensee.

7. Not less than once in every year the licensee of an installation shall test or cause to be tested the efficiency of the conductor in such manner as the Chief Inspector of Explosives may, by general or special order, declare to be sufficient, and a certificate showing the date of the last test shall be posted in a conspicuous place within the installation.

Official testing of lightning-conductor.

8. Any officer appointed by the Local Government in this behalf may enter any installation for the purpose of testing the efficiency of the conductor, at any time after sunrise and before sunset.

Time for work in installations or storage sheds.

9. No installation or storage shed shall be open, and no work in any installation or storage shed shall be permitted, between sunset and sunrise: provided that in cases where electric lighting is exclusively used, night working may be permitted by the Local Government on the recommendation of the Chief Inspector of Explosives.

Closure of pipes and openings.

10. Where there are any pipes or openings for draining out water in any enclosure wall, arrangements shall be made whereby they can be closed, and they shall only be kept open when actually necessary for drainage purposes. The nature of such arrangement shall be shown in the specifications which are required under rule 10 of Chapter IV of this Part, to be submitted with the application for a license.

Material for storage sheds.

11. All storage sheds in an installation shall be built of uninflammable material.

12. There shall be hung up in a conspicuous place in every installation and storage shed for which a license has been granted copies in English and the vernacular of the rules contained in this Chapter, and of the conditions endorsed on the license.

Posting up of rules and conditions.

CHAPTER II.—TRANSPORT OF PETROLEUM.

Conditions of carriage of petroleum in bulk by water.

1. Petroleum in bulk shall not be carried by water except on a ship certified as suitable for the carriage of petroleum in bulk by an officer appointed by the Local Government in this behalf, and the petroleum shall be stowed in such part of the ship and in such manner as may be approved, by general or special order, by the authority so appointed.

Petroleum in bulk on barges or flats.

2. Petroleum in bulk shall not, except with the sanction of the Local Government, be transported on any barge or flat which is not towed by a steamer or motor tug.

Inflammable cargo, or passengers.

3. No ship shall carry petroleum in bulk which carries at the same time passengers, or any inflammable cargo other than petroleum and its products.

Towage of barge or flat carrying petroleum.

4. No steamer carrying inflammable cargo other than petroleum and its products shall tow a barge or flat carrying petroleum in bulk.

Towage of additional barge or flat carrying inflammable cargo.

5. No steamer towing a barge or flat carrying petroleum in bulk shall at the same time tow any other barge or flat carrying inflammable cargo other than petroleum and its products.

Exemption of petroleum having a flashing point above 150°.

6. Rules 4 and 5 of this Chapter shall not apply when the petroleum carried in bulk has a flashing point above 150° Fahrenheit.

Cleaning of compartments.

7. When any ship has discharged petroleum in bulk, the oil compartments shall be thoroughly cleaned and freed from petroleum and petroleum vapour, before any other cargo or passengers are taken on board.

Hatches to be kept closed.

8. The hatches of oil tanks in all ships certified under rule 1 of this Chapter as suitable for the carriage of petroleum in bulk, and the manholes in the hatches, shall be kept closed (except in so far as it may be necessary to open them to take on board or discharge petroleum or to clean tanks), so long as there is petroleum in the tanks, and until the tanks have been thoroughly cleaned and freed from petroleum and petroleum vapour.

Loading and discharge.

9. No petroleum in bulk shall be taken on board or discharged from any ship certified as suitable for the carriage of petroleum in bulk, except through a suitable pipe prepared for the purpose.

Naked lights, fire or smoking prohibited.

10. No fire, naked lights or smoking shall be allowed on board any flat or barge carrying petroleum in bulk.

Flag to be carried.

11. The person in charge of any flat or barge carrying petroleum in bulk shall, from sunrise to sunset, show at its stern a conspicuous red flag having the words "Petroleum Boat" marked on it in black letters.

Loading and unloading by night.

12. No petroleum in bulk shall be loaded on or unloaded from any ship between sunset and sunrise, except when electric light is exclusively used.

Validity of license granted in another province.

13. Petroleum may be transported into and within————under cover of a license granted by the prescribed authority in any other province of British India or in any area outside British India to which the Indian Petroleum Act, 1899, may be applied, provided that the conditions of such license are observed throughout the period during which the petroleum is in transit.

CHAPTER III.—GENERAL PROVISIONS RELATING TO LICENSES.

Applications for licenses.

1. All applications for licenses for the possession or transport of petroleum shall be made to the District Magistrate.

Licensing authority.

2. Licenses—

(a) for the possession of non-dangerous petroleum, not being petroleum in bulk,

(b) for the possession of non-dangerous petroleum in a minor installation,

(c) for the possession or transport of dangerous petroleum in quantities not exceeding forty gallons, and

(d) for the transport of petroleum, not being dangerous petroleum, otherwise than by a pipe line,

may be granted by a District Magistrate, or by such other authority as the Local Government may from time to time by order in writing appoint in this behalf. In all other cases the licensing authority shall be the Local Government:

Provided that in the case of renewals of existing licenses the Local Government may delegate its powers under this rule to the District Magistrate or to such other authority as the Local Government may from time to time by an order in writing appoint in this behalf.

Refusal of license.

3. The licensing authority may, for reasons to be communicated to the applicant, refuse a license in any case:

Provided that the licensing authority shall not refuse a license for the possession of petroleum in a minor installation, unless such authority has first made a reference to the Chief Inspector of Explosives and obtained his concurrence.

Forfeiture of license.

4. Every license granted under these rules shall be liable to be forfeited for any contravention of the Act, or of any rule thereunder, or of any condition contained in such license, or for any other reason deemed by the licensing authority to be good and sufficient, and recorded by him in writing.

Particulars of license.

5. Every license and pass granted under these rules shall be held subject to the conditions endorsed on it, and shall contain all the particulars which are contained in the form prescribed for it by these rules:

Provided that in the case of installations and storage sheds in existence before these rules were made, the license may contain in lieu of the particulars contained in the form prescribed for it by these rules, either such particulars as may have been entered in the license granted for such installation or storage shed under the rules heretofore in force, or such particulars as may in each case be approved by the Chief Inspector of Explosives.

Renewal of licenses.

6. (1) Every application for the renewal of a license shall be made in the same manner as an application for an original license.

(2) Every such application shall be made at a date not less than thirty days before the date on which the original license expires, and, if the application is so made, the premises shall be held to be duly licensed until such date as the licensing authority issues the renewed license or until an intimation that the renewal of the license is refused has been communicated to the applicant.

(3) The same fee shall be charged for the renewal of a license as for a new license.

Supply of rules to licensee.

7. When any license is granted for the possession or transport of petroleum, a copy of the rules contained in Chapter I of this Part in the case of a license for possession, and in Chapter II of this Part in the case of a license for transport, printed in English and the vernacular, shall be given, together with the license, to the licensee.

Procedure on death or disability of licensee.

8. Where a licensee dies or becomes insolvent or becomes mentally incapable or otherwise disabled, the person carrying on the business of such licensee shall not be liable to any penalty or forfeiture under the Act of these rules for acting under the license during such time as may reasonably be necessary to allow him to make an application for a new license in his own name for the unexpired portion of the original license.

Loss of license.

9. Where a license granted under these rules is lost or accidentally destroyed, a duplicate may be granted.

CHAPTER IV.—LICENSES FOR THE POSSESSION OF PETROLEUM.

Continuance of license.

1. Every license for the possession of petroleum shall remain in force until the 31st of December next following the date of issue of the license.

Petroleum not in bulk, other than dangerous petroleum.

2. Licenses for the possession of petroleum, not being dangerous petroleum, otherwise than in bulk, may be granted in Form A.

Dangerous petroleum not in bulk.

3. Licenses for the possession of dangerous petroleum, not in bulk, in quantity exceeding forty gallons may be granted in Form B.

Dangerous petroleum not exceeding forty gallons.

4. Licenses for the possession of dangerous petroleum in quantity not exceeding forty gallons may be granted in Form C.

Transfer of certain licenses.

5. (1) The holder of a license in Forms A, B or C, may at any time before the expiry of the license, apply for permission to transfer his license to another person.

(2) Such application shall be made to the District Magistrate, who shall, if he approves of the transfer, enter upon the license, under his signature, an endorsement to the effect that the license has been transferred to the person named.

(3) A fee of Re. 1 shall be charged on each such application.

(4) The person to whom the license is so transferred shall enjoy the same powers and be subject to the same obligations under the license as the original holder.

Possession of dangerous petroleum in receptacles containing more than forty gallons each.

6. Special licenses for the possession of dangerous petroleum in receptacles containing more than forty gallons, but not more than 500 gallons each, may be granted on such terms as the Local Government may prescribe on the recommendation of the Chief Inspector of Explosives.

Storage in major installations.

7. Licenses for the possession of any stated quantity of petroleum, not being dangerous petroleum, in major installations, in accordance with such specifications and plans as the Local Government, on the recommendation of the Chief Inspector of Explosives, may from time to time, by general or special order, approve may be granted in Form D.

Storage in minor installations.

8. Licenses for the possession of any stated quantity of petroleum, not being dangerous petroleum, in minor installations, in accordance with such specifications and plans as the Chief Inspector of Explosives may from time to time, by general or special order, approve, may be granted in Form E.

Dangerous petroleum for use on motor-vehicles.

9. (1) Licenses in Form F may be granted free of charge for the possession of dangerous petroleum for use on motor-vehicles and for its transport thereon, for the purpose of use therein.

(2) The provisions of the ordinary rules relating to the possession of dangerous petroleum shall regulate the possession of dangerous petroleum for use on motor-vehicles, save in so far as these provisions are varied by the conditions of the license.

Particulars to be given in application for licenses for the possession of petroleum other than licenses under rules 4 and 9.

10. Every application for a license for the possession of petroleum, other than licenses under rules 4 and 9 of this Chapter, shall specify:—

(a) the description and quantity of petroleum which the applicant desires to keep,

(b) the name and position of the premises intended to be used for the storage of such petroleum, and whether the said premises fulfil the conditions prescribed by Form A, Form B, Form D, or Form E, as the case may be,

(c) the amount of petroleum, if any, already licensed to be kept on the same premises.

If the application be made for the first time in respect of any major or minor installation or if the quantity of petroleum to be stored in such an installation is to be increased, the application shall be accompanied by specifications and plans drawn to scale.

Certificate of safety to be furnished.

11. Before petroleum is stored in any major or minor installation for which a license has been granted for the first time, a certificate shall be furnished to the licensing authority to the effect that all enclosure walls and embankments required to be constructed under the conditions of the license are sufficient to ensure safety. The certificate shall be signed by an engineer accepted as qualified for the purpose by the licensing authority. When the license is not granted for the first time but is granted for an increased quantity of petroleum, a certificate shall similarly be furnished to the licensing authority before any quantity of petroleum exceeding the amount which was admissible under the former license is stored in the installation.

Particulars to be given in applications for licenses under rules 4 and 9.

12. Every application for a license under rules 4 and 9 of this Chapter shall specify:—

(a) whether the applicant is the owner of a motor-vehicle,

(b) the amount of dangerous petroleum the applicant desires to store,

(c) the exact position and nature of the premises intended to be used for the storage of such dangerous petroleum, and whether the said premises fulfil the conditions prescribed by Form C or Form F, as the case may be.

CHAPTER V.—LICENSES FOR THE TRANSPORT OF PETROLEUM.

General licenses for the transport of non-dangerous petroleum.

1. General licenses for the transport of petroleum, other than dangerous petroleum, may be granted for a period of twelve months in Form G.

General licenses for the transport of dangerous petroleum.

2. General licenses for the transport of dangerous petroleum otherwise than in bulk may be granted for a period of twelve months in Form H.

NOTE.—Dangerous petroleum cannot be transported in bulk.

Effect of general license.

3. Licenses granted under rules 1, 2 and 9 of this Chapter may authorise the holders to transport petroleum without restriction as to destination or total quantity.

Pass for transport of petroleum.

4. The holder of a general license granted under rules 1, 2 or 9 of this Chapter shall, with each consignment of petroleum conveyed under cover of his license, issue to the person who takes charge of the petroleum for the purpose of transporting it, a numbered pass in Form I.

Special licenses for the transport of petroleum other than dangerous petroleum.

5. Special licenses may be granted for the transport of petroleum, other than dangerous petroleum, in quantities exceeding five hundred gallons, in Form J.

Special licenses for the transport of dangerous petroleum.

6. Special licenses may be granted for the transport of dangerous petroleum other than in bulk in Form K.

Effect of special license.

7. A special license granted under rules 5 and 6 shall only cover the transport of the particular consignment entered in the license, and shall be valid for such period as may be entered in it.

Particulars to be given in applications for special licenses.

8. Application for special licenses for the transport of petroleum by rail, by road, by steamer or by barge, or by two or more of these modes of conveyance, shall specify the description and quantity of petroleum to be transported, and the places from and to which, respectively, the petroleum is to be conveyed, and shall describe the receptacles in which it is to be contained, or, in the case of petroleum to be transported in bulk by water, shall state that the ship in which it is to be carried has been certified as required by rule 1 of Chapter II of this Part.

Transport of dangerous petroleum by motorists otherwise than on a motor-vehicle.

9. General licenses in Form L to transport dangerous petroleum up to a maximum of sixty gallons at a time, otherwise than on a motor-vehicle, may be granted for a period of twelve months to owners of motor-vehicles holding licenses under rule 9, sub-rule (*1*), of Chapter IV of this Part, to possess petroleum and use or transport it on a motor-vehicle.

CHAPTER VI.—FEES.

Method of levying fees.

1. (*1*) Where the proceeds of fees leviable for licenses under these rules have been assigned by the Local Government to any local authority, the fees shall be levied in such manner as the local authority may from time to time direct.

(*2*) In all other cases the fees shall be paid in cash on receipt of a notice from the licensing authority that a license will be granted.

(*3*) The court fee stamp of the value of eight annas representing the fee chargeable under schedule II, Article 1 (*b*) of the Court Fees Act on an application for a license presented to a Magistrate should be attached to the application.

Fees for licenses for possession of petroleum.

2. The following fees shall be charged for licenses for the possession of petroleum, namely:—

Non-dangerous petroleum.

	R	
(*a*) When the quantity to be stored exceeds five hundred but does not exceed one thousand gallons.	12	
(*b*) When the quantity to be stored exceeds one thousand but does not exceed five thousand gallons.	12	for the first one thousand gallons *plus* R2 for every additional one thousand gallons or part thereof.
(*c*) When the quantity to be stored exceeds five thousand gallons, but does not exceed fifty thousand gallons.	20	for the first five thousand gallons *plus* R4 for every additional one thousand gallons or part thereof.
(*d*) When the quantity to be stored exceeds fifty thousand gallons.	250	

Dangerous petroleum.

	R	
(*e*) When the quantity to be stored does not exceed forty gallons.	3	
(*f*) When the quantity to be stored exceeds forty gallons, but does not exceed five hundred gallons.	8	
(*g*) When the quantity to be stored exceeds five hundred gallons.		the same fees as those laid down for non-dangerous petroleum.

Fees for licenses for transport of petroleum.

3. The following fees shall be charged for licenses for the transport of petroleum:—

Non-dangerous petroleum.

	R
Special license—	
(*a*) When the quantity to be transported exceeds five hundred but does not exceed five thousand gallons.	1
(*b*) For every additional five thousand gallons or part of five thousand gallons.	1
General license for the transport of non-dangerous petroleum by rail, by road, or by water for twelve months.	100

Dangerous petroleum.

Special license—

	R	
(*i*) When the quantity to be transported does not exceed forty gallons.	2	
(*ii*) When the quantity to be transported exceeds forty gallons but does not exceed four hundred and eighty gallons.	2	for the first gallons *plus* 8 annas for every additional forty gallons or part thereof.
(*iii*) When the quantity to be transported exceeds four hundred and eighty gallons.	8	for the first four hundred and eighty gallons *plus* R2 for every additional four hundred and eighty gallons or part thereof.
General license for the transport of dangerous petroleum by the owner of a motor-vehicle by road, rail or water, up to a maximum of sixty gallons at a time.	5	
General license for the transport of dangerous petroleum by dealers by rail, road or water.	50	

Fee for license granted for unexpired portion of an original license.

4. A fee of one rupee shall be charged for a new license for the unexpired portion of an original license granted to any person applying for the same in accordance with the provisions of rule 8 of Chapter III of this Part.

Fee for duplicate licenses.

5. A fee of eight annas shall be charged for a duplicate of a license granted in accordance with the provisions of rule 9 of Chapter III of this Part.

* * * * * * *

FORM A.

(Rule 2 of Chapter IV of Part II.)

License to possess petroleum (other than dangerous petroleum), otherwise than in bulk.

No. Fee, R

License is hereby granted to for the storage in the storage shed described below, of gallons of petroleum, subject to the rules for the storage of petroleum published in Notification No. dated , and to the further conditions on the back of this license.

District Magistrate or authority appointed under rule 2 of Chapter III of Part II.

The 190 .

[Description of the storage shed above referred to.]

Endorsement on Form A.

CONDITIONS OF THE LICENSE.

If the licensing officer call on the holder of a license, by a notice in writing, to execute any repairs of the storage shed, which may, in the opinion of such officer, be necessary for the safety of the shed, the holder of the license shall execute the repairs within such period, not being less than one month from the date of receipt of the notice, as may be fixed by the notice.

2. The storage shed shall be constructed of masonry or other uninflammable material with terraced, tiled or iron roofs and with tiled or paved or earthen floors, but the beams, rafters, columns, windows and doors may be of wood.

3. Either the doorways and other openings of the storage shed shall be built up to a height of two feet above the level of the road or street, or the floor sunk to a depth of two feet below the level of the road or street, so that the petroleum cannot flow out from the building in case of its escape from the receptacle in which it is contained, or the building itself shall be surrounded with a masonry wall or embankment or both not less than two feet high. When the quantity of petroleum stored exceeds 16,000 gallons the height or depth shall be 3 feet.

A combination of these methods is permissible.

4. The following distances shall be kept clear round the building :—

Distances to be kept clear round buildings or enclosure walls.	Number of gallons to be stored.
None	5,000 and under.
20 feet	over 5,000 and up to 50,000.
30 "	Unlimited.

5. No light, except a light of such strength, position or character as is not liable to ignite any inflammable vapour, nor fire of any description, shall be permitted within the storage shed.

FORM B.

(Rule 3 of Chapter IV of Part II.)

License to possess dangerous petroleum, otherwise than in bulk, in quantity exceeding forty gallons.

No. Fee, R

License is hereby granted to for the storage, in the storage shed described below, of gallons of dangerous petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated , and to the further conditions on the back of this license.

Assistant Secretary to the Chief Commissioner,
N.-W. Frontier Province.

The 190 .

[Description of the storage shed above referred to.]

Endorsement on Form B.

CONDITIONS OF LICENSE.

1. If the licensing officer call upon the holder of a license, by notice in writing, to execute any repairs of the storage shed, which may, in the opinion of such officer, be necessary for the safety of the shed, the holder of the license shall execute the repairs within such period, not being less than one month from the date of receipt of the notice, as may be fixed by the notice.

2. The license-holder is prohibited from delivering any quantity of dangerous petroleum exceeding three gallons to any one who has not a license under section 5 or section 6 of the Act, or any less quantity of such petroleum, except in accordance with the conditions of the proviso to section 6 of the Act, as to the vessels in which the petroleum must be contained.

3. The petroleum shall be stored in gas-tight tinned or galvanized sheet iron, steel or lead plate receptacles containing each not more than forty gallons and fitted with well-made filling holes and well-fitting screw plugs, or fitted with screw cap or other cap with metal air-tight undercap. Such receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch.

Provided that wood cases shall not be necessary when the receptacles are made of tinned or galvanized sheet iron or steel, and have the following thickness of metal:—

	Not less than
(1) When the capacity does not exceed two gallons	27 B. W. G.
(2) When the capacity exceeds two gallons but does not exceed four gallons	22 B. W. G.
(3) When the capacity exceeds four gallons but does not exceed eight gallons	20 B. W. G.
(4) When the capacity exceeds eight gallons but does not exceed twenty gallons	16 B. W. G.
(5) When the capacity exceeds twenty but does not exceed thirty gallons .	14 B. W. G.
(6) When the capacity exceeds thirty but does not exceed forty gallons .	12 B. W. G.

4. An air-space of at least one-tenth of its capacity shall be left in each receptacle at the time of filling.

5. The receptacles shall be so substantially constructed and secured as not to be liable except under circumstances of grave negligence or extraordinary accident, to be broken or become defective, leaky or insecure.

6. The receptacles shall be labelled in accordance with the provisions of section 7 of the Act.

7. Any receptacle, before being repaired, shall be cleared of all dangerous petroleum and of all dangerous vapours arising from the same.

8. The storage shed shall be constructed of masonry or other uninflammable material with terraced, tiled or iron roofs and with tiled or paved or earthen floors.

9. Either the doorways and other openings of the storage shed shall be built up to a height of two feet above the level of the road or street, or the floor sunk to a depth of two feet below the level of the road or street, so that the petroleum cannot flow out from the building in case of its escape from the receptacle in which it is contained, or the building

itself shall be surrounded with a masonry wall or embankment or both not less than two feet high. When the quantity of petroleum stored exceeds 16,000 gallons the height or depth shall be three feet.

A combination of these methods is permissible.

10. All ventilating openings in the storage shed shall be protected by strong wire gauze.

11. No light, except a light of such strength, position and character as is not liable to ignite any inflammable vapour, nor fire of any description, shall be permitted at any time within the storage shed.

12. All due precautions shall be taken for the prevention of unauthorised persons having access to any dangerous petroleum kept and to the vessels containing or having actually contained the same.

13. Every person managing or employed on or in connection with the storage shed shall abstain from any act whatever which tends to cause fire or explosion and which is not reasonably necessary, and shall prevent any other person from doing such act.

14. The drum or other receptacle containing dangerous petroleum shall only be opened on the licensed premises at or immediately adjoining the storage shed and for the time necessary for drawing off the petroleum, and during such drawing off every reasonable precaution shall be adopted for preventing the escape of dangerous petroleum or the vapour therefrom.

15. The following distances shall be kept clear from protected works round the storage shed :—

Quantity to be stored.	Distances to be kept clear.
Not exceeding 500 gallons	20 feet.
From 500 to 1,000 „	25 „
„ 1,000 to 5,000 „	30 „
„ 5,000 to 15,000 „	40 „
„ 15,000 to 25,000 „	50 „
„ 25,000 to 35,000 „	60 „
„ 35,000 to 50,000 „	70 „
„ 50,000 and over „	100 „

Provided that these distances may be reduced by the Local Government on the recommendation of the Chief Inspector of Explosives in cases where screen walls are provided, or other special precautions taken, or where there are special circumstances that in the opinion of the Chief Inspector of Explosives warrant the reduction.

16. Provided that when the quantity to be possessed does not exceed 60 gallons the provisions of conditions 8, 9 and 15 shall not apply, but the licensee shall observe the following conditions :—

(i) The storage shed in which the dangerous petroleum is stored shall be well ventilated and constructed of uninflammable material, provided however that the doors and windows may be of wood.

(ii) Where a storage shed forms part of or is attached to another building and when the intervening floor or partition is of an unsubstantial or inflammable character or has openings therein, the whole of such building shall be deemed to be the storage shed and no portion of such storage shed shall be used as a dwelling house or as a place where persons assemble. The storage shed shall have a separate entrance from the open air distinct from any building or dwelling in which persons assemble.

17. The storage shed shall be liable to inspection by an officer nor being of lower rank than an Inspector of Police authorized by the Local Government in this behalf.

FORM C.

(Rule 4 of Chapter IV of Part II.)

License to possess dangerous petroleum in quantity not exceeding forty gallons.

No. Fee, R3.

License is hereby granted to for the storage, in the storage shed described below, of gallons of dangerous petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated , and to the further conditions on the back of this license.

District Magistrate or authority,
appointed under rule 2 of Chapter III of Part II.

The 190 .

(Description of the storage shed above referred to.)

Endorsement on Form C.

CONDITIONS OF LICENSE.

1. If the licensing officer call upon the holder of a license, by notice in writing, to execute any repairs of the storage shed, which may, in the opinion of such officer, be necessary for the safety of the shed, the holder of the license shall execute the repairs within such period, not being less than one month from the date of receipt of the notice, as may be fixed by the notice.

2. The license-holder is prohibited from delivering any quantity of dangerous petroleum exceeding three gallons to any one who has not a license under section 5 or section 6 of the Act, or any less quantity of such petroleum, except in accordance with the conditions of the proviso to section 6 of the Act, as to the vessels in which the petroleum must be contained.

3. The petroleum shall be stored in gas-tight tinned or galvanized sheet-iron, steel or lead plate receptacles containing each not more than ten gallons and fitted with well-made filling holes and well-fitting screw plugs, or fitted with screw cap or other cap with metal air-tight undercap. Such receptacle shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch:

Provided that wood cases shall not be necessary when the receptacles are made of tinned or galvanized sheet iron or steel, and have the following thickness of metal:—

	Not less than
(1) When the capacity does not exceed two gallons	27 B. W. G.
(2) When the capacity exceeds two gallons but does not exceed four gallons	22 B. W. G.
(3) When the capacity exceeds four gallons but does not exceed eight gallons	20 B. W. G.
(4) When the capacity exceeds eight gallons	16 B. W. G.

4. An air-space of at least one-tenth of its capacity shall be left in each receptacle at the time of filling.

5. Receptacles shall be so substantially constructed and secured as not to be liable, except under circumstances of grave negligence or extraordinary accident, to be broken or become defective, leaky or insecure.

6. The receptacles shall be labelled in accordance with the provisions of section 7 of the Act.

7. Any receptacle, before being repaired, shall be cleared of all dangerous petroleum and of all dangerous vapours arising from the same.

8. The storage shed in which the dangerous petroleum is stored shall be well ventilated and constructed of uninflammable material; provided, however, that the doors and windows may be of wood.

9. All ventilating openings in the storage shed shall be protected by strong wire gauze.

10. No light, except a light of such strength, position and character as is not liable to ignite any inflammable vapour, nor fire of any description, shall be permitted at any time within the storage shed.

11. All due precautions shall be taken for the prevention of unauthorised persons having access to any dangerous petroleum kept and to the vessels containing or having actually contained the same.

12. Every person managing or employed on or in connection with the storage shed shall abstain from any act whatever which tends to cause fire or explosion and which is not reasonably necessary and shall prevent any other person from doing such act.

13. The drum or other receptacle containing dangerous petroleum shall only be opened on the licensed premises at or immediately adjoining the storage shed and for the time necessary for drawing off the petroleum, and during such drawing off every reasonable precaution shall be adopted for preventing the escape of dangerous petroleum or the vapour therefrom.

14. Where a storage shed forms a part of or is attached to another building, and where the intervening floor or partition is of an unsubstantial or inflammable character or has openings therein, the whole of such buildings shall be deemed to be the storage shed and no portion of such storage shed shall be used as a dwelling or as a place where persons assemble. The storage shed shall have a separate entrance from the open air distinct from any building or dwelling in which persons assemble.

15. The storage shed shall be liable to inspection by an officer not being of lower rank than an Inspector of Police, authorized by the Local Government in this behalf.

FORM D.

(Rule 7 of Chapter IV of Part II.)

License to possess petroleum, not being dangerous petroleum, in a major installation.

No. Fee, R

License is hereby granted to for the storage, in the place described below, of gallons of petroleum, not being dangerous petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated and to the further conditions on the back of this license.

Asst. Secretary to the Chief Commissioner,
N.-W. Frontier Province.

The 190 .

(Description of the place above referred to.)

Endorsement on Form D.

CONDITIONS OF LICENSE.

1. Each tank shall either be separately surrounded by a wall or embankment of substantial construction, or shall be partially sunk in an excavation. The inclosure thus formed shall be of dimensions sufficient to contain 10 per cent. more oil than the tank is capable of containing, and shall be so constructed as to prevent the escape therefrom of any oil in the form of liquid, whether under the action of fire or otherwise. Settling or measuring tanks* may be situated within the wall or excavation but otherwise the space enclosed by such wall or excavation, and not occupied by the tank, shall be kept entirely clear and unoccupied.

2. In the case of all storage sheds within the installation, either the doorways and other openings of the building shall be built up to a height of three feet above the level of the ground outside it, or the floor shall be sunk to a depth of three feet below the level of the ground, or the building itself shall be surrounded with a masonry wall or embankment or both not less than three feet high.

3. The height of any storage tank shall not be more than three-fifths of its diameter.

4. A distance of not less than one hundred feet shall be kept clear between one storage tank and another, or between a storage tank and a storage shed, the distance being measured between the nearest points of the perimeters of the storage tanks or storage sheds, as the case may be.

5. A distance of not less than one hundred and fifty feet shall be kept clear between any storage tank or shed and any protected work.

6. The distances specified in conditions 4 and 5 may be reduced by the Local Government on the recommendation of the Chief Inspector of Explosives in cases where screen walls are provided or other special precautions taken or where there are special circumstances that, in the opinion of the Chief Inspector of Explosives, warrant the reduction.

7. No fire or lights other than those necessary for soldering purposes, shall be permitted within the installation except in the office, living quarters, engine room, boiler house and smithy.

FORM E.

(Rule 8 of Chapter IV of Part II.)

License to possess petroleum, not being dangerous petroleum, in a minor installation.

No. Fee, R

License is hereby granted to for the storage, in the place described below, of gallons of petroleum, not being dangerous petroleum, subject to the rules for the storage of petroleum published in Notification No. , dated , and to the further conditions on the back of this license.

District Magistrate or authority appointed under
rule 2 of Chapter III of Part II.

The 190 .

(Description of the place above referred to.)

---

* These tanks shall not have a greater capacity than 30,000 gallons.

Endorsement on Form E.

CONDITIONS OF LICENSE.

1. Every tank of which the capacity exceeds fifteen thousand gallons shall either be separately surrounded by a wall or embankment of substantial construction, or shall be sunk in an excavation. The enclosure thus formed shall be of dimensions sufficient to contain the total quantity of oil capable of being contained in the tank and shall be so constructed as to prevent the escape therefrom of any oil in the form of liquid, whether under the action of fire or otherwise. The space enclosed by such wall or excavation and not occupied by the tanks, shall be kept entirely clear and unoccupied.

2. The distance to be kept clear between a tank and the walls or embankments which surround it shall be, measuring from the ground level—

(a) for horizontal tanks, not less than one-third the height of the tank;
(b) for perpendicular tanks, not less than one-half the height of the tank.

3. The height of walls or embankments surrounding the installation shall be not less than two feet six inches from the ground level.

4. The following distances shall kept clear between protected works not forming part of the installation and the enclosure walls or embankments:—

Where the number of gallons stored is—	Distance to be kept clear.
5,000 and under	Not less than 15 feet.
Over 5,000 and up to 20,000	Ditto 20 „
Over 20,000 and up to 50,000	Ditto 30 „

Provided that these distances may be reduced by the Local Government on the recommendation of the Chief Inspector of Explosives in cases where screen walls are provided or other special precautions taken, or where there are special circumstances which in the opinion of the Chief Inspector of Explosives warrant the reduction.

5. Soldering shall only be permitted in a separate room or building placed as far from the tanks as can be conveniently arranged, in which no storage or filling shall be permitted. No more tins shall be allowed in the soldering room at any one time than are necessary for expeditious working.

6. No fire or lights, except those necessary in the soldering room and watchman's house, shall be permitted.

7. If the installation contains tanks of which the capacity does not exceed fifteen thousand gallons, either—

(a) each tank shall be separately enclosed in the manner prescribed in condition 1,
or
(b) the entire installation shall be surrounded by a masonry wall or embankment or a combination of these forming an enclosure of dimensions sufficient to contain, and prevent the overflow of, all the oil that may be stored at any one time within such walls or embankments.

8. In the case of all storage sheds within an installation, which is not surrounded by a masonry wall or embankment as provided in clause (b) of condition 7, either the doorways or other openings of the building shall be built up to a height of two feet above the level of the ground outside it, or the floor sunk to a depth of two feet below the level of the ground, so that the petroleum cannot flow out from the building in case of its escape from the receptacle in which it is contained, or the building itself shall be surrounded by a masonry wall or embankment or both not less than two feet height. When the quantity of petroleum stored exceeds 16,000 gallons the height or depth shall be three feet.

A combination of these methods is permissible.

FORM F.

(Rule 9 of Chapter IV of Part II.)

Special license to possess and transport dangerous petroleum for owners of motor-vehicles.

No. Free of charge.

License is hereby granted to owner (or hirer) of a motor-vehicle (or vehicles) for the possession of gallons of dangerous petroleum for use

therein at* and for its transport on the said motor-vehicle (or vehicles) for the purpose of use therein, subject to the rules for the possession and transport of dangerous petroleum published in Notification No. , dated , and to the conditions at the back of this license.

* Situation and description of storage shed above referred to.

When the quantity exceeds 40 gallons. Asst. Secretary to the Chief Commr., N. W. Frontier Province.

When the quantity does not exceed 40 gallons. District Magistrate or authority appointed under rule 2 of Chapter III of Part II.

The 190 .

Endorsement on Form F.

CONDITIONS OF THE LICENSE.

1. The dangerous petroleum shall not be kept, used or transported except in gas-tight tinned or galvanized sheet iron, steel or lead plate drums or receptacles containing each not more than 4 gallons and fitted with well-made filling holes and well-fitting screw plugs, or fitted with screw cap or other cap with metal air-tight undercap. Such drums or receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch. Provided that wood cases shall not be necessary when the drums or receptacles are made of tinned or galvanized sheet iron, or steel, and have the following thickness of metal :—

	Not less than
(1) When the capacity does not exceed 2 gallons . .	27 B. W. G.
(2) When the capacity exceeds 2 gallons	22 B. W. G.

2. The drums or receptacles shall be so substantially constructed and secured as not to be liable, except under circumstances of gross negligence or extraordinary accident, to be broken or become defective, leaky or insecure.

3. Every such vessel, not forming part of a motor-vehicle, when used for transporting or keeping dangerous petroleum, shall bear the words "Dangerous Petroleum—Highly Inflammable" legibly and indelibly stamped or marked thereon, or on a metallic or enamelled label attached thereto.

4. An air-space of at least one-tenth of its capacity shall be left in each drum or receptacle at the time of filling to allow for expansion of the dangerous petroleum.

5. Before repairs are done to any such vessel, that vessel shall, as far as practicable, be cleaned by the removal of all dangerous petroleum and of all dangerous vapours derived from the same.

6. The storage shed in which the dangerous petroleum is stored shall be well ventilated and constructed of uninflammable materials, provided, however, that the doors and windows may be of wood.

7. Where a storage shed forms part of, or is attached to, another building, and when the intervening floor or partition is of an unsubstantial or inflammable character, or has an opening therein, the whole of such building shall be deemed to be the storage shed, and no portion of such storage shed shall be used as a dwelling, or as a place where persons assemble. A storage shed shall have a separate entrance from the open air distinct from that of any dwelling or building in which persons assemble.

8. The amount of dangerous petroleum to be kept in any one storage shed, whether or not upon motor-vehicles, shall not exceed sixty gallons at any one time.

9. The filling or replenishing of any vessels with dangerous petroleum shall not be carried on, nor shall the contents of any such vessel be exposed in the presence of fire or artificial light, except a light of such construction, position and character as not to be liable to ignite any inflammable vapour, and no artificial light shall be brought within dangerous proximity of the place where any vessel containing dangerous petroleum is being kept.

10. In the case of all dangerous petroleum kept or transported for the purpose of, or in connection with any motor-vehicle, (*a*) all due precautions shall be taken for the prevention of accidents by fire or explosion and for the prevention of unauthorized persons having access to any dangerous petroleum kept or transported and to the vessels containing, or having actually contained, the same, and (*b*) every person managing or employed on or in connection with any motor-vehicle shall abstain from every act, whatever, which tends to cause fire or explosion, and which is not reasonably necessary, and shall prevent any other person from committing such act.

11. The storage shed shall be liable to inspection by an officer not being of lower rank than an Inspector of Police, authorized by the Local Government in this behalf.

FORM G.

(Rule 1 of Chapter V of Part II.)

General license to transport petroleum other than dangerous petroleum.

No. Fee, R100.

A general license is hereby granted to to transport petroleum, other than dangerous petroleum, subject to the rules contained in Chapter V of Part II of Government Notification No. , dated , and to the condition at the back of this license.

This license shall continue in force till the

District Magistrate or other authority appointed under rule 2 of Chapter III of Part II.

The 190 .

Endorsement on Form G.

CONDITION OF THE LICENSE.

The petroleum, if not in bulk, shall be packed in air-tight tins or drums of steel or iron, or other receptacles not easily broken or in tank-carts of a pattern approved by the Local Government in this behalf, or in bottles securely stoppered and carefully packed so as to avoid risk of breakage.

FORM H.

(Rule 2 of Chapter V of Part II.)

General license to transport dangerous petroleum otherwise than in bulk.

No. Fee, R50.

A general license is hereby granted to to transport dangerous petroleum otherwise than in bulk, subject to the rules contained in Chapter V of Part II of Government Notification No. , dated , and to the further conditions on the back of this license.

This license shall continue in force till the

When the quantity to be transported at a time exceeds 40 gallons. Asst. Secretary to the Chief Commr., N. W. F. Province.

When the quantity to be transported at a time does not exceed 40 gallons. District Magistrate or other authority appointed under rule 2 of Chapter III of Part II.

Endorsement on Form H.

CONDITIONS OF LICENSE.

1. The petroleum must be contained in gas-tight tinned or galvanized sheet iron, steel, or lead plate receptacles containing each not more than forty gallons and fitted with well-made filling holes and well-fitting screw plugs, or with screw cap or other cap with metal air-tight undercap. Such receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch:

Provided that wooden cases shall not be necessary where the receptacles are made of tinned or galvanized sheet iron or steel, and have the following thickness of metal:

	Not less than
(1) When the capacity does not exceed 2 gallons	27 B.W.G.
(2) When the capacity exceeds 2, but does not exceed 4 gallons . . .	22 B.W.G.
(3) When the capacity exceeds 4, but does not exceed 8 gallons . .	20 B.W.G.
(4) When the capacity exceeds 8, but does not exceed 20 gallons . .	16 B.W.G.
(5) When the capacity exceeds 20, but does not exceed 30 gallons . .	14 B.W.G.
(6) When the capacity exceeds 30, but does not exceed 40 gallons . .	12 B.W.G.

2. An air-space of at least one-tenth of its capacity must be left in each receptacle at the time of filling.

3. The receptacles must be so substantially constructed and secured as not to be liable, except under circumstances of gross negligence or extraordinary accident, to be broken or become defective, leaky or insecure in transit.

4. The nature of the contents and the words "Highly inflammable" must be distinctly marked on the receptacles.

FORM I.

(Rule 4 of Chapter V, Part II.)

Pass to be granted by the holder of General License No. for the transport of dangerous/non-dangerous petroleum otherwise than in bulk/in bulk or otherwise than in bulk subject to the rules contained in Chapter V of Part II of Government Notification No. , dated and to the further conditions on the back of this pass.

This pass covers (drums/tins/cases/packages containing)* gallons of dangerous/non-dangerous petroleum being the property of while in transport from to

* To be omitted when the petroleum is transported in bulk.

Holder of General License No.

The 190 .

Endorsement on Form I.

CONDITIONS OF PASS.

I.—For dangerous petroleum in the case of the holder of a license in Form H.

1. The petroleum must be contained in gas-tight tinned or galvanized sheet iron, steel, or lead plate receptacles containing each not more than forty gallons and fitted with well-made filling holes and well-fitting screw plugs, or with screw cap or other cap with metal air-tight under cap. Such receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch:

Provided that wooden cases shall not be necessary where the receptacles are made of tinned or galvanized sheet iron or steel, and have the following thickness of metal:

	Not less than
(1) When the capacity does not exceed 2 gallons	27 B. W. G.
(2) When the capacity exceeds 2, but does not exceed 4 gallons	22 B. W. G.
(3) When the capacity exceeds 4, but does not exceed 8 gallons	20 B. W. G.
(4) When the capacity exceeds 8, but does not exceed 20 gallons	16 B. W. G.
(5) When the capacity exceeds 20, but does not exceed 30 gallons	14 B. W. G.
(6) When the capacity exceeds 30, but does not exceed 40 gallons	12 B. W. G.

2. An air-space of at least one-tenth of its capacity must be left in each receptacle at the time of filling.

3. The receptacles must be so substantially constructed and secured as not to be liable, except under circumstances of gross negligence or extraordinary accident, to be broken or become defective, leaky or insecure in transit.

4. The nature of the contents and the words "Highly inflammable" must be distinctly marked on the receptacles.

II.—For dangerous petroleum in the case of the holder of a license in Form L.

1. The quantity of dangerous petroleum to be transported under this pass shall not exceed 60 gallons.

2. The petroleum must be contained in gas-tight tinned or galvanized sheet iron, steel, or lead plate receptacles containing each not more than four gallons and fitted with well-made filling holes and well-fitting screw-plugs, or with screw cap or other cap with metal air-tight undercap. Such receptacles shall be packed in strong wooden cases, the thickness of the wood to be not less than three-eighths of an inch:

Provided that wooden cases shall not be necessary where the receptacles are made of tinned or galvanized sheet iron or steel and have the following thickness of metal :

	Not less than
(1) When the capacity does not exceed 2 gallons	27 B. W. G.
(2) When the capacity exceeds 2 gallons	22 B. W. G.

3. An air-space of at least one-tenth of its capacity must be left in each receptacle at the time of filling.

4. The receptacles must be so substantially constructed and secured as not to be liable, except under circumstances of gross negligence or extraordinary accident, to be broken or become defective, leaky or insecure in transit.

5. The nature of the contents and the words "Highly inflammable" must be distinctly marked on the receptacles.

III.—For petroleum other than dangerous petroleum.

The petroleum, if not in bulk, shall be packed in air-tight tins or drums of steel or iron, or other receptacles not easily broken, or in tank-carts of a pattern approved by the Local Government in this behalf, or in bottles securely stoppered and carefully packed so as to avoid risk of breakage.

FORM J.

(Rule 5 of Chapter V of Part II.)

Special license to transport petroleum other than dangerous petroleum.

No. Fee, R

License is hereby granted to to transport from to * (cases or packages containing)* gallons of petroleum subject to the rules contained in Chapter V of Part II of Government Notification No. dated , and to the further condition on the back of this license.

* To be omitted when the petroleum is transported in bulk.

The license shall continue in force till the day of

District Magistrate or authority appointed under rule 2 of Chapter III of Part II.

MILITARY SECRETARY'S OFFICE.

NOTIFICATION.

Simla, the 28th April, 1909.

No. 681-*M.*—Notice is hereby given that HIS EXCELLENCY THE VICEROY AND GOVERNOR GENERAL will hold a Levée at Viceregal Lodge, Simla, at 9-45 P. M. on Monday, the 24th May 1909.

All Civil and Military Officers and the Indian Officers of the Infantry Guard are invited to attend.

The following regulations are to be observed.

I.—Admission into Viceregal Lodge on the occasion of the Levée will be by tickets only which will be issued by the Military Secretary's Office on receipt of applications from Officers and other gentlemen who are already on the Viceregal Lodge List or who have already been presented at the Court of St. James and are desirous of attending the Levée.

II.—Applications for tickets of admission with addresses and with information as far as possible as to when, where and by whom the applicants were presented, should be submitted to the Military Secretary's Office not later than 21st May after which date no applications will be received.

III.—On receipt of applications, tickets of admission to Viceregal Lodge will be issued. These same tickets will be made use of by the Military Secretary when reading the names to His Excellency the Viceroy, and must consequently be carefully preserved. No other name-cards will be required.

IV.—Rules I, II and III do not apply to gentlemen who have the privilege of the Private Entree to Viceregal Lodge.

V.—Gentlemen who have not already been presented at the Court of St. James, or at the Viceregal Court, should send in their names and addresses through the gentlemen who propose to present them to the Military Secretary's Office not later than Wednesday, the 19th May 1909, in order that the names may be submitted to His Excellency, when, if they are approved, presentation cards will be forwarded. These very presentation cards will be made use of by the Military Secretary when reading the names to His Excellency the Viceroy and must therefore be carefully preserved.

VI.—Gentlemen presenting others must themselves attend the Levée.

VII.—Gentlemen entitled to wear uniform will appear in Full Dress: Military Officers—Review Order, dismounted; Civilians—Levée Dress. Helmets will not be taken to the Levée.

VIII.—Clergymen being University Graduates and other gentlemen entitled to wear robes or gowns on account of Judicial or Academical office or status, and not entitled to wear uniform, will appear in such robes or gowns.

IX.—Gentlemen not entitled to wear uniform, or robes or gowns, will appear in Evening Dress.

X.—Indian gentlemen who do not appear in the dress prescribed above will wear Choga, Aba or Jubba and Chapkan, Chilta, Saya or Kaba with trousers and their distinctive National head dress, or the ceremonial dress approved for their class by the Local Government.

In the case of Bengali gentlemen the head dress should be a Pugree generally known as Shamla or Mouratta, and not a brimless cap.

In the case of Burmese gentlemen, the head dress should be a white fillet, the hair being dressed in a top knot.

Indian gentlemen who do not appear in the dress prescribed in Rules VII, VIII and IX should not remove their head dress when they pass His Excellency.

At the Vice regal Court, only patent leather boots or shoes of an English pattern are allowed to be worn, except in the case of Indian Military Officers, who wear the particular style of boot or shoe which forms part of their uniform.

By Command,

JOHN MACKENZIE, *Captain,*

Officiating Military Secretary to the Viceroy.

HOME DEPARTMENT.

NOTIFICATIONS.

PUBLIC.

Simla, the 29th April, 1909.

No. 2071.—In modification of paragraph I (1) of the notification of the Government of India in the Home Department no. 518, dated the 6th March 1879, the Governor-General in Council is pleased to direct that the exemption from the operation of the prohibitions and directions contained in Sections 13, 14, 15 and 16 of the Indian Arms Act, 1878 (XI of 1878), thereby made in favour of persons who have been granted a sword in Public Darbar shall cease to extend to Kazi Fazal Allah of Tatta in the Karachi District in Sind.

BOOKS.

The 29th April, 1909.

No. 1-S.—The following Order of His Majesty in Council, published in the *London Gazette* of the 9th March 1909, is republished for general information :

At the Court at *Buckingham Palace*, the 2nd day of *March*, 1909.

PRESENT:

The KING'S Most Excellent Majesty in Council.

WHEREAS on the ninth day of September, one thousand eight hundred and eighty-six, a Convention (hereinafter called the Berne Convention) with respect to the protection to be given by way of copyright to the authors of literary and artistic works was concluded between Her late Majesty Queen Victoria and the foreign countries following, that is to say:—Belgium, Hayti, Switzerland, France, Italy, Germany, Spain, and Tunis:

And whereas on the fifth day of September, one thousand eight hundred and eighty-seven, the ratifications of the said Convention were duly exchanged between Her late Majesty Queen Victoria and the aforesaid countries:

And whereas by an Order in Council, dated the twenty-eighth day of November, one thousand eight hundred and eighty-seven, and made under the authority committed to Her late Majesty Queen Victoria by the International Copyright Acts, 1844 to 1886, Her Majesty was pleased to make provision for giving rights of copyright throughout Her Majesty's dominions to the authors of literary and artistic works first produced in any of the said foreign countries (therein referred to as the foreign countries of the Copyright Union) and otherwise giving effect throughout Her Majesty's dominions to the terms of the said Berne Convention, and an English translation of the said Convention was set out in the first schedule to the said Order in Council:

And whereas since the date of the said Order in Council the foreign countries following, namely:—Luxemburg, Monaco, Montenegro, Norway and Sweden have acceded to the said Berne Convention, and by Orders in Council dated respectively the tenth day of August, one thousand eight hundred and eighty-eight, the fifteenth day of October, one thousand eight hundred and eighty-nine, the sixteenth day of May, one thousand eight hundred and ninety-three, the first day of August, one thousand eight hundred and ninety-six, and the twelfth day of December, one thousand nine hundred and four, and made under the authority aforesaid, the provisions of the said Order in Council of the twenty-eighth day of November, one thousand eight hundred and eighty-seven, have been extended to the last-mentioned foreign countries respectively:

And whereas an Additional Act to the said Berne Convention was agreed upon between Her late Majesty Queen Victoria and the following foreign countries for the purpose of varying the provisions of the said Berne Convention, namely:—Germany, Italy, Switzerland, Belgium, Luxemburg, Spain, Monaco, Tunis, France, and Montenegro, and the ratifications of the said Additional Act were, on the ninth day of September, one thousand eight hundred and ninety-seven, exchanged between Her late Majesty Queen Victoria and the said foreign countries:

And whereas by an Order in Council, dated the seventh day of March, one thousand eight hundred and ninety-eight, and made under the authority aforesaid, Her late Majesty Queen Victoria was pleased to make provision for varying the hereinbefore recited Order in Council of the twenty-eighth day of November, one thousand eight hundred and eighty-seven, and otherwise giving effect to the said Additional Act throughout Her Majesty's dominions so far as regards the foreign countries hereinbefore named as parties to the said Additional Act, and an English translation of the said Additional Act is set forth in the schedule to the Order in Council now in recital:

And whereas the Republic of Hayti having duly acceded to the said Additional Act, the said Order in Council of the seventh day of March, one thousand eight hundred and ninety-eight, was, by Order in Council of the nineteenth day of May, one thousand eight hundred and ninety-eight, extended to the said Republic:

And whereas the Empire of Japan, the Kingdom of Denmark and the Faroe Islands, and the Republic of Liberia, having duly acceded to the said Berne Convention and the said Additional Act, the said Orders in Council of the twenty-eighth day of November, one thousand eight hundred and eighty-seven, and the seventh day of March, one thousand eight hundred and ninety-eight, were, by Orders in Council dated respectively the eighth day of August, one thousand eight hundred and ninety-nine, and the ninth day of October, one thousand nine hundred and three, and the twenty-first day of December, one thousand nine hundred and eight, extended to the said Empire of Japan, the said Kingdom of Denmark and the Faroe Islands, and the said Republic of Liberia:

And whereas the Principality of Montenegro having duly denounced the said Berne Convention, the said Order in Council of the sixteenth day of May, one thousand eight

hundred and ninety-three was revoked by an Order in Council of the eighth day of August, one thousand eight hundred and ninety-nine, and the provisions of the said Orders in Council of the twenty-eighth day of November, one thousand eight hundred and eighty-seven, and the seventh day of March, one thousand eight hundred and ninety-eight, have ceased to apply to the said Principality of Montenegro:

And whereas the foreign countries following, namely:—Luxemburg, Monaco, Norway, Japan, Denmark, and the Faroe Islands, Sweden and Liberia, together with the foreign countries comprised in the said Order in Council of the twenty-eighth day of November, one thousand eight hundred and eighty-seven, now constitute the foreign countries of the Copyright Union within the meaning of the said Order in Council of the twenty-eighth day of November, one thousand eight hundred and eighty-seven:

And whereas it has been intimated to His Majesty's Government that the Government of Germany have notified their accession for and on behalf of the German Protectorates to the said Berne Convention, and the said Additional Act, such accession to take effect from the first day of January, one thousand nine hundred and nine:

And whereas His Majesty in Council is satisfied that the said Government of Germany has made such provisions as it appears to His Majesty expedient to require for the protection in the said German Protectorates of authors' works first produced in His Majesty's dominions:

Now, therefore, His Majesty, by and with the advice of His Privy Council, and by virtue of the authority committed to His Majesty by the International Copyright Acts, 1844 to 1886, doth order, and it is hereby ordered as follows:—

1. From and after the commencement of this Order the hereinbefore recited Orders in Council of the twenty-eighth day of November, one thousand eight hundred and eighty-seven, and the seventh day of March, one thousand eight hundred and ninety-eight, shall extend to the German Protectorates.

2. This Order shall come into operation as from the first day of January, one thousand nine hundred and nine, which date is hereinbefore referred to as the commencement of this Order.

3. And the Lords Commissioners of His Majesty's Treasury are to give the necessary orders herein accordingly.

A. W. Fitz Roy.

H. A. STUART,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 29th April 1909, based on the Indian Daily Weather Reports of the period.

Weather was unusually wet over a large part of northern India during the past week, and was abnormally damp and cool over practically the whole of northern and central India. The disturbance in northwest India which gave so much rain in the third week of April had barely disappeared when a fresh depression entered northwest India from the west, and established conditions favouring the prolongation of rainfall in the Punjab, the United Provinces and the east of Central India. The rainfall due to the second depression was not so widespread as that given by the first, and did not extend to the Central Provinces and the west of Central India. Abundant rainfall also occurred during the week over the greater part of northeast India, but less rain than usual fell in Burma and the peninsula.

Burma.—Rainfall occurred at only a few stations, chiefly in the north of the province. Skies were lightly clouded on most days and temperature was approximately normal.

Northeast India, including Orissa.—All parts of the division received rain. Skies were lightly to moderately clouded. Weather was cooler than usual, the low temperature conditions being more marked in the province of Bengal than in that of Eastern Bengal and Assam.

The United Provinces, Central India and the Central Provinces.—Rain fell at most stations in the United Provinces and in the east of Central India and of the Central Provinces. Skies were moderately to heavily clouded in these areas up to the 27th, but at the end of the week skies were clear over practically the whole division. Day temperature was very much lower than usual especially in the United Provinces and the east of Central India where several maxima were reported more than 20° below the normal.

Northwest India.—No rain fell in Baluchistan, Sind and Gujarat and very little in Kashmir, but practically the whole of the Punjab and the North-West Frontier Province received rain during the week. Skies were moderately to heavily clouded over the greater part of northwest India on the 25th and 26th and were nearly free from cloud on the other days. Weather was unusually cool, and remarkably low maximum temperatures were registered, especially in the Punjab.

The Peninsula.—Rainfall was restricted almost entirely to the east and south of the peninsula and was heaviest on the north Madras coast. Skies were lightly to moderately clouded in Madras, and generally clear elsewhere. Temperature was approximately normal.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day :—

April 23rd. Barisal 2·13", Cuttack 1·84", Muktesar 1·16", Nowgong 1·60", Ajmer 1·50" and Masulipatam 2·32".

" 24th. Balasore 1·91", Sutna 1·04" and Simla 1·28".

" 25th. Trivandrum 1·14" and Gopalpur 1·44".

" 26th. Darbhanga 2·22".

" 27th. Gorakhpur 1·16", Murree 1·53" and Trichinopoly 1·33".

" 28th. Mergui 1·05", Cherra Poonjee 2·08", Darjeeling 1·16", Benares 1·10" and Gopalpur 1·02"

" 29th. Dhubri 1·10", Silchar 1·49" and Dinajpur 1·67".

The rainfall of the week was in more or less marked excess over the whole tract of country extending from the North-West Frontier Province to Bengal. The deficiency in seasonal rainfall a week ago in the North-West Frontier Province has decreased materially and seasonal rainfall is now in excess in the whole of the province of Bengal as well as in the east of the United Provinces and of Central India and the west of Rajputana.

DIVISION.	Rainfall data for week ending on 29th April 1909.			Rainfall data from 4th December 1908 to 29th April 1909.				
	Average actual rainfall in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Average actual rainfall of season to date in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Seasonal percentage departure from normal. This week.	Seasonal percentage departure from normal. Last week.

GEORGE C. SIMPSON,
for Director-General of Observatories.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;
The 29th April 1909.

E

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 24th April 1909.

Burma.—Scattered showers of rain fell during the week in places. Clearing and burning of hill sides for rice cultivation continue. Reaping of spring rice is progressing and that of miscellaneous and island crops has been completed in parts. The condition of standing crops is satisfactory but some damage has been done to crops by hail in Lower Chindwin. The price of unhusked rice has risen in four districts and has fallen in one.

Eastern Bengal and Assam.—Rain was received during the week in every district. By the end of the week the weather had become much warmer. Conditions are therefore almost ideal for cultivation and growth of crops. Harvesting of spring rice is in progress in Sylhet. In the Assam Valley crushing of sugarcane is almost finished and yielded a fairly good return. Plucking of tea is in progress. In Cachar and other places the yield of leaf up to date is below normal but prospects are improving. The average price of common rice has again risen by about 1 per cent. There were 639 persons on test relief works in Rangpur. In Bogra a test relief work has been opened and is attracting about 300 workers daily; in addition, there are about 1,400 persons on District Board relief works. In Dinajpur 6,793 persons are employed on test relief works. Cattle disease is prevalent in several districts.

Bengal.—Rain was general all over the Province. The fall was heavy in parts of Lower Bengal, Orissa and North Bihar. Cultivation has been facilitated and prospects of standing crops have improved but some damage has been done to the spring crops on threshing floors in Saran and Champaran. A storm did some damage in Angul. Sowing of jute and other autumn crops has commenced. The sugarcane crop and vegetables are doing well. The price of common rice has risen in Burdwan, the 24-Parganas, Nadia, Murshidabad, Gaya, Champaran, Bhagalpur, the Sonthal Parganas and Balasore; has fallen in Birbhum, Howrah, Jessore, Hazaribagh and Singhbhum; and is stationary in the remaining districts. Cattle disease is reported from several districts. The recent rain has greatly improved the water supply. Insufficiency of fodder and water is however still reported in parts of Jessore, Gaya and Monghyr. The number of persons on test works in Muzaffarpur, and Bhagalpur was 2,351 and the famine relief works in Darbhanga were attended by 49,474 persons Gratuitous relief was given to 33,442 persons in Muzaffarpur, Darbhanga, Bhagalpur, Purnea, Puri and Palamau.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—Workers exclusive of dependants 49,474; on gratuitous relief—(*a*) dependants of workers 11,742; (*b*) poor-houses or kitchens 2,007, and (*c*) village doles or other relief 12,272; total gratuitously relieved 26,021. Grand total on relief 76,095. Further and good rain fell during the week throughout the district. Agricultural operations have been resumed; hence the numbers on works have decreased. The scarcity of water has been much relieved by the recent rain. The distress caused by the failure of crops tends to increase Workers are in fair condition. The condition of people is improving and emaciation is less noticeable. Prices show a marked tendency to rise, especially in the interior, away from railway stations. Prices 12 to 13 seers per rupee.

United Provinces.—Heavy rain fell in all districts, the falls almost everywhere being over an inch. Almost all districts report damage from rain to the crops on the threshing floors, the extent of which has still to be ascertained. Generally however the damage has probably been slight. Some damage to extra crops is also reported from a number of districts and mangoes have suffered in places. On the other hand the rain did good to the standing crops in the higher hills in Kumaun and in the interior of Dehra Dun. Sugarcane has benefited generally The water supply and fodder are now everywhere adequate and the people have been enabled to commence ploughing for the autumn sowings. Scarcity is about to be declared in part of South Garhwal. In Almora standing crops are poor and in Kheri the outturn has not been good; elsewhere prospects are generally statisfactory. Cattle disease is reported from twenty-seven districts but the condition of agricultural stock is on the whole good. Prices are falling or are easier in ten districts; are rising in ten; and are stationary or fluctuating elsewhere.

The weekly report on the famine and scarcity is as follows:—The condition of the people on relief continues good in Bijaigarh, Kera Mangraur and Bahraich and is fairly good in Basti. The general health is good but fever is prevalent in places Crime is below normal in Basti and normal elsewhere. Three civil and five aided works and one unaided work are in progress and one poor-house is open in Bijaigarh; one civil work and 4 aided works in Kera Mangraur; 5 civil works in Bahraich and 3 more will shortly be started there; one departmental work, 6 aided works and one poor-house in Basti The increase in the numbers relieved is due to the termination of all harvesting operations. The total numbers on relief are:—on relief works 13,285; on aided works 9,087; on unaided works 317; on gratuitous relief 7,800; in poor-houses 145; dependants 162; on private works 36; total 30,832. Prices:—Bijaigarh 15; Kera Mangraur 15; Basti 16; and Bahraich 14 seers per rupee.

Punjab.—Good rain has fallen in all districts. Hailstones are reported from Delhi, Ambala, Ferozepore and Lyallpur. Harvesting of spring crops continues. It was interrupted by rain in Amritsar, Sialkot and Gujranwala. The condition and expected yield of spring crops on irrigated areas are generally good to average and on unirrigated areas average to below the average. The recent rain has somewhat damaged spring crops, especially gram in Hissar, Ambala, Ferozepore, Sialkot, Lahore, Gujranwala, Lyallpur and Jhang and fodder in Delhi and Ludhiana. Tobacco has been slightly damaged by hailstorm in parts of Delhi. Sowings of extra spring and autumn crops continue. Prices are high and have risen slightly in some districts. Cattle are generally in good condition. Fodder is sufficient except in Amritsar, Lyallpur, Multan and parts of Jhang.

North-West Frontier Province—Rain fell during the week all over the Province, ranging from 21 cents in Kohat to 95 cents in Hazara, and was beneficial to unirrigated crops. The condition of standing crops is generally good on irrigated lands and from average to below the average on unirrigated areas. Hail fell in certain parts of the Peshawar and Dera Ismail Khan districts but no damage was done to crops except in some villages of the Mardan tahsil in the Peshawar district. In the Bannu district, harvesting of wheat has commenced but that of gram and barley on lands cultivated by rain is finished. Barley is also being reaped in the Peshawar district. The outturn of spring crops is expected to be average. Sowings of extra spring crops, sugarcane and cotton continue. The water supply in canals is sufficient. Irrigation from the Paharpur canal in the Dera Ismail Khan district continues. Cattle are generally in good condition. The public health is good. Prices show a tendency to fall. Prices:—wheat 8½ to 11½; gram 13¼ to 14¾; maize 11$\frac{9}{16}$ to 18¾; and *bajra* 13 to 14¾ seers per rupee.

Jammu.—The rainfall during the week was fair. Prices are stationary. Wheat sells from 7 to 14 and maize from 11 to 24 seers per rupee. The condition of standing crops is fair. Cattle disease is reported from Mandal ilaka of the Kathua tahsil. Fodder is sufficient.

Kashmir—The weather was bright with slight rain. Spring crops are average particularly the *tilgugloo* crops. Ordinary ploughing and sowing are being made for autumn crops. There is no disease among cattle. The supply of fodder is average. Prices are unchanged

Rajputana.—The rainfall during the week was general. The minimum fall was 14 cents in Bikaner and the maximum 217 cents in Dholpur. Standing crops have been slightly damaged by rain in Marwar, Mewar, Tonk and Ajmer-Merwara, also harvested crops in Bharatpur and Karauli. The estimated outturn is fair to good. Cattle disease is prevalent in Bharatpur. The fodder and water supply is sufficient Prices are generally steady.

Central India.—The rainfall during the week was slight but general. Harvesting of spring crops is almost completed. Land is being prepared for autumn crops in parts of Malwa and Bhopawar. Agricultural stock are satisfactory except for some cattle disease. Prices are falling in parts of Bundelkhand and are stationary but high elsewhere. Opium extraction is almost completed.

Central Provinces.—The weather continued unsettled and thunder-storms caused local showers in all districts excepting Wardha, Buldana and Yeotmal. The rainfall registered (in inches) was:—Mandla 5¼; Balaghat 3½; Drug 3; Jubbulpore, Narsinghpur, Raipur and Bilaspur each 2; and Nagpur, Saugor, Damoh, Seoni and Chhindwara from 1 to 1½. Elsewhere it did not exceed 60 cents. In the northern districts, the Nagpur country, Bilaspur and Amraoti, the rain was accompanied by hail which in some places caused slight damage to crops on threshing floors. Cold weather cotton suffered somewhat in Chanda and *mahua* in Narsinghpur. Minor crops on beds of rivers were washed away in Bhandara and Balaghat. Threshing and winnowing of spring crops have been completed in most parts of the province but have been hindered by rain and wind in some districts. Preparation of land for sowings of next autumn crops continues. Cattle are in good condition Fodder and water are sufficient. Prices:—wheat remained stationary in fourteen districts; *juar* and gram in sixteen; and rice in twelve. Wheat rose by 2¼ seers per rupee in Drug. The number of weavers on relief was 1,267.

Feudatory States.—Thunder-storms gave rain in ten States ranging from 36 cents in Sirguja to 6¾ inches in Raj Nandgaon. It was accompanied by hail in the latter State. Threshing and winnowing have practically been completed. Repairs to field embankments and preparation of land for next autumn crops are in progress. Fodder and water are adequate everywhere. Prices exhibit a tendency to rise slightly in five States. Rice rose by 2 seers per rupee in Sakti.

Bombay.—Slight rain fell during the week in parts of Sind, Gujarat, Colaba, Ratnagiri, East Khandesh, the Gujarat Native States, Baroda and Kolhapur. Standing spring crops have been slightly damaged by hailstorm in parts of Sukkur and by frost in parts of Ahmedabad. Standing crops are generally in fair to good condition elsewhere. Harvesting of spring crops has been completed in the Panch Mahals, Satara, Bijapur and Palanpur; it is nearly over in Karachi, East Khandesh, Nasik and Savantvadi; and continues in parts of Sind, Kaira and Kanara. Threshing is nearly completed in Colaba and Ahmednagar and is in progress in parts of Sukkur, Hyderabad, Broach, West Khandesh, Palanpur and Mahi Kantha. Cotton-picking has been completed in the

Karnatak and Kolhapur and continues in parts of Gujarat, Kathiawar, Baroda, Cutch and Rewa Kantha. Lands are being prepared for next season in parts of Karachi, Hyderabad, Gujarat, the Konkan, the Deccan, Dharwar, Kathiawar, Baroda and Kolhapur. The supply of fodder is adequate except in parts of West Khandesh, Nasik, Belgaum and Kolhapur. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water is adequate except in parts of Kanara, West Khandesh, Nasik, Bijapur and Belgaum. Water for irrigation is sufficient except in parts of Surat, West Khandesh, Nasik, Poona, Bijapur and Belgaum. The prices of food grains have fallen slightly in Sukkur, Satara and Dharwar; have risen slightly in Hyderabad, Broach, East Khandesh and Poona; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 26 to 40 per cent.; in Gujarat 20 to 63 per cent.; in the Konkan 3 to 25 per cent.; in the Deccan 17 to 38 per cent.; and in the Karnatak 32 to 65 per cent. less than the normal. Stocks of grain are adequate. Emigration on a small scale is progressing in Bijapur. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition The numbers on relief in Bijapur are :—workers 288; on gratuitous relief 10.

Hyderabad.—Report not received.

Mysore.—There was good rain during the week in Bangalore and Kolar and slight rain in other places. Prices of food grains are steady and markets are well supplied. Ploughing operations are in progress. Prospects of the season have improved but more rain is needed all over the State. Cattle are generally healthy but cattle disease is prevalent in some localities. There is scarcity of fodder in some parts.

Coorg.—The rainfall during the week was 1 cent. Coffee blossoms are out. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was heavy in Madras, Godavari and Kistna; good in Vizagapatam, Ganjam, Salem and Guntur; *nil* in Bellary and South Canara; and light to fair elsewhere. Irrigation supplies are insufficient in parts of all districts except Vizagapatam, Godavari, Kistna, Chingleput, Coimbatore, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair and have benefited by the recent rains; but some in parts of North Arcot and South Canara are withering. Harvests continue with outturn poor to normal. Pasture is sufficient in Vizagapatam, Godavari, Chingleput, Madras, South Arcot, North Arcot, Salem, Coimbatore and the Nilgiris. Fodder is scanty in parts of Guntur, the Deccan and North Arcot. The condition of cattle is generally good. The price of rice is stationary in eleven districts; has fallen in nine; and has risen in three. The prices of millets have fluctuated as follows :—*Ragi* is stationary in six districts; has fallen in ten; and has risen in five. *Cholam* is stationary in four districts; has fallen in four; and has risen in six. *Cumbu* is stationary in six districts; has fallen in three; and has risen in six. The public health is generally good. Prospects are fair. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

Nepal.—*Report for the quarter ending 15th April 1909.*—The rainfall for the period was ·86 inch as compared with 2·08 inches for the corresponding period of last year. The rainfall for the season is not sufficient for the spring crop and more rain is much needed.

January and *February*.—The second crop of potatoes and winter vegetables were sown.

March.—In the Terai, the spring crop, *i. e.*, wheat, barley and gram, was harvested and the outturn was fair. *Makai* sowing was commenced in the hills.

April.—The wheat and barley crops in the hills are being harvested and the second crop of potatoes is nearly ready to be dug. Peas (small) are being gathered. Fields are being prepared for pepper. The wheat, barley and potato crops are suffering for want of rain, which is very badly wanted.

The health of live stock is reported to be good. The market is well stocked and the prices of food grains continue normal.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the otals reported in the telegraphic famine reports published weekly in the Supplement to the *Gazette of India.*

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief."

C. F. ANDERSON, *Capt., R.E.*,
for Secretary, Railway Board.

Simla, the 29th April 1909.

SUPPLEMENT TO THE GAZETTE OF INDIA, MAY 1, 1909.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla*.

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MAY 1, 1909.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1909

From the 3rd April next till further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 27th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

" It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

Rates of subscription.	Per annum. R	a.	p.
Subscription for *Gazette* and Supplement	15	0	0
Postage	5	8	0
Subscription for Parts I, II, and III, or any of them	6	0	0
Postage	2	8	0
Subscription for Parts IV, V, and VI, or any of them	4	0	0
Postage	2	8	0
Subscription for Supplement only	5	0	0
Postage	3	0	0
Subscription for Supplement and Part VI	5	0	0
Postage	3	0	0
For a single copy of the *Gazette* and Supplement	0	8	0
For a single copy of Parts I, II, and III, or IV, V, and VI, or Supplement	0	4	0

J. A. ROBERTSON,
Offg. Comptroller General.

The 30th April 1909.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 29th April 1909.

NOTIFICATIONS.

No. 1664 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 26th April 1909 :—

No. 205 of 1909.—John James Marsland, general manager, Messrs. Marsland, Price & Co., Limited, Nesbit road, Mazagon, Bombay. *Improvements in walls, roofs, floors, etc., made of concrete or other suitable material and the like.*

No. 206 of 1909.—Hukam Chand, agriculturist, resident of village Bakhlaur *viâ* Phillour, district Jullundhar, Punjab. *Bullock power engine.*

No. 207 of 1909.—Edwin Thomas Low, Rangoon. *A rotary paddy dryer.*

No. 208 of 1909.—Hara Dhan Mandal, mechanic, Dhurmtollah, Khurut, Howrah. *Pulley power jute press (regulated by means of connecting rods linked to the crank shaped ends of its arms).*

No. 209 of 1909.—Peter Martin, warehouse supervisor, Port Commissioners' Jetties, Calcutta, residing at 20 Metcalfe street, Calcutta, India. *Improved treatment of iron or steel to prevent rust or corrosion.*

No. 210 of 1909.—Tarak Nath Mukerjee, artist, resident of Dakhinparah, Belghoria, in the district of Twenty-four Purgunnahs. *An improved gate for the manufacture of cooking pans, etc.*

No. 211 of 1909.—Mirza Mohammad Aslam Beg, agriculturist and managing proprietor, of the Lahore Iron Works, outside Bhatigate, Lahore. *A water lifting machine, named Butler Charsa lifter.*

No. 212 of 1909.—John Alfonzo Wesener, chemist, of 103 State street, Chicago, United States of America. *Apparatus for diluting and applying flour bleach.*

No. 1665 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2, Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 336 of 1908.—The Westinghouse Metal Filament Lamp Company, Limited, manufacturers, of 2 Norfolk street, Strand, London. *Improvements relating to electric incandescent lamps.* (Specification filed 20 April 1909.)

No. 354 of 1908.—Harry Parker Gibbs, chief electrical engineer to the Government of Mysore, and Harold Eric Ormerod, motor engineer, both residing in Bangalore. *An easily detachable rim for motor cars to be known as "The Ormerod Gibbs detachable rim."* (Specification filed 16 April 1909.)

No. 374 of 1908.—Charles McLachlan Graham, civil servant, of 16 Isabella street, Malvern, in the state of Victoria, commonwealth of Australia. *An improved insulator.* (Specification filed 20 April 1909.)

No. 388 of 1908.—Maschinenfabrik Munchen, G. m. b. H., of No. 88 Blutenburgstrasse, Munchen, Germany. *A machine for covering in places strips of cigaret-paper with mouth-piece material.* (Specification filed 20 April 1909.)

No. 389 of 1908.—Rudolf Krog, managing director, of Golzern, kingdom of Saxony, German Empire. *Improvements in the treatment of fibrous plants for disintegrating, opening up or reducing the same.* (Specification filed 20 April 1909.)

No. 390 of 1908.—William Henry McGauley, electrical engineer, of 124 William street, East Orange, New Jersey, United States of America. *Means for lubricating sleeve bearings.* (Specification filed 20 April 1909.)

No. 534 of 1908.—William Robert Sykes, engineer, of 26 Voltaire road, Clapham, London, S.W., and Charles Joseph Cooke, electrical engineer, of 112 Station road, Wood Green, London, N. *Improvements in the control of railway traffic by means of the block telegraph system of signalling.* (Specification filed 15 April 1909.)

No. 325 of 1908.—Newton Kibler Bowman, mining engineer, of North Lawrence, Ohio, United States of America. *Improvements in means for receiving mails delivered by passing trains.* (Specification filed 20 April 1909.)

No. 378 of 1908.—William Griffith Williams, contractor, residing on the Klipriversberg Estate, near Johannesburg, Transvaal. *Improvements in extracting metals from their ores.* (Specification filed 20 April 1909.)

No. 387 of 1908.—Henry Gauntlett Raikes, gentleman, of 62 Frith street, Soho, in the county of London, England. *Improvements in, and relating to, vessels for containing liquids of an inflammable nature.* (Specification filed 20 April 1909.)

No. 393 of 1908.—Ernest Ivan Jones, importer, of 8/2 Hastings street, Calcutta *Improvements in driving bands for jute spinning frames and the like.* (Specification filed 20 April 1909.)

No 399 of 1908.—John Forster, engineer, of Wynne House, St. Helens, in the county of Lancaster, England. *Improvements in or relating to machines for making glass articles.* (Specification filed 20 April 1909.)

No. 423 of 1908.—Thomas Evans and Sons (Poplar) Limited, engineers, of Lower North street, Poplar, in the county of London, E., England. *Improvements in smoke preventing devices.* (Specification filed 20 April 1909.)

No. 424 of 1908.—Alexander John Arbuckle, mechanical engineer, of 1 Main street, Belgravia, near Johannesburg, Transvaal, and Alfred Osborne, mine manager, of 1 Main street, Belgravia aforesaid. *Improvements in rotary filtering apparatus.* (Specification filed 20 April 1909.)

No. 425 of 1908.—Francis Harrison, electrical engineer, of 14 Ossian road, Stroud Green, London, N., England, and Christoph Heinrich Dorman, electrical chemist, of 82 Duckett road, Harringay, London, N., England. *Process for producing tungsten metal combinations.* (Specification filed 20 April 1909.)

No. 426 of 1908.—Charles Jennings Hillman, draughtsman, of No 6 Dyers Buildings, Holborn, in the city of London, England. *A new or improved photographic printing device, particularly applicable for use in the duplicate of drawings.* (Specification filed 29 April 1909.)

No. 427 of 1908.—The Metals Extraction Corporation Limited, of Finsbury House, Blomfield street, London, E.C., England. *Improvements in the separation of zinc from its ores or compounds.* (Specification filed 20 April 1909.)

No. 430 of 1908.—George Harker, doctor of science of the University of London, of 35 Boulevarde, Petersham, near Sydney, in the state of New South Wales, Australia. *Improvements in apparatus for fumigating and disinfecting ships, buildings and sewers.* (Specification filed 20 April 1909.)

No. 439 of 1908.—Robert Morrison Abraham, electrical engineer, of 10 Norfolk Mansions, Battersea Park, in the county of London, England, and Samuel Lear Glenn, signal engineer of "Exon," York road, Woking, in the county of Surrey, England. *Improvements in or relating to railway signalling systems and apparatus.* (Specification filed 20 April 1909.)

No. 440 of 1908.—Jules Paul Lajoie, engineer, residing at Taverny, Avenue Delariviere, Seine-&-Oise. *Improvements in apparatus for the purification of water used for manufacturing purposes.* (Specification filed 20 April 1909.)

No. 441 of 1908.—Stephen Edward Gunyon, chartered patent agent, of 115 Cannon street, in the city of London, England. *A new or improved knot-tying device.* (Specification filed 20 April 1909.)

No. 1666 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 272 of 1896.—Hugh Jorwerth Roberts. *A baling press.* (From 12 May 1909 to 12 May 1910.)

No. 41 of 1899.—Edward Tyer. *Improvements in railway signals.* (From 7 June 1909 to 7 June 1910.)

No. 67 of 1900.—Francis Edward Elmore. *Improvements in separating metallic from rocky constituents of ores and apparatus therefor.* (From 6 June 1909 to 6 June 1910.)

No. 175 of 1901.—Joseph Fuhrer. *Improvements in explosives.* (From 22 June 1909 to 22 June 1910.)

No. 301 of 1901.—Alexander Gray. *An improved covering for steam-pipes, cylinders and other similar structures.* (From 2 June 1909 to 2 June 1910.)

No. 334 of 1901.—Jean Vincent Emmanuel Thiollier. *Improved means for fixing bolts, screws and similar articles in soft substances such as wood.* (From 3 May 1909 to 3 May 1910.)

No. 59 of 1902.—The American Machine Telephone Company, Limited. *Improved automatic electric exchange apparatus.* (From 7 May 1909 to 7 May 1910.)

No. 454 of 1902.—Wilhelm Constein. *An improved process for the decomposition of esters of fatty acids.* (From 29 July 1909 to 29 July 1910.)

No. 1 of 1903.—Arthur Kitson. *Improvements in or pertaining to vapour burning apparatus.* (From 29 April 1909 to 29 April 1910.)

No. 376 of 1903.—Hans Siegwart. *Improvements in or relating to apparatus for cutting beams, girders and other structures, particularly to those made of artificial stone or the like.* (From 11 May 1909 to 11 May 1910.)

No. 377 of 1903.—Hans Siegwart. *Improvements in or relating to cores or formers for use in the manufacture of hollow girders or structures.* (From 11 May 1909 to 11 May 1910.)

No. 412 of 1904.—Sven Carlson. *Improvements in petroleum burners with inverted flame.* (From 10 May 1909 to 10 May 1910.)

No. 416 of 1904.—John Gell. *Improvements in apparatus for perforating tape for automatic telegraph instruments or for the like purposes.* (From 11 May 1909 to 11 May 1910.)

No. 493 of 1904.—Arthur Stein. *Improved process for maling a product for use as food for animals and for other purposes, and apparatus therefor.* (From 6 June 1909 to 6 June 1910.)

No. 527 of 1904.—The Badiche Anilin & Soda Fabrik. *Improvements in the preparation or manufacture of indigo paste for direct use in the fermentation vat.* (From 17 July 1909 to 17 July 1910.)

No. 94 of 1905.—Wilbur Alson Hendryx. *A process for treating ores.* (From 24 May 1909 to 24 May 1910.)

No. 95 of 1905.—Wilbur Alson Hendryx. *An apparatus for extracting metals from their ores and solutions, and for agitating purposes.* (From 24 May 1909 to 24 May 1910.)

No. 1667 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased :—

No. 215 of 1904.—James Henry Apjohn. *Improvements in tea bulkers or blenders.* (Specification filed 18 January 1905.)

No. 263 of 1904.—Lemuel Mellett. *Improvements in or relating to ring spindles for ring spinning or twisting machines.* (Specification filed 20 January 1905.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

No. 99 of 1903.—Arthur Burden Campbell Rogers. *Improvements in non-conducting compositions.* (Specification filed 19 January 1904.)

Fee in respect of the continuance of an exclusive privilege—

4 (*b*) After the expiration of the fourth year and before the expiration of the fifth year from the date of the filing of the specification—

Fee in respect of the continuance of an exclusive privilege—

4 (*i*) After the expiration of the eleventh year and before the expiration of the twelfth year from the date of the filing of the specification—

The sum of R100 for the above invention.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905, 1906, 1907 and 1908, entitled 'Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified : or if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. A new and revised edition is now on sale. Royal 8vo volumes, paper cover, price one rupee or 1*s*. 6*d*. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

A copy of the Bill, which it is proposed to introduce to amend the law relating to the protection of Inventions and Designs, together with a statement of objects and reasons and notes on clauses, has been placed in the visitors' room of the Patents Office for inspection. Copies, price one rupee, may be obtained on application to the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and Designs Act, V of 1888.

THE CIVIL ENGINEERING COLLEGE, SIBPUR.

ENGINEER DEPARTMENT.

SESSION 1909-10.

The following course is offered:—A 4 year course leading to the Bachelor of Engineering degree of the Calcutta University in the Civil Engineering branch.

The session begins on November 1st, 1909.

Two classes of students will be admitted:—

(1) *Regular students* who must reside at the college (number to be admitted limited to 32)

(2) *Special students* (for whom 8 vacancies are reserved).

Regular students are students from Bengal, Burma and Eastern Bengal and Assam who intend to go through the Regular course of study leading to the degree of Bachelor of Engineering. Candidates with the following qualifications are eligible for admission as regular students:—

(1) B. Sc.'s }
(2) B A.'s } must be below 23 years of age on January 1st, 1909.
(3) Intermediate in Science.
(4) Intermediate in Arts (with Physics or Chemistry).
(5) First Arts.

Candidates in (3), (4) and (5) must be under 21 years of age on January 1st, 1909.

The age statement as given on the Calcutta University Entrance Examination certificate alone is accepted.

The selection of candidates for admission is entrusted to the Principal, who will take into account the following factors.

The standard by which the applicant has qualified, the subjects in which he has qualified, his position on the list of merit, and his age.

Candidates for admission must apply to the Principal on the prescribed form not later than June 15th, they shall produce with their application a detailed statement obtained from the Registrar of the Calcutta University showing the marks obtained by them at the B.Sc., Intermediate Science or other Examination upon which they base their claim for admission. The application must be accompanied by a registration fee of one rupee which will not be returned.

The tuition fee for regular students is payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (first two years) R10 monthly.

Graduate Course in Engineering (last two years) R15 monthly.

Scholarships:—

The following scholarships are offered, their award will be made after the admissions are completed, they will not be tenable by students who hold other Government or University scholarships:—

Open scholarships tenable for two years from the opening of the session in November—

One of R20 monthly.
" " R15 "
Six of R10 "

Reserved for Europeans and Eurasians—

One of R20 monthly.
" " R10 "

Every applicant for admission to the college must produce with his application for admission a medical certificate in the prescribed form signed within one month of its submission by a Civil Surgeon or by the Resident Medical Officer in charge of the college. No other form will be accepted. If the Report is unsatisfactory the application will be rejected

Applicants wishing to obtain a certificate from the college Resident Medical Officer should present themselves at the Dispensary at the Civil Engineering College on Wednesdays and Saturdays between the hours of 7 and 10 A.M.

Special students include the sons of professional men (Engineers), owners of landed or mineral property, and others who wish to receive training in connection with engineering business or the development of the country and its resources.

They are not eligible for any posts guaranteed to regular students, for scholarships or prizes and shall in no case be transferred to the list of regular students.

Special students are admitted to the 1st, 2nd, 3rd or 4th years of the College Course at the discretion of the Principal, they shall have as nearly as possible the same educational qualifications as regular students and no limits of age are imposed.

Special students are required to submit a certificate of good character on admission and must apply before July 1st, their applications must be accompanied by:—

(1) A satisfactory proof of their educational attainments.
(2) A full statement as to why the candidate is seeking admission as a special student.
(3) A statement of the course of study the candidate wishes to follow.

Special students taking the regular course are required to appear at the ordinary College Examinations and if eligible at the University Examinations also.

The Tuition Fees for special students are payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (1st two years) R15 monthly.
Graduate Course in Engineering (last two years) R20 "

A candidate for admission as a special student is not required to submit a medical certificate.

For copies of the Rules of the Engineer Department, forms of application for admission and any other information apply to the undersigned.

B. HEATON,
Principal, Civil Engineering College, Sibpur.

The public are cautioned against purchasing or otherwise dealing with the above-mentioned security.

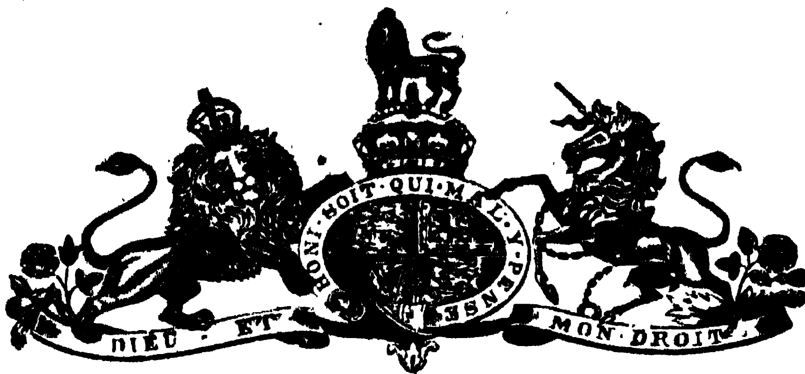
Name of the advertiser—C. V. RAMAN,
Assistant Accountant Genl.,
In charge Paper Currency, Rangoon.

UNCOVENANTED SERVICE FAMILY PENSION FUND.

NOTICE.

Notice is hereby given that in pursuance of a requisition of twelve qualified subscribers to the Uncovenanted Service Family Pension Fund (resident in England) a special meeting of the subscribers to the Fund will be held in the Town Hall on Saturday, the 12th June 1909, at 3 P.M., to consider the advisability of referring again to the general body of subscribers the revision and amendment of the proviso added to Rule 54 by circular No. 1 of the 10th April 1907.



Under the above proviso every subscriber's share of surplus at the commencement of each year was restricted to an amount not exceeding his registered annual subscription, any surplus in excess of this limit being held over for addition to the surplus to be distributed in the following year, instead of being available for refund to the subscriber concerned in cash or for enhancement of the pension assured.

The requisitionists propose that the above proviso be repealed in view to a reversion to the practice of treating excess surplus as available for refund in cash or for enhancement of the pension assured.

Subscribers who cannot attend the above meeting have the right to vote by proxy, the votes to be valid should be stamped with a one-anna stamp and registered in this office not later than the 9th June 1909.

RIVERS HOWE,
Secretary.

52-3, Park Street,
Calcutta;
The 18th February 1909.

H. A. STUART,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 6th May 1909, based on the Indian Daily Weather Reports of the period.

The normal amount of rain fell during the week in Eastern Bengal and Assam, but rainfall was lighter than usual in the provinces of Bengal and Burma. On the 5th May a depression appeared off the Coromandel coast and, travelling slowly westward across the peninsula, was in the neighbourhood of Mangalore by the morning of the 6th. It occasioned a strong inflow of humid winds from the adjacent sea areas and moderate to heavy rain was reported from south India on the 4th, 5th and 6th.

Temperature was in general defect in northwest India and in the region of rainfall in the peninsula: in other parts of the country it was fairly normal. The highest temperature recorded was 113·7° at Akola.

Burma.—Rainfall was light and scattered. Skies were lightly to moderately clouded and temperature was nearly normal.

Northeast India, including Orissa.—Rainfall was confined almost entirely to Eastern Bengal and Assam. Skies were clear or only lightly clouded in the western districts, but elsewhere moderate to thick cloud was present on most days of the week. On the 30th April temperature was in general defect: it then rose gradually and by the 6th May was normal or in excess.

The United Provinces, Central India and the Central Provinces.—Amraoti and Seoni had light falls of rain. Skies were cloudless except on the 4th when cloud was reported from Berar and its vicinity. Normal temperature conditions prevailed in the Central Provinces: in the United Provinces and Central India temperature was normal or in defect, the deficiency being most marked in the temperatures reported on the 3rd and 4th.

Northwest India.—Light rain fell at Peshawar and Cherat. Skies were practically free from cloud except in Kashmir. Temperature fell rapidly in Baluchistan on the 30th April and the fall extended eastwards, with the result that weather was cooler than usual in northwest India almost throughout the week.

The Peninsula.—The rainfall reported on the first four days of the week was light and local in character, but during the last three days the depression from the Bay gave general and moderate to heavy rain in south India. Skies were clear or lightly clouded in the north of the division: in the south they were completely overcast from the 3rd to the end of the week. Temperature fell, owing to the rainfall, and was largely below the normal in parts of Madras and of Mysore.

The following summarises the chief rainfall amounts as reported at 8 hrs. each day:—

April 30th. Dibrugarh 1·45" and Gauhati 1·38".

May 1st. Barisal 2·00".

" 2nd. Kyaukpyu 2·36" and Silchar 1·52".

" 3rd. Jalpaiguri 1·32".

" 4th. Madras 2·73" and Trivandrum 2·12".

" 5th. Cherra Poonjee 4·02", Madras 5·22", Ootacamund 3·48" and Calicut 3·54".

" 6th. Cherra Poonjee 4·11", Nagpur 2·30", Bangalore 5·82", Mangalore 2·71", Calicut 6·98", Cochin 2·22", Trivandrum 4·75" and Mercara 4·03".

The rainfall of the week was much heavier than usual in Mysore, Malabar and southeast Madras. A new rainfall period commences this week.

DIVISION.	Rainfall data for week ending on 6th May 1909.			Rainfall data from 30th April 1909 to 6th May 1909.				
	Average actual rainfall in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Average actual rainfall of season to date in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Seasonal percentage departure from normal. This week.	Seasonal percentage departure from normal. Last week.

for Director-General of Observatories.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;
The 6th May 1909.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 1st May 1909.

Burma.—Showers of rain fell during the week in many districts. Clearing of hill sides for rice cultivation continues. Harvesting of spring rice and dry spring crops is approaching completion. In Upper Burma, ploughing for early monsoon crops is progressing and some sowing and planting have been done in favoured places. Standing crops are generally in good condition. The price of unhusked rice is normal at export markets, but high in the Arracan ports. Prices are normal in up-country districts.

Eastern Bengal and Assam.—The weather continues rainy. Sowing of jute and autumn and winter rice has made considerable progress. Weeding has commenced in some districts, though in others notably Tippera, Noakhali and Bakarganj, field operations have been temporarily stopped and seedlings have been damaged by the excessive rainfall. Reaping of summer rice is in progress in several places. Prospects of tea and all ordinary field crops are good, but the mangoe harvest in Malda will probably be poor. The average price of common rice is substantially the same as last week. The number employed on test relief works in the various districts were as follows:—Dinajpur 3,256; Rangpur 298; Bogra 419; total 3,973. Cattle disease prevails in several districts.

Bengal.—Rain was general all over the Province. The fall was fairly moderate in parts of the Presidency, Bhagalpur, Orissa and Chota Nagpur divisions and also in Bankura, Midnapore, Howrah, Champaran and Cooch Behar. Preparation of lands for autumn crops is in progress. Sowings of jute and other early crops have commenced. The price of common rice has risen in Hooghly, Jessore, Saran, the Sonthal Parganas, Puri, Sambalpur, Palamau, Manbhum and Singhbhum; has fallen in Nadia, Gaya, Champaran and Hazaribagh; and has been stationary in the remaining districts. Cattle disease is reported from several districts. Insufficiency of fodder and water is still reported from parts of Jessore and Gaya. The water scarcity in North Bihar is disappearing owing to the recent good rain. The number of persons on test works in Muzaffarpur and Bhagalpur was [illegible]o and the famine relief works in Darbhanga were attended by 32,860 persons. 33,928 persons were relieved gratuitously in Muzaffarpur, Darbhanga, Bhagalpur, Purnea, Puri and Palamau.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—Workers exclusive of dependants 32,860; on gratuitous relief—(*a*) dependants of workers 9,334; (*b*) poor-houses or kitchens 2,967 and (*c*) village doles or other relief 12,514; total gratuitously relieved 24,815. Grand total on relief 57,675. Distress due to want of agricultural employment has been temporarily reduced by the recent rainfall, but distress due to failure of crops continues. The number on relief works shows a large and satisfactory decrease of about 16,000 caused by the resumption of agricultural work, the change in the price basis for wages and the distribution of *takavi* loans. Workers are in fairly good condition. There is no wandering. No general emaciation is noticeable but new admissions to poor-houses are sometimes very emaciated. Prices have risen everywhere. Prices 12 to 12½ seers per rupee.

United Provinces.—Rain fell during the week in all districts varying from a few cents to over an inch in Etawah, Etah, Cawnpore and Bareilly. Considerable damage is reported to crops and grain on threshing floors by the rain of this and the preceding week. Generally however the damage has not been great whilst sugarcane has been much benefited in some districts. The rain caused damage to extra crops. Standing crops in Dehra are not good and in Kheri, where a test work was opened on the 26th April, the outturn

has been poor. Elsewhere prospects are satisfactory. Cattle disease is reported from twenty seven districts but the general condition of agricultural stock is good. Fodder, water and supplies are adequate. Prices have fallen in eight districts; are rising in ten; and are stationary elsewhere or fluctuating.

The weekly report on the famine and scarcity is as follows :—The health of persons on relief is good in Bijaigarh, Kera Mangraur and Bahraich and fairly good in Basti. Crime continues below normal in Basti and is normal elsewhere. Three civil and five aided works and one unaided work are in progress and one poor-house is open in Bijaigarh; one civil and four aided works in Kera Mangraur; six civil works and one poor-house in Bahraich; and one departmental work, eight aided works and one poor-house in Basti. The numbers on relief have risen somewhat in Bijaigarh, Bahraich and Basti and have fallen in Kera Mangraur. The numbers on Government relief are :—on relief works 15,365; on aided works 9,169; on test works 330; dependants 296; on gratuitous relief 7,925; in poor-houses 146; on private works 406; total on relief 33,637. Prices :—Bijaigarh 15; Kera Mangraur 15; Basti 16; and Bahraich 14 seers per rupee.

Punjab.—Moderate to light rain has fallen in all districts except Rohtak. Hailstorms are reported from Delhi, Ferozepore, Shahpur, Mianwali, Lyallpur and Multan and have done local damage. Spring crops are being harvested in most districts. Their condition and expected yield on irrigated areas are generally good to average and on unirrigated areas average to below the average. The recent rain has damaged gram to an appreciable extent in nearly all districts. The most serious losses were :—Rohtak 33 to 50 per cent.; Delhi 25 per cent.; and Multan 25 per cent. In other districts the damage is considerably less. The damage to wheat is reported to be 25 per cent. in Delhi; 13 to 20 per cent. in Rohtak; 14 per cent. in Gurgaon; 10 per cent. in Ferozepore, Amritsar and Multan; and in other districts *nil* or below 5 per cent. The most important wheat tracts are those which are least affected and the total provincial loss is under 5 per cent. Practically no damage has been done to oilseeds and barley. Sowings of extra spring and autumn crops continue. Prices are high and have risen slightly in some districts. Cattle are generally in good condition. Fodder is sufficient except in Amritsar, Gujranwala, Lyallpur, Multan and in parts of Mianwali and Jhang.

North-West Frontier Province.—The rainfall during the week was 38 cents in Hazara, 91 cents in Peshawar and 19 cents in Bannu; and *nil* elsewhere. Hail fell in the Peshawar and Bannu districts and some damage was done to spring and extra spring crops in some villages of the Peshawar and Nowshera tahsils in the Peshawar district. Standing crops are generally in good condition on irrigated lands and from average to below the average on unirrigated areas. Harvesting of spring crops continues but that of gram and barley on lands cultivated by rain in the Bannu district has been finished. The yield of spring crops is expected to be average. Sowings of extra spring and autumn crops continue. The water supply in canals is ample. There have been floods in the Kurram and Tochi rivers in Bannu. Irrigation from the Paharpur canal in the Dera Ismail Khan district continues. Fodder is sufficient. The condition of cattle is generally good except that cattle disease is reported in certain villages. The public health is good. Prices, except that of *bajra*, show a slight tendency to rise. Prices :—wheat 7½ to 11; gram 13 to 15; maize 11$\frac{9}{16}$ to 18½; and *bajra* 13 to 14¾ seers per rupee.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 7 to 12 and maize from 11 to 20 seers per rupee. The condition of standing crops is fair. Fodder is sufficient. Spring harvesting is in progress.

Kashmir.—The weather was bright with slight rain The condition of spring crops is average, specially the *tilgugloo* crop. Ploughing for autumn crops is going on. There is no disease among cattle. The condition of fodder is average. Prices are almost stationary.

Rajputana.—The rainfall registered in cents was :—Jaipur 86; Alwar 72; Bharatpur 781; Karauli 166; Dholpur 61; and Bikaner 6 to 97. Slight showers were received in parts of Marwar, Jaisalmer, Bundi and Ajmer. The rain caused slight damage on thresh-ing floors and fields in Marwar, Tonk, Jaipur, Kishangarh, Bharatpur and Karauli. Har-vesting of spring crops continues in a few places and preparations for autumn sowings are in progress in a few others. Cattle disease is prevalent in Mewar and Bharatpur. Fodder is sufficient. Prices show a tendency to fall in Ajmer-Merwara and in four States and are rising in eight States.

Central India.—The rainfall during the week was slight but general except in Indore and Bhopal. Harvesting of spring crops is in progress but some damage is reported in parts of Gwalior on account of the heavy rainfall. Lands are being prepared for autumn crops in parts of Bhopal and Bhopawar. Agricultural stock are satisfactory except for some cattle disease in Bhopal, Baghelkhand, Bundelkhand and Bhopawar. Prices are high but stationary.

Central Provinces.—The weather was warm and occasionally cloudy with high winds. Light local showers not exceeding 73 cents fell in Seoni, Chanda, Wardha, Drug, Bilaspur, Amraoti and Yeotmal. Threshing and winnowing of spring crops continue in the northern districts as operations were somewhat retarded owing to rain and wind last week. Sugarcane in Bhandara and Raipur and minor crops generally in Buldana are reported to be in good condition. Construction of field embankments in the rice districts and preparation of land for sowing of next autumn crops are in full swing. Water is sufficient everywhere except in parts of Hoshangabad. Fodder is getting dear in Damoh. Agricultural stock are doing well. Prices :—wheat in the northern districts and Chhattisgarh became slightly cheaper; and *juar* rose by about 2 seers per rupee in Chanda and Yeotmal. Prices were steady or fluctuated slightly elsewhere. The number of weavers on relief was 881.

Feudatory States.—Thunder-storms caused local showers in nine States and the quantity registered in Sarangarh, Korea, Sirguja and Jashpur ranged from 1½ to 2½ inches. The rain was accompanied by hail in Kawardha. Sugarcane is doing well in Raigarh and Sarangarh. The usual preparation of fields for sowing of the next autumn crops continues. Fodder and water are adequate. Prices:—rice in Sakti, wheat in Sirguja and Jashpur and gram in Korea fell by 2 to 3 seers per rupee. There were no marked variations elsewhere.

Bombay.—Slight rain fell during the week in parts of Larkana, Hyderabad, Kanara, the Karnatak and Kolhapur. Standing crops are generally in fair to good con-dition. Harvesting of spring crops has been completed in Thar and Parkar, East Khan-desh, Satara and Bijapur; it is nearly over in Karachi, Larkana and Nasik; and continues in parts of Sukkur, the Upper Sind Frontier, Kaira, Kanara and Baroda. Threshing has been completed in Ahmednagar; it is nearly over in Colaba; it is in progress in parts of Sukkur, Hyderabad, East and West Khandesh, and Mahi Kantha; and has commenced in Larkana and the Upper Sind Frontier. Cotton-picking continues in parts of Gujarat, Baroda, Cutch and Rewa Kantha. Preparation of lands for next season are generally in progress. The supply of fodder is adequate except in parts of West Khandesh, Nasik, Belgaum and Kolhapur. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water is adequate except in parts of Kanara, West Khandesh, Nasik, Bijapur and Belgaum. Water for irrigation is sufficient except in parts of Surat, West Khandesh, Nasik, Poona, Bijapur and Belgaum. Prices of food grains have fallen slightly in Ahmednagar; have risen in Sukkur, Larkana, the Panch Mahals, Ratnagiri, Kanara, Belgaum and Dharwar; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 30 to 40 per cent.; in Gujarat 20 to 66 per cent.; in the Konkan 3 to 25 per cent.; in the Deccan 17 to 38 per cent.; and in the Karnatak 39 to 79 per cent. less than the normal. Stocks of grain are adequate

Emigration on a small scale is progressing in Bijapur. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. The numbers on relief in Bijapur are :—workers 563; on gratuitous relief 10.

Hyderabad.—The rainfall during the week was 4 cents. Good showers were received in the Adilabad district. The highest falls were—1 inch 40 cents in the Chinnur taluka; 67 cents in the Gulbarga taluka; and 66 cents in the Paloncha and Mahadeopur talukas. There was hardly any rain in other parts. The spring harvest has been completed but is reported to be progressing in Kannar. The late rice crop is fair throughout. The crop has probably been injured only where good showers fell. Lands are under preparation in all districts for the next monsoon sowings. Cattle disease and fodder scarcity are reported in seven and nine talukas respectively. Prices :—wheat 6¾; coarse rice 6¾; and *juar* 14¼ seers per rupee. White *juar* is selling in Hyderabad City at 12 seers per rupee. Yellow *juar* is not available. The highest price is 9 seers in the Paloncha taluka of the Warangal district and the lowest 22 seers in the Nilanga taluka of the Bidar district.

Mysore.—Slight rain fell during the week throughout the State. Prices of food grains are generally steady and markets are fairly well supplied. Ploughing operations are in active progress. Prospects of the season have improved but more rain is needed all over the State. Cattle are generally healthy except that cattle disease continues in some localities. Fodder is available in limited quantities.

Coorg.—The rainfall during the week was 1 inch 48 cents. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was good in the Nilgiris, Ganjam, the Vizagapatam Agency and Madura; *nil* in Cuddapah and Madras; and light to fair elsewhere. Irrigation supplies are insufficient in parts of all districts except Vizagapatam, Godavari, Kistna, Chingleput, Coimbatore, Tanjore, Malabar and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are generally fair and have benefited by the recent rains; but some in parts of South Canara are withering. Harvests continue with outturn poor to normal. Pasture is sufficient in Ganjam, Godavari, Chingleput, Madras, South Arcot, North Arcot, Salem and the Nilgiris. Fodder is scanty in parts of Vizagapatam, Guntur, Anantapur, Cuddapah and North Arcot. The condition of cattle is generally good. The price of rice is stationary in sixteen districts; has fallen in six; and has risen in one. The prices of millets have fluctuated as follows :—*Ragi* is stationary in fourteen districts; has fallen in five; and has risen in two. *Cholam* is stationary in three districts; has fallen in seven; and has risen in four. *Cumbu* is stationary in nine districts; has fallen in five; and has risen in one. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the *Gazette of India.*

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief."

R. W. CARLYLE,

No. 3164-73.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

GENERAL.

Simla, the 4th May 1909.

RESOLUTION.

A report by the Secretary under the Inventions and Designs Act, 1888 (V of 1888), on the working of the Act during the calendar year 1908, is published for general information:

No. 1477-P., dated Calcutta, the 20th April 1909.

From—H. G. GRAVES, Esq., Secretary under the Inventions and Designs Act,

To—The Secretary to the Government of India, Department of Commerce and Industry.

I HAVE the honour to submit, for the information of the Government of India, the Annual Report of the Patents Office during the calendar year 1908.

2. The office, at 2, Bankshall Street, Calcutta, has been in my charge throughout the year.

3. During the year 551 applications were made for leave to file specifications and 471 specifications were filed. The total number of applications under the present Act has been 9,510 and of specifications 7,387. Compared with the previous year there has been a somewhat heavy decrease of 64 in the number of applications and of 37 in the number of specifications filed. On the other hand, the amount received as continuance fees by payment of which existing exclusive privileges are kept in force, has shown a slight increase and the total income of the office has only fallen by Rs. 956. Although the number of applications is so much smaller than last year, it is worthy of note that residents in India are not accountable for the reduction which is solely due to the decrease in the number of foreign applicants.

4. As usual, the railway and textile industries take the lead, though to a somewhat less extent than previously, amongst the wide range of inventions for which protection is sought. One of the features of interest of the year is to be found in the inventions for safe-guarding railway passengers, which arose from some recent notorious incidents. Of the applications that originated in this way two refer to alarm systems, two to modified foot boards, two connect the doors with the brake system, and two others lock the doors by the motion of the train. Some six inventions for locking railway wagon doors have also been put forward for the protection of goods against train-thieves Amongst the textile inventions are to be found four hand looms. Applications of interest in the printing trades show an increase from 9 to 21, largely due to a number of type setting machines.

5. Of the 551 applications made during the year 55 related to inventions that *primâ facie* did not appear to be novel. In accordance with the practice that is now well established, the state of public knowledge was pointed out to the applicant, and he was given an opportunity of amending his application. Including 5 cases pending from the previous year, the result has been that 25 applications were abandoned, 6 were finally refused and leave was granted in 21 cases, 8 being still pending. Altogether leave was granted on 408 of these 551 applications during the year, 14 were rejected, 27 abandoned and 102 were pending on December 31st. 255 specifications were filed in respect of applications filed during the year, while the balance 216 appertained to the applications of the previous year.

6. Exclusive privileges were kept alive by payment of prescribed fees in 612 cases, or 8 less than in the previous year, whilst 428 or 9 more than in 1907, ceased. Of the 7,387 specifications brought on the register, 2,645 are now in force, an increase of 42 as compared with 2,603 at the end of last year. The appended table shows the comparative age and number of these privileges for the various years.

G

7. One application only was made for the extension of an exclusive privilege beyond the normal period of 14 years. After due consideration the Governor General in Council allowed an additional period of seven years, subject to conditions.

8. Sixty-nine applications for the registration of designs, including three outstanding from the previous year, were all disposed of during the period under review. Fifty-six of these designs were registered. The marked increase of 32 as compared with the number in 1907 is largely due to the inclusion of 21 wall papers and borders, presented by one applicant in Bombay. There were also thirteen discs of the same ornamental types which originated in Madras and Delhi as mentioned last year. Eight bangles were also registered. Five applications were abandoned and eight refused, six of the latter being for trade marks or labels, to which the Act does not apply.

9. The work of the office has progressed satisfactorily and has been kept up to date during the year. As in 1906 and 1907 no reference was made to the law officers and any other expert advice that was necessary, was obtained informally. The annual consolidated index of all inventions and designs, for which protection was sought or obtained during 1907, was issued early in the year. Corresponding volumes, entitled "Inventions and Designs", are at this date available for the years 1905 to 1908 at the price of Re. 1 each. A consolidated subject matter index of inventions in the years 1901 to 1907 inclusive was also issued at the same price.

10. The Bill for the amendment of the law relating to patents has been drafted, and in September, was distributed to Local Governments, patent agents and others with the view of eliciting opinions from the manufacturing public and others concerned in the protection of inventions and designs. In its main lines the draft Bill follows the provisions of the United Kingdom Patents and Designs Act of 1907, though it has not gone quite so far as that Act in the matter of compulsory working in the country, for which India as yet is not sufficiently advanced. Replies have not yet been received to all the references but it is hoped that legislation may be possible next season.

11. The usual tables are appended.

Statement showing (a) *number of specifications filed;* (b) *privileges kept in force by payment of continuance fees to end of the 4th to the 14th years;* (c) *privileges expired through non-payment of continuance fees at commencement of the 4th to the 14th years.*

C. F. ANDERSON, *Capt., R.E.,*
for Secretary, Railway Board.

Simla, the 6th May 1909.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MAY 8, 1909.

Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1909.

From the 3rd April next till further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 27th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher at Simla.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

" It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 6th May 1909.

NOTIFICATIONS.

No. 1798 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 3rd May 1909 :—

No. 213 of 1909.—Hiram Percy Maxim, engineer, of 550 Prospect Avenue, in the city of Hartford, state of Connecticut, United States of America. *Improvements in devices for lessening the sound of discharge of guns.*

No. 214 of 1909.—Louis Fessmann, Director, of 19 Johanneshaagstrasse, Augsburg, and Gebhard Hammerle, loom foreman, of 40 Proviantbachstrasse, Augsburg, in the empire of Germany. *An improved mechanical warping frame.*

No. 215 of 1909.—George Gates, machinist, of 151 North Crittenden street, San Jose, county of Santa Clara, state of California, United States of America. *Improved railway rail support and fastener.*

No. 216 of 1909.—Hugo Per Wilhelm Esping, engineer, of Nassjo, in the kingdom of Sweden. *Improvements in apparatus for raising liquids.*

No. 217 of 1909.—The Commercial Products Company, Limited, of 27 & 28 Old Jewry, London, E.C., England. *Improvements in or relating to the production of a plastic and elastic substance.*

No. 218 of 1909.—Edward Brice Killen, engineer, of 52 Queen Victoria street, London, England. *Improvements in or relating to rubber tyres and their attachment to wheels.*

No. 219 of 1909.—Edward Brice Killen, engineer, of 52 Queen Victoria street, London, England. *Improvements in or relating to wooden wheels.*

No. 220 of 1909.—Paul Gaultier, professor, 45 Boulevard de la Republique, Versailles. *Instrument for topographical surveying.*

No. 1799 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2, Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 244 of 1908.—William Walter Henry Silk, engineer, of 11 Bentinck street, Calcutta. *An improved fastening arrangement specially suitable for railway wagon doors.* (Specification filed 15 January 1909.)

No. 348 of 1908.—Frederic Walton, engineer, of 114 Holborn, in the county of London, England. *Improvements in or relating to road vehicle suspension arrangements.* (Specification filed 23 April 1909.)

No. 350 of 1908.—Paul Sabatier, Professor, resident of 11 Allee des Zephyrs of Toulouse, France. *Improvements in and relating to the manufacture of methane or of mixtures of methane and hydrogen.* (Specification filed 23 April 1909.)

No. 459 of 1908.—Dhannaram Heeralall, cycle and motor dealer, of Nagpur, Central Provinces, British India. *A fan.* (Specification filed 20 April 1909.)

No. 535 of 1908.—Henry Edward Dilke Merry, mine manager, of Cuddingwarra, Western Australia, in the commonwealth of Australia. *An improvement relating to the feed screw of rock drills.* (Specification filed 24 April 1909.)

No. 36 of 1909.—L. P. Declozets, civil engineer, of Rangoon, Burma. *A ground nut decorticating machine called the "Simplex."* (Specification filed 23 April 1909.)

No. 68 of 1909.—Badische Anilin and Soda Fabrik, of Ludwigshafen-on-Rhine, in the German Empire. *Improvements relating to bowking material which has been dyed, or printed, with vat colouring matters.* (Specification filed 21 April 1909.)

No. 89 of 1909.—William Tice, engineer, in the employ of Messrs. Bird & Co., of 101/1 Clive street, Calcutta. *Improvements in latrine and like flushes.* (Specification filed 21 April 1909.)

No. 109 of 1909.—Clancy Metals Process Company, a corporation organized and existing under the laws of the state of New York, located at No. 170 Broadway, in the Borough of Manhattan, city, county, and state of New York, United States of America. *Treatment of ores bearing precious metals.* (Specification filed 23 April 1909.)

No. 113 of 1909.—Henry Plunkett Bath Walters, permanent-way inspector, of Eastern Bengal State Railway, of Muragacha, Bengal, British India, and Henry Arthur Fitzherbert Musgrave, executive engineer, of Eastern Bengal State Railway, Baliaghata, British India. *A combined nut lock and washer.* (Specification filed 24 April 1909.)

No. 119 of 1909.—William Jackson, engineer, of Thorn Grove, Mannofield, Aberdeen, North Britain. *Improvements connected with apparatus for drying tea-leaf, or other produce.* (Specification filed 21 April 1909.)

No. 127 of 1909.—John Bruce Bolitho, gentleman, of Rockbeare House, Near Exeter, Devonshire, England. *Improvements in or relating to target practice and aim recording apparatus or the like where no projectile is employed.* (Specification filed 21 April 1909.)

No. 135 of 1909.—Andrew Frederick Crosse, consulting metallurgist, of 41 Oxford Terrace, Hyde Park, in the county of London, England. *Improvements in extracting gold and silver from crushed ore and ore slimes, and means therefor.* (Specification filed 24 April 1909.)

No. 137 of 1909.—Werther Anders Gustaf Von Heidenstam, chemical engineer, of Gamla Kungsholmsbrogatan 54, Stockholm, Sweden, and Karl Louis Felix Friedemann, chemical engineer, of Drottninggatan 53, Stockholm, Sweden. *Process of impregnating wood.* (Specification filed 22 April 1909.)

No. 138 of 1909.—Karl Koszegi, of Baja, Comitat Bacs-Bodrog, in the kingdom of Hungary, and Emil Szechenyi, of Vajszka, Comitat Bacs-Bodrog, in the kingdom of Hungary. *Improvements in cultivating machines.* (Specification filed 22 April 1909.)

No. 139 of 1909.—Niels Schiern Friderichsen, mechanical engineer, of Vesterfaelledvej No. 44, Copenhagen, Denmark. *Machine for casting lead seals and the like.* (Specification filed 24 April 1909.)

No. 141 of 1909.—George Vincent Barton, chemical manufacturer, of "Shirley," Queens Drive, Mossley Hill, in the city of Liverpool, in the county of Lancaster, in the kingdom of England. *Improvements in salts or oxides of lead.* (Specification filed 24 April 1909.)

No. 143 of 1909.—David Suchostawer, engineer of 91 Bedford street, Commercial road, in the county of London, England. *Improvements in or relating to electric traction on the surface contact system.* (Specification filed 24 April 1909.)

No. 1800 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 371 of 1899.—Khasherao Bhagawantrao Jadhava. *Improvements in or relating to the treatment of sewage and in apparatus therefor.* (From 9 May 1909 to 9 May 1910.)

No. 99 of 1900.—John William Mac Gillivray and Herbert Ams Hobson. *The production of a concentrated hopped wort.* (From 15 August 1909 to 15 August 1910.)

No. 431 of 1900.—Marconi's Wireless Telegraph Company, Limited. *Improvements in apparatus for wireless telegraphy.* (From 18 June 1909 to 18 June 1910.)

No. 105 of 1902.—Joseph Allen Baker and William King Baker. *Improvements in or relating to refuse destructors and the like.* (From 9 May 1909 to 9 May 1910.)

No. 169 of 1902.—George Samuel Baker. *Improvements in or relating to refuse destructors and the like.* (From 25 June 1909 to 25 June 1910.)

No. 1801 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 278 of 1904.—David Harrington. *Improvements in spinning rings.* (Specification filed 27 January 1905.)

No. 287 of 1904.—Patrick Duncan Gourlay Clark. *Improvements in apparatus for heating air or gases and economising fuel.* (Specification filed 27 January 1905.)

No. 295 of 1904.—Charles Joshua Greengrass. *An improved air-motor, to be called the (Kena) Direct-Acting air motor.* (Specification filed 28 January 1905.)

No. 344 of 1904.—Edgar Guess. *Improvements in and connected with electrical cash checking machines.* (Specification filed 24 January 1905.)

Fee in respect of the continuance of an exclusive privilege—

4 (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for each of the above inventions.

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to the Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's Office are now on sale to the public at one anna and eight annas a copy, respectively. Consolidated indexes for 1905, 1906, 1907 and 1908, entitled "Inventions and Designs," are also on sale, price one rupee each. They contain a chronological list, subject-matter and name indexes of exclusive privileges for inventions, which have been obtained or applied for in the year, together with lists of designs applications.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified : or if the 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, the applicant shall cause a duplicate copy of the application to be delivered or sent therewith to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issued under its provisions and the notices of the office of Inventions and Designs, to which is added an explanatory memorandum for the guidance of persons applying for protection of Inventions and Designs. A new and revised edition is now on sale. Royal 8vo volumes, paper cover, price one rupee or 1*s*. 6*d*. To be had of the Superintendent, Government Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

A copy of the Bill, which it is proposed to introduce to amend the law relating to the protection of Inventions and Designs, together with a statement of objects and reasons and notes on clauses, has been placed in the visitors' room of the Patents Office for inspection. Copies, price one rupee, may be obtained on application to the Superintendent, Patents Office, 2, Bankshall Street, Calcutta.

H. G. GRAVES,
Secretary under the Inventions and
Designs Act, V of 1888.

4. Draftsmen and Surveyors.
5. Motor Car Drivers.
6. Engine Drivers.
7. Men trained in—
   (a) Photo-Mechanical and Lithographic Work.
   (b) Workshops (both Electrical and Mechanical sides).

E. ATKINSON, Major, R.E.,
Principal, Thomason College, Roorkee.

SULPHATE OF QUININE AND SULPHATE OF CINCHONIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona Alkaloids. Quinine is for sale only to Government officers Cinchonidine is for sale to Government officers and to dealers. Both Quinine and Cinchonidine are for sale for cash only and may be obtained from the Superintendent, Royal Botanic Garden, Sibpur, near Calcutta

The rates for both drugs from 1st April 1909 are as follows:—

For original sealed cases containing not less in one delivery than the undernoted quantities or for any larger quantities R10 per lb. Carriage extra.

Quinine—	In 4 lb. tins	48 lbs.
	" 1 " "	50 "
	" ½ " "	30 "
	" ¼ " "	30 "
	" 1 oz. "	60 "
	" ½ " "	60 "
Cinchonidine—	In 1 lb. tins	50 lbs
	" ½ " "	30 "
	" ¼ " "	30 "

For any less quantity in one delivery than the above R15 per lb. By post 6 annas for every lb. and 4 annas for every half or quarter lb. extra.

THE CIVIL ENGINEERING COLLEGE, SIBPUR.

ENGINEER DEPARTMENT.

SESSION 1909-10.

The following course is offered —A 4-year course leading to the Bachelor of Engineering degree of the Calcutta University in the Civil Engineering branch.

The session begins on November 1st, 1909

Two classes of students will be admitted —

(1) *Regular students* who must reside at the college (number to be admitted limited to 32)

(2) *Special students* (for whom 8 vacancies are reserved).

Regular students are students from Bengal, Burma and Eastern Bengal and Assam who intend to go through the Regular course of study leading to the degree of Bachelor of Engineering. Candidates with the following qualifications are eligible for admission as regular students:—

(1) B. Sc.'s } must be below 23 years of age on January 1st, 1909
(2) B. A.'s }
(3) Intermediate in Science.
(4) Intermediate in Arts (with Physics or Chemistry).
(5) First Arts.

Candidates in (3), (4) and (5) must be under 21 years of age on January 1st, 1909.

The age statement as given on the Calcutta University Entrance Examination certificate alone is accepted.

The selection of candidates for admission is entrusted to the Principal, who will take into account the following factors.

The standard by which the applicant has qualified, the subjects in which he has qualified, his position on the list of merit, and his age.

Candidates for admission must apply to the Principal on the prescribed form not later than June 15th, they shall produce with their application a detailed statement obtained from the Registrar of the Calcutta University showing the marks obtained by them at the B.Sc., Intermediate Science or other Examination upon which they base their claim for admission. The application must be accompanied by a registration fee of one rupee which will not be returned.

The tuition fee for regular students is payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (first two years) R10 monthly.

Graduate Course in Engineering (last two years) R15 monthly.

Scholarships:—

The following scholarships are offered, their award will be made after the admissions are completed, they will not be tenable by students who hold other Government or University scholarships:—

Open scholarships tenable for two years from the opening of the session in November—

One of R20 monthly.
" " R15 "
Six of R10 "

Reserved for Europeans and Eurasians—

One of R20 monthly.
" " R10 "

Every applicant for admission to the college must produce with his application for admission a medical certificate in the prescribed form signed within one month of its submission by a Civil Surgeon or by the Resident Medical Officer in charge of the college. No other form will be accepted. If the Report is unsatisfactory the application will be rejected.

Applicants wishing to obtain a certificate from the college Resident Medical Officer should present themselves at the Dispensary at the Civil Engineering College on Wednesdays and Saturdays between the hours of 7 and 10 A.M.

Special students include the sons of professional men (Engineers), owners of landed or mineral property, and others who wish to receive training in connection with engineering business or the development of the country and its resources.

They are not eligible for any posts guaranteed to regular students, for scholarships or prizes and shall in no case be transferred to the list of regular students.

Special students are admitted to the 1st, 2nd, 3rd or 4th years of the College Course at the discretion of the Principal, they shall have as nearly as possible the same educational qualifications as regular students and no limits of age are imposed.

Special students are required to submit a certificate of good character on admission and must apply before July 1st, their applications must be accompanied by:—

(1) A satisfactory proof of their educational attainments.
(2) A full statement as to why the candidate is seeking admission as a special student.
(3) A statement of the course of study the candidate wishes to follow.

Special students taking the regular course are required to appear at the ordinary College Examinations and if eligible at the University Examinations also.

The Tuition Fees for special students are payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (1st two years) R15 monthly.
Graduate Course in Engineering (last two years) R20 "

A candidate for admission as a special student is not required to submit a medical certificate.

For copies of the Rules of the Engineer Department, forms of application for admission and any other information apply to the undersigned.

B. HEATON,
Principal, Civil Engineering College, Sibpur.

SIBPUR,
The 16th April, 1909.

ERRATUM.

The 2nd May 1909.

On page 697 of the *Gazette of India*, dated 24th April 1909, *for* No. "756" *read* "567" in Notifications Nos. 66 and 67 of the 19th April 1909.

The 1st May 1909.

No. 77.—In exercise of the powers conferred by the Notification of the Government of India, No. 2256, dated 22nd December 1906, the Hon'ble the Chief Commissioner being satisfied that the town of Dera Ismail Khan is visited with an outbreak of a dangerous epidemic disease, *viz.*, plague, and that the ordinary provisions of the law are insufficient for the purpose of preventing its spread, is pleased under sub-section (1) of section 2 of the Epidemic Diseases Act III of 1897 to prescribe for the area of the Dera Ismail Khan Municipality the following temporary regulations for observance by all persons or class of persons to whom such regulations respectively relate:—

PART I.

REPORTING OF CASES AND DEATHS.

A.—In Municipal towns.

(1) Every person shall be responsible for making a special report of every case of or death from plague which occurs in circumstances in which, under the ordinary rules of the Municipality relating to the reporting of deaths, he is responsible for reporting any death. Such special report shall be made without delay upon the occurrence of the case or death, and it shall be made at the Office of the Health Officer or Medical Officer in charge of plague operations if there is one, and at the Municipal Office if there is no Health Officer or no such Medical Officer.

(2) Every report received under rule (1) shall be communicated immediately to the President or the Vice-President of the Municipality or to some member of the Municipal Committee specially appointed by the District Magistrate to receive reports under these rules.

(3) Every Municipal Commissioner in charge of a ward or any local area, every Muhalladar, and every servant of the Municipal Committee not being an enrolled Police Officer, shall report, to the President or the Vice-President or the member of the Municipality specially appointed by the District Magistrate to receive reports under these rules, the occurrence of all cases of, and deaths from, plague or of excessive mortality among rats coming to his knowledge; and the President, Vice-President or member shall give immediate information of such report to the Health Officer or the Medical Officer in charge of plague operations in the Municipality if there is one. After plague has established itself in the Municipality, the President, Vice-President or member may direct the discontinuance of reports under this rule.

(4) The Health Officer or Medical Officer on receiving a report under Rule (1) or Rule (3), or where there is no Health Officer or Medical Officer, the President, Vice-President or member on receiving a report under rule (2) or rule (3) shall send on immediate information of it to the District Magistrate and the Civil Surgeon of the district after plague has established itself in the Municipality, no such information shall be sent on to the District Magistrate if he directs that it need not be sent, and such information may be sent to the Civil Surgeon, if he so directs periodically instead of immediately.

B.—Of inoculated persons.

The person responsible for and making the report of any case of or death from plague shall also report whether the person attacked or deceased had been inoculated or not, and if inoculated, how long before his attack or death.

PART II.

COMPULSORY REMOVAL OF PLAGUE PATIENTS IN MUNICIPAL TOWNS.

(1) If any friendless or unattended person who is believed to be suffering from plague is found in any public place, he may be removed under the order of a Magistrate, and under arrangements to be made by the Municipal authorities, to a suitable place which the Municipality shall provide for voluntary isolation or for compulsory isolation under these rules.

(2) If a person who is believed to be suffering from plague has, though attended, no home and he and his friends are unable to provide accommodation for him, he may be removed as under Rule (1).

(3) If a case of plague occurs in a serai or other place used for the accommodation of travellers, the plague patient may be removed as under Rule (1) by a special order of the District Magistrate issued in exercise of his discretion. In passing an order under this rule, the District Magistrate shall have regard to the feelings of the inhabitants of the neighbourhood and to the degree in which the removal is likely to be efficacious in protecting the town from an outbreak. When a case of plague has occurred in a serai or other such place as aforesaid, and the plague patient has not been removed under this rule, the proprietor or lessee, and the person who for the time being is in charge of the serai or other such place, shall be responsible for affixing a notice and a distinguishing mark in a conspicuous place at the entrance of the serai or place for the purpose of intimating to

travellers that the place has been infected. This notice and mark shall be retained until the District Magistrate permits their removal. During any absence from the District head-quarters or for any other special temporary reason the District Magistrate may delegate to any Magistrate his powers under this rule, and in the case of a municipal town not situated at the head quarters of a district the power given under this rule to the District Magistrate may, in his absence from such Municipal town, be exercised by the Sub-Divisional officer or the Tahsildar.

(4) If a person suffering from plague is left unattended in a private house and if after notice given under arrangements to be made by the Municipal authorities no one is forthcoming to look after him, the District Magistrate may authorize his removal to a place of isolation as in rule (1). The District Magistrate's powers under this rule may be delegated by him, or exercised by the Sub-Divisional Officer or Tahsildar, as under rule (3).

(5) No person may be compulsorily removed to a place of isolation except under rules (1) to (4), and, except rules (1) and (2), no moribund person may be so removed.

PART III.

REMOVAL FROM UNINFECTED TOWN OR QUARTER OF TOWN OF PERSON COMING FROM A PLAGUE INFECTED AREA.

When any person who has recently been in an area which has been declared by the Local Government to be a plague-infected area, within ten days of leaving such area, takes up his abode, either temporarily or permanently, in a street or quarter of a town which is not infected with plague, the District Magistrate on receipt of the complaint or petition of any five or more adult inhabitants of such street or quarter presented within ten days of the arrival therein of the person whose presence is complained of, may, provided he is satisfied that their action is *bonâ fide* and represents the general opinion of the inhabitants of such street or quarter, issue an order in writing to such person to remove himself forthwith from such street or quarter to some other place where his presence will not be objected to, and shall inform him that in case of disobedience he will be liable to the penalty provided by section 188 of the Indian Penal Code. If such order is not obeyed the person to whom it is issued may be prosecuted on the complaint of any one of the inhabitants on whose initiative the said order was issued.

By order, etc.,

V. GABRIEL,

Secretary to the Chief Commissioner,
North-West Frontier Province.

NORTH-WEST FRONTIER PROVINCE—PUBLIC WORKS DEPARTMENT.

NOTIFICATION.

Peshawar, the 14th April 1909.

No. 212.—Whereas it appears to the Honourable the Agent to the Governor-General and Chief Commissioner, North-West Frontier Province, that land is required by Government for a public purpose, namely, for a bund 700 ft. long to share flood water between existing waterways up stream side of bridge at mile 1072-7-8.

It is hereby declared that the undermentioned land is required for the said purpose :—

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Simla, the 8th May, 1909.

No. 3.—The following Statutes and portions of Statutes are published for general information :—

POST OFFICE ACT, 1908.

[8 EDW. 7, CH. 48.]

(Sections 9, 36, 70 (3), 85 (1), 87, 93 and 94.)

AN ACT TO CONSOLIDATE ENACTMENTS RELATING TO THE POST OFFICE.

[21st December, 1908.]

BE it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :

* * * * * * * *

Official mark to be evidence of amount of postage.

9. The official mark of any sum on any postal packet as due to the Post Office, British, colonial, or foreign, in respect of that packet, shall in every British court, whether within or without the United Kingdom, be received as evidence of the liability of the packet to the sum so marked, and the sum shall be recoverable in any such court as postage due to His Majesty.

* * * * * * * *

Proof of Post Office regulations.

36. The Documentary Evidence Act, 1868, as extended by the Documentary Evidence Act, 1882, shall have effect—

(a) as if the Postmaster-General were mentioned in the first column, and any Secretary or Assistant Secretary of the Post Office were mentioned in the second column, of the schedule to the former Act; and

(b) as if a warrant of the Treasury under this Act were mentioned in the second section of the former Act as well as an order.

* * * * * * * *

Recovery of fines and forfeitures.

70. (3) Any fine or forfeiture incurred under this Act may be recovered in any place outside the United Kingdom before any court or magistrate before whom like fines or forfeitures are ordinarily recovered, or in such other manner as may be determined by any Act or ordinance having the force of law in that place.

* * * * * * * *

Power of legislature of British possession to establish posts.

85. The legislature of any British possession may by any enactment make such provision as may seem fit for the establishment, maintenance, and regulation, of posts within the possession, and for charging rates of postage, and for appropriating the revenue derived therefrom.

* * * * * * * *

Arrangements with British possessions and foreign countries as to money orders.

87. Where an arrangement is made with the Government of any British possession, or with the Government, or with any person on behalf, of a foreign State or British protectorate for the transmission of small sums through the Post Offices of the British Islands and the British possession, foreign State, or British protectorate by means of money orders of a like character to postal orders, the provisions of this Act with respect to postal orders shall, so far as is consistent with the tenor thereof, and subject to any modifications prescribed by Post Office regulations, apply in like manner as if an order issued in pursuance of the arrangement, whether by an officer of the Post Office, or by an officer of a British possession, foreign State, or British protectorate, were a postal order within the meaning of those provisions, and such portions of those provisions as enact punishments shall apply accordingly.

Provided that—

(a) Any Post Office regulations in relation to any money orders issued in pursuance of any such arrangement as aforesaid may differ from the regulations respecting any other money orders; and

(b) Any money orders issued in pursuance of any such arrangement as aforesaid may be of such amount not exceeding the maximum amount fixed by this Act for postal orders, and in such form and subject to such conditions respecting poundage, commission, the periods during which they are payable, and other matters, as may be prescribed by Post Office regulations.

Commencement of Act.

93. This Act shall come into operation on the first day of May one thousand nine hundred and nine.

Short Title.

94. This Act may be cited as the Post Office Act, 1908.

STATUTE LAW REVISION ACT, 1908.

[8 EDW. 7, CH. 49.]

AN ACT FOR FURTHER PROMOTING THE REVISION OF THE STATUTE LAW BY REPEALING ENACTMENTS WHICH HAVE CEASED TO BE IN FORCE OR HAVE BECOME UNNECESSARY.

[21st December, 1908.]

WHEREAS it is expedient that certain enactments which may be regarded as spent, or have ceased to be in force otherwise than by express specific repeal by Parliament, or have, by lapse of time or otherwise, become unnecessary, should be expressly and specifically repealed :

Be it therefore enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :—

Enactments in schedule repealed

1. The enactments described in the schedule to this Act are hereby repealed, subject to the provisions of this Act and subject to the exceptions and qualifications in the said schedule mentioned ; and every part of a title, preamble, or recital specified after the words " in part, namely," in connexion with an Act mentioned in the said schedule may be omitted from any revised edition of the statutes published by authority after the passing of this Act, and there may be added in the said edition such brief statement of the Acts, officers, persons, and things mentioned in the title, preamble, or recital, as may in consequence of such omission appear necessary :

Provided as follows :—

The repeal of any words or expressions of enactment described in the said schedule shall not affect the binding force, operation, or construction of any statute, or of any part of a statute, whether as respects the past or the future ;

and where any enactment not comprised in the said schedule has been repealed, confirmed, revived, or perpetuated by any enactment hereby repealed, such repeal, confirmation, revivor, or perpetuation shall not be affected by the repeal effected by this Act ;

and the repeal by this Act of any enactment or schedule shall not affect any enactment in which such enactment or schedule has been applied, incorporated, or referred to ;

nor shall such repeal of any enactment affect any right to any hereditary revenues of the Crown, or affect any charges thereupon or prevent any such enactment from being put in force for the collection of any such revenues, or otherwise in relation thereto ;

and this Act shall not affect the validity, invalidity, effect, or consequences of anything already done or suffered,—or any existing status or capacity,—or any right, title, obligation, or liability, already acquired, accrued, or incurred, or any remedy or proceeding in respect thereof,—or any release or discharge of or from any debt, penalty, obligation, liability, claim, or demand,—or any indemnity,—or the proof of any past act or thing ;

nor shall this Act affect any principle or rule of law or equity, or established jurisdiction, form or course of pleading, practice, or procedure, or the general or public nature of any statute, or any existing usage, franchise, liberty, custom, privilege, restriction, exemption, office, appointment, payment, allowance, emolument, or benefit, or any prospective right, notwithstanding that the same respectively may have been in any manner affirmed, recognised, or derived by, in, or from any enactment hereby repealed ;

nor shall this Act revive or restore any jurisdiction, office, duty, drawback, fee, payment, franchise, liberty, custom, liability, right, title, privilege, restriction, exemption, usage, practice, procedure, form of punishment, or other matter or thing not now existing or in force ;

and this Act shall not extend to repeal any enactment so far as the same may be in force in any part of His Majesty's dominions out of the United Kingdom, except where otherwise expressed in the said schedule.

Application of repealed enactments in local courts.

2. If and so far as any enactment repealed by this Act applies or may have been by Order in Council applied to the court of the country palatine of Lancaster or to any inferior court of civil jurisdiction, such enactment shall be construed as if it were contained in a local and personal Act specially relating to such court, and shall have effect accordingly.

Short title.

3. This Act may be cited as the Statute Law Revision Act, 1908.

APPELLATE JURISDICTION ACT, 1908.

[8 EDW. 7, CH. 51.]

AN ACT TO AMEND THE LAW WITH RESPECT TO THE JUDICIAL COMMITTEE OF THE PRIVY COUNCIL, AND THE COURT OF APPEAL IN ENGLAND.

[21st December, 1908.]

BE it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :—

Power to direct colonial judge to act as assessor of the Judicial Committee on hearing of appeals from the colony.

1.—(1) For the purpose of the hearing of any appeal to His Majesty in Council from any court in a British possession, His Majesty may, if he thinks fit, authorise any person who is or has been a judge of the court from which the appeal is made, or a judge of a court to which an appeal lies from the court from which the appeal is made, and whose services are for the time being available, to attend as an assessor of the Judicial Committee of the Privy Council on the hearing of the appeal.

(2) This section shall not apply to any British possession except the possessions specified in the schedule to this Act and any possession which may hereafter be added to that schedule by Order in Council.

Provision as to persons being or having been judges in British India.

2.—(1) If any person being or having been chief justice or judge of any High Court in British India is a member of His Majesty's Privy Council, he shall, if His Majesty so directs, be a member of the Judicial Committee of the Privy Council.

(2) The number of persons being members of the Judicial Committee by reason of this section shall not exceed two at any one time.

(3) In this section the expression "High Court in British India" means the High Court of Bengal, Madras, Bombay, or the North-Western Provinces or any other Court in British India which may for the time being be recognised for the purpose by Order in Council.

Extension of 58 & 59 Vict., c. 44.

3.—(1) Section one of the Judicial Committee Amendment Act, 1895, shall have effect as if the persons named therein included any person being or having been chief justice or a justice of the High Court of Australia or chief justice or judge of the Supreme Court of Newfoundland.

(2) The Schedule to the Judicial Committee Amendment Act, 1895, shall be read as if the Transvaal and the Orange River Colony were included therein as South African Colonies.

Resignation of members of the Judicial Committee.

4. Any member of the Judicial Committee of the Privy Council may resign his office as member of that Committee by giving notice of his resignation in writing to the Lord President of the Council.

Power to make continuing Order instead of annual Order directing appeals to be referred to Judicial Committee.

7 & 8 Vict., c. 69.

5. His Majesty may from time to time by Order in Council make a general Order directing that all appeals shall be referred to the Judicial Committee of the Privy Council until the Order is rescinded, and section nine of the Judicial Committee Act, 1844, shall have effect as if any such general Order for the time being in force were substituted in the first proviso to that section for the annual Order therein referred to, and the time for which the Order remains in force were substituted for the twelve months next after the making of the general Order. The expression "appeals" in this section means appeals on petitions presented to His Majesty in Council, and includes any complaints in the nature of appeals and any petitions in the matter of appeals.

Attendance of a judge of the High Court in the Court of Appeal.

6.—(1) The Lord Chancellor may request the attendance at any time of any judge of the High Court to sit as an additional judge at the sittings of the Court of Appeal, and any judge whose attendance is so requested shall attend accordingly.

38 & 39 Vict., c. 77.

39 & 40 Vict., c. 59.

(2) Every judge who attends in pursuance of this section shall be deemed to be an additional judge within the meaning of section four of the Supreme Court of Judicature Act, 1875, and section nineteen of the Appellate Jurisdiction Act, 1876 (which relate to the constitution of the Court of Appeal).

(3) The fifth paragraph of section four of the Supreme Court of Judicature Act, 1875, beginning with the words "The Lord Chancellor" and ending with the words "attend accordingly," is hereby repealed.

Short title and construction.

7.—(1) This Act may be cited as the Appellate Jurisdiction Act, 1908.

(2) The provisions of this Act shall be in addition to and shall not affect any other enactment for the appointment of or relating to members of the Judicial Committee.

EAST INDIA LOANS ACT, 1908.

[8 EDW. 7, CH. 54.]

AN ACT TO EMPOWER THE SECRETARY OF STATE IN COUNCIL OF INDIA TO RAISE MONEY IN THE UNITED KINGDOM FOR THE CONSTRUCTION, EXTENSION, AND EQUIPMENT OF RAILWAYS IN INDIA BY STATE AGENCY, OR THROUGH THE AGENCY OF COMPANIES, FOR THE CONSTRUCTION OF IRRIGATION WORKS; AND FOR OTHER PURPOSES.

[21st December, 1908.]

BE it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :

Short title.

1. This Act may be cited as the East India Loans Act, 1908.

Definition.

2. In this Act the expression "Secretary of State" means the Secretary of State in Council of India, unless the context otherwise requires.

Power to raise 20,000,000*l*. for constructing, extending and equipping railways in India for constructing irrigation works, and for other purposes.

3. It shall be lawful for the Secretary of State at any time or times to raise in the United Kingdom as and when necessary, by the creation and issue of capital stock, bonds, debentures, or bills, or partly by one of such modes and partly by another or others, any sum or sums of money not exceeding in the whole twenty millions of pounds sterling, to be applied—

(1) in the construction, extension, and equipment of railways in India by State agency, or through the agency of a company or companies under engagement with the Secretary of State ; or

(2) in the repayment of the principal of any bonds or debentures issued by any such company under the guarantee of the Secretary of State ; or

(3) in the discharge of any obligations incurred or arising by reason of the purchase by the Secretary of State of any railway constructed or worked in India by any such company or on the determination of the contract of any such company with the Secretary of State ;

(4) in the construction of irrigation works in India.

Power to raise 5,000,000*l*. for the general purposes of the Government of India.

4. It shall also be lawful for the Secretary of State at any time or times to raise in the United Kingdom, as and when necessary, in the manner mentioned in section three of this Act, any sum or sums of money not exceeding in the whole five millions of pounds sterling for the general purposes of the Government of India.

Power to apply securities created under this Act directly in exchange for or discharge of obligations.

5. The power given to the Secretary of State by this Act to raise moneys by means of stock or other securities created by him shall be deemed to include power to create such stock or other securities to be applied directly in exchange for or discharge of any of the bonds, debentures, or other obligations mentioned in sub-sections (2) and (3) of section three of this Act, in such manner as may be necessary for carrying out any arrangement made for the purpose :

Provided that, in calculating the amount of the moneys raised under this Act, the capital value of any obligations exchanged for or discharged by means of stock or other securities created under this section shall be included as if an equivalent amount of money had been raised under this Act.

Certain provisions of 56 & 57 Vict., c. 70, to apply.

6. Sections four to twelve inclusive, sections fourteen to seventeen inclusive, and section nineteen of the East India Loan Act, 1893, shall be incorporated with this Act.

Saving.

7. This Act shall not prejudice or affect any power of raising or borrowing money, or of creating or issuing securities, vested in the Secretary of State at the time of passing thereof.

4

COMPANIES (CONSOLIDATION) ACT, 1908.

[8 EDW. 7, CH. 69.]

(Sections 34-36, 274, 275, 295 and 296.)

AN ACT TO CONSOLIDATE THE COMPANIES ACT, 1862, AND THE ACTS AMENDING IT.

[21st December, 1908.]

BE it enacted by the King's most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :—

* * * * * * * *

PART II.

DISTRIBUTION AND REDUCTION OF SHARE CAPITAL, REGISTRATION OF UNLIMITED COMPANY AS LIMITED, AND UNLIMITED LIABILITY OF DIRECTORS.

Distribution of Share Capital.

* * * * * * * *

Power for company to keep colonial register.

34. (1) A company having a share capital, whose objects comprise the transaction of business in a colony, may, if so authorised by its articles, cause to be kept in any colony in which it transacts business a branch register of members resident in that colony (in this Act called a colonial register).

(2) The company shall give to the registrar of companies notice of the situation of the office where any colonial register is kept, and of any change in its situation, and of the discontinuance of the office in the event of its being discontinued.

(3) For the purpose of the provisions of this Act relating to colonial registers the term "colony" includes British India and the Commonwealth of Australia.

Regulations as to colonial register.

35. (1) A colonial register shall be deemed to be part of the company's register of members (in this and the next following section called the principal register).

(2) It shall be kept in the same manner in which the principal register is by this Act required to be kept, except that the advertisement before closing the register shall be inserted in some newspaper circulating in the district wherein the colonial register is kept, and that any competent court in the colony may exercise the same jurisdiction of rectifying the register as is under this Act exerciseable by the High Court, and that the offences of refusing inspection or copies of a colonial register, and of authorising or permitting the refusal may be prosecuted summarily before any tribunal in the colony having summary criminal jurisdiction.

(3) The company shall transmit to its registered office a copy of every entry in its colonial register as soon as may be after the entry is made ; and shall cause to be kept at its registered office, duly entered up from time to time, a duplicate of its colonial register, and the duplicate shall, for all the purposes of this Act, be deemed to be part of the principal register.

(4) Subject to the provisions of this section with respect to the duplicate register, the share registered in a colonial register shall be distinguished from the shares registered in the principal register, and no transaction with respect to any shares registered in a colonial register shall, during the continuance of that registration, be registered in any other register.

(5) The company may discontinue to keep any colonial register, and thereupon all entries in that register shall be transferred to some other colonial register kept by the company in the same colony, or to the principal register.

(6) Subject to the provisions of this Act, any company may, by its articles, make such provisions as it may think fit respecting the keeping of colonial registers.

Stamp duties in case of shares registered in colonial registers.

36. In relation to stamp duties the following provisions shall have effect :—

(a) An instrument of transfer of a share registered in a colonial register shall be deemed to be a transfer of property situate out of the United Kingdom, and,

unless executed in any part of the United Kingdom, shall be exempt from British stamp duty:

(*b*) On the death of a member registered in a colonial register, the shares of the deceased member shall if he died domiciled in the United Kingdom, but not otherwise, be deemed, so far as relates to British duties, to be part of his estate and effects situate in the United Kingdom for or in respect of which probate or letters of administration is or are to be granted, or whereof an inventory is to be exhibited and recorded, in like manner as if he were registered in the principal register.

PART IX.

COMPANIES ESTABLISHED OUTSIDE THE UNITED KINGDOM.

Requirements as to companies established outside the United Kingdom.

274. (1) Every company incorporated outside the United Kingdom which establishes a place of business within the United Kingdom shall within one month from the establishment of the place of business file with the registrar of companies—

(*a*) a certified copy of the charter, statutes, or memorandum and articles of the company, or other instrument constituting or defining the constitution of the company, and, if the instrument is not written in the English language, a certified translation thereof;

(*b*) a list of the directors of the company;

(*c*) the names and addresses of some one or more persons resident in the United Kingdom authorised to accept on behalf of the company service of process and any notices required to be served on the company;

and, in the event of any alteration being made in any such instrument or in the directors or in the names or addresses of any such persons as aforesaid, the company shall within the prescribed time file with the registrar a notice of the alteration.

(2) Any process or notice required to be served on the company shall be sufficiently served if addressed to any person whose name has been so filed as aforesaid and left at or sent by post to the address which has been so filed.

(3) Every company to which this section applies shall in every year file with the registrar such a statement in the form of a balance sheet as would, if it were a company formed and registered under this Act and having a share capital, be required under this Act to be included in the annual summary.

(4) Every company to which this section applies, and which uses the word "Limited" as part of its name, shall—

(*a*) in every prospectus inviting subscriptions for its shares or debentures in the United Kingdom state the country in which the company is incorporated; and

(*b*) conspicuously exhibit on every place where it carries on business in the United Kingdom the name of the company and the country in which the company is incorporated; and

(*c*) have the name of the company and of the country in which the company is incorporated mentioned in legible characters in all bill-heads and letter paper, and in all notices, advertisements, and other official publications of the company.

(5) If any company to which this section applies fails to comply with any of the requirements of this section the company, and every officer or agent of the company, shall be liable to a fine not exceeding fifty pounds, or, in the case of a continuing offence, five pounds for every day during which the default continues.

(6) For the purposes of this section—

The expression "certified" means certified in the prescribed manner to be a true copy or a correct translation;

The expression "place of business" includes a share transfer or share registration office;

The expression "director" includes any person occupying the position of director, by whatever name called; and

The expression " prospectus " means any prospectus, notice, circular, advertisement, or other invitation, offering to the public for subscription or purchase any shares or debentures of the company.

(7) There shall be paid to the registrar for registering any document required by this section to be filed with him a fee of five shillings or such smaller fee as may be prescribed.

Power of companies incorporated in British possessions to hold lands.

275. A company incorporated in a British possession which has filed with the registrar of companies the documents and particulars specified in paragraphs (a), (b) and (c) of sub-section (1) of the last foregoing section shall have the same power to hold lands in the United Kingdom as if it were a company incorporated under this Act.

* * * * * * * *

Short Title.

295. This Act may be cited as the Companies (Consolidation) Act, 1908.

Commencement of Act.

296. This Act shall come into operation on the first day of April, nineteen hundred and nine.

Forage Cap.—	
Great Coat and Cape.—	
Boots.—	
Spurs.—	
Gloves.—	

EVENING DRESS.

Coat.—	Same as for class I.
Waistcoat.—	
Trousers.—	

NOTE.—The helmet may be worn with full dress when the officer is exposed to the sun. Officers need not, unless they so desire, provide themselves with the great coat and cape described in these Regulations.

Hot weather uniform.

Patrol coat.—White cotton drill, stand and fall collar fastened with one hook and eye; 5 gilt medium buttons down front, 2 patch breast pockets with box plait, one inch wide in centre and pointed flaps with small gilt button in each. Sleeves plain with pointed cuffs 5 inches high at point and 2½ inches behind.

Rank will be designated by shoulder cords and number of buttons on cuffs as follows:—

Shoulder cords.—Of gold wire Lancer shoulder strap cord, on each shoulder.

For Lieutenant-Governors and Members of Council—

4 cords twisted.

" Class I.—2 cords twisted.

" " II.—2 " straight.

Buttons on cuffs.—For Lieutenant-Governors and Members of Council—4 buttons.

" Class I.—3 buttons.

" " II.—2 buttons.

Trousers.—White cotton drill over-alls with black leather foot straps.

Buttons.—Lieutenant-Governors and Members of Council will wear gilt mounted buttons with the Royal Arms, with supporters. The buttons to be worn with the other two classes of uniform should be gilt mounted bearing the Royal Arms without supporters, surmounted by the Imperial Crown.

Helmet, boots, spurs, forage cap, sword and sword belt.—As for undress. Lieutenant-Governors and Members of Council to wear the same as 1st class officers. Belt to be worn under the coat.

NOTE.—This uniform will be worn in substitution either for the full dress or undress uniform during such periods of the year as the local Government may prescribe. Local Governments are authorised to declare that officers need not provide themselves with it unless an occasion arises when they will require it. When the uniform is worn as full dress, medals and decorations will be worn. When it is worn as undress, ribbons only will be worn. No separate evening dress is prescribed for the hot weather.

Notification No. 2556-G., dated the 2nd October 1908, is hereby cancelled.

No. 144.—The following is published for general information:

No 826-R T., dated the 7th May 1909.

RESOLUTION—By the Railway Board.

Adoption on such portions of the East Indian Railway, and of the railways worked by it, as are situate in British territory, of the modification of rule 64, Chapter III, Part I of the General Rules of 1906 for working open lines of railway.

READ—

Section 47 of the Indian Railways Act, 1890 (IX of 1890).

Government of India, Department of Commerce and Industry, notification No 801, dated the 24th March 1905.

Railway Board's notification No. 183, dated the 8th September 1906, and Railway Board's circular No R. T. 80-A, dated the 8th September 1906.

Railway Board's notification No. 97, dated the 24th April 1907, and Railway Board's resolution No 35-R T., dated the 17th April 1907

Railway Board's notification No. 91, dated the 18th March 1909, and Railway Board's circular No 476-R T., dated the 12th March 1909.

READ ALSO—

Letter No. 764-T / 692 ?, dated the 22nd April 1909, from the Agent of the East Indian Railway Company.

RESOLUTION—The Agent of the East Indian Railway Company has recommended the adoption on the East Indian Railway system of the modification, promulgated under Railway Board's circular No. 476-R. T., dated the 12th March 1909, and published under their notification No. 91, dated the 18th March 1909, of Rule 64, Chapter III, Part I of the General Rules of 1906 for working open lines of railway in British India, which rules were sanctioned for adoption on such portions of the East Indian Railway and of the railways worked by it, as are situate in British territory, in Railway Board's resolution No. 35-R. T., dated the 17th April 1907, read in the preamble above.

2. In exercise of the powers conferred by the notification of the Government of India in the Department of Commerce and Industry, No. 801, dated the 24th March 1905, read in the preamble above, the Railway Board sanction, under section 47, sub-sections (1) and (4), of the Indian Railways Act, 1890 (IX of 1890), the adoption of the modification of the said General Rules, cited in paragraph 1 above, on such portions of the East Indian Railway and of the railways worked by it as are situate in British territory.

ORDER.—Ordered, that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3), of the Indian Railways Act, 1890 (IX of 1890); also that the modification cited in paragraph 1 above, which has already been published in the *Gazette of India*, be kept open for inspection at railway stations as directed by sub-section (6) of the same section, and that this resolution be communicated to the Senior Government Inspector of Railways, Circle No. 2, Calcutta, and to the Agent of the East Indian Railway Company, for information.

TRANSLATION OF DECREES RELATING TO THE OFFER BY THE BELGIAN GOVERNMENT OF A PRIZE FOR THE BEST ESSAY ON AERIAL NAVIGATION.

Simla, the 11th May 1909.

The following papers are published for general information:

Minister
of Sciences and Arts.

Administration
of the superior instruction
of the Sciences and Letters.

No. 613.

LEOPOLD II.

KING OF BELGIUM.

To all whom these Presents shall concern, GREETING.

RELATIVE to Our Decree, dated 14th December 1874, regarding the prize of 25,000 francs instituted by Us for the best piece of work done during every four years on some definite subjects on the proposal of Our Minister of Sciences and Arts, We have decreed and do engage :—

Article 1.—The prize to be awarded in 1911 (mixed competitions) will be given to the best piece of work answering the following question :—

" To explain the progress of aerial navigation and the best means to encourage it ".

Article 2.—The intended documents should reach the Minister of Sciences and Arts before the 1st March 1911.

Article 3.—Our Minister of Arts is charged with the execution of the present decree.

Given at Laeken,
The 22nd January 1909.

In the name of the King.
Minister of the Sciences and Arts :

B. Descamps.

LEOPOLD.

ANNUAL PRIZE OF 25,000 FCS. INSTITUTED BY HIS MAJESTY THE KING.

ARRANGEMENTS REGARDING THE CONDITIONS OF THE COMPETITION.

(*Extracts from the royal decree, dated 14th December 1874.*)

Article 1.—An annual prize of 25,000 francs is instituted for the best piece of work on some subjects selected by the King.

A

Article 2.—The competition will extend over a period of four years, it will be ruled that, during three consecutive years, the works written or printed in Belgium, and produced by Belgian authors, will alone be admitted.

Article 3.—

Article 4.—A new edition of a printed work shall not be admitted to the competition, especially if it has been greatly changed or subjected to many alterations.

Article 5.—Whatever may be the time of the publication of the first portion of a work it shall be admitted to compete if the last portion has been prepared during the period in which the competition is open.

Article 6.—The judging in the competition is assigned to a jury of seven members nominated by the King. For the competition to which foreigners will be invited to participate, however, the jury will comprise three Belgian members and four foreign members of different nationalities. A Belgian member shall be President of the Jury.

Article 7.—When the jury shall have studied the works submitted for their examination, they shall decide if among these works there is one which merits a prize to the exclusion of all others.

The question shall be decided by vote without division.

It shall positively be decided by a majority of four votes. No member of the faculty will be allowed to abstain from voting.

Article 8.—The works of members of the jury will be excluded from the competition.

Article 9.—No work can obtain the prize instituted by the present decree as well as the quinquennial prizes established by the royal decrees of the 1st December 1854 and of the 6th July 1851.

Article 10.—The manuscript work which shall have obtained the prize will be published during the course of the year in which it obtained such prize.

The works shall be entirely finished and sent to the Minister of Sciences and Arts in the time specified in the decrees fixing the subjects of the competition. They should be written in French or Flemish. For the mixed competitions to which foreigners are admitted the works should be written in any of the following languages :—French, Flemish, English, German, Italian, Spanish and Portuguese. The conditions of article 9 above is equally applicable to the quinquennial prize as well as the decennial prize instituted by the royal decree of the 20th December 1882.

H. A. STUART,
Secretary to the Government of India.

H. A. STUART,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 13th May 1909, based on the Indian Daily Weather Reports of the period.

The most important feature in the weather was the storm which at the close of the previous week had advanced to the neighbourhood of Mangalore in its march across the peninsula from the Bay. It crossed the coast into the Arabian Sea on the morning of the 8th and then apparently followed a north-westerly course towards the Mekran coast; finally it ceased to affect the Indian coast stations on the 12th. It gave very rough seas on the Malabar and Kathiawar coasts, and moderate to heavy rain in the southwest of the peninsula. There was very little rain in other parts of the country until quite the close of the week when rainfall increased in northeast India and Burma, the recrudescence of rainfall in the latter area being partly at least associated with an advance of humid winds from the south. As is often the case the advance was accompanied by a depression which formed in the Andaman Sea on the 10th and 11th; by the 13th the disturbance had travelled to a position west of Diamond Island.

The highest temperature recorded in India during the week was 115° at Jacobabad, and was 4½° above the normal.

Burma.—Weather was dry in the central districts, but rain fell at almost all stations in Lower Burma and in the north of the province. Skies were clear or only lightly clouded on most days, but at the close of the week cloud increased considerably. Weather was warmer than usual in Upper Burma.

Northeast India, including Orissa.—Very little rainfall occurred outside of Assam. Skies were lightly to moderately clouded in Eastern Bengal and Assam and were almost clear elsewhere. Temperature was in excess in the dry region, especially in the daytime.

The United Provinces, Central India and the Central Provinces.—The only stations where rain fell were Akola, Seoni, Nagpur and Raipur. Skies were cloudy in the Central Provinces and were clear in Central India and the United Provinces. The nights were cooler than usual in the last area, but in the rest of the division temperature was nearly normal.

Northwest India.—The storm in the Arabian Sea caused some cloud in Gujarat and lower Sind and cloud was occasionally reported from the extreme north, but skies were clear over the remainder of the division. Temperature was in general defect during the first four days of the week; on the remaining days it was normal or in excess.

The Peninsula.—Most stations received rain except in south Hyderabad and on the north Madras coast. The rainfall was very heavy in Malabar, Mangalore reporting a fall of 14 inches on the 8th. Skies were lightly to heavily clouded. Temperature was in defect on the first four days of the week, and approximately normal on the last three.

F

The following summarises the chief rainfall amounts as reported at 8 hrs. each day:—

May 7th. Cherra Poonjee 10·91", Chitaldroog 2·48", Mysore 2·85", Mangalore 5·77", Mercara 6·50", Ootacamund 3·47", Coimbatore 2·25", Calicut 9·81", Cochin 2·98" and Trivandrum 3·25".

„ 8th. Seoni 1·12", Mangalore 14·21", Mercara 6·85" and Calicut 4·55".

„ 11th. Bassein 2·69".

„ 12th. Poona 1·65".

„ 13th. Rangoon 2·73", Diamond Island 2·06", Ahmednagar 1·95" and Trichinopoly 2·85".

The rainfall of the week was in large excess in Malabar, Mysore, the Konkân, the Bombay Deccan and at the Stations in the Bay, and was normal in Lower Burma and Assam, but in Eastern Bengal and the province of Bengal it was considerably in defect.

DIVISION.	Rainfall data for week ending on 13th May 1909.			Rainfall data from 30th April 1909 to 31st May 1909.			Seasonal percentage departure from normal.	
	Average actual rainfall in inches.	Average normal rainfall in inches.	Excess or defect in inches.	Average actual rainfall of season to date in inches.	Average normal rainfall in inches.	Excess or defect in inches.	This week.	Last week.

GEORGE C. SIMPSON,
for Director-General of Observatories.

R. W. CARLYLE,
Secretary to the Government of India.

SIMLA;
The 13th May 1909.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 8th May 1909.

Burma.—Slight rain fell during the week in most places. Clearing of hill sides for rice cultivation continues. Reaping of spring rice and harvesting of miscellaneous crops are approaching completion. Cultivation of early monsoon crops is progressing in parts of Upper Burma. Standing crops are in good condition. The price of unhusked rice has risen considerably in one district and slightly in five others; and has fallen slightly in two districts. It continues high in Arakan and is normal elsewhere.

Eastern Bengal and Assam.—More rain fell during the week in most districts though the quantity was generally moderate. In Noakhali and Lakhimpur crops were damaged by the excessive rainfall; but more rain is wanted in parts of the Rajshahi division. The weather is usually warm. The general condition is very favourable to the prospects of rice and jute. The prospects of tea have improved except in Lakhimpur. The average prices of common rice are substantially unchanged. The numbers on test relief works are:—Dinajpur 2,706; Bogra 1,800; and Rangpur 862; total 5,368. Cattle disease is prevalent in several districts.

Bengal.—There were some scattered showers in parts of the Presidency division and in Midnapore, Howrah, Darjeeling, Balasore, Angul and Cooch Behar. More rain is still wanted in Midnapore, Howrah, Jessore and Darbhanga. Preparation of lands for next season's crops is being pushed on and the sowing of jute, paddy and other autumn crops continues. Lac is being collected in Palamau. Sugarcane and vegetables are doing well. Early sown *makai* in Patna is reported to be withering for want of rain. The price of common rice has risen in Midnapore, Murshidabad, Patna, Gaya, Shahabad, Bhagalpur and Hazaribagh; has fallen in Jessore, Balasore and Manbhum; and has been stationary in the remaining districts. Cattle disease is reported from several districts. Insufficiency of fodder and water is still reported from parts of Murshidabad, Jessore and Gaya. 1,833 persons attended test works in Muzaffarpur and Bhagalpur and 40,540 persons were on famine relief works in Darbhanga. Gratuitous relief was given to 34,326 persons in Muzaffarpur, Darbhanga, Bhagalpur, Purnea, Puri and Palamau.

The weekly report on the famine and scarcity is as follows:—District Darbhanga—Workers exclusive of dependants 40,540; on gratuitous relief—(*a*) dependants of workers 12,151; (*b*) poorhouses or kitchens 2,841 and (*c*) village doles or other relief 13,408; total gratuitously relieved 28,400. Grand total on relief 68,940. The rain has passed off. Numbers on relief works are rising again. A further increase is probable until the monsoon breaks. Workers are in fair condition. Cases of emaciation have been noticed among new applicants for relief. Prices 12 seers per rupee.

United Provinces.—The week was rainless. Threshing and winnowing of spring crops, irrigation of sugarcane and extra crops and preparation of fields for autumn sowings are in progress in places. Autumn sowings have commenced. The condition of standing crops is good or fair except in Chakrata and Jalaun. Supplies of fodder and water are adequate. Cattle disease is reported from twenty-three districts but in general the condition of agricultural stock is good. Prices are rising in twelve districts; are falling in four; and are stationary or fluctuating elsewhere.

The weekly report on the famine and scarcity is as follows:—The condition of the labouring and cultivating classes is generally good. Crime is below normal in Basti and normal elsewhere. Scarcity has been declared in parts of Garhwal from the 1st May but the

distress is slight at present. Figures for civil works and gratuitous relief which have been started there are not yet available. Two civil and six aided works and one unaided work are in progress and one poorhouse is open in Bijaigarh; one civil and two aided works in Kera Mangraur; and one departmental work and eight aided works in Basti. The poorhouse in Basti was closed from the 6th May. Seven civil works are in progress and one poorhouse is open in Bahraich. Aided works are in progress in Jaunpur and test works in Kheri. There is a slight increase in the numbers on relief in Bijaigarh, Kheri and Bahraich and a slight decrease in Kera Mangraur and Basti. The numbers on Government relief are :—on relief works 14,150; on aided works 11,605; on test works 409; on gratuitous relief 8,452; in poorhouses 149; on private works 472; total on relief 35,237. Prices :—Bijaigarh 15; Kera Mangraur 15; Basti 16; Garhwal 7; and Bahraich 14 seers per rupee.

Punjab.—Rainfall *nil*. Spring crops are being harvested Their condition and expected yield on irrigated areas are generally good to average and on unirrigated areas average to below average. Sowings of extra spring and autumn crops continue. Prices are high but have fallen slightly in some districts. Cattle are generally in good condition. Fodder is sufficient except in Delhi, Lyallpur and parts of Gurgaon, Mianwali and Jhang.

North-West Frontier Province.—No rain fell during the week except 10 cents in Kohat. The condition of standing crops is generally good on irrigated areas and from average to below the average on unirrigated lands. Harvesting of spring crops is in progress. The outturn is expected to be average. Sowings of extra spring and autumn crops continue. The water supply in canals is sufficient. Irrigation from the Paharpur canal in the Dera Ismail Khan district continues. Fodder is sufficient. Cattle are generally in good condition except that cattle disease is reported in some villages. The public health is good. Prices are fluctuating. Prices :—wheat 8⅛ to 11¼; gram 13 1/16 to 15, maize 11½ to 17¾; and *bajra* 13 to 14½ seers per rupee.

Jammu.—Rainfall *nil*. Prices are fluctuating. Wheat sells from 7 to 14 and maize from 12 to 23 seers per rupee. The condition of standing crops is fair. Fodder is sufficient. Harvesting of spring crops is in progress.

Kashmir.—The weather is bright and is becoming warm. The condition of spring crops is average. Ploughing for autumn crops is going on. There is no disease among cattle. Fodder is average. Prices are almost stationary.

Rajputana.—General rain was received during the week. The falls in Bikaner ranged from 5 to 125 cents. Harvesting of spring crops continues in a few places. Land is being prepared for autumn sowings. The outturn of the recent harvest is fair to good. Cattle are doing well generally except that cattle disease is still reported in parts of Mewar and Bharatpur. The fodder and water supply is sufficient. Prices have risen in Shahpura, Jhalawar, Karauli and Ajmer; they have risen slightly in Bharatpur; and have fallen in Bikaner.

Central India.—Slight rain fell during the week in Gwalior and *nil* elsewhere. Harvesting of spring crops is progressing in Gwalior, Bhopal, Baghelkhand and Bundelkhand. Lands are being prepared for autumn crops except in Baghelkhand. Agricultural stock are satisfactory except for some cattle disease in Bhopal, Baghelkhand, Bundelkhand and Bhopawar. Prices are again rising in Gwalior and Indore and are high but stationary elsewhere.

Central Provinces.—The weather continues warm and cloudy with high winds. Rain fell in twelve districts, the quantity registered ranging from 2 cents in Chanda and Drug to 2½ inches in Nagpur. In Nagpur it was accompanied by hail-storms. Threshing and winnowing of spring crops are in many districts not quite completed but land is being prepared for autumn sowings all over the Provinces. Double-cropped rice in the Sironcha tahsil of the Chanda district is doing well and so are garden crops where they are sown.

Cattle are in good condition. Fodder and water are adequate except that water is getting scarce in a few villages in Nimar. Prices :—wheat remained stationary in fifteen districts; gram in sixteen; rice in eighteen; and *juar* in twenty. Wheat and rice in Drug and gram, rice and *juar* in Chanda fell by 1½ to 2½ seers per rupee. In Mandla gram sells dearer by 1½ seers. Fluctuations elsewhere are unimportant. The number of weavers on relief was 569.

Feudatory States.—Light showers not exceeding 75 cents were received in five States. The rain caused considerable damage to grain on threshing floors in Kawardha. Construction of field embankments and preparation of land for the sowing of the next season's crops are in progress everywhere. Fodder and water are sufficient. Prices :—rice in Kawardha fell by over a seer and wheat and gram in Korea by 2 and 3 seers per rupee respectively. Wheat in Sarangarh rose by 2 seers and wheat and rice in Sakti by 1 seer. Prices were steady elsewhere.

Bombay.—The rainfall during the week was heavy in parts of Kanara; moderate in parts of Dharwar, and slight in parts of Ratnagiri, the Deccan, Bijapur, Belgaum and Kolhapur. Standing crops are generally in fair to good condition. Harvesting of spring crops has been completed in Karachi, Kaira, Broach, West Khandesh and Satara; it is nearly over in Sukkur, the Upper Sind Frontier, Kanara and Nasik; and continues in parts of Larkana and Baroda. Threshing has nearly been completed in Colaba, West Khandesh and Mahi Kantha and continues in parts of Sukkur, Larkana, Hyderabad, the Upper Sind Frontier, Broach and East Khandesh. Cotton-picking continues in parts of Ahmedabad, Kaira, Broach, Baroda, Cutch and Rewa Kantha. Preparation of lands for the next season is generally in progress. The supply of fodder is adequate except in parts of West Khandesh, Nasik, Belgaum and Kolhapur. Agricultural stock are sufficient except in parts of Ahmednagar, Poona, Sholapur, Satara and Cutch and are generally in good condition. The supply of drinking water is adequate except in parts of Kanara, West Khandesh, Nasik, Bijapur and Belgaum. Water for irrigation is sufficient except in parts of Surat, West Khandesh, Nasik, Poona, Bijapur and Belgaum. Prices of food-grains have fallen slightly in Kanara and Poona; have risen slightly in Larkana; and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 32 to 40 per cent; in Gujarat 25 to 49 per cent; in the Konkan 3 to 25 per cent; in the Deccan 17 to 38 per cent; and in the Karnatak 39 to 44 per cent less than the normal. Stocks of grain are adequate. Emigration on a small scale is progressing in Bijapur. Labourers get sufficient employment. The cultivating and labouring classes are generally in fair condition. The numbers on relief in Bijapur are :—workers 812; on gratuitous relief 14.

Hyderabad.—The rainfall during the week was 5 cents. Showers were received in the Gulbarga and Raichur districts and in some isolated tracts. The highest fall was 1 inch 45 cents in the Diglur taluka of the Nander district. Wherever the rain was heavy the late rice crop has been damaged. The crop is however fair to good throughout and is being harvested everywhere. Lands are under preparation in all districts for next season's sowings. Cattle disease and fodder scarcity are reported in eight and nine talukas respectively. Prices :—wheat 6¾; coarse rice 6¾; and *juar* 14 seers per rupee. White *juar* is selling in Hyderabad City at 12 seers per rupee. Yellow *juar* is not available. The highest price is 9 seers in the Kushtagi taluka of the Raichur district and the Paloncha taluka of the Warangal district and the lowest 22 seers in the Nilanga taluka of the Bidar district.

Mysore.—Good rain fell during the week all over the State. Prices of food grains are generally steady and markets are well supplied. Ploughing operations are in progress. Prospects of the season have improved considerably by the recent rainfall. Cattle are generally healthy except that cattle disease continues in some localities. Water is available. Difficulty is still experienced in procuring fodder.

Coorg.—The rainfall during the week was 18 inches 78 cents. Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was very heavy in Malabar, South Canara, the Nilgiris, Madras, Chingleput and North Arcot; heavy in Trichinopoly, South Arcot, Salem and Coimbatore; *nil* in Godavari and Kistna; light to fair in Ganjam, Guntur, Vizagapatam and Kurnool; and good elsewhere. Irrigation supplies are insufficient in parts of all districts except Godavari, Chingleput, South Arcot, Coimbatore, Trichinopoly, Tinnevelly, Malabar, South Canara and the Nilgiris. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair and have been much benefited by the recent rain. Harvests continue with outturn poor to normal. Pasture is sufficient except in parts of the Circars, the Deccan, Nellore, Coimbatore, Malabar and South Canara. Fodder is scanty in parts of Vizagapatam, Guntur, Anantapur and Cuddapah. The condition of cattle is generally good. The price of rice is stationary in fourteen districts; has fallen in six; and has risen in three. The prices of millets have fluctuated as follows:—*Ragi* is stationary in nine districts, has fallen in nine; and has risen in three. *Cholam* is stationary in six districts; has fallen in four; and has risen in four. *Cumbu* is stationary in eight districts; has fallen in five; and has risen in two. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is good and employment is procurable. Grain stocks are generally sufficient.

FAMINE.

Statement showing the number of persons on relief works and in receipt of gratuitous relief in the Districts and Native States affected by famine or scarcity in India—(District details).

NOTE.—The figures are compiled from returns obtained from Local Governments and Political Officers, and give the corrected details of the totals reported in the telegraphic famine reports published weekly in the Supplement to the *Gazette of India*.

Non-labouring children and other dependants of relief workers are classed under relief works when distinguished in the local returns from persons gratuitously relieved in poor-houses or at their houses. Weavers relieved in their own trade are shown under "village doles or other relief"

C. F. ANDERSON, *Capt., R.E.*,
for Secretary, Railway Board.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MAY 15, 1909.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller General, etc.

GAZETTE OF INDIA.

NOTICE

The 18th March 1909.

From the 3rd April next till further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published at Simla. After the 27th March all notifications and other matter intended for publication in the *Gazette* should be addressed to the Officiating Publisher at Simla

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901 :—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette*, and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*."

J. P. HEWETT,

Secretary to the Government of India.

J. J. MEIKLE,

Publisher, *Gazette of India*.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

INVENTIONS and DESIGNS.

Calcutta, the 13th May 1909.

NOTIFICATIONS.

No. 1887 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 10th May 1909 :—

No. 221 of 1909.—Egbert Von Lepel, engineer, of 9 Traunsteinerstrasse, Charlottenberg, Berlin W., in the German Empire. *Improved apparatus for producing rapid electric oscillations.*

No. 222 of 1909.—Robert Arnolds Becher, civil engineer, of Morungao, Goa, Portuguese India. *Improvements in locks for railway safety signal and other appliances.*

No. 223 of 1909.—A. Subramanian Servai, of Authikadu-Thekkur, Tirupatoor Taluq, Madura District, Madras Presidency. *A waterlift.*

No. 224 of 1909.—K. E. Chalthan Sahib, ruby merchant, 75 Chinna Chetti street, Trichinopoly Fort. *An improved machine for polishing, boring and cutting rubies, diamonds and other precious stones.*

No. 225 of 1909.—Ramji Dass Bhargava, journalist, Lucknow. *Urdu and Persian Nastalique types to be called Shamsi type.*

No. 226 of 1909.—Seneca George Milton, oil producer, of Franklin, county of Vanango, state of Pennsylvania, United States of America. *Improvements in pulling machines.*

No. 227 of 1909.—Henry Dudley Gill, engineer, of Byculla Ironworks, Bombay. *An improved vapouriser for oil engines.*

No. 228 of 1909.—Francis Thomas Partridge, tea garden assistant, of the Lower Ging Tea Garden, Darjeeling. *A brake in combination with a carrier for the safe, easy and controlable transport of goods along a rope or wire cable from a high to a low level.*

No. 229 of 1909.—Francis Touzel LeFeuvre, works manager, Carriage and Wagon Department, East Indian Railway, Lillooah, Bengal. *An improved type of vacuum cylinder piston rod with detachable cross head and the device for fixing it thereby to piston of cylinder for the prevention of theft of piston rod.*

No. 230 of 1909.—Richard à Court Beadon, Superintendent of Police, United Provinces, India. *The Beadon improved return spring bolt.*

No. 231 of 1909.—Mederic Brihaye, manufacturer, of Glageon (Nord), in the Republic of France. *Method of treating leather for the manufacture of boots and shoes and other articles.*

No. 232 of 1909.—Albert Edwards Greene, engineer, of 6028 Jackson Park Avenue, Chicago, state of Illinois, United States of America. *Process of refining metals and alloys.*

No. 233 of 1909.—Alexander Ralph Ogden, contractor, of Fairlawn, Waratah street, Rushcutter Bay, Sydney, New South Wales, formerly of the Arundel Hotel, Arundel street, Strand, in the city of Westminster, England, but at present of 17 and 19 Bishops road, Cambridge Heath, in the county of Middlesex, England, and Richard Wingfield Stuart, gentleman, formerly of 7 Granville Mansions, Shepherds Bush, London, but at present of 8 and 9 Colville Square, Bayswater, in the county of Middlesex, England. *Improvements in and connected with apparatus of the ejector type for producing a vacuum.*

No. 234 of 1909.—Edward Halford Strange, technical research chemist, and Charles Albert Pim, chemical engineer, both of 7 Staple Inn, in the county of London, England. *Improvements in apparatus for the manufacture of thin sheets, or foil, or strips, or ribbons, of lead, or other metal, or alloy.*

No. 1888 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Madras, Bombay, and Burma, and the Director of the Department of Land Records and Agriculture, United Provinces of Agra and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 3 P.M., at the Secretary's office, 2, Bankshall street, Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 385 of 1908.—Dossabhoy Maneckji Wadia, cotton mill manager, residing at No. 2 Warden road, Malabar Hill, Bombay. *Improvements in cotton carding engines.* (Specification filed 6 April 1909.)

No. 444 of 1908.—Bhim Chandra Chatterjee, electrical engineer to the Government of Nepal, Nepal. *The Annada electrolier switch for turning on one, two, three or more lamps or groups of lamps at will in an electric circuit.* (Specification filed 3 May 1909.)

No. 484 of 1908.—Walter Reuben Preston, a Director of J. Stone and Company, Limited, engineers, of Deptford, in the county of Kent, and Reginald Godfrey Peckitt, of Thornton le Moor, in the county of York. *Improvements in and connected with railway and other trucks or vehicles for the transport of timber and similar goods.* (Specification filed 30 April 1909.)

No. 524 of 1908.—Mark Maxwell Lindsley, works manager, North Western Railway Karachi. *An improved form of brake truss for railway and other vehicles.* (Specification filed 2 April 1909.)

No. 129 of 1909.—Ernest Wright, inventor, of St. Mary's Cottage, Waxwell lane, Pinner, Middlesex, England. *Improvements in machines for decorticating the fibrous leaves and stems of plants.* (Specification filed 29 April 1909.)

No. 164 of 1909.—John Henry Messenger, gentleman, of 36 Beaumount street, Portland Place, London, England. *Improvements in or connected with pneumatic tyres for wheels of road vehicles.* (Specification filed 6 May 1909.)

No. 1889 P.—THE fees prescribed in the fourth schedule to the Inventions and Designs Act of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 18 of 1899.—Gustav Graf-von Geldern-Egmond. *Improvements in the manufacture of explosives.* (From 10 May 1909 to 10 May 1910.)

No. 381 of 1900.—The British Westinghouse Electric and Manufacturing Company, Limited. *Improvements in means for protecting electrical apparatus from abrupt changes in static potential.* (From 10 May 1909 to 10 May 1900.)

No. 125 of 1902.—John Andrews and Sydney Andrews. *Improvements in conditioning or improving the quality of grain or recently ground flour, semolina or the like.* (From 7 July 1909 to 7 July 1910.)

No. 343 of 1902.—Oliver Joseph Lodge, Alexander Muirhead and Edward Ernest Robinson. *Receivers for wireless telegraphy.* (From 27 May 1909 to 27 May 1910.)

No. 413 of 1902.—The Cotton Seed Company, Limited. *Improvements in or relating to the treatment of cotton seed.* (From 12 May 1909 to 12 May 1910.)

No. 414 of 1902.—The Cotton Seed Company, Limited. *Improvements in or relating to machines for cracking and disintegrating cotton seed.* (From 12 May 1909 to 12 May 1910.)

No. 452 of 1903.—George Westinghouse and Louis Minturn Aspinwall. *Improvements in controlling systems for electric motors.* (From 24 May 1909 to 24 May 1910.)

No. 453 of 1903.—George Westinghouse. *Improvements in controlling systems for electric motors.* (From 24 May 1909 to 24 May 1910.)

No. 147 of 1904.—Grove Johnson and Percy Richard Hare. *Improvements relating to the fermentation of liquids.* (From 23 May 1909 to 23 May 1910.)

No. 33 of 1905.—Budd John Jones. *Improvements in apparatus for supporting overhead conductors for electrically propelled vehicles.* (From 17 May 1909 to 17 May 1910.)

No. 34 of 1905.—Budd John Jones. *Improvements in apparatus for supplying current to electrically propelled vehicles.* (From 17 May 1909 to 17 May 1910.)

No. 251 of 1905.—Hubert Vincent Blake. *Improvements in hydraulic rams.* (From 9 December 1909 to 9 December 1910.)

No. 1890 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act of 1888, the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2), of the said Act the exclusive privilege of making, selling and using the said inventions in British India, and of authorizing others so to do, has ceased:—

No. 241 of 1904.—Jean Nicolaidi. *Improvements in the manufacture of cattle food.* (Specification filed 1 February 1905.)

No. 252 of 1904.—Harrie Malcolm Maxwell. *Improvements in horse bridles.* (Specification filed 1 February 1905.)

No. 288 of 1904.—Stephen Tulloch. *Improvements in scotch blocks for use on railways and the like.* (Specification filed 3 February 1905.)

NOTICES.

All communications relating to applications for leave to file specifications and for registration of designs under the Inventions and Designs Act, 1888 (V of 1888), or in continuation of such applications, should be addressed to the Patents Secretary, 2, Bankshall Street, Calcutta.

The Office of the Secretary under the Inventions and Designs Act, 1888, will in future be open for the transaction of business from 11 A.M. to 3 P.M. on all days, except Sundays and gazetted holidays.

The Government of India are advised that, as trade marks are not "designs" withir the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, an applicants are warned that they must be responsible for any delay in cashing cheques.

Cheques and money orders will only be accepted if made payable *at Calcutta* to th Secretary under the Inventions and Designs Act.

Copies of the weekly notifications, and of the quarterly lists, of applications and speci- fications filed in the Secretary's Office are now on sale to the public at one anna and eigh annas a copy, respectively. Consolidated indexes for 1905, 1906, 1907 and 1908, entitle "Inventions and Designs," are also on sale, price one rupee each. They contain a chrono- logical list, subject-matter and name indexes of exclusive privileges for inventions, whic have been obtained or applied for in the year, together with lists of designs applications.

All applications made under the Inventions and Designs Act, V of 1888, will from thi date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified : or if th 10th day is a holiday, till the evening of the office day next following.

At the time of delivering or sending an application for leave to file a specification, th applicant shall cause a duplicate copy of the application to be delivered or sent therewit to the Secretary.

The Inventions and Designs Act (V of 1888), with the notifications and rules issue under its provisions and the notices of the office of Inventions and Designs, to which i added an explanatory memorandum for the guidance of persons applying for protection o Inventions and Designs. A new and revised edition is now on sale. Royal 8vo volume paper cover, price one rupee or 1*s*. 6*d*. To be had of the Superintendent, Governmen Printing, 8, Hastings Street, Calcutta, or of the Superintendent, Patents Office, 2, Bankshal Street, Calcutta.

A copy of the Bill, which it is proposed to introduce to amend the law relating t the protection of Inventions and Designs, together with a statement of objects and reason and notes on clauses, has been placed in the visitors' room of the Patents Office fo inspection. Copies, price one rupee, may be obtained on application to the Superintendent Patents Office, 2, Bankshall Street, Calcutta.

J. C. SHIELDS,

Offg. Secretary under the Inventions and Designs Act, V of 1888.

THE CIVIL ENGINEERING COLLEGE, SIBPUR.

ENGINEER DEPARTMENT.

SESSION 1909-10.

The following course is offered:—A 4-year course leading to the Bachelor of Engineering degree of the Calcutta University in the Civil Engineering branch.

The session begins on November 1st, 1909.

Two classes of students will be admitted:—

(1) *Regular students* who must reside at the college (number to be admitted limited to 32).

(2) *Special students* (for whom 8 vacancies are reserved).

Regular students are students from Bengal, Burma and Eastern Bengal and Assam who intend to go through the Regular course of study leading to the degree of Bachelor of Engineering. Candidates with the following qualifications are eligible for admission as regular students:—

(1) B. Sc.'s } must be below 23 years of age on January 1st, 1909.
(2) B. A.'s }
(3) Intermediate in Science.
(4) Intermediate in Arts (with Physics or Chemistry).
(5) First Arts.

Candidates in (3), (4) and (5) must be under 21 years of age on January 1st, 1909.

The age statement as given on the Calcutta University Entrance Examination certificate alone is accepted.

The selection of candidates for admission is entrusted to the Principal, who will take into account the following factors.

The standard by which the applicant has qualified, the subjects in which he has qualified, his position on the list of merit, and his age.

Candidates for admission must apply to the Principal on the prescribed form not later than June 15th, they shall produce with their application a detailed statement obtained from the Registrar of the Calcutta University showing the marks obtained by them at the B.Sc., Intermediate Science or other Examination upon which they base their claim for admission. The application must be accompanied by a registration fee of one rupee which will not be returned.

The tuition fee for regular students is payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (first two years) R10 monthly.

Graduate Course in Engineering (last two years) R15 monthly.

Scholarships:—

The following scholarships are offered, their award will be made after the admissions are completed, they will not be tenable by students who hold other Government or University scholarships:—

Open scholarships tenable for two years from the opening of the session in November—

One of R20 monthly.
" " R15 "
Six of R10 "

Reserved for Europeans and Eurasians—

One of R20 monthly.
" " R10 "

Every applicant for admission to the college must produce with his application for admission a medical certificate in the prescribed form signed within one month of its submission by a Civil Surgeon or by the Resident Medical Officer in charge of the college. No other form will be accepted. If the Report is unsatisfactory the application will be rejected.

Applicants wishing to obtain a certificate from the college Resident Medical Officer should present themselves at the Dispensary at the Civil Engineering College on Wednesdays and Saturdays between the hours of 7 and 10 A.M.

Special students include the sons of professional men (Engineers), owners of landed or mineral property, and others who wish to receive training in connection with engineering business or the development of the country and its resources.

They are not eligible for any posts guaranteed to regular students, for scholarships or prizes and shall in no case be transferred to the list of regular students.

Special students are admitted to the 1st, 2nd, 3rd or 4th years of the College Course at the discretion of the Principal, they shall have as nearly as possible the same educational qualifications as regular students and no limits of age are imposed.

Special students are required to submit a certificate of good character on admission and must apply before July 1st, their applications must be accompanied by:—

(1) A satisfactory proof of their educational attainments.
(2) A full statement as to why the candidate is seeking admission as a special student.
(3) A statement of the course of study the candidate wishes to follow.

Special students taking the regular course are required to appear at the ordinary College Examinations and if eligible at the University Examinations also.

The Tuition Fees for special students are payable for 12 months each session at the following rates:—

Intermediate Course in Engineering (1st two years) R15 monthly.

Graduate Course in Engineering (last two years) R20 "

A candidate for admission as a special student is not required to submit a medical certificate.

For copies of the Rules of the Engineer Department, forms of application for admission and any other information apply to the undersigned.

B. HEATON,
Principal, Civil Engineering College, Sibpur.

THE HONOURABLE THE CHIEF COMMISSIONER OF AJMER-MERWARA.

NOTIFICATIONS.

Abu, the 4th May 1909.

No. 646.—The following draft of rules which the Hon'ble the Chief Commissioner proposes to make in exercise of the powers conferred on him by section 2 of the Poisons Act, 1904 (Act I of 1904), is hereby published for general information.

Any objection or suggestion which may be received from any person within six weeks of the date of issue of this Notification will receive consideration.

Draft rules under section 2 of the Poisons Act, 1904, regulating the possession for sale by retail and the sale by retail of certain poisons specified in the said rules within the limits of all Municipalities and Cantonments in Ajmer-Merwara.

RULES.

1. The following substances are specified as poisons for the purposes of section 2, sub-section (3), of the Poisons Act, 1904 (I of 1904), namely :—

(1) Aconite (Mahoor Mitha Telia);

(2) Nux Vomica (Kuchla);

(3) Perchloride of mercury (corrosive sublimate) (Raskapur);

(4) Cyanide of potash (Vernacular name not known), and

(5) Stramonium (Dhatura).

The expressions "sell" and "sale" mean respectively "sell by retail" and "sale by retail."

2. No person shall—

(1) possess for sale by retail; or

(2) sell by retail

any poison except under a license granted in this behalf by the District Magistrate and for Cantonment areas by the Cantonment Magistrate.

3. The grant of a license to any applicant shall be at the discretion of the District Magistrate and in the case of a Cantonment, the Cantonment Magistrate, whose decision thereon shall be final. The license shall be granted for the calendar year.

4. A fee of R1 shall be charged for each annual license granted under rule 3, and shall be paid before the grant of such license. The license shall be inscribed on a non-judicial impressed stamped paper of the appropriate value: Provided that no fee shall be charged to any person already licensed to possess white arsenic for sale under the rules framed under section 4 of the Act.

5. A license shall terminate on the death of the license holder.

6. The District Magistrate and in the case of a Cantonment, the Cantonment Magistrate may for any sufficient cause revoke or cancel any license granted under rule 3.

7. A license holder shall effect every sale of poison in person.

8. A license holder shall not sell any poison to any person,

(*a*) who is not personally known to him or identified to his satisfaction, or

(*b*) who appears to him to be under the age of eighteen years, or

(*c*) who does not appear to him to be in full possession of his faculties, or

(*d*) who is a wandering mendicant.

9. A license holder shall not sell any poison in any quantity exceeding one ounce at any one time and to any one person.

10. (1) A license holder shall maintain a register in which he shall enter all sales of poison.

(2) The following particulars shall be entered in respect of each sale in the register maintained under sub-rule (1), namely:—

(*a*) serial number,

(*b*) name of poison,

(*c*) quantity sold,

(*d*) date of sale,

(*e*) name of purchaser,

(*f*) address of purchaser,

(*g*) purpose for which the poison is stated to be required,

(*h*) signature of purchaser (or where the purchaser is illiterate, his thumb mark) and

(*i*) signature of vendor.

11. A license holder shall maintain in respect of each poison a stock register which shall contain the following particulars, namely:—

(*a*) serial number,

(*b*) date,

(*c*) amount received,

(*d*) name and address of person from whom received,

(*e*) amount sold,

(*f*) balance in stock, and

(*g*) remarks.

12. Any Magistrate, any Police Officer of or above the rank of Sub-Inspector, any revenue officer of or above the rank of Naib Tahsildar, or any Medical Officer of or above the rank of Hospital Assistant may at any time visit and inspect the premises of a license holder where poison is kept for sale and may inspect all poisons found therein and the registers maintained under rules 10 and 11.

13. (1) All poisons shall be kept in securely closed receptacles of glass, tin or earthenware.

(2) All such receptacles shall be kept in a separate locked almirah or box and shall be marked in paint with the name of the poison contained therein.

(3) Every almirah or box and each receptacle within such almirah or box shall have the word "poison" in English and vernacular painted upon it in red letters.

14. (1) When any poison is sold it shall be securely packed in a packet.

(2) Every packet sold shall be labelled by the vendor with a red label bearing the name of the poison in the vernacular and the number and date of the entry in the register of sales.

15. When a license holder also deals in poisons wholesale, the stock maintained for sale as defined in these rules shall be kept entirely distinct from any stock maintained for the purpose of wholesale transactions.

No. 647.—The following draft of rules which the Hon'ble the Chief Commissioner proposes to make in exercise of the powers conferred on him by section 4 of the Poisons Act 1904 (Act I of 1904), is hereby published for general information.

Any objection or suggestion which may be received from any person within six weeks of the date of issue of this Notification will receive consideration

---

Draft rules under section 4 of the Poisons Act, 1904, for regulating the possession for sale by retail and the sale by retail of white arsenic in Ajmer-Merwara.

RULES.

1. For the purposes of these rules the expressions "sell" and "sale" mean respectively "sell by retail" and "sale by retail".

2. No person shall

(1) possess white arsenic for sale by retail, or

(2) sell white arsenic by retail

except under a license granted in this behalf by the District Magistrate and for Cantonment areas by the Cantonment Magistrate.

3. The grant of a license to any applicant shall be at the discretion of the District Magistrate and in the case of a Cantonment the Cantonment Magistrate whose decision thereon shall be final. The license shall be granted for the calendar year.

4. A fee of R1 shall be charged for each annual license granted under rule 3 and shall be paid before the grant of such license. The license shall be inscribed on a non-judicial impressed stamped paper of the appropriate value: Provided that no fee shall be charged to any person already licensed to possess poisons for sale under the rules framed under section 2 of the Act.

5. A license shall terminate on the death of the license holder.

6. The District Magistrate and in the case of a Cantonment the Cantonment Magistrate may for any sufficient cause revoke or cancel any license granted under rule 3.

7. A license holder shall effect every sale of white arsenic in person.

8. A license holder shall not sell any white arsenic to any person

(*a*) who is not personally known to him or identified to his satisfaction, or

(*b*) who appears to him to be under the age of eighteen years, or

(*c*) who does not appear to him to be in full possession of his faculties, or

(*d*) who is a wandering mendicant.

9. A license holder shall not sell white arsenic in any quantity exceeding one ounce at any one time and to any one person.

10. (1) A license holder shall maintain a register in which he shall enter all sales of white arsenic.

(2) The following particulars shall be entered in respect of each sale in the register maintained under sub-rule (1) namely:—

(*a*) serial number,

(*b*) name of poison,

(*c*) quantity sold,

(*d*) date of sale,

(*e*) name of purchaser,

(*f*) address of purchaser,

(*g*) purpose for which the white arsenic is stated to be required,

(*h*) signature of purchaser (or where the purchaser is illiterate, his thumb mark), and

(*i*) signature of vendor.

11. A license holder shall maintain a stock register which shall contain the following particulars, namely :—

(*a*) serial number,

(*b*) date,

(*c*) amount received,

(*d*) name and address of person from whom received,

(*e*) amount sold,

(*f*) balance in stock, and

(*g*) remarks.

12. Any Magistrate, any police officer of or above the rank of Sub-Inspector, any revenue officer of or above the rank of Naib Tahsildar or any medical officer of or above the rank of Hospital Assistant may at any time visit and inspect the premises of a license holder where white arsenic is kept for sale and may inspect the stock fonnd therein and the registers.

13. (1) White arsenic shall be kept in securely closed receptacles of glass, tin or earthenware.

(2) All such receptacles shall be kept in a separate locked almirah or box and shall be marked in paint with the name of the poison contained therein.

(3) Every almirah or box and each receptacle within such almirah or box shall have the word "poison" in English and Vernacular painted upon it in red letters.

14. (1) When any white arsenic is sold, it shall be securely packed in a packet.

(2) Every packet sold shall be labelled by the vendor with a red label bearing the name of the poison in the vernacular and the number and date of the entry in the register of sales.

15. A license holder shall not sell powdered white arsenic to any person unless the same is before the sale thereof mixed with soot, indigo or prussian blue in the proportion of half an ounce of soot, indigo or prussian blue at least to one pound of the white arsenic and so in proportion for any greater or less quantity.

16. When a license holder also deals in white arsenic wholesale, the stock maintained for sale as defined in these[rules shall be kept entirely distinct from any stock maintained for the purpose of wholesale transaction.

The 5th May 1909.

No. 147-*A1-II*.—In accordance with the provisions of section 25 of the Ajmer Municipalities Regulation (V of 1886), the Hon'ble the Chief Commissioner of Ajmer-Merwara is pleased to notify the appointments of—
